Samples of the MS62256A are now available with production quantities available in first quarter of 1991. These devices are offered for commercial (0 degrees Centigrade-70 degress Centigrade) temperature applications, and are packaged in the JEDEC standard 28 pin 600mil and 300mil plastic DIP and the space-saving 300mil small outline surface mount package.

The 25 nano second standard power devices are priced at $26.30 for PDIP and $31.50 for SOJ/SOIC in quantities of 100.

MOSEL is a manufacturer of state of the art specialty memory products including Latch RAMs, FIFOs, Cache Data RAMs, Dual Port SRAMs, Voice ROMs, Video Color Palette devices in addition to high-speed bytewide SRAMs and industrial temperature SRAMs. With sales up 75 percent in 1989, the company is one of the fastest growing in the semiconductor industry. MOSEL is located at 914 West Maude Ave., Sunnyvale, Calif.

WILMINGTON, CALIF. (OCT. 25) BUSINESS WIRE - Vector Aeromotive Corp. (NASDAQ:VCAR) announced Thursday that VECTOR No. 002 is scheduled to be delivered during the last week of October 1990.

To date, four VECTOR W8 TwinTurbo supercars have been completed, with No. 001 having been delivered in September. Two of the completed VECTORs have been delivered to Vector's marketing and sales division to support its ongoing international marketing and selling efforts.

According to Robert Braner, director of sales, marketing and dealer development for the company, ''We have scheduled additional deliveries for November, and a total of ten completed and delivered W8 supercars by the end of 1990.

''This schedule is in keeping with the advancement that has been made to date in refining the production process, as well as the progress that Vector has made in testing requirements for emissions certification.

''To date, the company has made substantial progress towards completing required EPA testing for 50-state certification of the VECTOR W8. The certification process is expected to be successfully completed prior to year-end, providing Vector with the ability to meet delivery schedules, both in the United States and offshore.''

The American-made VECTOR supercar competes in the same price category with the 3 liter Ferrari F40 and 5 liter Lamborghini Diablo. The VECTOR, designed and engineered to ''mil-spec'' quality standards, has an aerospace manufactured monocoque chassis that is epoxy bonded and riveted with aircraft fasteners.

The powerplant is a Vector designed TwinTurbo 6 liter V-8 engine that generates over 600 horsepower, based on confirmed dynamometer tests.

Vector Aeromotive Corp. is headquartered in Wilmington, Calif., near the Port of Los Angeles.

SUNNYVALE, CALIF. (OCT. 25) BUSINESS WIRE - SGS-THOMSON Microelectronics' subsidiary Innovative Silicon Technology (IST) and ZyMOS Corp. Thursday announced the signing of a product exchange and development agreement.

IST, with its expertise in digital semicustom products, and ZyMOS, a leading supplier of PC chip sets, graphics and ASIC SuperCell solutions, will jointly market and design semi-standard components for the personal computer marketplace.

As a part of the agreement, ZyMOS will contribute its system core logic chip set System 90/SX, POACH 51 VGA Controller, system design expertise and SuperCell library.

IST will contribute its 1.2- and 0.8-micron semicustom families which will soon include functions derived from the ZyMOS SuperCells, and its access to high-volume cost-effective manufacturing through parent company SGS-THOMSON.

The initial emphasis of the agreement is on the marketing and manufacturing of the existing ZyMOS System 90/SX and POACH 51 VGA Controller for which IST will have manufacturing and marketing rights. Future generation devices, jointly developed by the two companies, will be added over the next 12 months which will complete the product offering for PC manufacturers.

''We are convinced that this partnership will be very successful,'' said Piero Martinotti, chief executive officer of IST. ''Our benchmark activity has proven the System 90/SX to be one of the best performing 386SX AT chip sets available, and is a prime example of the high-level performance products we will be able to jointly offer at a very competitive price.''

LOS ANGELES (OCT. 25) BUSINESS WIRE - Sterling Bancorporation (OTC) (not to be confused with the NYSE company of the same name) Thursday announced earnings of $1,367,482, or 94 cents per share, for the first nine months ended Sept. 30, 1990.

Earnings for the nine months of 1989 were $968,442, or 72 cents per share. Earnings per share data is adjusted for the 5 percent stock dividend paid Nov. 16, 1989 and the 5 percent stock dividend to be paid Nov. 15, 1990.

The company attributed the earnings increase to higher loan volume outstanding at its bank and finance company subsidiaries and to higher service fee income, mortgage originations and sales at its mortgage company subsidiary. The company noted that its mortgage servicing portfolio was $617 million at Sept. 30, 1990 compared with $278 million on the same date in 1989.

For the third quarter, earnings amounted to $418,619, or 27 cents per share, compared with $306,100, or 23 cents per share, for the third quarter of 1989.

Sterling Bancorporation, based in Los Angeles, is the holding company for Sterling Bank, a specialist commercial bank, BSC Mortgage Corp., and Sterling Business Credit Inc., a commercial finance company.

DALLAS/FORT WORTH AIRPORT (OCT. 25) BUSINESS WIRE - American Airlines

announced Thursday that it had sent the following letter to Thomas G. Plaskett chairman of Pan American World Airways, with a copy to each member of the Pan American Board:

'' We have seen the press releases issued on October 23 by Pan Am and United, announcing Pan Am's intention to sell to United various assets, including five route authorities between U.S. cities and Heathrow Airport. As I have told you many times in the past, most recently in our telephone conversation of Monday, October 22, we have for some time been interested in acquiring a number of Pan Am's international route authorities, including those to the United Kingdom.

''We would welcome an opportunity to make an offer to acquire the United Kingdom route authorities and believe, if given the opportunity thus far denied us, we would propose terms substantially better than those described in the press releases. Alternatively, we would welcome an opportunity to enter into an arrangement to acquire a package of assets that would provide Pan Am with superior economic benefits than that offered by United.

''We believe that the fiduciary duties owed by you and your fellow directors to maximize value for Pan Am's stockholders and creditors dictate that you afford us an opportunity to make a competing offer for these assets.

''While we think there may be competitive and regulatory concerns for United in the arrangement proposed with Pan Am, if United is permitted to proceed, certainly American would be.

''We look forward to hearing from you so that we may pursue a transaction superior to the proposed United transaction.''

MADISON, Wis. (OCT. 25) BUSINESS WIRE - LUNAR Corp. (NASDAQ:LUNR) Thursday announced that net income for the quarter ended Sept. 30, 1990, increased 9 percent to $685,000, or 14 cents per share, compared with net income of $558,000, or 12 cents per share, for the first quarter of fiscal 1990.

First quarter revenues increased 9 percent to $3,506,000, from $3,210,000 in the first quarter of fiscal 1990.

LUNAR completed its initial public offering of 1,250,000 shares of common stock at $12.00 per share on August 21. Of the 1,250,000 shares sold, 1,000,000 were sold by the company and 250,000 by shareholders.

$2,800,000 of the company proceeds were used to repay long term debt and the balance was invested in short term securities to be used for general corporate purposes.

LUNAR develops products for the diagnosis, monitoring and treatment of osteoporosis and other metabolic bone diseases. The company develops and sells bone densitometers, which are specialized scanning systems used to aid in the diagnosis of bone disease by measuring the desity of bone.

The company is developing a drug, one alpha-D2, for the treatment of osteoporosis and is currently conducting Phase I clinical trials on osteoporotic patients.

#90298b0118 10/25/1990 ~Business Wire

GREENVILLE, SC (OCT. 25) BUSINESS WIRE - Despite slow growth predictions by analysts, significant growth opportunities for the world's tiremakers in the 1990s can be found in the burgeoning democracies of Eastern Europe, the Soviet embrace of ''glasnost'' and China's search for Western products and technology.

That's the industry forecast offered by Thomas F. Will, Goodyear's manager of management information, at a two-day tire industry conference here sponsored by Clemson University. Will has been a tire industry forecaster and planner at Goodyear for 10 years. North America, the largest tire market in the world

through the 1980s, will continue as the dominant marketplace for tire manufacturers in the l990s, Will said.

But a reunified Germany and newly opened Eastern European markets head Will's list of new growth opportunities in the 90s for the world's tiremakers.

The historic democratization of Eastern Europe adds roughly 10 percent to the world tire market -- an estimated 78 million units, Will said.

This region of 440 million people with only 30 million cars and 15 million trucks will have vehicle manufacturers and suppliers spending the next decade developing the new marketplace, he projected.

The Soviet Union has the largest single market and most advanced tire industry in the region, Will said, but its desire for Western technology could mean business for those willing to sell or license tire technology.

Poland has the largest market outside Russia, and Czechoslovakia (Barum) and Hungary (Taurus) have already been active in the United States tire industry.

Perhaps the most dramatic untapped tire market is in China, where one billion people are awaiting modern transportation. China will fall further behind the rest of the world if it does not make a substantial automotive effort in the 1990s, Will said.

''The tire industry is mature in some regions, but is just now unfolding in others,'' Will said. ''The 1990s offer an expanded challenge for manufacturers and suppliers.''

The 1980s produced significant growth within the tire industry, with worldwide units growing from 541 million in 1980 to 709 million by decade's end.

North America, Europe and Asia/Africa all experienced solid growth rates during the 1980s, but tire market growth in Latin America was lackluster, according to Will.

World vehicle production -- the lifeblood of the tire industry -- posted modest gains during the 1980s, with the Asia/Africa region the growth leader, Will said.

#90298b0128 10/25/1990 ~Business Wire
REDWOOD SHORES, CA (OCT. 25) BUSINESS WIRE - Oracle Corporation, today announced the immediate availability of ORACLE Version 6.0 with the

transaction processing option for Stratus VOS fault-tolerant computer systems. This is the first product released as a result of Oracle's recent technology-sharing and cooperative marketing agreement with Stratus Computer, Inc.

Oracle also announced plans to market application development tools, such as Oracle FinancialsTM, and networking products with Stratus in the coming months.

These Oracle products will be available on the full range of Stratus XA 2000 Continuous Processing Systems, including the recently announced Stratus mainframes.

ORACLE Version 6.0 with the transaction processing option is the high-performance, on-line transaction processing (OLTP) version of the ORACLE relational database management system (RDBMS). Stratus has marketed and sold earlier versions of ORACLE for Stratus VOS since 1985; however, Version 6.0 is the first product jointly developed, marketed, sold and supported by the two companies.

The high-performance, multi-server characteristics of ORACLE Version 6.0, combined with Stratus' multi-processing architecture, will support high-volume transactions. The linear scalability of ORACLE's multi-server architecture and Stratus' multi-processor architecture together provide users with an easy growth path to higher levels of performance and support increased numbers of users. Stratus users can increase RDBMS throughput linearly by simply adding processors to their Stratus system. This incremental system growth enables users to meet higher performance and higher transaction-volume requirements cost effectively.

Stratus' broad range of connectivity options complement ORACLE's portable, open and distributed architecture. Through SQL Net, ORACLE Version 6.0 on Stratus can interface with applications on other vendors' systems across asynchronous, TCP/IP, DECnet, and NetBIOS connections. Stratus systems connected to each other by the StrataLINK local-area networking and StrataNET wide-area networking products are also supported by SQL Net.

ORACLE software is priced based on the Stratus machine size, starting at $7,000 including training. Production shipments of the ORACLE RDBMS, SQL Forms, SQL Plus, SQL Net for StrataLINK and StrataNET, and precompilers for C, COBOL, FORTRAN, PASCAL and PL/I are available now. Planned for release later this year are SQL ReportWriterTM and the PL/SQL language, and other SQL Net products for TCP/IP, NetBIOS, asynchronous and DECnet protocols. These products will be sold and supported by both Oracle and Stratus.

Oracle Corporation, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education and support services, in 92 countries around the world. Oracle is a publicly held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

ORACLE, SQL Forms, SQL PLUS and SQL Net are registered trademarks of Oracle Corporation. SQL ReportWriter is a trademark of Oracle Corporation. Stratus, Continuous Processing, VOS and StrataNET are registered trademarks, and XA and StrataLINK are trademarks of Stratus Computer, Inc. DECnet is a trademark of Digital Equipment Corp. UNIX is a trademark of AT&T. NetBIOS is a trademark of International Business Machines Corp.

SANTA ANA, CALIF. (OCT. 25) BUSINESS WIRE - Novadyne Computer Systems Inc. Thursday broke ground for a new multi-million-dollar Orange County headquarters facility planned for completion in a year.

The groundbreaking was highlighted by the symbolic start-up of heavy earth moving equipment and turning of the first shovel of earth by Novadyne President and Chief Executive Officer Bert J. Novak. McDonnell Douglas Realty Co. President Robert R. Young had earlier introduced guests and other speakers to celebrate the start-up of the new facility.

The heavily landscaped, futuristic-appearing structure is located at St. Andrew Place and Lyon in the city of Santa Ana.

When completed in October 1991, the new 170,000-square-feet, $25 million facility will house approximately 400 Novadyne headquarters-based employees comprising the administrative, sales and marketing, logistics and repair, finance, MIS, technical support and training organizations.

The new three-story design facility, located in the McDonnell Douglas Center, was designed by the Irvine division of Sverdrup Corp., a St. Louis-based corporation. Sverdrup will also be the engineers and general contractor of

this project. Sverdrup is one the largest engineering, design/building contractors in the United States.

For over 30 years they have designed and constructed facilities for McDonnell Douglas.

Combining energy efficiency with aesthetic design, the new facility will feature employee amenities such as employee showers and dining facilities.

McDonnell Douglas Realty Co. (MDRC), with headquarters in Irvine, is the real estate development subsidiary of McDonnell Douglas Corp., (NYSE:MD) the nation's second largest defense contractor. MDRC is involved in projects throughout the United States including such California locations as Santa Ana, Cypress, Huntington Beach, Long Beach and Irvine.

Novadyne Computer Systems' products and services are marketed nationwide to companies in all facets of commerce including aerospace, retailing, transportation, distribution, communications, health care, educational organizations and federal and local government agencies.

     #90298b0142 10/25/1990 ~Business Wire
BEVERLY HILLS, CA (OCT. 25) BUSINESS WIRE - Litton Industries Inc. announced Thursday that Roland O. Peterson will step down as president and chief operating officer of the company effective Nov. 1, 1990.

The Litton board of directors Thursday elected Alton J. Brann, a Litton senior vice president and group executive, as his successor.

The change was made because Peterson, who has been with the company for 30 years and will be 59 in January 1991, decided to retire early in a few years. Until his retirement he will take over responsibility as senior vice president for Litton's Components and Industrial Products activities, as well as the chief scientist office, replacing Charles Bridge who retired last month.

Peterson said: ''Taking this step toward retirement has allowed the board to select my successor early, which will result in better management continuity. At the same time it enables me to continue in an operations-oriented executive capacity and as the chief scientist who coordinates technology across the corporation.''

Peterson also decided not to stand for reelection to Litton's board. The board, upon recommendation of its nominating committee, has proposed Brann for election to a corporate directorship at the annual shareholders' meeting in

December 1990.

Brann joined the company in 1973 at the Guidance & Control Systems division, one of Litton's major operations. He was named president of the division in 1983 and elected a corporate vice president in 1984.

He was appointed group executive for Navigation, Guidance & Control Systems in 1986. He was elected a corporate senior vice president in 1987 and assumed responsibility for the company's Components and Industrial Products business early in 1988.

Brann, 48, is a native of Portland, Maine, and earned a bachelor's degree in mathematics from the University of Massachusetts at Boston.

He is a member of numerous professional associations, including the Institute of Electrical and Electronics Engineers, Optical Society of America and Institute of Navigation.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

SAN FRANCISCO (OCT. 25) BUSINESS WIRE - EurekaBank Thursday reported earnings of $5.4 million on assets of $1.8 billion for the quarter ending Spet. 30, 1990, up from $5.3 million for the like period in 1989.

The company's net worth reached $120 million with the earnings figure generating an annualized return on average assets of 1.24 percent. For the first nine months of 1990, EurekaBank has reported earnings of $16.4 million.

As ranked by capital strength, the Northern California-based federal savings bank maintained its position among the nation's leading financial institutions by posting capital ratios substantially above requirements for the thrift industry. EurekaBank's risk-based capital ratio stands at 13.57 percent, with its tangible capital ratio reaching 6.74 percent.

''We are delighted with our operating results, as well as with the sustained strength of our capital position,'' said Byron A. Scordelis, president and chief executive officer.

''Despite an increasingly challenging economic environment, we have been able to demonstrate sustained earnings by maintaining a focus on expense control, ensuring credit quality and continuing to seek improved ways of serving our

clients.''

With headquarters in Foster City, EurekaBank serves more than 100,000 households through its Greater Bay Area network of 35 branches.

#90298b0173 10/25/1990 ~Business Wire

NEWPORT BEACH, CALIF. (OCT. 25) BUSINESS WIRE - MIP Properties Inc. (ASE:MIP) an equity-oriented real estate investment trust advised by Koll Realty Advisors, Thursday reported financial results for the three and nine months ended Sept. 30, 1990.

Consolidated funds available for distribution were 10 and 42 cents per share for the three months and nine months ended Sept. 30, 1990, respectively, compared with 20 and 55 cents per share for the same periods in 1989.

The decreases in consolidated funds available for distribution were primarily the result of lower net interest income relating to non-earning loans, the planned lower loan volume and lower fee income.

Consolidated net income (loss) for the three months and nine months ended Sept 30, 1990, was ($64,100) and $2,001,200, or (1 cent) and 22 cents per share, respectively, compared with $1,488,400 and $3,732,500, or 17 cents and 41 cents per share, for the same periods in 1989.

The decrease in net income for the periods ended Sept. 30, 1990, was primarily the result of lower net interest income relating to non-earning loans, lower loan volume and reduced combined income from real estate operations and equity in joint venture operations.

On July 27, 1990, the company increased its ownership to 100 percent in Northbay Industrial Park Phase I. This attractive 120,480-square-foot industrial building is located in Petaluma and is substantially leased by Sola Optical USA Inc.

Results of operations of this property and Miramar D, along with the consolidated joint ventures Campus at Carlsbad and Casas Lindas are included in income from real estate operations, net.

Also, in the third quarter of 1990, results of operations from two additional equity in joint venture investments, 580 Marketplace and San Dimas Corporate Park, were included in equity in joint venture income (loss).

The Park in the Valley loan of $12.4 million, secured by 23.5 acres of land in

San Diego, continues to be classified as a non-earning loan. At the end of the third quarter, the borrowers filed for protection under Chapter 11 of the bankruptcy code.

#90298b0175 10/25/1990 ~Business Wire

CINCINNATI (OCT. 25) BUSINESS WIRE - Cincinnati Microwave Inc. (NASDAQ/NMS:CNMW) announced Thursday its results for the quarter ended Sept. 30.

Net sales for the quarter ended Sept. 30, were $15.5 million compared to $13.0 million for the like period a year ago. The company reported a net loss of $1.3 million or 13 cents per share for the third quarter of 1990 as compared to a net loss of $974,000 or 9 cents per share for the third quarter of 1989.

For the nine months ended Sept. 30, 1990, Cincinnati Microwave Inc. reported a net loss of $3.8 million or 37 cents per share on net sales of $51.9 million. During the same period one year earlier, the net loss was $746,000 or 7 cents per share on net sales of $41.3 million.

The net sales comparisons for the quarters ending Sept. 30, 1990 and 1989, reflect increased revenues in the company's radar warning receiver division as well as in its Guardian Technologies Inc. (Guardian) and Cincinnati Microwave Communications Inc. (CMC) subsidiaries. These increases were partially offset by a decrease in revenues generated by the company's contract manufacturing subsidiary, CMI Technologies Inc. (CMIT).

The results of the third quarter of 1990 include an increase in earnings in the radar warning receiver division and reduced operating losses incurred by Guardian vs. the like period one year earlier. Offsetting these increases were the loss incurred by CMIT in the quarter (vs. earnings for the like quarter in the prior year) and an increase in operating losses incurred by CMC. The result was a greater loss in the third quarter of 1990 than that for the like period in the prior year.

Cincinnati Microwave Inc. and its subsidiaries manufacture and market a variety of electronic products. Cincinnati Microwave Inc.'s common shares are traded in the NASDAQ National Market System under the symbol CNMW. For additional information please contact Shareholder Relations, Cincinnati Microwave Inc., One Microwave Plaza, Cincinnati, Ohio, 45249, 513/489-5400.

#90298b0212 10/25/1990 ~Business Wire
LOS ANGELES (OCT. 25) BUSINESS WIRE - Dandees Enterprises Inc. (NASDAQ:DANY-Z BoSE:DND) Thursday announced that in response to the recently enacted California statute restricting use of the term ''biodegradable,'' the company is in the process of modifying its labeling for its disposable diapers so that it will be in compliance as of the effective date -- Dec. 31, 1990.

''The new California statute prohibits any claim that a product is 'biodegradable' unless it has the proven capability to decompose in a landfill WITHIN ONE YEAR through natural biological processes.''

''We strongly believe that our product is environmentally beneficial and based on documented test data, has the capacity to break down in 3-5 years in active landfill. But, we do not presently have available to us the necessary verification to establish that our diapers are biodegradable within the new statutory definition,'' said Donald A. Lazar, Dandees' president, ''and will therefore modify our labeling appropriately.''

''We have been a leader in the development of 'environmentally friendly' diapers and believe that the California statute is unduly restrictive and anti-environment by restricting the marketing of products which are demonstrably beneficial to the environment. Furthermore, in order to comply fully with new state statute means that product would have to have a very short shelf life.''

''Based on test data available to the company, which has been compiled by Archer Daniels Midland Co. and other major corporations in the United States, we expect to continue to stress the environmental benefits of our multicolored diapers, which have become very popular wherever they have been sold.''

''We hope that the public along with our suppliers will continue to support us in our quest to produce products which are unquestionably more friendly to the environment than products which, when untreated, do not biodegrade for a century, or more.''

Dandees management indicated that the company will intensively monitor the marketing impact resulting from the proposed relabeling and advertising and plans to evaluate the best use of the company's resources in view of this new statute.

PORTLAND, Ore. (OCT. 25) BUSINESS WIRE - North American lumber will be banned

from entry into member countries of the European Community (E.C.) as of Jan. 1 1991, unless the stock is kiln dried.

Or unless a short term exception is agreed to by the E.C. itself, and only then if the ''green'' lumber has been inspected under approved procedures to assure an absence of bark and grub holes. And even then each E.C. member country may still permit landing of only kiln dried lumber.

''Despite rumors to the contrary, that is the way the matter stands on Oct. 25 '' reported H.A. Roberts, president of the Western Wood Products Association (WWPA).

The E.C. action is intended to prevent the import into Western Europe of the pine wood nematode, which forestry people there say could damage the continent's forests. An eelworm of microscopic dimension, the nematode is carried into wood by a species of beetles. Though the nematodes then disperse throughout the tree, they cannot escape the wood without a beetle to carry them out.

Unless requirements somehow are relaxed in the interim, Roberts warned that shipments of green lumber that arrive at European ports after Dec. 31 are at risk of being refused.

''At this moment, we cannot advise anyone to make shipments who cannot be assured of landing by that date,'' he said.

The U.S. government has been working with the United Kingdom to obtain a one-year derogation (exception) to the green lumber ban similar to that already negotiated by the Canadians, Roberts said. The U.K., in turn, is recommending an E.C. derogation be approved for the United States. Originally it was hoped the derogation request and acceptance would become effective on Jan. 1, simultaneous with the E.C. law, but delays have prevented it.

''Our government's paperwork arrived here just yesterday,'' Roberts reported. ''Based upon the time required for the Canadians, and assuming all hurdles are cleared between now and the year's end, we could have a derogation by March.''

During the derogation period, stringent inspection procedures would be implemented to prevent any shipment of lumber with bark or with grub holes. However, this would allow qualifying U.S. shipments to continue into Europe while providing time to work out alternatives to the time-consuming and costly kiln drying treatment.

''The irony is that kiln drying to sterilize wood for this purpose is an expensive overkill,'' Roberts said. ''No bark and no holes means no beetles. Even if nematodes are present in wood clean of bark and holes, they cannot escape. So they cannot be a threat.''

Should the derogation be allowed by the E.C. itself, its member countries each still have the right to enforce bans on their own imports anyway, Roberts said.

#90298b0275 10/25/1990 ~Business Wire

SEBASTOPOL. Calif. (OCT. 25) BUSINESS WIRE - Vacu-dry Co., one of California's largest volume apple processors, Thursday announced financial results for the first quarter of the company's 1990-91 fiscal year.

Vacu-dry Co. finished the quarter ended Sept. 30 with total revenues of $4,836,000 and net earnings of $32,000, or approximately 2 cents per share on 1,668,171 average shares outstanding. These results compare with revenues of $6,472,000 and net earnings of $33,000, or 2 cents per share, on 1,668,171 average shares outstanding for the quarter ended Sept. 30, 1989.

The lower revenues are a result of the sale of the applesauce and apple juice business to Knouse Foods Cooperative Inc., in February of 1990.

As of Sept. 30, the company had an unshipped backlog of $9,716,000, which compares to $15,962,000 as of Sept. 30, 1989.

Vacu-dry Co.

SANTA MONICA, Calif. (OCT. 25) BUSINESS WIRE - Oppenheimer Industries Inc. (the ''Company'')(ASE:OPP) Thursday announced that on Oct. 16, 1990, the company's wholly owned subsidiary, The Armendaris Corp. (''Armendaris''), was served with a lawsuit by The Travelers Insurance Co. (''Travelers'').

The complaint filed by Travelers alleges, among other things, Armendaris' failure to make payments due under a loan from Travelers and seeks foreclosure of the Armendaris Ranch in New Mexico and a judgment against Armendaris.

Travelers alleged in the complaint that the total amount owed to it includes outstanding principal of $6,041,700 and accrued interest of $558,572.17, as of Oct. 11, 1990.

As previously announced, on Sept. 6, 1990, the company received notice from Travelers that, as a result of failure to make the payments due on the company's loan from Travelers, Travelers has accelerated all sums due it pursuant to the terms of the loan.

The company also announced that the acceleration by Travelers of the maturity of all amounts due may be deemed to be an event of default by Meyers Investments Inc. (''Meyers''). Meyers has furnished to the company a $10 million revolving credit facility pursuant to a commitment which was delivered to the company on July 3, 1990 (''Commitment'').

If Meyers concludes that an event of default has occurred, it would have the right to refuse to fund any amounts under the Commitment.

The company and Armendaris, together with counsel, are evaluating Travelers' allegations and options available to the company and Armendaris.

Oppenheimer Industries is an American Stock Exchange company with real estate holdings in Missouri, California and New Mexico.

SAN JOSE, Calif. (OCT. 25) BUSINESS WIRE - International CMOS Technology Inc. (NASDAQ:ICTI) - common stock, (NASDAQ:ICTIW) - warrants, Thursday announced that the company will not be able to make the payment of principal and interest on its convertible debentures due Nov. 1, 1990.

As of Nov. 1, the debentures of $2.84 million in principal amount will have accrued $142,700 in interest. The company will be making an offer to the holders of the convertible debentures to restructure the obligation.

The company's chairman and chief executive officer, Drew Osterman, said that lower sales in the fourth quarter ended Sept. 28, 1990, had contributed to company's present inability to make the payments.

''We expect that sales for the fourth quarter ended Sept. 28, 1990, will be about 8 percent less than sales for the fourth quarter ended Sept. 30, 1989, and 45 percent less than sales for the third quarter ended June 29, 1990.

''The company will need to delay payment of the debentures, and is also negotiating with its primary trade creditor, Gould Semiconductor Division, American Microsystems Inc., restructure of its current obligations.

''We have also been actively pursuing discussions with Hyundai Electronics America Inc., as well as some other companies, to provide additional funding to the company.

The drop in fourth-quarter sales was due largely to slowed release of orders by a major customer, and a general softening of demand in the semiconductor market. This customer has now resumed releasing significant orders.''

On a positive note, according to Osterman, there are several exciting developments within the company. ''The first is our new PEEL-array family of products that show what can happen when you follow your instincts instead of following the competition.

''Three years ago, we set out to build a new breed of logic devices -- A new Benchmark. The results of our efforts have been rewarded with an advance in the state-of-the-art.''

The speed and exceptional architectural flexibility of these devices have already captured the attention of the marketplace, earning accolades as the best integrated circuit introduced in the market during 1989 out of 100 cited by Electronic Design magazine.

The potential revenue from the first device in the family could exceed the company's earlier sales forecast for the first PEEL-array during 1991 by several times.

International CMOS Technology Inc. designs, develops and markets user-programmable logic and memory devices. The company's CMOS process technology offers the advantages of high-speed, low power consumption and re-programmability.

These features allow the customer to reduce size, power supply and cooling requirements, and allow the producer to test each unit for defects before release.

#90298b0611 10/25/1990 ~Business Wire

MENLO PARK, CALIF. (OCT. 25) BUSINESS WIRE - Raychem Corp. Thursday reported first-quarter fiscal 1991 net income of $3.3 million, or 9 cents per share, vs. $4.8 million, or 14 cents per share, in the comparable period in the prior year.

Sales increased 21 percent to $292 million from $242 million in the comparable period of fiscal 1990. The quarter's sales results would have been lower by $24 million had currency exchange rates remained unchanged from the first quarter of 1990.

Operating expenses for the quarter decreased as a percent of sales to 46 percent from 50 percent a year ago. Raychem's pretax income, excluding the effect of Raynet, increased to $29 million vs. $22 million in the first quarter of fiscal 1990.

Including Raynet, pretax income was $11 million in the first quarter of fiscal 1991 and $9 million in the first quarter of fiscal 1990. The company's annual effective tax rate increased to 70 percent from 43 percent in the previous year's first quarter as a result of strong operating performance outside of the United States coupled with continuing net losses in the United States.

Raychem's gross profit margin was 51 percent compared to 54 percent in the first quarter fiscal 1990 and 48 percent in the fourth quarter of fiscal 1990.

Shipments in the first quarter of fiscal 1991 improved over the prior year's first quarter in all three of Raychem's major segments -- electronics ($115 million vs. $102 million); industrial ($91 million vs. $77 million); and telecommunications ($84 million vs. $61 million). First-quarter orders were ahead of shipments in the company's electronics and industrial segments and approximately equal to shipments in the telecommunications segment.

Raychem is a broadly based materials science company serving international markets. The company develops and supplies high- performance products for the aerospace, automotive, construction, electronics, electrical power, process and telecommunications industries.

HAUPPAUGE, NY (OCT. 25) BUSINESS WIRE - Robert A. Carlson, president and chief executive officer, North Atlantic Industries, Inc. (NATL/NASDAQ) today announced record third quarter and first nine month results for the period ended September 30, 1990.

Net income for the third quarter of 1990 was $528,000 or $0.15 per share, compared to a net loss of $3,030,000 or ($0.85) per share in the third quarter of 1989. Revenues for the quarter increased 21% to $9.3 million compared with $7.7 million during the third quarter of last year.

For the first nine months of 1990, net income was $2,160,000 or $0.61 per share as compared to a net loss of $2,368,000 for the first nine months of 1989. Revenues for the nine months increased 17% to $30.0 million compared with $25.7 million in the first nine months of last year. The Company recorded a charge of $3.2 million in the third quarter of 1989 to reflect the costs of a restructuring plan and a terminated merger transaction.

Income before income taxes and special charges for the third quarter of 1990 increased 182% to $622,000, compared with $220,000 in the third quarter of 1989. For the first nine months of 1990 income before income taxes and special charges rose 143% to $2,542,000 compared with $1,048,000 in 1989.

The improvement in earnings resulted in part from increased sales and also from the cost reductions achieved through the Company's restructuring activity noted above. The increase in sales for both the quarter and year-to-date is attributable to increased shipments of military products Carlson commented, ''Our operating performance continues to match expectations and, with our quarter-end backlog at $22.5 million, I expect our improved performance to continue into 1991.''

North Atlantic Industries designs, manufactures and markets computer, computer peripheral, communications and instrumentation products to government and aerospace industry customers. The Company is a leading supplier of TEMPEST printers, MIL-SPEC teleprinters and tape storage systems, as well as phase sensitive instruments.

SANTA CLARA, CALIF. (OCT. 25) BUSINESS WIRE - Uniteq Application Systems Inc. introduced its Distribution and Logistics Management (DLM) System for process manufacturing industries Thursday.

DLM is the first offering in Uniteq's architecture of UNIX-based enterprise-wide solutions.

Uniteq's DLM system is designed for process manufacturers, supports global distribution and logistics management, and integrates with other Uniteq or third party applications.

Separate modules address Warehouse and Distribution Center Management, Traffic and Transportation, Distribution Requirements Planning, and Sales Order Management.

All are designed for multiple facilities, provide cost or service-based optimization, and accommodate Electronic Data Interchange (EDI) as required.

Increasing competitive pressures have been forcing manufacturers to reduce the overall cost of doing business and to significantly improve customer service.

This requires the sharing of corporate data among functional areas, such as marketing, manufacturing, distribution, etc., as well as among dispersed physical locations, such as production plants, warehouses and headquarter offices.

Information must support consistent decision making throughout the entire organization at the strategic, operational and tactical levels. This business challenge has created the need for the establishment of a distributed, enterprise-wide information infrastructure.

Uniteq Application Systems Inc. develops, markets and implements enterprise-wide Unix-based Computer Integrated Manufacturing software solutions. Uniteq's applications are specifically designed for process manufacturing industries and can be easily configured for implementation purposes.

Uniteq is a privately held company founded in 1989. The company is located in Santa Clara.

SAN FRANCISCO (OCT. 25) BUSINESS WIRE - Union Bank (OCT/UBNK) announced Oct. 24 that Taisuke Shimizu, 54, has been elected president and chief executive officer. Shimizu has been vice chairman and chief financial officer since 1988.

As previously announced, Shimizu replaces Seishichi Itoh, 55, who is returning to The Bank of Tokyo, Ltd., as senior managing director after more than five years as president of Union Bank. Itoh engineered the bank's growth to the fifth largest commercial bank in California.

Shimizu commented that, ''Mr. Itoh helped the bank grow to more than $16 billion in assets and is leaving it in sound financial condition. While we are not planning any major changes in direction, we will keep on course in expanding our retail branch network.''

Shimizu was a key member of the management team that oversaw the acquisition of Union Bank in 1988 by California First Bank, which retained the Union Bank name.

Shimizu began his career with The Bank of Tokyo, Ltd., in 1959 and has held senior management positions in Tokyo, Europe and the United States. He joined California First Bank in 1985 as executive vice president, chief financial officer and head of the administration group. In 1987, he returned to Japan as general manager of the Bank of Tokyo's overseas division before resuming his former posts at California First in June 1988. He was named vice chairman in October 1988.

Also on October 24, the bank's board of directors elected Kanetaka Yoshida, 52 to replace Shimizu as vice chairman and chief financial officer. Yoshida started his career with The Bank of Tokyo, Ltd., in 1962 and has wide experience in such areas as international investments, loan administration and planning. From 1978 to 1983, he was a senior vice president in California First Bank's Office of the President and Corporate Banking Group. He has also served as general manager of the Bank of Tokyo's Jakarta office.

Union Bank, headquartered in San Francisco, has 177 offices throughout the state and five facilities overseas.

MILPITAS, CALIF. (OCT. 25) BUSINESS WIRE - Quantum Corp. (OTC:QNTM) announced Wednesday that Hewlett-Packard Co. has selected two of Quantum's high capacity 3-1/2-inch ProDrive Series disk drives for use in several models of the HP Vectra PC line of industry-standard personal computers.

The Quantum ProDrive 120AT and 170AT are currently being used in various 286, 386 and 486 models of the HP Vectra line of personal computer systems.

''The combination of Quantum and HP-produced disk drives provides our customers with a broad range of complementary, high quality, mass storage solutions,'' said William J. Toney, general manager, California Personal Computer Division.

Hewlett-Packard's Disk Mechanism Division in Boise, Idaho provides drives with 330 and 670 megabytes of formatted capacity for high performance HP Vectra PC systems in applications demanding large amounts of data storage.

The ProDrive disk drives chosen by Hewlett-Packard provide 120 and 168 megabytes of formatted capacity and embedded AT-Bus controllers. These drives feature and average seek time of less than 15 milliseconds and Quantum's proprietary DisCache firmware for even faster data retrieval.

According to David A. Brown, Quantum vice chairman and chief operating officer Quantum has been supplying Hewlett-Packard with entry-level capacity 42 and 84 megabyte hard drives since early 1990.

Since its founding in 1980, Quantum has emerged as a leading independent manufacturer of reliable, high-performance, mass storage systems for business, engineering, and scientific computing. The publicly held company offers products designed for desktop workstation; personal computer; and laptop, notebook, and portable computer applications.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. Hewlett-Packard has 92,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

COLUMBUS, GA. (OCT. 25) BUSINESS WIRE - Oct. 25, 1990, Carmike Cinemas, Inc. (NASDAQ:CMIKA) today announced results for the third quarter and nine month periods ended September 30, 1990.

For the quarter ended September 30, 1990, total revenues increased 19 percent to $38,706,000 from $32,622,000 for the quarter ended September 30, 1989. Operating income for the quarter was $7,893,000, compared with $8,189,000 in the prior year.

The Company's net income was $3,013,000, or $0.40 per fully diluted share compared to $3,779,000 or $0.55 in the comparable quarter of last year. Weighted average common shares outstanding on a fully diluted basis for the three months ended September 30, 1990 and 1989 were 7,514,296 and 7,498,743, respectively.

For the nine months ended September 30, 1990, total revenues increased 24 percent to $94,020,000 from $75,946,000 for the nine months of 1989. Operating income was $14,908,000 compared to $14,320,000 in the first nine months of last year.

The Company's net income was $5,341,000, or $0.71 per fully diluted share compared to $5,297,000 or $0.84 in the comparable quarter of last year. Weighted average common shares outstanding on a fully diluted basis for the three months ended September 30, 1990 and 1989 were 7,554,255 and 7,484,894, respectively.

Commenting on the results, President and Chief Executive Officer Michael Patrick stated, ''Although the 1990 summer motion picture season lacked the blockbusters of 1989 P Indiana Jones And The Last Crusade, Batman, and Lethal Weapon II P Carmike's after tax cash flow for the nine months increased by more than 18 percent. We look forward to the traditionally strong holiday season which this year sports an exceptional slate of motion pictures, including Godfather III, Three Men And A Little Lady, The Russia House and Look Who's Talking Too.''

Carmike Cinemas is the fifth largest motion picture exhibitor in the United States, and is the leading exhibitor in the southern United States in terms of number of screens and theatres operated.

SUNNYVALE, CA (OCT. 25) BUSINESS WIRE - Maxim Integrated Products reported record sales of $17,317,000 for the first quarter of fiscal 1991, a 41 percent increase over the $12,251,000 for this period a year ago.

Net income of $2,270,000 (or 17 cents per share) for the quarter marked the 18th consecutive increasingly profitable quarter for Maxim and represented a 36 percent gain over the $1,664,000 (or 13 cents per share) for the like quarter in fiscal 1990.

Return on equity for the quarter was 23.2 percent, up 0.6 percentage points from 22.6 percent for the quarter ending Sept. 30, 1989. Operating income for the quarter was 21.2 percent of sales, continuing to be one of the industry's highest.

Jack Gifford, president and chief executive officer, commented: ''During the first quarter of fiscal '91, we generated net cash flow from operating activities of $2.8 million. This cash was utilized in part to eliminate a $2.5 million short term bank loan used to acquire our new wafer fabrication facility.

''This leaves Maxim's balance sheet healthy, with no short term bank loans and a debt to equity ratio of approximately 0.5. Furthermore, we have a credit facility available for up to $5.0 million and can borrow under that line of credit on a short term revolving basis and on a long term basis secured by our Sunnyvale facilities which are owned by Maxim and are unemcumbered by debt.

''We continue to focus major resources on new product development and expect to introduce approximately 30 new products during the first six months of fiscal 1991.

''A growing awareness of the Maxim brand was confirmed recently in an industry survey conducted by 'EE Times' that place Maxim first in technological innovation among all analog companies.

''This heightened awareness has reached the financial community as well and is evidenced by Maxim's inclusion in both 'Business Week' (5/21/90) and 'Forbes' (upcoming issue date, 11/12/90) as one of the outstanding companies in the United States.

Maxim Integrated Products is a leading international supplier of quality analog products for applications that require real world signal processing.

IRVINE, CALIF. (OCT. 25) BUSINESS WIRE - BoMed Medical Manufacturing Ltd. (NASDAQ:BOMD) Thursday announced that it has signed a three-year private label agreement with AVL Medical Instruments AG, a Schaffhausen, Switzerland-based manufacturer of blood gas equipment.

Under the terms of the agreement, BoMed will provide its CardioDynamic Data Processing (CDDP) system to AVL, which will market the system under its own label throughout the world.

The CDDP system is a real-time, non-invasive hemodynamic patient-management and monitoring system that uses electrical bioimpedance to measure the patient's hemodynamic parameters -- global blood flow and mean arterial blood pressure.

The system measures a patient's hemodynamics by using electronic data gathered by strategically placed electrodes, which use the patient's thorax as a transducer.

''We're pleased to be a part of AVL's extensive world distribution network, which includes more than 100 locations worldwide,'' said Hevka Sramek, president of BoMed. ''This is a tremendous opportunity for thousands of hospitals to take advantage of the clinical and cost-saving benefits of hemodynamic patient management.''

BoMed's expected revenues under the agreement could reach as much as $3 million over the next three years, Sramek said.

The CDDP system is considered a safer, non-invasive alternative to invasive procedures, and its numerous applications range from preoperative assessment to intraoperative and postoperative patient management in intensive care, cardiology, OB/GYN, anesthesia, hypertension and others.

BoMed, located in Irvine, is a leader in the field of non-invasive cardiodynamic patient management and monitoring. The company develops, manufactures and markets technically advanced instruments for a broad range of patient and therapeutic management and monitoring applications.

#90298b0627 10/25/1990 ~Business Wire

EINDHOVEN, THE NETHERLANDS (OCT. 25) BUSINESS WIRE - In the period January-September 1990 Philips achieved sales of f 39,472 million, 1 per cent less than in the corresponding period of 1989.

Disregarding the effect of changes in consolidations and exchange rate movements, sales rose by 7 per cent. Before the deduction of restructuring costs, income from operations in this period amounted to f 1,550 million (f 1,826 million in 1989).

After allowing for a restructuring provision of f 2,261 million, most of which was set aside in the third quarter for the program aimed at restoring the information systems and integrated circuits businesses to profitability announced earlier this year, there was a negative operating result of f 711 million.

The negative balance of financial income and expenses amounted to f 1,293 million (f 991 million in January-september 1989). Philips's net loss in the period January- September 1990 was f 1,786 million (net income January-September 1989 f 685 million).

Sales in the lighting sector totaled f 5,161 million, 6 per cent less than in January-September 1989. When adjusted for exchange rate movements, sales in this sector rose by 1 per cent. The sector's income from operations amounted to f 399 million (f 574 million in the corresponding period of 1989).

Sales in the consumer products sector increased by 9 per cent to f 17,475 million, while income from operations (excl. restructuring) totaled f 1,122 million (f 818 million in January-September 1989).

Sales in the professional products and systems sector amounted to f 9,217 million, 13 per cent less than in 1989. Excluding deconsolidations and exchange rate movements, this sector's sales were higher than in January-September 1989. The sector's operating result was negative, amounting to (excl. restructuring) -f 48 million (a positive operating result of f 114 million in 1989).

The sales figure for the components sector was f 6,162 million, 7 per cent more than the comparable figure in 1989. The sector achieved an operating income (excl. restructuring) of f 14 million (f 39 million in 1989). The decline was mainly due to lower earnings caused by exchange rate movements.

At the end of September 1990 Philips's total liabilities and provisions amounted to 69.9 per cent of capital employed. The number of employees had fallen since January 1, 1990 by 9,400 to 285,700. Note for editors:

#90298b0630 10/25/1990 ~Business Wire

BLUE BELL, PA (OCT. 25) BUSINESS WIRE - U.S. Bioscience Inc. (ASE:UBS), a pharmaceutical company specializing in the development and commercialization of anticancer compounds, Thursday announced that U.S. patent number 4,957,481 for photodynamic therapy was issued.

Exclusive rights to the patent, which covers the delivery of a light-sensitive drug directly into a tumor, were assigned to U.S. Bioscience by the inventor in 1987.

The patent claims a method of reducing the severity of symptoms resulting from the presence of a tumor by: (1) the injection of an effective amount of photosensitive compound directly into the tumor; (2) insertion of a sheathed light source capable of emitting light at a wavelength absorbed by the tumor; and (3) the activation of the light source so that the light is absorbed by the photosensitive compound, thereby disrupting the tumor cell and reducing the severity of tumor-induced symptoms.

Photodynamic therapy is an emerging form of cancer treatment in which a photosensitive agent is concentrated within a localized tumor and, upon exposure to light, releases a toxic form of oxygen known as singlet oxygen. Singlet oxygen, in turn, destroys the cell membrane of tumor cells.

To date about 6,000 patients have been treated with PDT. Although some impressive results have been reported, two major problems have impeded greater usage of this type of therapy: the method of administration and the chemical features of photosensitizers currently available.

Historically, the photosensitizer has been administered intravenously. This results in distribution of the drug throughout the body, thereby sensitizing the normal skin to sunlight and requiring patients to remain ''out of'' sunlight for periods of four to six weeks. The second problem involves properties of the photosensitizer, such as wavelength of light absorption, avidity to light and chemical purity.

According to Philip S. Schein, M.D., chairman and president of U.S. Bioscience: ''The intratumoral injection of the photosensitizing agent allows for a much safer and more practical treatment. In addition, this provides high tissue concentrations of the photosensitizers where it is needed -- in the tumor -- while significantly reducing skin sensitization.''

Schein explained that intratumoral injection is a relatively simple out-patient procedure that has been used for treating tumors throughout the body, including the brain.

''This technique is an important step toward making PDT a viable alternative for patients with locally advanced, symptomatic tumor. U.S. Bioscience is pleased to have been assigned rights to this patent which represents an integral part of our business development strategy for photodynamic therapy of cancer.''

Schein also said U.S. Bioscience has U.S. and Japanese rights to a new photosensitizing agent, licensed from Eastman Kodak, that is currently being prepared for clinical testing under an agreement with Kodak's subsidiary, Sterling Drug.

Based in Blue Bell, Pa., U.S. Bioscience is a pharmaceutical company specializing in the development and commercialization of drugs to increase the survival and productivity of cancer patients.

The company's portfolio includes an array of compounds, some of which are in late stages of development -- one in Phase-II clinical trials, two in Phase-III clinical trials, and another with a new drug application pending with the U.S. Food and Drug Administration.

CUPERTINO, CALIF. (OCT. 25) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Thursday announced record revenues for the fourth quarter of fiscal 1990, ended Sept. 30.

Revenues for the quarter reached $506,069,000, compared with $456,162,000 posted in the comparable three-month period a year ago. Net income for the quarter was $31,834,000, or 30 cents per share, compared with $39,404,000, or 38 cents per share, recorded in the fourth quarter of the prior year.

The company reported annual revenues of $1,865,873,000, a 14 percent gain over the $1,632,522,000 recorded in fiscal 1989. Net income for the fiscal year reached $121,832,000, compared with net income in fiscal 1989 of $118,316,000. Annual earnings per share stood at $1.13, compared with $1.17 reported in fiscal 1989.

''Throughout the year, we continued strong growth in most industries and countries,'' said James G. Treybig, president and chief executive officer. ''However, we have been impacted in countries where our greatest strength is in banking and securities, bringing our revenue growth rate to a level below our goals.''

''Among our rapidly growing industries, transportation and wholesale and

retail distribution posted better than 50 percent gains for the year,'' Treybig said. ''Customers such as BI-LO Pty. Ltd., a subsidiary of Coles Meyer Ltd., one of Australia's largest retailers, contributed to annual revenue growth in the wholesale and retail industry with the fourth quarter purchase of a NonStop Cyclone system.

''A fourth quarter sale to a new customer, Northwest Airlines, contributed to annual revenue growth in the transportation industry.''

Tandem Computers Inc. manufactures and markets fault tolerant computer systems online transaction processing systems and enterprise networks. The company is headquartered at 19333 Vallco Parkway, Cupertino, Calif. 95014, 408/725-6000.

#90298b0632 10/25/1990 ~Business Wire

DENVER (OCT. 25) BUSINESS WIRE - The Exeter Group Wednesday announced the execution of agreements to acquire the Pinseeker Golf Corp. and Larlen Inc., both of Santa Ana, Calif.

Pinseeker, a manufacturer of a full line of mid- to high-priced golf products, has been in business for over 18 years and generates revenues of approximately $5 million per year. Larlen Inc., which designs, imports and distributes high quality sportswear, is well-known in the golf industry for its ''Dache'' and ''Club Maui by Dache'' clothing lines.

Larlen generated sales of approximately $5 million in its most recent fiscal year ended June 30.

The purchase of Pinseeker is to be financed through a combination of cash and notes, while the acquisition of Larlen will be made pursuant to a stock exchange between Larlen and Exeter. The acquisitions are expected to close on or about Dec. 15. The indicated total value of the acquisitions is approximately $6.5 million.

Commenting on the proposed acquisitions, Robert Walter, Denver-based chairman of the board of The Exeter Group, stated, ''We at The Exeter Group are very excited about the prospect of affiliating ourselves with two of the greatest names in the golf industry today, Pinseeker and Dache.''

Remarked Jack Butler, chairman of Larlen, ''We anticipate that these acquisitions will offer numerous marketing and other opportunities for the combined companies and that these acquisitions will produce a stronger, more

diversified competitor in the golf industry as golf continues its growth and popularity in the 1990s.''

Upon closing of the acquisitions, four of the present directors of Larlen will be appointed to the board of directors of Exeter, including Leonard Jaffe, John Butler and Lawrence Spitz. Jaffe and Spitz founded Larlen in 1985, and each has had extensive experience in the garment industry for over 30 years.

The Exeter Group, which was founded in 1988, is a private investment group with principals in Los Angeles, Denver and New York.

#90298b0633 10/25/1990 ~Business Wire

HOLYOKE, Mass. (OCT. 25) BUSINESS WIRE - Heritage Bancorp, Inc. (NASDAQ:HNIS) today reported a loss for the third quarter ended September 30, 1990 of $5.7 million or $ .78 per share compared to losses of $18.9 million and $8.4 million for the first and second quarters of 1990 respectively.

The loss was primarily the result of a $7.5 million provision for possible loan losses. In addition, $12.5 million in non-performing loans were charged off during the third quarter. For the nine months ended September 30, 1990 the net loss was $33.0 million or $4.53 per share compared to a net loss of $10.9 million or $1.49 per share for the same period in 1989.

At September 30, 1990, non-performing loans were $90.6 million, other real estate owned totaled $11.6 million, while in-substance foreclosures equaled $31.3 million, bringing total non-performing assets to $133.5 million. With this quarter's provision for loan losses and charge-offs, the period-end loan loss reserve was $30.1 million, representing 33.22% of non-performing loans and 22.54% of non-performing assets. Chairman Richard B. Covell commented, ''While our income statement has shown improvement over the past two quarters, the Bank's level of non-performing loans is still of primary concern and focus. If the region's economy continues to remain in difficulty, then additional losses and charge-offs will be likely in the future.''

In addition, Heritage announced that as a result of its recently completed regulatory examination by the Federal Deposit Insurance Corporation, it is discussing arrangements with federal and state banking regulators regarding corrective measures that will be required to be taken in light of the examination report. These discussions may result in formal orders or agreements addressing, among other things, increased capital requirements or the formation of written plans of action to address non-performing and adversely classified assets. Chairman Covell stated, ''We hope that these discussions will yield measures that will strengthen Heritage and reinforce

the prudent conduct of this Company's affairs.''

Heritage today also announced further cost containment measures being taken. The Bank has petitioned the Commissioner of Banks for permission to close its branch office located at Mountain Farms Mall in Hadley. As previously announced, Heritage plans to close its Lamb Street, South Hadley office early in 1991 and is proceeding with preparations at the nearby Newton Street, South Hadley branch to accommodate the absorption of the Lamb Street customer base into that office. In the area of staff reduction, the Bank has recently eliminated ten positions, including 5 officer positions. Heritage is currently operating with 52 fewer positions, which includes the prior elimination of unfilled positions, than were planned for in the 1990 budget. Commenting on these matters, Chairman Covell stated that ''While these are difficult and painful decisions to make, the Company must forge ahead with efforts to reduce expenses and take actions designed to return this Company to profitability.''

In a related area, Heritage acted on its plans to increase its core deposit base by introducing two new deposit products during September which target distinct segments of its market area. The first, ''Basic Banking,'' is a checking account designed for the local area's large student population. The second, ''Advantage 50,'' is geared to the over 50 age group and combines both bank and non-bank products into one package. Mr. Covell remarked, ''Strengthening the Bank's local deposit base will decrease the Bank's use of less desirable funding sources. The new products have been received with enthusiasm by the communities we serve, and all sales goals for the first month have been surpassed. We are very pleased with the results of these programs so far.''

Heritage Bancorp, Inc. is the holding company of Heritage Bank for Savings, a Massachusetts-chartered FDIC-insured savings bank with assets of $1,566.1 million at September 30, 1990, operating 27 offices in western Massachusetts.

#90298b0634 10/25/1990 ~Business Wire

LOUISVILLE, KY (OCT. 25) BUSINESS WIRE - Vencor Inc. (NASDAQ/NMS:VCOR) Thursday announced record third quarter results, including a threefold increase in earnings per share for the three months ended Sept. 30, 1990.

Earnings totaled $1,066,000, or 18 cents per share, on 6,042,000 average shares outstanding, compared with net income of $274,000, or 6 cents per share a year ago on 4,429,000 average shares.

Revenues for the third quarter were $19,979,000, up 42 percent from

$14,103,000 in the year-earlier period.

For the nine months ended Sept. 30, 1990, revenues were up 39 percent to $54,752,000 compared with $39,382,000 a year ago. Net income increased to $1,977,000 compared with $573,000; and earnings per share more than doubled to 33 cents per share on 6,019,000 average shares vs. 13 cents per share on 4,375,000 average shares in the year-earlier period.

The increase in the number of shares outstanding for both the third quarter and nine months was due primarily to Vencor's public offering of 1.6 million shares in September 1989.

Vencor specializes in providing long-term hospital care for patients who suffer from catastrophic illness. The company has eleven hospitals in Arizona Colorado, Florida, Georgia, Illinois, Indiana, Louisiana and Texas.

#90298b0646 10/25/1990 ~Business Wire

EINDHOVEN, THE NETHERLANDS (OCT. 25) BUSINESS WIRE - Philips is embarked upon a major efficiency drive throughout its world-wide operations with the aim of restoring the company's profitability.

The drive will lead to a sharp reduction of costs. It is expected that the measures to be taken will result in a loss of 35,000 to 45,000 jobs at all levels of the company world-wide by the end of 1991. These measures are in addition to those announced on July 2, 1990, concerning the restructuring of loss-making activities, particularly in the fields of integrated circuits and computers, which will lead to a reduction of about 10,000 jobs, mainly in Europe.

The efficiency drive was announced by J.D. Timmer, president of Philips, at a press conference about the company's third quarterly report for 1990, which was held in Eindhoven, the Netherlands, today. Timmer also announced that, in view of the current situation at Philips, it has been decided to propose to shareholders that no dividend should be declared for 1990.

Timmer said: ''Philips' financial performance calls for drastic steps in the shortest possible time. The measures are aimed at increasing efficiency. We are going to change the way we work. This will improve our competitiveness.''

He added: ''The measures will have a profound impact on all levels of the organization world-wide and must, at the same time, lead to a more customer-oriented organization.''

''The implementation of the efficiency drive and the consequent reduction of the number of employees will be carried out in each country according to national custom and practice. In view of the extent of the reduction, Philips considers that compulsory redundancies will be unavoidable.''

Discussing the company's activities, Timmer said that Philips' group management committee will continue to examine the future of those activities which are not meeting the company's profitability standards. This review could lead to an increase of the restructuring provision chargeable to the 1990 accounts and might, therefore, influence the net results to a further extent than the measures announced on July 2. However, Timmer could not yet say if, and to what extent, this would be the case.

Going into more detail on the settlement in the class action filed by American shareholders, Timmer reviewed the financial information process which took place at the beginning of this year. He also answered questions on this subject which, in view of the class action, could not be answered at the annual general meeting of Philips' shareholders on July 2.

Philips is a global company active in diverse fields of electronics and lighting, with industrial activities in 45 countries and sales and service organizations in practically every country in the world. In 1989, the company's sales amounted to 57.2 billion Dutch guilders (27 billion U.S. dollars).

On September 30, 1990, Philips employed 285,700 people world-wide.

CHICAGO (OCT. 25) BUSINESS WIRE - More than 100 city and state officials, including Chicago Mayor Richard M. Daley, will join United Airlines Chairman and President Stephen M. Wolf and the company's employees for the grand opening of United's new $25 million Chicago Regional Reservations Center near O'Hare International Airport.

''This grand opening today is another highlight in what can only be described as perhaps the most exciting 11 days in United's history,'' said Wolf. ''In the last week and a half, we announced the largest widebody order in the history of commercial aviation. We won the right to fly non-stop between Chicago and Tokyo and Washington and Madrid.

''This week we reached an agreement in principle with Pan American World Airways to acquire their rights to fly to London's Heathrow Airport from five cities in the United States -- New York, Washington, San Francisco, Los

Angeles and Seattle -- and to acquire Pan Am's Washington Dulles-Paris route and certain other assets.

This transaction will more than triple United's number of non-stop flights to European destinations.

''Today we are showing the world our state-of-the-art reservations center, which by the time it is fully operational in 1993, will employ more than 2,000 people -- more than double the size of the workforce today,'' he added.

The grand opening ceremonies will begin at 9:30 a.m. in the newly- opened, 120,000-square-foot complex located at 11555 West Touhy Avenue, near the north boundary of O'Hare. United currently employs 900 people at the reservations facility.

United currently has nine domestic reservations centers and 15 reservations and ticket sales offices in Europe, the Pacific and Mexico.

SAN ANTONIO, TEXAS (OCT. 25) BUSINESS WIRE - OFFICE PRODUCTS OF AMERICA, INC. (NASDAQ Symbols: OPOAA, OPOAW & OPOAU) Thursday announced the successful grand opening of its sixth ''Office Stop'' office supply warehouse store.

Located at 11000 Roosevelt Boulevard in Philadelphia, Pa., the new warehouse is the company's first in Pennsylvania. The store occupies approximately 30,000 square feet and represents an expansion of a former Crazy Eddie store.

Commenting on the announcement, Thomas Klimback, president and chief executive officer of OFFICE PRODUCTS OF AMERICA, INC., said, ''The Philadelphia Office Stop is the Company's sixth store and the third to open in the past two weeks. Two stores opened on October 18, one in Towson, Maryland., and one in Glen Burnie, Maryland. OFFICE PRODUCTS OF AMERICA has now exceeded its original goal of opening five stores by the end of 1990. The Company expects to open a seventh store in Warwick, Rhode Island in November.''

Klimback continued, ''Each new store opening enhances recognition of the Office Stop name and helps build consumer awareness of our everyday low prices on top quality office products.''

OFFICE PRODUCTS OF AMERICA, INC. operates ''Office Stop'' warehouses offering general office supplies, office equipment, office furniture and other

business-related products at discounts of 30 percent to 70 percent below manufacturers' suggested retail list prices. The company plans to open Office Stop warehouses throughout the New England, Middle Atlantic and selected South Atlantic states.

#90298b0650 10/25/1990 ~Business Wire

MILFORD, CT (OCT. 25) BUSINESS WIRE - BIC Corporation for the third quarter ended September 30, 1990, reported net income of $6,189,000, or $.51 per share compared with $5,599,000, or $.46 per share, in the same period last year.

Net income in the 1990 third quarter included an extraordinary gain of $464,000, or $.04 per share, due to the utilization of a Mexican tax-loss carry-forward. Sales for the quarter were $87,725,000 compared with $84,531,000.

Net income for the first nine months of 1990 was $19,807,000, or $1.63 per share, compared with net income of $19,771,000, or $1.63 per share in the same period a year ago. Net income in the 1990 period included an extraordinary gain of $962,000, or $.08 per share. Sales for the nine months were $258,665,000 compared with $260,411,000.

Commenting on the third-quarter results, Bruno Bich, president, said, ''In the third quarter our U.S. operations continued their strong performances in writing instruments and shavers, each experiencing increases in unit and dollar sales as well as profits. However, these increases were more than offset by a significant sales and earnings decline in lighters. Earnings comparisons also benefited from reduced losses in BIC Sport and perfume.

''Writing instruments benefited from line extensions of existing products such as our 'Hot Stic' pens, as well as substantial growth in 'Brite Liner' highlighters and 'Clic Stic' pens. The growth in sales of shavers was accompanied by higher profit margins despite increased advertising expenditures. We are currently introducing 'Pastel Shavers', a metal shaver line extension designed for women. Lighters continued to be negatively affected by the decline in the number of smokers in the U.S. and, to a greater extent, by the continued impact of low-quality, inexpensive lighters being imported from the Far East.''

STAMFORD, CT (OCT. 25) BUSINESS WIRE - Warrantech Corp.'s (NASDAQ:WTEC), wholly owned subsidiary Warrantech Dealer Based Services Inc. (WDBS) announced Thursday that it has signed a contract with Avis Rent a Car System, of Garden City, N.Y., whereby WDBS will be the administrator of vehicle service contracts sold by Avis through their Avis Buyer Satisfaction Plan.

Joel San Antonio, chairman of Warrantech, stated: ''This is the second national account WDBS has signed since we acquired them last year. BMW of North America signed a contract with WDBS earlier this year. Our agreement with Avis is for successive one-year periods and is nationwide in scope, except for Florida.''

Edward Gitlitz, vice president of car sales for Avis said: ''We were most impressed with the administrative expertise at WDBS and the company's ability to respond to our particular needs in such a precise and professional manner. After reviewing several potential options, we believe that Warrantech provides the ultimate in service contract administration services.''

David Robertson, president of WDBS said: ''Based upon our review of Avis' records, service contracts on cars sold by Avis have generated revenues of approximately $10 million annually. Consequently, if this trend continues, this contract represents a significant source of potential new revenues for WDBS.''

Warrantech administers service contracts for consumer electronic products, appliances and home office equipment. Through WDBS, the company administers service contracts for automobiles and recreational vehicles.

STAMFORD, CONN. (OCT. 25) BUSINESS WIRE - Trenwick Group Inc. reported earnings of 65 cents per share in the third quarter of 1990, an increase of 18 percent compared to earnings per share of 55 cents in the third quarter of 1989.

Earnings per share of $1.83 for the nine months ended Sept. 30, 1990 increased 17 percent compared to $1.57 in 1989.

Consolidated net income of $4.4 million in the third quarter of 1990 increased 5 percent compared to consolidated net income of $4.2 million in the third

quarter of 1989.

Consolidated net income of $12.9 million for the nine months ended Sept. 30 increased 8 percent compared to $12 million for the first nine months ended Sept. 30, 1989. Trenwick's net income for the quarter and nine months ended Sept. 30, 1990 includes a fresh start benefit of $85,000, or 1 cent per share and $236,000, or 3 cents per share, respectively.

Fresh start benefits of $61,000, or 1 cent per share and $348,000, or 5 cents per share were included in the company's net income for the third quarter and nine months ended Sept. 30, 1989, respectively.

HORSHAM, PA. (OCT. 25) BUSINESS WIRE - Advanta Corp. (NASDAQ:ADVN) Thursday announced record earnings for the third quarter ended Sept. 30 with net income

of $3.9 million or 42 cents per share.

These results reflect a 47 percent increase from the comparable quarter in 1989 which yielded net income of $2.7 million or 26 cents per share. Extraordinary income in 1989's third quarter was $2.2 million or 22 cents per share, primarily attributable to the repurchase of debt.

Richard Greenawalt, president and chief operating officer commented, ''We are very pleased with our results thus far this year. Of particular note is that we were able to achieve these record results while continuing to strengthen our reserves as a precautionary measure in light of recessionary pressures. We remain confident that 1990 will be another year of record earnings and look ahead to 1991 to continue to build the earnings and capital base of the company.''

Earnings were up on a year-to-date basis as well for the quarter. Net income before extraordinary income was $10.9 million or $1.14 per share for the nine months ended Sept. 30 versus $7.5 million or 78 cents per share for the comparable 1989 period. Extraordinary income for the 1989 nine-month period was $3.3 million or 24 cents per share.

Advanta continued to leverage its revenue generating capacity with net revenues up 58 percent in the third quarter versus a year ago. This increase was well above the 32 percent growth in average gross receivables over the same period. Meanwhile, the company realized further improvements in operating expenses, with the operating expense ratio declining to 4.1 percent in the third quarter of 1990 versus 5.3 percent a year ago.

Despite recessionary pressures, no material deterioration has occurred in the asset quality of the credit card portfolio. Nonperforming credit card receivables (including off-balance sheet serviced portfolios) as a percentage of gross receivables moved up just slightly to 1 percent at Sept. 30 from .9 percent last quarter.

Advanta Corp. is a financial services holding company which services assets in excess of $2.3 billion at Sept. 30. Through subsidiaries, the company markets credit cards, home equity loans, equipment leases and deposit products to consumers nationwide.

#90298b0662 10/25/1990 ~Business Wire

TORRANCE, CALIF. (OCT. 25) BUSINESS WIRE - Sunrise Medical Inc. (NASDAQ:SNMD) announced Thursday record sales and earnings for the first quarter ended Sept.

28, 1990.

Sales accelerated 23 percent to $48.1 million in the quarter, the highest rate of internal growth in the company's history. Expenses were well controlled, causing net income to increase to $1.7 million, 98 percent over the prior year. Earnings per share of 32 cents (fully diluted) advanced 68 percent from last year's figure of 19 cents.

This was the seventh consecutive quarter of record sales and earnings vs. the comparable prior-year period. Over that time, earnings gains have averaged more than 50 percent per quarter.

Sales of Rehabilitation Products increased 31 percent this quarter, led by custom wheelchairs in both the United States and Europe, which together were up over 40 percent. Sales and profit comparisons in this segment were also helped by favorable foreign exchange rates. Sales of Recovery Products were up 14 percent, led by continued vigorous growth in our therapeutic mattress products line.

''In both our Rehabilitation and Recovery groups, operating expense growth was kept well below the revenue advance, yielding improved operating margins,'' stated Richard H. Chandler, chairman and president, Sunrise Medical Inc. ''Our corporate operating margin rose to 9.1 percent this year from 8.2 percent last year. Meanwhile, interest expense dropped 18 percent. The result was a marked improvement in our net income margin, one of our key financial objectives for fiscal 1991.''

Sunrise Medical designs, manufactures and markets internationally medical products used in the rehabilitation and recovery phases of patient care. Products include custom manual and power wheelchairs, ambulatory and bath safety aids, patient room beds and furnishings and specialty mattresses for the management of pressure sores. Sunrise products are designed to meet the needs of three customer groups: the disabled, the geriatric and the bed-confined patient.

#90298b0664 10/25/1990 ~Business Wire

PHOENIX (OCT. 25) BUSINESS WIRE - Phoenix-based America West Airlines announced that it has begun to offer a new discounted one-way ticket for many travelers headed to/from Phoenix or Las Vegas.

The new fares are 25 percent below the full fare coach price. The ticket requires a four day advance purchase.

Marilyn Hoppe, vice president of pricing and revenue management for the airline said, ''Quite frankly, we are offering these fares because we believe that in some cases, the industry's unrestricted one-way fares have actually risen too much.'' She continued, ''The cities where these new fares are being offered did not have discounted one-way tickets.''

''Businesses normally will cutback on travel expenses during a soft economy. We believe that America West will be able to assist U.S. corporations to get through this soft period by providing them with an opportunity to take advantage of substantially lower fares,'' Hoppe stated.

''These are not promotional fares. We have created a completely new fare category that offers excellent new prices in many of our markets,'' she concluded.

America West currently operates one of the world's most modern, fuel efficient fleets including Boeing 747s, 757sm 737s and de Havilland Dash 8s. The average age of the carrier's fleet is less than seven years. America West is currently the national champion in on-time performance for 1989, 1988 and since the Department of Transportation began mandatory reporting in 1987.

As a result of a recent DOT route authorization, the airline will begin its first overseas international operation with new, daily service between Honolulu and Nagoya, Japan, in early 1991.

HINTON, VA (OCT. 25) BUSINESS WIRE - WLR Foods Inc. (NASDAQ: WLRF) Thursday reported results for the first quarter of fiscal 1991 ended September 29, 1990.

Net sales for the 1991 first quarter were $132,954,000 compared with $127,068,000 in the same period of fiscal 1990. Net earnings were $5,015,000 or $0.48 per share versus $6,521,000 or $0.63 per share in the comparable period last year.

All per share figures have been adjusted for a 3-for-2 stock split distributed May 9, 1990. All figures also reflect the acquisition of Cassco Ice & Cold Storage in April of 1990, which is accounted for as a pooling of interests.

Commenting on the results, James L. Keeler, President and Chief Executive Officer, said, ''Our results for the fiscal first quarter were strong in a

period of weaker quoted market prices for poultry. They did not match those of the 1990 first quarter, which was the first quarter to fully benefit from our improved chicken operation. However, the profitability of our chicken subsidiary was in line with last year's profitability for the same quarter, despite a 5.1 percent decrease in average quoted market prices for chicken which was offset by increased sales volume. Profitablity of the turkey subsidiary was not as strong this quarter as the first quarter of last fiscal year due in part to the 3.6 percent decrease in average quoted market prices for turkeys.''

Keeler continued, ''Several other factors impacted our turkey subsidiary. Inventories of frozen whole turkeys, for all of which the Company had customer orders, were higher at the end of this year's first quarter, compared to same quarter last year. These inventories have already been reduced and will all be delivered during the holidays.

The Company's financial condition at September 29, 1990 remained strong. Working capital was $45,008,000 and the current ratio was 2.1 to 1. Long-term debt-to-equity was 3.6%. Shareholders' equity increased to $112,484,000 or $10.69 per share.

WLR Foods, Inc. is engaged in fully integrated turkey and chicken production, processing, further processing and marketing. The Company is the eighth largest poultry processor/further processor in the United States.

#90298b0678 10/25/1990 ~Business Wire

STOCKHOLM, SWEDEN (OCT. 25) BUSINESS WIRE - Ericsson and the Austrian Bank Creditanstalt-Bankverein, as a leader of a group of Austrian investors, have reached an agreement in principle with the present owner E. Harold Schrack to buy Schrack Elektronik.

Creditanstalt-Bankverein will take over 49.5 percent of the shares of the company and Ericsson will take 33.5 percent. The rest will remain with E. Harold Schrack. A contract will be signed within two months.

The Schrack companies effected by the acquisition have an annual turnover of ATS 2.4 billion (USD 220 million) and employing 1,900 people. Schrack is located in Vienna and has manufacturing facilities in Kindberg.

Schrack supplies public telephone exchanges to Austrian Telecom and has also a

strong customer base in the private communications market. The company has installed more than 10,000 private telephone systems. Among its customers are the national railways, the national defense, the government and several major banks.

Ericsson's private branch exchanges (PBX's) have been sold by Schrack since the end of the 1970's. Schrack started license manufacture of MD110, Ericsson's digital PBX, in 1984. The MD110 is sold in Austria, as well as in some Eastern European countries, through Schrack. Schrack also markets Ericsson's mobile terminals.

Ericsson is an international leader in telecommunications. Ericsson is recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson is also a leading supplier of electronic defense systems.

Ericsson has 70,000 employees and operations in 80 countries. Turnover in 1989 was SEK 40 billion. Research and development costs for 1989 corresponded to 11 percent of turnover.

Creditanstalt-Bankverein is the largest bank in Austria with total assets of approximately ATS 450 billion (USD 41 billion).

#90298b0679 10/25/1990 ~Business Wire

ATLANTA (OCT. 25) BUSINESS WIRE - ''The Southern Company will take an after-tax charge against earnings of up to $240 million or 75 cents a share after the Supreme Court of Georgia this week refused to review a decision by the state public service commission disallowing a portion of our investment in the Vogtle nuclear plant,'' Southern Company President Edward L. Addison said today.

The charge will be reflected in Southern Company earnings for September. Those results were released on Oct. 22 and will now be restated to take into account this latest development. The Financial Accounting Standards Board requires any costs that are determined nonrecoverable to be charged against earnings once that determination is made.

The Sourhtern Co. had reported earnings for the 12 months ending Sept. 1990, of $841 million or $2.66 per share. Restated earnings for this period will be available in a few days, as soon as the exact amount of the charge against earnings is determined.

Addison said, ''...the write-off will significantly erode the company's

financial results in the short-term, but in and of itself the write-off will not prevent us from maintaining the dividend we're paying to our stockholders.''

The Southern Company's most recent quarterly dividend of 53-1/2 cents per share is equivalent to an annual per-share dividend of $2.14.

In making today's announcement, Addison emphasized that, ''...the fundamentals of our business are strong and the company's financial condition is sound. We're disappointed in the court's decision, but after several years the legal issues surrounding the recovery of our investment in Plant Vogtle are now substantially resolved.''

The Southern Co. (NYSE:SO) is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric.

#90298b0681 10/25/1990 ~Business Wire

LOS ANGELES (OCT. 25) BUSINESS WIRE - Coast Savings Financial Inc. (NYSE/PSE:CSA), reported Thursday that primarily as a result of the establishment of additional general loan loss reserves, it realized a net loss of $24.4 million, for the quarter ended Sept. 30, 1990, compared with a net loss of $92.2 million, for the third quarter of 1989.

The fully diluted net loss per share totaled $1.60, for the third quarter, compared with a fully diluted net loss per share of $6.03, for the year-earlier period.

The net loss for the first nine months of 1990 totaled $47.2 million, compared with a net loss of $80.4 million, for the first nine months of 1989. The fully diluted net loss per share was $3.11, for the nine months ended Sept. 30 1990, compared with a fully diluted net loss of $5.27, for the year-earlier period.

''We are now in the final stages of Coast's initial joint examination by the Office of Thrift Supervision and the Federal Deposit Insurance Corp.,'' said Ray Martin, chairman and chief executive officer.

''While no significant adjustments to specific loan and real estate loss reserves have resulted from the review, the third-quarter results include the establishment of an additional $61 million of general loan loss reserves and elimination of Coast's $7.2 million investment in core deposit premiums. These actions were taken following consultation with the federal regulatory

agencies regarding evolving industry and regulatory practices.''

''Importantly, Coast continues to exceed all currently applicable regulatory capital requirements. At the end of the third quarter, Coast's tangible, leverage (core) and risk-adjusted capital ratios were 1.52, 3.02 and 6.74 percent, respectively, compared with the minimum required ratios of 1.50, 3.00 and 6.40 percent, respectively.

Coast Savings Financial, is the holding company of Coast Federal Bank, FSB. With assets over $10 billion, Coast is one of the nation's largest thrift institutions. Coast's primary emphasis is on residential real estate lending and retail banking provided through 120 retail banking offices and eight regional mortgage-lending centers located throughout California.

#90298b0685 10/25/1990 ~Business Wire

LAGUNA HILLS, CALIF. (OCT. 25) BUSINESS WIRE - Newport Pharmaceuticals International Inc. (NASDAQ:NWPH) and Direct Pharmaceutical Corp. (NASDAQ:DPRX) jointly announced Thursday that they have signed a letter of intent which provides that Newport will acquire certain assets of Direct's mail-service pharmacy subsidiary, Mailscripts Inc., including its customer base and operating facility.

Under the terms of the letter of intent, Newport will pay $2.1 million in marketable common stock of Newport and will issue a warrant to Direct for the purchase of an additional 400,000 shares of Newport's common stock.

Mailscripts is a rapidly growing mail-service pharmacy with a dispensing facility located in Columbus, Ohio. It serves primarily the Midwest prescription drug benefits market and is currently operating at a $7.5 million annualized revenue rate.

Newport's subsidiary, America's Pharmacy Inc. (API) serves the entire U.S. market and is currently operating at an annualized revenue rate of over $50 million from a dispensing facility located in Des Moines, Iowa.

The closing of the acquisition is anticipated to occur in December 1990 following the fulfillment of conditions incidental to the closing.

Commenting on the acquisition, Newport's president and chief executive officer J. Roberts Fosberg, stated: ''We are excited to be adding Mailscripts' customer base to API's mail-service pharmacy business. This is the third mail-service pharmacy business acquired by Newport since it began its program of diversification in 1987.

Newport Pharmaceuticals International is a diversified health-care company with headquarters in Laguna Hills. Direct Pharmaceutical has headquarters in St. Louis.

SANTA ANA, Calif. (OCT. 25) BUSINESS WIRE - BE Avionics Inc., (NASDAQ:BEAV) Thursday announced that its board of directors had authorized the repurchase of up to 1 million shares of the company's common stock.

BEA presently has 6,868,194 shares of common stock outstanding. The shares may be purchased from time to time in open market regular or block transactions.

A company spokesperson stated that up to 500,000 shares of the total repurchased could be used to reduce dilution associated with the issuance of shares under employee stock option programs.

With more than 150 commercial airline customers, BE Avionics Inc., is the world's leading supplier of passenger control units for in-plane audio and video entertainment and service systems.

#90298b0692 10/25/1990 ~Business Wire

WOODLAND HILLS, CA (OCT. 25) BUSINESS WIRE - 20th Century Industries (NASDAQ: TWEN), the Woodland Hills-based insurance holding company, reported earnings per share for the three months ending Sept. 30, 1990 of $1.05. This compared with earnings per share of $1.04 for the same period last year, according to Louis W. Foster, chairman.

Foster also announced the attainment of a major corporate mark: during the quarter the insurance subsidiaries passed the one million policy mark. Autos insured were 838,000; home and condominiums numbered 160,000 and personal liability policies were 6,000. In total, policies in force climbed 14.2 percent over a year ago to 1,004,000.

Net income for the third quarter was $27 million on revenues of $205.4 million compared with net income of $26.8 million on revenues of $179.4 million for the same period in 1989.

For the nine months ending Sept. 30, the company reported earnings per share

of $2.30, revenues of $589.4 million and net income of $59.2 million. This compared with the earnings per share of $2.68, revenues of $522.7 million and net income of $68.8 million for the same period in 1989 (earnings per share for the nine months included pre-tax realized investment gains of 12 cents in 1990 and seven cents in 1989).

At the end of the nine-month period, the company has accrued $35 million as pre-tax deferred revenue because of Proposition 103's rollback provision. The company believes that it has made an adequate provision and does not need to defer any additional amount for this purpose. Highlights for the period include:

- Net premiums written increased from $163.1 million to $183.6 million comparing the third quarter of 1990 to 1989. For the nine-month period, net premiums written were $546.4 million, up 12.9 percent.
- Net investment income rose by 17 percent in the quarter compared with the same period a year ago; for the nine-month period it rose 18 percent compared with 1989.
- Stockholders' equity stood at $366.8 million as of Sept. 30, 1990, and book value per share was $14.28 compared with $11.67 at Sept. 30, 1989.
- The combined ratio on GAAP was 94.8 for the quarter and 98.0 for the nine months.
- Assigned-risk policies declined from 54,697 as of June 30 to 52,541 as of Sept. 30.

Foster said a direct mail and newspaper ad campaign for homeowner's and condominium policies in Northern California had been very successful, especially in the Sacramento area.

He said the company's losses associated with the state's mandated assigned-risk plan are expected to be reduced in coming periods. The state has approved the use of toughened eligibility certification procedures and has authorized an 85 percent interim rate increase. The premium impact of the rate increase will be earned incrementally over a two-year period.

#90298b0702 10/25/1990 ~Business Wire

NASHVILLE, TENN. (OCT. 25) BUSINESS WIRE - Surgical Care Affiliates Inc. (NASDAQ/NMS:SCAF) the Nashville-based outpatient surgery center company Thursday announced record operating results for the third quarter and nine months ended Sept. 30, 1990.

Revenues for the third quarter ended Sept. 30, 1990, were $29,193,918, compared to revenues of $20,608,431, for the same quarter of 1989. This was an increase of 42 percent for the period. The company reported net income of $3,055,686, or 13 cents per share for the third quarter of 1990, vs. $1,666,685, or 7 cents per share for the third quarter of 1989, an earnings increase of 83 percent.

For the nine month period of 1990, net revenues were $86,660,909, compared to revenues of $59,499,989 for the same nine-months of 1989, an increase of 46 percent. The company reported net income of $8,160,782, or 35 cents per share for the first nine months of 1990, vs. $4,474,354, or 20 cents per share for the same period of 1989, an increase of 82 percent.

Ken Melkus, president of Surgical Care Affiliates Inc., stated: ''Results for the third quarter of 1990 continue at a record level of profitability and surpassed each of the preceding 17 quarters. The major factor contributing to these record financial results was the volume of surgical procedures performed at our centers.

''Specifically, total case load during the quarter for all of SCA's centers increased by 35 percent and the same center growth for facilities in SCA's system during the third quarter of 1989 grew by 16 percent. Volume increases of this magnitude resulted in operating margins rising to an all-time high of 42 percent for the company.''

During the third quarter of 1990, the acquisition of the Scranton Surgery Center in Scranton, Pa., was finalized. The center will be joint ventured with local physicians in the Scranton community. SCA plans to replace the existing center by constructing a new facility with opening scheduled for early 1991.

Surgical Care currently operates 30 surgery centers in 16 states, a diagnostic center and an HMO.

#90298b0706 10/25/1990 ~Business Wire
BLUE BELL, PA. (OCT. 25) BUSINESS WIRE - Unisys Corp. Thursday added a new high-end model to its System 80 line of mainframe computers and delivered LINC the corporation's industry-leading CASE tool, to the System 80 user community.

The announcements came as part of a live Unisys Business Television (UBT) program that was beamed by satellite from the Unisys studio in Princeton, N.J. to System 80 customers hosted at Unisys facilities across the country. Viewers were able to phone in questions to Unisys program hosts in a ''talk show'' format.

The new System 80 Model 50 is up to three times faster than the current high-end (Model 20), and it supports four times the memory.

In addition to offering users more power and memory for their existing OS/3 applications, the new Model 50 supports two Input/Output (I/O) interfaces: the System 80 standard Selector Channel (FIPS) interface, and the industry-standard Small Computer System Interface (SCSI).

Unisys also announced that its LINC II product is now being shipped to System 80 users. The UBT program included a profile of one of the first System 80 users of this Unisys Upper- and Lower- CASE systems generation tool. Using LINC II, this customer was able to develop the specifications for 50 System 80 applications in just seven weeks. Availability and Pricing

The Unisys System 80 Model 50 ranges in price from US $350,000 to $540,000, depending on configuration options. Unisys will begin volume shipments of the Model 50 in the second quarter of 1991. New Model 50 Expands Unisys System 80 Performance Range

The new Unisys Model 50 expands the object-code compatible performance range of the current System 80 family, which includes Model 7E, 15, 20 and 50, to a factor of 10. Its advanced VLSI design requires only 49 percent of the

cooling and 64 percent of the power consumed by the Model 20, and it occupies only 28 percent of the floor space.

GREAT NECK, N.Y. (OCT. 25) BUSINESS WIRE - For the first quarter of fiscal 1991, ended Sept. 28, 1990, Avnet Inc. (NYSE:AVT) Thursday reported net income of $17.7 million, or 49 cents per share, on sales of $438.8 million compared with last year's first quarter net income of $16.3 million or 45 cents per share, on sales of $438.0 million.

Avnet's Chairman and Chief Executive Officer, Leon Machiz, said that the higher net income resulted from improved Electronic Marketing Group earnings as a result of expense reduction and asset management programs and higher sales. The Group's first quarter sales were $355.2 million compared with $342.6 million in the prior year's first quarter.

The Video Communications Group's first quarter earnings were flat but its sales were substantially lower due to its disposing of its Taiwanese home stereo and computer manufacturing operations last year. While Group sales accounted for only 8% of Avnet's consolidated sales vs. 10% last year, the sales of its continuing operations at Avnet Malaysia and Channel Master were each higher than in last year's first quarter.

The Electrical and Industrial Group's sales, which accounted for 11% of first quarter consolidated sales compared with 12% last year, were slightly lower and its earnings considerably lower than in the prior year period due largely to a difficult business environment in the industrial sector.

Machiz pointed out that despite flat overall sales and declining gross profit margins, Avnet's net margins increased to 4.0% of sales in the first quarter of fiscal 1991 from 3.7% in the prior year's first quarter.

BENTON HARBOR, MI (OCT. 25) BUSINESS WIRE - Whirlpool Corp. (NYSE: WHR) today reported that third-quarter earnings declined, consistent with further softening of the North American market for major appliances and growing pressures on margins. At the same time, net revenues increased and the company showed improvement in the performance of its European and Brazilian operations.

Whirlpool said its third-quarter net earnings were $60 million or 86 cents per share, including an after-tax gain of $23 million, or 33 cents per share, from the sale of assets to a joint venture with Matsushita Electric Industrial Co. Ltd., to manufacture vacuum cleaners at the former Whirlpool facility in Danville, Ky.

Excluding the Danville sale, third-quarter 1990 net earnings were $37 million, or 53 cents per share, compared with $47 million, or 68 cents per share, during the third quarter of 1989. Equity interest in Whirlpool's Brazilian operations contributed 15 cents per share in the quarter, compared to 19 cents per share in the same 1989 period.

Minus Brazil's results and the sale of the Danville assets, third-quarter net earnings were $26 million, or 38 cents per share in 1990, down 22 percent from $34 million, or 49 cents per share, in 1989. Consolidated net revenues increased to $1.7 billion in the quarter, up 10.8 percent from $1.5 billion in 1989.

Net earnings for the nine months ended September 30 were $126 million, or $1.82 per share, versus $138 million, or $1.99 per share, in 1989.

Excluding Brazil and the gain on the floor care business, net earnings for the first nine months of 1990 were $117 million, or $1.68 per share, up 3.2 percent from $113 million, or $1.63 per share, in 1989. Consolidated net revenues for the first nine months of 1990 were $5.0 billion compared to $4.7 billion in 1989, a 6.2 percent increase.

In both the third-quarter and nine-month comparisons, increases in net revenues resulted primarily from favorable currency exchange rates; however, third-quarter gains were also bolstered by strong European unit sales. Rises in net revenues and gross margins were offset by higher selling and administrative expenses and increased interest expense.

"Given the current worldwide economic picture and resulting decreased demand for major appliances in North America, our sales performance during 1990 has been good," said David R. Whitwam, Whirlpool chairman, president and chief executive officer.

Whirlpool Corp. is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, the company manufactures in ten countries and markets products under nine major brand names in more than 45 countries.

DALLAS (OCT. 25) BUSINESS WIRE - The Southland Corp. announced Oct. 24 that the U.S. Bankruptcy Court for the Northern District of Texas, Dallas Division, has authorized the immediate use of $100 million in Debtor In Possession (DIP) financing.

The court set Nov. 14, 1990, as the final hearing date on Southland's request to use the balance of the $400 million DIP facility that Southland has arranged for a syndicate of lenders to provide.

In addition, the court scheduled a confirmation hearing for Southland's prepackaged reorganization plan for Dec. 14, 1990.

Citing the importance of ensuring the continuation of normal operations at the company, the court also authorized Southland to pay amounts equal to outstanding trade balances to those trade creditors who agree to restore normal credit terms to Southland. In the event those trade creditors do not maintain normal credit terms, they will be obligated to refund such otherwise unrestricted deposits to Southland.

In addition, the court approved a motion to assume all of Southland's 7-Eleven franchise agreements, but gave creditors until November 9 to raise objections. The court also approved the payment of employee wages and salaries and the continuation of all health benefit plans.

During the day-long hearing, the court approved the company's motions to maintain bank accounts, continue its cash management system, and pay pre-petition beer drafts and lottery obligations.

Southland filed its bankruptcy petition and a prepackaged reorganization plan early yesterday under Chapter 11 of the U.S. Bankruptcy Code. In connection with the filing, Southland arranged for a syndicate of lenders to provide up to $400 million in DIP financing to be used as working capital during the bankruptcy case.

Southland's case number is 390-37119-HCA-11. Judge Harold Abramson is hearing the case.

PURCHASE, NY (OCT. 25) BUSINESS WIRE - JWP Inc. (NYSE: JWP), a multinational technical services company, announced Thursday that net income for the third quarter of 1990 increased by 25 percent to $16 million compared to $12.8 million in the third quarter of 1989.

Third quarter revenues increased 44 percent to $745 million from $515 million in the year-ago period. On a per share basis, earnings for the third quarter increased to $.42 from $.36 in the prior year.

For the nine months ended Sept. 30, revenues and earnings increased by 49 percent and 32 percent to $2.048 billion and $43.2 million, respectively, over last year's comparable period. On a per share basis, earnings for the nine months increased to $1.14 per share from $.94 per share.

Current and historical results include the acquisition of Neeco Inc., which was accounted for as a pooling of interests. Per share results have been adjusted to reflect a three-for-two stock split effected July 16.

Andrew T. Dwyer, JWP's chairman of the board and president, commented that, "Although business is being affected by recessionary pressures, JWP's market leadership, multiple product lines, broad coverage of the marketplace and financial strength continue to provide opportunities for continued growth in revenues and profits.

"Our customers, which include a majority of the leading U.S.-based corporations and many large, multinational firms based outside the United States, continue to upgrade their facility and information systems to increase productivity, reduce costs and clean up the environment."

Backlog at Sept. 30, remained at $1.5 billion, up from year ago levels, but unchanged over the prior quarter. Dwyer added that "during a period of economic slowdown, we expect to capitalize on our superior position in the marketplace to increase market share and to concentrate on improving operating efficiencies."

By the end of October, the company expects to complete the acquisition of Compumat Inc., a supplier of computer and network systems with offices in Chicago, Indianapolis, Atlanta and Jacksonville.

JWP, a multinational technical services company, provides integrated solutions to complex engineering, information, and environmental challenges with more than 120 offices and 20,000 employees serving 60 major markets and 40,000 customers.

HAYWARD, CALIF. (OCT. 25) BUSINESS WIRE - Carolyn Bean Publishing, Ltd., released the following preliminary earnings as of Sept. 30, 1990:

Carolyn Bean Publishing, Ltd.
(Unaudited)

	Quarter		Year to date	
	1990	1989	1990	1989
Sales	$1,223,134	$1,095,399	$2,446,153	$2,658,848
Net profit (loss)	$ 167,062	$ (215,830)	$ (59,315)	(1,009,081)
Net profit (loss) per share	28 cents	(65 cents)	(15 cents)	$ (3.11)

Company president, Bruce Wilson, commented: ''Our anticipated results for 1990 are expected to show better than an 80 percent improvement versus our 1989 loss of $1,584,000. Our revised Marketing Plan to focus on our cause related businesses like the Sierra Club, ASPCA and MADD combined with aggressive overhead cuts has resulted in significant financial improvement versus prior periods.

''We feel that we have formed the foundation for profitable growth in 1991 and beyond as evidenced by our results to date and such potential new sources of sales such as the upcoming Christmas card test market in 50 of Wal-Mart's estimated 1,500 outlets.''

#90298b0720 10/25/1990 ~Business Wire

LOUISVILLE, KY (OCT. 25) BUSINESS WIRE - Kentucky Medical Insurance Co. (NASDAQ/NMS:KYMDA) reported higher operating earnings for the quarter ending Sept. 30, 1990.

Third-quarter operating income for the medical professional liability insurer was $1.2 million, or 84 cents per share, compared with $1.1 million, or 82 cents per share, for the same period in 1989.

Revenues decreased to $5 million from the prior period's level of $5.8 million.

Net income was $1.2 million (84 cents per share), a decrease from $1.3 million ($1.01 per share) in 1989. Net income for the third quarter of 1989 included an extraordinary tax credit of $253,000, or 19 cents per share.

Earnings per share were calculated on 1,438,887 and 1,275,823 average shares

outstanding for the quarters ending Sept. 30, 1990, and 1989, respectively.

Lester said revenues for the quarter decreased to $5 million from $5.8 million resulting from lower rates and a shift of policy renewal dates.

Since the 12.5 percent average rate reduction and other rate credits were implemented in January, policyholder counts have increased. Kentucky Medical is the principal provider of medical professional liability insurance for the state's physicians.

For the nine months ending Sept. 30, 1990, operating income increased to $2.5 million from $2.3 million. Net income fell to $2.5 million from $3.1 million, a figure which included an extrordinary tax credit of $825,000. Total revenues fell to $14.9 million from $17.1 million.

In addition, for the first time in the company's history, total assets exceeded $70 million, or 7 percent higher than at the previous year end. During the same period, book value increased 20 percent to $9.62 from $7.99.

Kentucky Medical Insurance Co. is a major medical professional liability insurance carrier for Kentucky's doctors. The company insures hospitals, healthcare facilities, dentists, oral surgeons and healthcare professionals. It also offers investment, leasing and other insurance services to the Kentucky medical community.

ENGLEWOOD, CO (OCT. 25) BUSINESS WIRE - Electromedics Inc. (NASDAQ:ELMD) reported that for the third quarter ended Sept. 30, 1990 revenues were up 17 percent to $7,177,000 and net income increased 36 percent to $204,000.

This compares to the third quarter of 1989 revenues of $6,130,000 and net

income of $150,000. Revenues for the nine months ended Sept. 30, 1990 were a record $21,269,000 vs. $18,617,000.

''The increase in revenues for the third quarter and nine months of 1990'' according to F. James Lynch, chairman and chief executive officer, ''was primarily due to continued growth in autotransfusion software, disposable temperature probes and international sales.''

Lynch stated that ''Although a one-time gain of $52,000 from an award for legal action added to our third quarter profit, we are pleased with our continued improvements in manufacturing efficiencies and our sales growth without the benefit of new products.''

Net income for the first nine months ended Sept. 30, 1990, was $283,000 as compared to $649,000 for the corresponding period in 1989. Net income for nine months of 1990 was negatively affected by a $141,000 extraordinary (non-cash) write-off from early retirement of debentures, a $323,000 increase in interest expense and $680,000 of additional expenditures in the areas of research and development, quality assurance, administration, product management and regulatory affairs which were required for the company's continued growth.

Lynch stated, ''The company has never been in a better posture for growth. Our strong financial position, superior personnel and new products being released in the marketplace will enable us to expand faster than ever before.

''The company's four new products, the TCPM II orthopaedic tourniquet, the AT500P/PRP machine which performs autotransfusion, platelet-rich plasma sequestration and therapeutic aphersis, the arterial filter and the cost effective wound drainage system should begin to produce revenues in the fourth quarter, but it will be 1991 before these products generate significant revenues and gross profits.''

Electromedics Inc. develops, manufactures and markets a proprietary line of autotransfusion equipment and related disposable medical supplies which permits the purification and recirculation of a patient's own blood during surgery.

The company also manufactures cardiovascular disposable products, as well as a line of digital electronic temparature monitoring devices and disposable probes.

#90298b0743 10/25/1990 ~Business Wire

TORONTO (OCT. 25) BUSINESS WIRE - Stake Technology Ltd. (NASDAQ:STKLF) and

Chesapeake Corp. (NYSE:CSK) announced Thursday the formation of a partnership to market a revolutionary system that will use steam explosion technology for the recylcing of waste papers such as old corrugated containers (OCC), old newspapers (ONP) and mixed office waste.

This new proprietary technology is a product of joint research undertaken by Chesapeake and StakeTech. The partnership will bring together the technology of StakeTech in recovering solid waste materials for recycling and the expertise in producing paper products from secondary fibers.

This patented system will provide a flexible and cost effective alternative for pulping and drinking deinking secondary fiber. When fully operational, the environmentally friendly steam explosion system will be more compact and more energy efficient than conventional deinking facilities.

The introduction of this revolutionary system is timely since the paper industry has pledged to increase the amount of waste paper recovered from 25 percent today to the practical maximum limit of 40 percent in 1995. To achieve this undertaking, the paper industry will be required to invest more than $3 billion in conventional processing equipment.

With this technology, the goal of 40 percent recovery is made more achievable because of the lower capital requirement and the reuse of some waste paper, such as wet strengths, that is not recoverable today.

The partnership will manage the continued research of this innovative system through the operation of a developmental facility. Furthermore, the partnership will market this new technology through license agreements with waste paper handlers such as municipal recycling centers, landfill operations, waste management and paper mills.

Chesapeake Corp. is an integrated paper and forest products company that produces and markets kraft, tissue, packaging and treated wood products. Stake Technology Ltd. is a technology company based in Toronto that owns and licenses the StakeTech process which, through continous steam explosion, converts solid waste biomass into higher-value end products.

NEW ORLEANS (OCT. 25) BUSINESS WIRE - The Louisiana Land and Exploration Co. (NYSE:LLX) (''LL&E'') Thursday reported third quarter 1990 unaudited consolidated net earnings totaling $8.2 million, or 29 cents per share, up approximately 5 percent from the same period in 1989.

In 1989's third quarter, LL&E earned $7.8 million, or 27 cents per share.

The impact of higher crude oil prices in this year's third quarter was mitigated by much lower natural gas prices than in last year's third quarter. Crude and condensate prices averaged $23.46 per barrel during 1990's third quarter, up over 35 percent from the 1989 third quarter average of $17.16 per barrel.

Crude and condensate production volumes rose marginally during the quarter despite temporary shut-ins of certain domestic properties for workovers and repairs.

Domestic natural gas sales volumes rose about 5 percent from year-earlier levels, however, prices were down by nearly 25 percent to $1.57 per MCF. Weaker spot prices and the expiration of a number of premium priced gas sales contracts were responsible for the decline in domestic gas prices.

Dry holes and exploratory charges increased by $1.9 million, reflecting a higher level of drilling activity. Income tax expense was lower mainly due to a third quarter 1990 adjustment reflecting a reduction in LL&E's estimated effective tax rate for 1990.

#90298b0761 10/25/1990 ~Business Wire

BUFFALO, NY (OCT. 25) BUSINESS WIRE - American Precision Industries

(AMEX:APR) announces financial results.

Consolidated revenues declined 12 percent in the third quarter and 8 percent for the nine months as compared to last year. Net earnings declined 24 percent and 26 percent in the third quarter and nine months, respectively.

Although sales for the Electronic Products segment for the nine months declined 19 percent from last year, the segment's backlogs have improved 20 percent since the prior year-end. The Industrial Process Equipment segment sales have remained relatively constant, while backlogs have increased 34 percent since December 1989.

Overall, the company's backlogs have increased 28 percent since December 1989 and 14 percent since September 1989.

During the third quarter, the company made a decision to cease operations at its API of Florida Division prior to the end of the year. The costs associated with this decision were provided for in the second quarter ended June 29.

In addition to the lower earnings from reduced sales volume, the company's 1990 results have been adversely affected by the costs and disruption associated with the closing of two manufacturing facilities and the work stoppages and lost time surrounding contract negotiations with labor unions.

However, the company has concluded new three-year contracts with labor unions representing production employees at three plant locations. The company believes that out of these adversities, a stronger relationship has been achieved between management and labor. The company's financial position remains strong. Also these plant closings are expected to reduce costs and improve operating results.

#90298b0776 10/25/1990 ~Business Wire

INDIANAPOLIS (OCT. 25) BUSINESS WIRE - The Somerset Group Inc. (OTC:SOMR) Thursday reported net income for the quarter ended Sept. 30 of $711,000 or 40 cents per share.

This compares favorably with net income of $100,000 or 5 cents per share during the like quarter in 1989. The $100,000 net income for the 1989 quarter included a loss of $283,000 from the discontinued radio broadcasting operations.

Net income for the first nine months of the year amounted to $2,242,000 or

$1.24 per share, compared to a loss in 1989 of $392,000 or 22 cents per share, including a loss of $854,000 from the discontinued operations.

Sales of the continuing operations increased 29 percent during the quarter, compared to 1989, and were up 32 percent for the first nine months. In addition, the company's equity in earnings of First Indiana Corp. (a 23.4 percent owned subsidiary) increased from $278,000 in 1989 to $425,000 for the third quarter of 1990, and from $726,000 in 1989 to $1,221,000 for the nine months.

During October, agreement was reached for the sale of the remaining assets of the company's discontinued radio broadcasting properties, consisting of an FM station and an AM station serving the Parkersburg, W.Va., area. Closing of the transaction is pending approval of the transfer of control of the broadcasting licenses by the Federal Communications Commission, which is expected before the end of the year.

Earlier in the year, Somerset sold its Indianapolis radio station for a net gain of $909,000, following a decision in late 1989 to withdraw from the radio broadcasting industry.

In announcing the results, Robert H. McKinney, chairman and chief executive officer, stated, ''We are very pleased with the consistent progress the company is making as implementation of our strategic restructuring continues. Earnings for the first nine months are a positive indication that concentration of our efforts in our core business has been beneficial to our shareholders. We are proceeding cautiously, however, as we attempt to accurately appraise recent economic indicators and the effects of tax reform on our markets.''

The Somerset Group Inc., is a diversified public holding company which through its divisions and subsidiaries engages in three primary lines of business -- banking, construction products and services, and environmental testing.

Through its 23.4 percent investment in First Indiana Corp., whose principal subsidiary is First Indiana Bank, a Federal Savings Bank, the company operates retail banking and real estate mortgage lending centers in strategic metropolitan communities.

The company provides construction products and engineering services through its American Precast Concrete Division, one of the largest manufacturers, marketers and installers of precast/prestressed concrete building components in the Midwest.

The company provides analytical testing services for toxic and hazardous compounds in the environment through its 80 percent owned subsidiary, TMS Analytical Services Inc. This subsidiary performs services for both the governmental and private sectors.

CUYAHOGA FALLS, OHIO (OCT. 25) BUSINESS WIRE - Falls Financial Inc. (Falls) announced Thursday its intention to repurchase up to five percent of the company's 1,564,000 shares of outstanding common stock.

The repurchases will be transacted in the open market from time to time depending on the company's assessment of market conditions and subject to regulatory considerations.

Gene Stalnaker, president of Falls commented, ''The program to repurchase the stock was adopted because we recognize that it is currently priced at less than 55 percent of its book value, which provides Falls an outstanding investment and an exceptional opportunity to improve shareholder value.''

''The strong capital position of Falls Financial Inc., provides this and other opportunities that we will continue to take advantage of for the benefit of our customers, stockholders, and employees. It is our level of strength and customer service that separates us from the other financial institutions with which we compete,'' commented Howard W. Atwood, chairman and CEO of Falls.

Falls' core capital ratio at Sept. 30, was 12.23 percent. The company's common stock is traded on the NASDAQ System under the symbol ''FFII.'' Its subsidiary, Falls Savings Bank, FSB operates 11 retail banking offices in Summit and Portage Counties.

#90298b0785 10/25/1990 ~Business Wire

BIRMINGHAM, ALA. (OCT. 25) BUSINESS WIRE - Protective Life Corp. (NASDAQ:PROT) announced Thursday that its consolidated net income for the third quarter of 1990 was $7.0 million or 51 cents per share, an increase of

28 percent over the $5.4 million or 40 cents per share in the same period in 1989.

Excluding realized investment gains and losses, the company's earnings were 60 cents per share in the third quarter of 1990 as compared to 39 cents per share last year, a 54 percent increase. In the 1990 third quarter, realized investment losses were $1.9 million or 9 cents per share compared to realized investment gains of $0.2 million or 1 cent per share for that period last year.

The company's third quarter results reflect improved earnings in most of its major business segments compared to the same period in 1989.

Consolidated net income in the first nine months of 1990 was $19.2 million or $1.41 per share, compared to $16.2 million or $1.17 per share in the comparable period in 1989, an increase of 21 percent. Excluding realized investment gains and losses, earnings in the first nine months of 1990 were $1.52 per share compared to $1.11 per share in the same period of 1989, a 37 percent increase.

Realized investment losses were $2.1 million or 11 cents per share in the first nine months of 1990 compared to realized investment gains of $1.2 million or 6 cents per share for that period of 1989.

The quality of the company's assets remains high. At Sept. 30, 1990, delinquent mortgage loans and foreclosed real estate were 1 percent of assets. Bonds rated less than investment grade were less than 2 percent of assets. Although the quality of its assets remains high, the Company has established a reserve for potential future losses on investments.

#90298b0789 10/25/1990 ~Business Wire

NEW YORK (OCT. 25) BUSINESS WIRE - Inspiration Resources Corp. (ticker symbol:IRC) Thursday reported a 1990 third quarter net loss of $18.0 million, or 27 cents per share, on revenues of $306.7 million, compared with a 1989 net loss of $8.3 million, or 12 cents per share, on revenues of $281.4 million.

Excluding a 1990 non-cash charge of $16.5 million, or 25 cents per share, primarily related to the closure of an offshore gold mining project in Nome, Alaska, and 1989 charges of $5.3 million resulting from a product damage claim and clean-up of a chemical fire, IRC's third quarter net loss decreased $1.5 million, or 2 cents per share, from the previous year.

IRC reported 1990 third quarter operating income of $11.4 million, compared with 1989 third quarter operating income of $4.8 million.

IRC chairman Reuben F. Richards said that the 1990 third quarter results reflected lower losses at the corporation's agribusiness operations, higher copper prices and increased production at IRC's base metals subsidiary. Excluding the charge related to the gold operation closure, IRC would have reported a 1990 third quarter loss of 2 cents per share, he added.

For the first nine months of 1990, IRC reported net income of $6.9 million, or 10 cents per share, on revenues of $1.2 billion, compared with 1989 net income of $27.6 million, or 42 cents per share, on revenues of $1.2 billion.

During the 1990 third quarter, Terra International Inc. (''Terra''), IRC's agribusiness subsidiary, reported an operating loss of $5.1 million on revenues of $180.7 million, compared with a 1989 operating loss of $8.9 million on revenues of $170.6 million. Terra customarily reports an operating loss in the third and fourth quarters following the spring planting season. In addition, the 1989 third quarter operating loss included the charges related to the clean-up of a chemical fire and a product damage claim of a formulated agricultural chemical.

IRC's base metals operations, consisting of Canada-based Hudson Bay Mining and Smelting Co. Ltd. (HBMS) and a metals trading operation, reported 1990 third quarter operating income of $15.4 million on revenues of $93.5 million, compared with 1989 third quarter operating income of $14.4 million on revenues of $93.1 million.

The increase was due primarily to higher copper prices and increased production from HBMS's 60 percent-owned Namew Lake nickel/copper mine in northern Manitoba, which reached full production at the end of 1989. Average London Metal Exchange prices for zinc declined seven percent and nickel prices declined 14 percent in the 1990 third quarter from the year ago period. New York Comex prices for copper increased six percent from the year earlier period.

IRC's coal operations reported a 1990 third quarter operating loss of $1.7 million on revenues of $21.9 million, compared with a 1989 third quarter operating loss of $2.7 million on revenues of $14.6 million.

Increased company and contract coal production and higher selling prices contributed to the reduced 1990 third quarter loss.

IRC's leasing subsidiary reported 1990 third quarter operating income of $2.1 million on revenues of $2.9 million, compared with a 1989 third quarter operating income of $2 million on revenues of $3.1 million.

IRC's 1990 third quarter results also included a $16.5 million equity loss from its 50 percent interest in a gold affiliate, compared with an equity loss of $1 million in the 1989 third quarter. The 1990 third quarter loss resulted

primarily from the $16.5 million charge related to the permanent shutdown of the offshore Alaska gold mining project.

IRC's construction materials operations, which were acquired in 1990, reported third quarter income of $0.8 million on revenues of $7.7 million.

Inspiration Resources Corp., which had 1989 revenues of $1.4 billion, is a diversified natural resources company that provides products and services for agriculture, mines base and precious metals and coal, produces construction materials and leases equipment.

#90298b0791 10/25/1990 ~Business Wire

NEW YORK (OCT. 25) BUSINESS WIRE - For the third quarter of 1990, Quantum Chemical Corp., reported a loss of $1.4 million, equal to 5 cents per common share, compared with a loss of $21.4 million or 83 cents per share, for the 1989 quarter.

The prior year period was adversely affected by costs associated with the fires at its Morris, Ill. chemical plant and by non-recurring debt issue expenses incurred by QFB partners, the company's Petrolane propane joint venture.

Although average selling prices for polyethylene were lower, operating profits were slightly higher in the current quarter compared to the 1989 period. Profit margins in the propane marketing business in the third quarter declined compared with the 1989 quarter principally because higher propane costs as a result of the Middle East crisis were not fully offset by increased selling prices.

Similarly, polyethylene margins have narrowed since the second quarter of 1990 as the company was unable to pass through increases in the cost of feedstocks.

Sales from continuing operations in the third quarter were $621.9 million, compared with sales of $557.7 million in the 1989 period. The average number of shares of common stock outstanding was 27.2 million in 1990 vs. 25.6 million in 1989.

Net income for the 1990 nine months was $11.5 million, or 43 cents a share, compared with $229.3 million, or $8.96 a share, in the 1989 period.

Net income for the 1989 period included $133.3 million or $5.21 per share principally from the sale of the oleochemical business. The 1990 nine months income from continuing operations decreased significantly compared to the prior year period because of lower selling prices and profit margins for all

major products of the petrochemical business.

The average number of shares of common stock outstanding was 26.6 million in 1990 vs. 25.6 million in 1989. Quantum Chemical Corp. has operations in petrochemicals and propane marketing.

#90298b0795 10/25/1990 ~Business Wire

PEABODY, Mass. (OCT. 25) BUSINESS WIRE - Warren Bancorp Inc. (NASDAQ:WRNB) Friday reported its operating results for the third quarter ended Sept. 30, 1990.

The corporation reported a net loss of $7.3 million, or $2.10 per share, for the quarter ended Sept. 30, 1990, compared with a net loss of $3.5 million, or $1.00 per share, for the comparable period in 1989. For the nine months ended Sept. 30, 1990, the corporation reported a net loss of $10.6 million, or $3.02 per share, compared with a net loss of $2.7 million, or $0.78 per share, for the nine months ended Sept. 30, 1989.

Paul M. Peduto, acting president and chief executive officer of Warren Bancorp Inc., noted that the 1990 third quarter results reflected the continuation of the regional economic and real estate market downturn that has impacted the performance of the corporation and other New England financial institutions during the past year.

These conditions have contributed to the need for a higher addition to the provision for loan losses, as well as in general to higher levels of non-performing loans which do not accrue interest, increases in real estate acquired through foreclosure and substantively repossessed (and the administrative expenses associated with acquiring and maintaining these properties) and write-downs of principal on real estate acquired through foreclosure and investments in real estate joint ventures.

In addition to real estate-related issues, Peduto noted two other items which affected the performance of the corporation during the 1990 quarter. First, the corporation recognized a loss of $1.0 million from a subordinated debenture issued by Sentry Federal Savings Bank; Sentry was declared insolvent and placed in RTC conservatorship on Sept. 21, 1990. Also, included in the 1990 third quarter non-interest expense is a charge related to the resignation of the corporation's former chairman, president and chief executive officer.

The provision for loan losses was $4.6 million in the 1990 third quarter, and $6.8 million for the first nine months of 1990, compared with $4.0 million,

and $4.8 million, respectively, for the same periods in 1989. The allowance for loan losses totaled $9.8 million at Sept. 30, 1990, compared with $6.9 million at June 30, 1990, and $5.8 million at Sept. 30, 1989; the ratio of the allowance for loan losses to total non-performing loans was 38.32 percent at Sept. 30, 1990, compared with 28.41 percent at June 30, 1990, and 23.04 percent at Sept. 30, 1989.

The allowance for loan losses at Sept. 30, 1990 reflected net loan charge-offs totaling $1.8 million during the 1990 third quarter, compared with $399,000 in the third quarter of 1989.

Peduto noted that an increased provision for loan losses and further write-downs of real estate joint ventures and real estate acquired through foreclosure were necessary in light of the sustained economic decline and the ongoing uncertainty for the short-term recovery of the region.

Net loans decreased to $425.0 million at Sept. 30, 1990, compared with $425.7 million at June 30, 1990 and $480.0 million at Sept. 30, 1989. Included in net loans at Sept. 30, 1990 are $7.8 million in condominium development loans, $11.6 million in land loans, and $2.4 million in commercial construction loans.

Loans in a non-performing status at Sept. 30, 1990, totaled $25.5 million, or 5.86 percent of loans, compared with $24.4 million, or 5.52 percent of loans, at June 30, 1990 and $25.1 million, or 5.18 percent of loans at Sept. 30, 1989. Real estate acquired through foreclosure and substantively repossessed at Sept. 30, 1990 totaled $10.5 million compared with $9.2 million at June 30, 1990, and $3.5 million at Sept. 30, 1989.

Warren Bancorp Inc. is the holding company for Warren Five Cents Savings Bank. A Massachusetts-chartered, FDIC-insured savings bank, Warren Five services the North Shore, Merrimack Valley and Cape Ann communities through eight branches and two loan offices in Peabody, Beverly, Andover and Gloucester.

HILLIARD, OH (OCT. 25) BUSINESS WIRE - HDR Power Systems Inc. (NASDAQ:HDRP) Thursday announced first quarter financial results for fiscal 1991.

Sales for the first quarter, which ended Sept. 29, 1990, were $2,205,465. This represents an 11 percent increase compared to sales of $1,991,376 recorded in the like period a year ago. This increase was primarily the result of the resurgence in custom product orders for the fourth quarter of the previous year.

Net earnings for the first quarter were $16,836, or 1 cent per share, compared

to a net loss of $(23,931), or (1 cent) per share for the comparative quarter ended Sept. 30, 1989.

Richard J. Lippott, vice president-finance stated: ''Management is very encouraged regarding the continued increase in custom-designed UPS system orders. Custom product orders were $2,667,000 for the first quarter, an increase of 55 percent compared to $1,719,000 booked in the comparative quarter last year. Also, total orders were $3,395,000 for the quarter ended Sept. 29, 1990, a 28 percent increase, compared to the $2,645,000 booked for the quarter ended Sept. 30, 1989.''

HDR Power Systems Inc. manufactures a broad line of uninterruptible power systems used in both industrial and commercial business applications.

CHICAGO/PHILADELPHIA (OCT. 25) BUSINESS WIRE - Ameritech (NYSE: AIT) and Bell Atlantic (NYSE: BEL) Thursday announced the selection of Goldman, Sachs & Co. and Merrill Lynch Capital Markets as Co-Global Coordinators of the initial public offering of stock in Telecom Corporation of New Zealand.

Salomon Brothers, who acted as an advisor to Ameritech and Bell Atlantic in connection with the acquisition of Telecom, has been named Advisor to the Selling Shareholders.

Goldman Sachs and Merrill Lynch Capital Markets will be jointly responsible for structuring the offering of Telecom stock and coordinating global marketing activities.

Ameritech, Bell Atlantic and two New Zealand companies--Fay Richwhite and Freightways--last month completed the purchase of Telecom for approximately

$2.4 billion.

To meet New Zealand Government requirements, the two U.S. companies will reduce their ownership position in Telecom to 24.95 percent over time.

Telecom is New Zealand's principal supplier of domestic and international telecommunications services to approximately 1.4 million access lines and a population base of some 3.3 million. The company also provides national and international trunk and date transmission services; cellular mobile telephone services; directory services; telephone equipment and repair and value-added services.

Ameritech is the Chicago-based parent of Bell companies serving 12 million customers in Illinois, Indiana, Michigan, Ohio and Wisconsin. Other Ameritech companies provide mobile communications, directory publishing, voice messaging and audiotex services.

Bell Atlantic Corporation is the Philadelphia-based parent of Bell telephone companies serving more than 17 million customers in the mid-Atlantic region of the U.S., and of companies that provide mobile communications, computer maintenance and financial services in national and international markets.

WALTHAM, MA (OCT. 25) BUSINESS WIRE - Infotronic and its exclusive North American distributor, Hitachi/Nissei Sangyo America (NSA) have announced software drivers for AutoCAD and Windows 3.0, running on the ultra-high resolution INFO SGX intelligent graphics controllers.

The first of future introductions, the AutoCAD and Windows drivers significantly enhance the price performance of the industry's fastest graphics controllers. With 10 MIPS of throughput, the INFO SGX controllers are 60 percent faster than conventional boards. Additionally, they feature software-selectable resolutions to 1600x1280, and through the TIGA II interface are compatible with MS-DOS, UNIX, and OS/2 environments.

The boards' inherent speed will greatly improve all applications using the Windows 3.0 driver. The SGX board with the Windows driver gives users access to hundreds of applications ranging from Lotus 1-2-3 to Pagemaker to Harvard Graphics to high-end CAD/CAM environments.

The INFO/ACAD Display List Driver defines new performance levels for AutoCAD

10, 11 and 386. INFO/ACAD is fully compatible with AutoCAD syntax, and features the Infotronic Multiviewport Orientation System (MOS). MOS helps users to recognize their location in a complicated multiviewport drawing. INFO/ACAD also supports a fast Flush command, which quickly refreshes display lists without AutoCAD's traditional regeneration function.

Infotronic S.p.A. is a major European manufacturer of graphic controllers. The company maintains a product development and OEM support organization in Austin, Texas. Its exclusive North American distributor is Hitachi/NSA.

Nissei Sangyo America is a $500 million North American trading company in the Hitachi Group. The Hitachi/NSA Office Automation Group, headquartered in Waltham, Mass., markets monitors and graphic controllers through OEMs and a network of distributor throughout North America. The toll-free number in the U.S. and Canada is 800/441-4832.

Lotus 1-2-3 is a registered trademark of Lotus Development Corp.

Windows is a trademark of Microsoft Corp.

EL DORADO, ARK (OCT. 25) BUSINESS WIRE - James V. Kelley, chairman and president of First United Bancshares Inc. (NASDAQ/NMS:UNTD), El Dorado, has reported financial results for the period ended Sept. 30, 1990.

Net income was $1.89 million, or 88 cents per share for the third quarter of 1990 an increase of 23 percent over the same period in 1989 when earnings were $1.53 million, or 72 cents per share.

Net income for the nine months ended Sept. 30, 1990, was $5.56 million, or $2.60 per share, compared with $4.50 million, or $2.14 per share during the same period in 1989.

Total assets at the end of the period were $752.27 million, as compared with $730.60 million at Sept. 30, 1989.

The annualized return on average assets for the nine-month period was .99 percent and return on average equity was 11.81 percent on an annualized basis.

Stockholders' equity rose to $64.99 million at Sept. 30, 1990, compared with $59.94 million at Sept. 30, 1989.

Book value per share at Sept. 30, 1990, was $30.42, compared with $28.06 at

Sept. 30, 1989.

FORT WORTH, TEXAS (OCT. 25) BUSINESS WIRE - Union Pacific Fuels Inc. (UPFI), the marketing subsidiary of Union Pacific Resources Company of Fort Worth, announced today finalization of a new midterm fuel supply contract to provide Bethlehem Steel Corp. with natural gas for its Sparrows Point (Maryland) plant.

Union Pacific Resources Company, the oil, gas and minerals subsidiary of Union Pacific Corporation of Bethlehem, Penn., is a major producer of natural gas in the United States and Canada, with deliverability in excess of 600 million cubic feet per day (MMcf).

Bethlehem Steel, the second largest steel producer in the United States, consumes more than 60 billion cubic feet of natural gas annually. Bethlehem's facilities are served primarily by Columbia, NGPL, ANR and Trunkline Pipeline System.

The new one-year contract provides for a market sensitive pricing provision and firm takes of six MMcf per day with firm transportation provided by Trunkline Gas Company.

Donald W. Niemiec, president of UPFI, noted, ''This fuel supply contract is hopefully the beginning of a long lasting relationship between Bethlehem Steel and Union Pacific Fuels, and represents a market responsive contract which is advantageous to both companies.''

#90298b0832 10/25/1990 ~Business Wire

BIRMINGHAM, AL (OCT. 25) BUSINESS WIRE - Vulcan Materials Co. (NYSE:VMC) Thursday announced that third quarter sales and earnings were down from last year's record levels.

Sales of $306,596,000 were slightly below the $307,237,000 reported for 1989's third quarter. Pretax earnings totaled $63,541,000, down 17 percent from the $76,498,000 earned in the third quarter of 1989. Net earnings and earnings per

common share amounted to $42,128,000 and $1.08, down 17 percent and 14 percent respectively, from last year's third quarter results of $50,473,000 and $1.25.

Earnings per share declined at a lesser rate because of share repurchases.

The third quarter effective tax rate of 33.7 percent was slightly below the comparable 1989 rate of 34.0 percent.

For the first nine months, sales were a record $834,298,000, up 2 percent from last year's level of $818,464,000. Pretax earnings totaled $151,789,000, off 9 percent from the $166,433,000 reported for the first nine months of 1989.

Net earnings and earnings per share before the cumulative effect of accounting changes were $100,469,000 and $2.57, down 8 percent and 5 percent, respectively, from the $109,713,000 and $2.70 earned in the first nine months of 1989.

The company adopted two accounting changes in the first quarter of 1989; the cumulative effect of these changes resulted in after-tax income of $1,490,000. With that income included in last year's nine months results, corresponding 1990 net earnings and earnings per share reflect declines of 10 percent and 6 percent, respectively.

Construction Materials sales were at an all-time quarterly high of $203,175,000, up 1 percent from last year's level due to slightly higher volume. The volume increase resulted from acquisitions made since the third quarter of 1989, particularly the initial impact of the Reed companies acquired on Sept. 6, 1990.

Excluding the effect of acquisitions, stone shipments were 4 percent lower than last year's third quarter level. Sales of the Chemical segment totaled $103,421,000 in the third quarter, down 3 percent from comparable 1989 sales as a result of market pressures on chlorine and chlorinated solvents.

Construction Materials segment earnings were $45,475,000 in the third quarter of 1990, down 9 percent from last year's third quarter level of $50,129,000. This decline was due principally to higher operating costs. Earnings of the Chemicals segment totaled $19,892,000, down 26 percent from 1989's third quarter figure of $26,804,000. This decrease resulted primarily from lower selling prices and higher operating costs, including the effect of cutbacks in production rates due to lower solvent demand.

Selling, administrative and general expenses in the third quarter of 1990 were minimally above comparable 1989 expenses. Normal increases in personnel-related expenses and additional significant costs incurred on business development projects were essentially offset by lower provisions for management incentive awards, reflecting weaker results and a decline in the price of Vulcan's common stock.

Other income, net of other charges, was up $893,000 from the third quarter level in 1989, reflecting mainly nonrecurring items referable to results in joint-venture companies.

Interest expense increased $518,000, or 30 percent, over last year's third quarter level due to higher short-term borrowings.

Net cash provided by continuing operations amounted to $125,975,000 in the first nine months of 1990 as compared with $160,743,000 last year. The decline relates primarily to larger increases in accounts receivable and inventories in the first nine months of 1990 as compared with the same period last year.

The receivables increase was unusually high because accounts receivable at Dec. 31, 1989, were at a depressed level, reflecting the impact of severe weather conditions on December shipments.

Property additions totaled $193,111,000 in the first nine months of 1990, up 81 percent from the comparable 1989 level of $106,510,000. The current year's property additions included $95,175,000 referable to acquisitions as compared with $22,338,000 in 1989.

Expenditures for acquisitions were up sharply in 1990 due to the acquisition of the Reed companies in September, which included a large limestone quarry, barges and other facilities for the distribution of stone, and terminal facilities for coal handling services. During the first half of 1990, the company also acquired three quarries and two asphalt plants.

The company's current liabilities at Sept. 30, 1990 included commercial paper notes totaling $130,716,000. These notes were issued during the third quarter principally to finance the acquisition of the Reed companies. The company is reviewing the desirability of converting a portion of these borrowings into longer-term obligations.

Pursuant to the company's common stock purchase program, 504,856 shares of common stock were purchased in the third quarter of 1990 at a total cost of $19,259,000, equal to an average price per share of $38.15. For the first nine months of 1990, common stock purchases totaled 1,349,559 shares at a cost of $56,615,000, equal to $41.95 per share.

Cash and cash equivalents amounted to $10,912,000 at Sept. 30, 1990, down $50,529,000 from the same date last year.

H. A. Sklenar, president and chief executive officer of Vulcan, stated, ''Third quarter results fell short of expectations in both segments. Deteriorating conditions in our national economy cause us to expect continuing downward pressure on volumes and margins in both of our businesses in the

fourth quarter.

''Construction Materials results should be enhanced by earnings from the Reed companies. Notwithstanding that impact, we think fourth quarter Construction Materials earnings will fall short of last year's level.

''We expect fourth quarter earnings of our Chemicals segment to be down from this year's third quarter level but above last year's severely depressed fourth quarter results.

''Interest expense in the fourth quarter will be up significantly over last year's level, reflecting borrowings principally for acquisitions.

''For the year as a whole, we expect Vulcan's 1990 net earnings from continuing operations to be below last year's result. Our current projection is that earnings per common share will be between $3.05 and $3.20.''

Vulcan is a producer of industrial materials and commodities with significant positions in two industries. It is the nation's foremost producer of construction aggregates and a leading chemicals manufacturer, producing a diversified line of chlorinated solvents and other industrial chemicals.

LONDON (OCT. 25) BUSINESS WIRE - The board of Polly Peck International Ltd. resolved Wednesday to apply to the High Court for an Administration Order to be made because the board believes this step will result in the survival of the company and its operations as going concerns.

It is expected that the Order will be made Friday.

An Administrator is not a Liquidator, and work will continue as usual. The Administrators will work in conjunction with the board to run the group, and further announcements will be made as soon as the administrator is formally appointed. It should be once again stated that this process is followed with the intent of promoting the survival of the Polly Peck Holding Co. and its subsidiaries.

The administration process will be focused on the holding company in London.

Polly Peck Produce as an operating subsidiary is not itself in administration and will continue to operate as a stand-alone company individually managed and financed as before. Polly Peck Produce will continue with business as usual and ensure it operates to its maximum efficiency, reassuring customers,

suppliers and employees of its solid position.

WESTPORT, CT (OCT. 25) BUSINESS WIRE - MECA Software Inc. (NASDAQ:MECA) Thursday announced that revenues for the first quarter of fiscal year 1991 were $2.3 million.

For the same period of fiscal year 1990 the company recorded revenues of $3.6 million. Fiscal 1990 results included revenues of $2.0 million generated from a one time joint marketing arrangement with IBM. Net of this one time arrangement, first quarter of fiscal 1991 revenues increased 38% over the comparable period of fiscal 1990. As MECA's products are closely tied to the calendar year-end holiday season and tax preparation periods, a disproportionate amount of the company's revenues are realized in the second and third quarters of their fiscal year.

For the three month period ended Sept. 30, 1990 MECA reported net income of $70,000 or 2 cents per share.

MECA Software Inc. develops, publishes and markets a family of personal and business productivity software designed to assist individuals in managing personal or small business finances, preparing their income taxes, manage personal legal affairs and organize their business environment. MECA's products which include Andrew Tobias' Managing Your Money, Andrew Tobias' Tax Cut and Hyatt Legal Services Home Lawyer and The Manager's Organizer are sold through independent distributors, software specialty chains and mail order outlets.

CHARLOTTE, NC (OCT. 25) BUSINESS WIRE - Brad Ragan Inc. (ASE: BRD) recorded improved revenues and earnings for the third quarter and nine months ended Sept. 30, 1990, W.P. Brophey, president and chief executive officer, announced Thursday.

A net loss of $132,000, 6 cents per share was recorded for the third quarter 1990 comparing favorably to a net loss of $300,000, 14 cents per share, for the like period a year earlier. Total revenues were improved to $59,214,000 from $57,970,000.

For the nine month period, net income more than doubled to $457,000, 21 cents per share from $190,000, 9 cents per share. Total revenues grew $1.6 million from $171,593,000 to $173,173,000.

''Merchandising and sales efforts in the third quarter of 1990 generated margin contribution growth in all product and service categories with the exception of Lawn and Garden Products where extremely dry weather conditions in the southeast resulted in approximately $900,000 lower volume.

''The rubber mixing business for outside new tire manufacturing continued at lower levels from last year with a $644,000 reduction in sales in the third quarter,'' stated W.P. Brophey.

''With the economic uncertainties of the fourth quarter, we will intensify and balance efforts toward cost and expense efficiency with aggressive promotional activities. The requirement of a satisfactory return on working capital in all locations has been emphasized throughout our organization,'' Brophey added.

Brad Ragan Inc. is the largest United States producer of retreaded tires for off-highway vehicles. BRI distributes new and retreaded off-the-road and truck tires through a network of 50 commercial outlets in 20 states. The company also operates a chain of 133 retail stores in the Southeast, featuring products and services for the auto and home.

FAIRFAX, VA (OCT. 25) BUSINESS WIRE - The fun and excitement of an American tradition that has entertained generations of children comes to life year

round at the neighborhood shopping mall starting this weekend.

The world's first Ringling Bros. and Barnum & Bailey Circus Store will formally open its doors here at Fair Oaks Mall at 10:30 a.m., Saturday, Oct. 27, following a day of preview activities on Friday. Store officials have scheduled an array of Circus-style entertainment and gifts for opening day shoppers.

Circus President Kenneth Feld announced the establishment of the new national retail chain several weeks ago at the opening of Irvin Feld and Kenneth Feld Productions' new world headquarters in Vienna, Va.

Fair Oaks festivities will be staged in two areas: the store site on the second level near Hecht's, and at the mall's Center Court on the ground level.

Opening day shoppers will find gifts for children including goodie bags for the first 100 arrivals. They also may register for prizes plus two grand prizes of a free three-week session at the new Ringling Bros. and Barnum & Bailey Circus summer camp opening next year in Maine.

The new Ringling Bros. and Barnum & Bailey Circus Store combines the colorful flavor of a visit to the Big Top with a wide array of exclusive merchandise ranging from seasonally fresh apparel to authentic Circus memorabilia, interactive toys and party decorations and supplies. Its offerings are created especially for the Stores by a collection of craftsmen and are not available elsewhere.

Store President and Chief Executive Officer Kathy Self said the Fair Oaks facility offers merchandise timely to each season and occasions, pointing to a current Halloween display.

The manager of the Fair Oaks store is Ramona Cropper.

Personnel, who will wear colorful Ringling Bros. and Barnum & Bailey Clown College jumpsuits, have been trained by the Circus' professional clowns to entertain and apply clown makeup to youngsters.

The 4,500 square foot Fair Oaks Store is the first of three initial installations already under development. Others are scheduled to open before year-end at West Farms Mall in Farmington, Conn., and The Mall at Short Hills in Short Hills, N.J.

SANTA ROSA, CA (OCT. 25) BUSINESS WIRE - Optical Coating Laboratory Inc. was named a Certified Supplier by Xerox Corp. Thursday at a ceremony in OCLI's plant here.

The certification was presented by Marjorie B. Efron, manager, optics commodity team, for XEROX to Rolf Illsley, OCLI's chairman, president and chief executive officer.

OCLI is the 16th domestic Xerox supplier to achieve this status since it was established a little over a year ago. As a Certified Supplier, it will produce and ship parts to the company with minimal intervention and supervision from Xerox.

Efron noted that, as a producer of critical, coated-glass optical parts for Xerox copiers and electronic printers, OCLI earned its new status by maintaining a virtual zero-defects level of performance. The company also provides continuous expert assistance to Xerox product-design engineers, she said.

Efron added that OCLI has achieved a high level of performance in making deliveries to Xerox on an as-needed, or just-in-time, basis. It won the Xerox Award of Excellence last year.

''The outstanding performance of suppliers like OCLI played a critical role in helping Xerox to earn the 1989 Malcolm Baldrige National Quality Award,'' Efron said.

FORT LAUDERDALE, FL (OCT. 25) BUSINESS WIRE - Medical Depot Inc. (NASDAQ:MEDD) is pleased to announce the opening of its fifth Medical Depot Superstore at 6022 East Colonial Drive in Orlando, Fla.

Medical Depot Superstores are 10,000 square foot locations selling a complete line of durable and disposable medical supplies to the retail, professional, and wholesale markets. Each store stocks approximately 2,000 different products and has access to thousands of other products.

''This store marks Medical Depot's first store outside of Southern Florida, the first store in the growing Orlando market, and the fifth franchised store to open since March. Our association with a top quality franchisee team

consisting of Don Young, Jack Armstrong and Ken Black will insure a quick and profitable penetration of the Orlando market,'' said Medical Depot Inc.'s President, Ralph Leopold.

Medical Depot has one more franchised Superstore scheduled to open in 1990. This sixth Medical Depot Superstore will be in the Shoppes of Hillsboro Shopping Center in Deerfield Beach, Fla.

BLUE BELL, PA (OCT. 25) BUSINESS WIRE - Unisys Corp. said Thursday that W. Michael Blumenthal, who retired from the company as chief executive officer on April 1, has resigned his non-executive role as chairman of the board and also resigned as a director effective Nov. 1.

James A. Unruh, Unisys president and chief executive officer, was elected to the additional post of chairman.

Blumenthal, 64, cited increasing international obligations for his decision to leave the board. He is a limited partner in the investment banking firm of Lazard Freres & Co. and co-chairman of a newly formed International Coordinating Group of Lazard. He said his business headquarters will be in Paris.

QUINCY, MA (OCT. 25) BUSINESS WIRE - Excel Bancorp Inc. (OTC:XCEL), parent company of Quincy Savings Bank and Lincoln Trust Co., Thursday adopted a shareholder rights plan.

The plan is designed to protect shareholders' interests in the event of an unfair and coercive takeover attempt.

The shareholder rights plan entitles each holder of Excel Bancorp Inc. stock to purchase the corporation's stock at a discount price in the event any person or group of persons exceeds predetermined ownership limitations of the corporation's outstanding common stock and, in certain circumstances, engages in certain activities deemed adverse to the interests of the corporation's stockholders.

According to Charles R. Simpson Jr., president and chief executive officer, ''The rights plan is intended to assure that all of Excel's shareholders receive fair and equal treatment in the event of any proposed takeover of the corporation. The plan will not prevent a takeover, but should encourage anyone seeking to acquire the corporation to negotiate with the board prior to attempting a takeover.''

''Our principal objective,'' Simpson said, ''is to continue to build long-term value for our shareholders.''

The rights plan applies to shares held on the record date of Nov. 8, 1990. However, rights issued under the plan will not be exercisable initially. They will trade with the corporation's common stock and no certificates will be issued until certain triggering events occur.

Excel Bancorp Inc. is the holding company for Quincy Savings Bank, a state chartered stock savings bank, headquartered in Quincy, and Lincoln Trust Co., a state chartered commercial bank, headquartered in Hingham. The subsidiaries conduct business through 17 offices located on the South Shore of Massachusetts.

Quincy Savings Bank and Lincoln Trust Co. are members of the Federal Deposit Insurance Corp. (FDIC). Quincy is also a member of the Deposit Insurance Fund of Massachusetts (DIFM).

BOSTON (OCT. 25) BUSINESS WIRE - The board of directors of BayBanks Inc. at its meeting today declared a quarterly dividend of 30 cents per share payable on Saturday, Dec. 1, 1990, to stockholders of record on Wednesday, Nov. 14, 1990.

The previous quarterly dividend was also 30 cents per share. ''Decisions on future dividends will be based on the circumstances prevailing at the time,'' said William M. Crozier Jr., chairman of the board and president of BayBanks Inc.

BayBanks Inc. also announced a net loss of $12.3 million for the third quarter ended Sept. 30, 1990, which is roughly consistent with a loss of $11.5 million for the second quarter of 1990, and a $13.8 million loss for the first quarter. Year-to-date losses thus total $37.6 million.

Losses in the third quarter and for the year-to-date have resulted from the establishment of reserves for current and possible future loan losses

occasioned by the sharp decline in the region's real estate sector. Additions to reserves so far in 1990 amount to $190 million against which actual losses of $114 million have been recorded. Net additions to reserves thus have equalled $76 million for the first nine months of 1990.

Nonperforming loans were $261 million at Sept. 30 compared with $265 million at the end of the prior quarter. Other real estate owned and in-substance foreclosures (a new category reflecting properties in the process of foreclosure but where the company's bank subsidiaries have not yet taken title) were $115 million at third quarter end compared with $69 million at June 30.

Other loans past due 90 days or more were $95 million at Sept. 30 vs. $94 million at June 30.

Crozier noted that BayBanks' total capital was $738 million at Sept. 30, 1990. Under the new regulatory guidelines that will be effective at year end, the company's core capital and total capital ratios at Sept. 30 were 6.09 percent and 8.19 percent, compared with regulatory minimums of 3.625 percent and 7.25 percent, respectively. BASKING RIDGE, NJ (OCT. 25) BUSINESS WIRE - Hooper Holmes Inc. (AMEX:HH), a leading healthcare and health information services firm, annnounced Thursday its operating results for the third quarter and nine months ended Sept. 30, 1990.

A summary of the company's performance compared with the like 1989 periods is shown below.

''We are extremely pleased by our performance in a difficult economic environment,'' said Jim McNamee, president and CEO.

''Our impressive revenue gains of 49 percent and 36 percent respectively for the third quarter and nine months reflect solid internal growth and the benefit of recent acquisitions. Pretax profit improvement, while quite satisfactory, didn't keep pace with revenue growth because of short-term funding requirements. We are being temporarily hurt somewhat by financing costs brought about by our rapid growth, including unanticipated growth in some of our recently-acquired companies. We would expect our short-term financing needs to be materially reduced during the next few operating periods thus enhancing our overall net operating results,'' the executive added.

''Our revenues are now tracking at an annual rate of $110 million and profitability should increase materially over the next several years. Hooper Holmes is strategically well positioned for the future. While current worldwide uncertainty dictates extreme caution at this juncture, we anticipate a good fourth quarter and expect 1991 to be another record year,'' McNamee concluded.

#90298b0871 10/25/1990 ~Business Wire

CHARLOTTE, N.C. (OCT. 25) BUSINESS WIRE - Based on preliminary unaudited results, Ruddick Corp. (ASE: RDK) announced Thursday that consolidated sales in the fiscal 1990 of $1.4 billion increased 9 percent over the $1.3 billion reported last year.

Net income of $24 million was up 19 percent from $20.2 million reported last year. Fully diluted earnings on a per share basis in fiscal 1990 were $2.17 ($2.38 primary) compared to $1.87 ($2.07) in fiscal 1989.

Consolidated sales for the fourth quarter of the 1990 fiscal year were $358 million, up 7 percent from the $335 million reported in 1989. Net income for the quarter of $5.9 million was the same as reported for the prior year.

American & Efird consolidated sales were up 5 percent for the year with operating profit of $18.4 million, up 4 percent over last year. Approximately half of the sales increase occurred in domestic markets with the balance coming from foreign markets. As a result of current economic conditions, operating profit in the last two quarters of the fiscal year were lower than for the comparable periods last year.

Harris Teeter reported record sales and operating profit for fiscal 1990. Sales of $1.2 billion increased 11 percent over the $1.1 billion reported last year. Operating profit of $32.2 million increased 17 percent. The higher sales volume resulted from increased sales in existing stores and from sales in new stores opened during the year.

There were 130 stores in operation at the end of fiscal 1990 vs. 128 at the end of fiscal 1989. Improvement in operating profit was the result of increased sales and moderate improvement in margins during the year.

Jordan Graphics recorded a modest sales gain of 2 percent while operating profit was flat. Sales were strong in custom forms and pressure sensitive labels and, as expected, significantly lower in stock forms. Margin pressure from increasing paper costs, overcapacity in the industry, and the current softness in the economy continues to adversely affect operating profit.

Ruddick Investment Co. reported $663 thousand operating profit for the year, which earnings are related to a gain from the tendering of publicly traded securities.

Ruddick Corp. is a diversified holding company which, through its subsidiaries is engaged in four primary businesses: American & Efird Inc., manufactures and distributes industrial sewing thread and sales yarn; Harris Teeter Inc. operates a chain of supermarkets in four southeastern states; Jordan Graphics Inc. produces and distributes business forms, tags and labels; and Ruddick Investment Co., an investment manager and venture capital investor.

#90298b0884 10/25/1990 ~Business Wire
EL DORADO, AR (OCT. 25) BUSINESS WIRE - Murphy Oil reports financial results.

Murphy Oil Corp.'s net income for the third quarter of 1990 was $37.6 million, $1.11 a share, Jack W. McNutt, president, announced today.

Earnings for the quarter included unusual gains of $39.1 million, $1.15 a share, mostly from sale of a 4.25 percent interest in the Ninian field in the U.K. North Sea, and an $18.7 million charge, $.55 a share, for write-down of certain assets, with $15.6 million due to a reduction in recoverable reserves at Gaviota field offshore Spain.

McNutt said, ''Excluding the unusual items, earnings for the quarter were $17.2 million, down slightly from $18.2 million for the previous quarter but significantly higher than the $2.5 million earned in the third quarter of 1989 when net income was depressed by a drop in crude oil prices accompanied by a squeeze on refined product margins, mechanical downtime at the Meraux refinery and idle super semi-submersible rigs.

Earnings from exploration and production were $10.8 million, up from $6.5 million in the third quarter of 1989. Average crude oil and gas liquids prices were up $6.65 a barrel in the U.S., $2.95 in Canada and $6.63 in the U.K. Most of the production in Gabon was still in inventory valued at $17.00.

Natural gas production increased 3 percent; average prices were up $.08 an MCF in Canada, but decreased $.09 in the U.S. and $.40 in Spain. Oil and gas liquids production increased 662 barrels a day in Canada, but was down 1,565 barrels a day in the U.S., 5,855 in the U.K. (reduced ownership) and 797 in other areas.

Exploration expenses were $19.2 million compared to $16.1 million a year ago.

Refining, marketing and transportation operations earned $12.3 million, up from $7.3 million in 1989. U.S. operations earned $8 million, up from $3.7

million in 1989. Operations in the U.K. and Western Europe earned $2.5 million compared to $2 million a year ago. Profits from purchasing, transporting and reselling crude oil in Canada were $1.8 million compared to $1.6 million in 1989.

The contract drilling business lost $4.1 million, down from a $9.7 million loss in the 1989 third quarter. ODECO's utilization rate was 63.3 percent compared to 59 percent a year ago, and average day rates were up. Extending the depreciable lives of the equipment reduced depreciation and loss for the quarter by $2.8 million and $1.7 million.

Earnings from farming, timber and real estate were $1 million, up from $.4 million a year ago, with the improvement due mostly to higher timber sales to third parties. Corporate functions incurred losses of $2.8 million in the current quarter and $4.7 million in the third quarter of 1989, with the improvement due to lower net interest.

Revenues for the quarter were $577.6 million compared to $406.8 million for the third quarter of 1989. Crude oil and gas liquids production averaged 36,846 barrels a day compared to 44,401 in 1989. Natural gas production averaged 213.5 million cubic feet a day, up from 206.8 million a year ago.

Refinery crude runs were 140,637 barrels a day, up from 123,540 in 1989. Petroleum product sales were 146,601 barrels a day compared to 141,693 in 1989.

Net income for the nine months ended Sept. 30, 1990 was $95.1 million, $2.80 a share, compared to $25.7 million, $.76 a share, earned in the same period in 1989. Earnings for the first nine months of 1990 included unusual gains of $59.3 million, $1.75 a share, and an $18.7 million charge, $.55 a share, for write-down of assets.

An extraordinary credit from utilization of a financial net operating loss carryforward was offset by an equivalent increase in the provision for income taxes, so it had no effect on net income. Crude oil and gas liquids production averaged 40,194 barrels a day compared to 43,654 in 1989.

Natural gas production averaged 234.3 million cubic feet a day, up from 227.6 million in 1989. Refinery crude runs were 122,845 barrels a day compared to 120,990 a year ago. Petroleum product sales were 134,054 barrels a day compared to 132,274 in 1989.

DAYTON, OH (OCT. 25) BUSINESS WIRE - L.W. Ladehoff, chairman and president of Amcast Industrial Corp. (AIZ), announced Thursday that the board of directors has declared the company's 117th consecutive quarterly dividend.

The dividend of 12 cents per share on the common stock is payable Dec. 28, 1990, to shareholders of record Dec. 10.

The company has completed its previously announced share repurchase program. The directors therefore authorized management to repurchase additional shares in unsolicited transactions when considered in the best interest of shareholders. Shares now authorized for repurchase amount to 10 percent of the shares outstanding.

Commenting on the actions, Ladehoff stated, ''The board authorized the dividend and share repurchase in light of the company's good financial condition and prospects for improved near-term performance.''

Amcast Industrial Corp. is a manufacturer of technology-intensive metal products. Its two primary businesses are proprietary FLOW CONTROL PRODUCTS marketed through national distribution channels, and ENGINEERED COMPONENTS for original equipment manufacturers. The company serves four major sectors of the economy: aerospace/aviation/ defense, construction, automotive and general industry.

NEW YORK (OCT. 25) BUSINESS WIRE - Belvedere Corp. (AMEX: BLV), Thursday announced results for the three month and nine month periods ended Sept. 30.

Total revenues for the third quarter increased to $7,446,000 from $7,380,000 in the third quarter of 1989 (excluding revenues of $7,131,000 from the corporation's former Bermuda subsidiaries which were sold in December 1989).

Net income for the third quarter increased to $393,000 compared to a loss of $702,000 in the same period last year. The 1989 loss was caused by Hurricane Hugo. Net income per share for the three month period was 7 cents compared to a loss of 12 cents in the comparable period of 1989, based on 5,938,000 and 5,942,000 shares outstanding for the respective periods.

Total revenues for the nine month period increased to $22,821,000 from $21,924,000 in the comparable period of 1989 (excluding revenues of $24,047,000 from the corporation's former Bermuda subsidiaries). Net income for the nine months increased to $801,000 from $667,000 a year ago. Net income per share for the nine month period increased to 13 cents compared to 11 cents for 1989, based on 5,939,000 and 5,945,000 shares outstanding, respectively.

Net investment income for the three months and nine months ended Sept. 30, increase to $1,549,000 and $4,602,000, respectively, from $1,214,000 and $3,562,000 for the comparable periods of 1989 (excluding the Bermuda subsidiaries).

Belvedere Corp., through its subsidiary, Belvedere America Reinsurance Co., a U.S. company, underwrites property and casualty reinsurance.

#90298b0895 10/25/1990 ~Business Wire
HONOLULU (OCT. 25) BUSINESS WIRE - The board of directors of Alexander & Baldwin Inc., Thursday announced that R.J. Pfeiffer, chairman, president and

chief executive officer of the corporation, has agreed to postpone his retirement to March 31, 1992.

With important capital programs planned for both major subsidiaries of Alexander & Baldwin, Inc. (A&B), A&B-Hawaii, Inc. (ABHI), and Matson Navigation Co. Inc. (Matson), the Board considers it appropriate that Pfeiffer's extensive experience be available to the corporation for another year.

ABHI has many ambitious programs under way. They include developing its real property; diversifying its agriculture operations, including coffee and macadamia nuts; continuing to seek the improvement of its sugar operations and developing byproducts for bagasse (the cane residue subsequent to crushing).

John C. Couch, president and chief executive of ABHI, has assumed the additional duties of chairman of California and Hawaiian Sugar Co. (C&H), which is located at Concord, Calif., and will be spending some of his time there. Couch said that he is delighted to have Pfeiffer's continued advice and support for the additional year.

Matson also has many projects on which it must focus: the construction of a new vessel; the purchase or construction of a new neighbor-island barge; the growth of Matson Leasing Co. Inc.; the continual introduction of new information systems; the ever-present goal of enhancing customer service; preparing to meet the possible introduction of a new competitor into the Hawaii service as well as the planned expansion of existing competition.

Mulholland said that he welcomes Pfeiffer's willingness to stay on for another year.

The board currently plans to name John C. Couch president and chief executive officer of Alexander & Baldwin Inc., upon Pfeiffer's retirement in 1992.

Headquartered in Honolulu, A&B is a diversified corporation with operations in ocean transportation, agribusiness, and property development and management.

CONWAY, AR (OCT. 25) BUSINESS WIRE - Acxiom (NASDAQ:ACXM) Thursday reported earnings for the second quarter of fiscal 1991.

Consolidated revenue for the second quarter ended Sept. 30, 1990, was $24.97 million, compared to $20.66 million for the second quarter ended Sept. 30, 1989, a 21 percent increase. Net income for the second quarter ended Sept. 30 1990, was $1.73 million, compared to $1.60 in the quarter ended Sept. 30, 1989, a 9 percent increase.

Per share earnings for the quarter ended Sept. 30, 1990, were 35 cents per share vs. 32 cents per share for the quarter ended Sept. 30, 1989, a 9 percent increase.

Consolidated revenue for the six months ended Sept. 30, 1990, was $48.58 million, compared to $40.47 million for the six months ended Sept. 30, 1989, a 20 percent increase.

Net income for the six months ended Sept. 30, 1990, was $2.21 million, compared to $2.78 million for the six months ended Sept. 30, 1989, a 21 percent decrease. Per share earnings for the six months ended Sept. 30, 1990, were 45 cents, compared to 57 cents per share for the six months ended Sept. 30, 1989, a 21 percent decrease.

Consolidated results for the sixTionti p%riod reflect Acxiom's strategic measures in the first quarter to streamline its mailing services operation in Philadelphia and to close its catalog fulfillment services operations in Lakewood, N.J.

In the second quarter, Acxiom completed an intensive three-month effort to relocate its United Kingdom data center from London to Sunderland, England.

''This represents a tremendous team effort by our hardware and software support groups in both the U.S. and United Kingdom,'' said Charles Morgan, chief executive officer and chairman of the board. ''It allows us to reduce operating costs and better utilize our existing UK facilities.''

Several significant factors influence the outlook for the second half of fiscal 1991. Potential recessionary trends coupled with the Feb. 7, 1991, postal increase could impact recovery from the first six-month results.

Acxiom provides marketing systems, services and outsourcing to direct marketing businesses and marketing divisions of Fortune 1000 companies in the United States and United Kingdom.

NEW YORK (OCT. 25) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Thursday reported net earnings of $59,399,000 or $1.43 per common share, for the third quarter ended September 30, 1990, compared with net earnings of $52,717,000, or $1.25 per share, for the third quarter of 1989.

Sales of products and services were $594,280,000 in the third quarter of 1990, compared with $522,254,000 in the same period of 1989.

For the nine-months ended September 30, 1990, Asarco reported net earnings of $145,365,000, or $3.50 per share, compared with net earnings of $172,052,000, or $4.08 per share, in the comparable period in 1989.

Sales of products and services for the first nine months of 1990 were $1,658,659,000 compared with $1,679,747,000 in 1989.

The increase in sales in the 1990 third quarter, compared with those of the prior-year period, was the result of higher prices and volumes for copper and lead despite lower prices for silver. Net earnings for the 1990 third quarter compared favorably with those of the prior-year period due both to higher prices in the quarter for copper and lead and to $6.4 million net after tax of non-recurring charges taken in the 1989 third quarter. Earnings in the current quarter were also affected by lower silver prices and to a lesser extent by higher costs at its Ray Mine in Arizona, whose production was affected by adverse weather conditions in July and August and a three-week labor strike in July.

Commenting on third-quarter earnings, Richard de J. Osborne, chairman, president and chief executive officer of Asarco said, ''The company's results in the 1990 third quarter reflect good operating performance and good demand for the base metals we produce. Market demand for copper, lead and zinc remained strong in the quarter despite some economic weakness in certain of the industries we serve. We see continued strong demand for our products for the balance of the year.''

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and

other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

REDMOND, WA (OCT. 25) BUSINESS WIRE - Digital Systems International, Inc. (NASDAQ:DGTL) Thursday announced net sales of $11.2 million for the third quarter ended Sept. 30, 1990, up 65% from net sales of $6.8 million for the third quarter 1989.

Net income for the third quarter was reported at $2.5 million, up 86% from net income of $1.3 million for the third quarter 1989. Earnings per share for the third quarter were $.26 on 9.3 million shares outstanding, up 44% from $.18 on 7.5 million shares for the third quarter 1989.

Consolidated results for the third quarter include results produced by the company's Voicelink Data Services subsidiary, acquired at the end of second quarter.

Net sales for the nine months ended Sept. 30, 1990, were $27.2 million, an increase of 62% from $16.7 million for the same period last year. Net income for the nine months was $5.8 million, up 61% from $3.6 million for the first nine months of 1989. Earnings per share for the nine months were $.71 compared to $.50 for the same period last year.

Digital Systems International, Inc. is the leading supplier of outbound call processing systems. Users of the company's Voicelink systems enhance the efficiency and effectiveness of telephone contacts with their customers through collection, teleservicing, and telemarketing applications. Digital Systems' customers include financial institutions, utilities, Regional Bell operating companies, and other companies in the consumer credit, collections, communications, telemarketing and health care industries.

#90298b0907 10/25/1990 ~Business Wire

DALLAS (OCT. 25) BUSINESS WIRE - Dr Pepper/Seven-Up Cos. Inc. Thursday announced key management promotions including the elevation of John R. Albers to chairman and chief executive officer of Dr Pepper Co. and The Seven-Up Co. election of True H. Knowles to president and chief operating officer of Dr Pepper Co.

The announcement was made following the company's regular board of directors meeting.

Albers has served as president and chief exectuve officer of both Dr Pepper Co. and The Seven-Up Co. since mid-1988 when both soft drink firms became wholly owned subsidiaries of the new parent holding company. Albers, 59, is a 19-year veteran of Dr Pepper Co. and currently serves as president and CEO of The Seven-Up Co. He retains the title of president and CEO of Dr Pepper/Seven-Up Cos. Inc.

Knowles, 53, becomes only the 14th president in the history of the 105-year-old Dr Pepper Co. Since July 1988, he has served as executive vice president and chief operating officer of Dr Pepper Co. and senior vice president of Dr Pepper Co./Seven-Up Cos. Inc. He joined Dr Pepper Co. in 1982 as fountain/foodservice division vice president and general manager after a 19-year sales and marketing career with Procter & Gamble Co.

Albers also announced the promotions of holding company Vice-President-Treasurer Michael R. Buiter to vice president-finance & treasurer of Dr Pepper/Seven-Up Cos. Inc. and Michael S. McGrath from division vice president of Premier Beverages to corporate vice president of Dr Pepper/Seven-Up Cos. Inc.

McGrath will continue to manage Premier Beverages, Dr Pepper Co.'s sales and marketing division for Welch's carbonated soft drinks. All promotions were approved by the board of directors.

Albers acknowledged that under Knowles's leadership, Dr Pepper Co. is posting another record year for sales volume. Since 1984, Dr Pepper Co. has recorded successive record sales volume years and continues to grow at a rate three times better than the soft drink industry. Sales for 1989 were 8 percent better than the previous year.

McGrath, 44, joined Dr Pepper Co.'s fountain/foodservice division in 1982 as national accounts manager. In July 1988, he was appointed division vice

president/general manager of Premier Beverages with domestic sales and profit responsibility for Welch's carbonated soft drinks and I.B.C. Root Beer. For nine years prior to joining Dr Pepper Co., McGrath was with Procter & Gamble as a sales and national account manager.

MALVERN, PA. (OCT. 25) BUSINESS WIRE - Rabbit Software Corp. (NASDAQ: RABT) Thursday announced its 1990 third quarter results.

Revenues were $2,147,400, which represents a 59 percent increase, compared to 1989 third quarter revenues of $1,348,700. Operating losses continue to be significantly reduced as compared to the prior year. The loss for the quarter was $749,000 (4 cents per share) compared to a loss of $3,155,300 (16 cents per share) for the third quarter of 1989.

For the first nine months of 1990, revenues and losses were $6,387,900 and $1,866,500 (10 cents per share), respectively, compared to 1989 revenues and losses of $3,929,800 and $8,319,200 (49 cents per share), respectively.

Alfred R. Berkeley III, Rabbit's chairman and CEO said, ''During the third quarter we announced two significant new products, an Advanced Workstation for Microsoft's Windows 3.0 and The Visible Advantage. The Windows 3.0 implementation is an exciting opportunity for Rabbit, because it offers a way for the company to benefit from the growth of Windows in the marketplace.

''The Visible Advantage is a special implementation of our DOS workstation products designed for users needing simultaneous views of up to four full 3270 screens. Typical users for The Visible Advantage would be insurance claims processors, customer service desks and computer operators' consoles.

Rabbit Software, a member of the Safeguard Scientifics family of technology companies, specializes in the development of advanced SNA and SAA communications products. Rabbit's complete line of connectivity products span all major IBM communications protocols and operating systems and can be found in the most demanding IBM end-user environments.

#90298b0914 10/25/1990 ~Business Wire
RESEARCH TRIANGLE PARK, NC (OCT. 25) BUSINESS WIRE - CompuChem Corp. (NASDAQ:CCEM) Thursday announced results for its third quarter ended September 30, 1990.

Included in results for 1990 are those of Lifedata Medical Services, which the company acquired in early January 1990. The 1989 results do not include Lifedata.

Revenues for the quarter were up 49 percent to $16,290,000 from $10,942,000. Net income for the third quarter was $401,000, or $.05 per share compared to $1,142,000, or $.15 per share for the third quarter of 1989.

Revenues for the first nine months of 1990 increased 43 percent from $32,329,000 to $46,237,000. Net income for the nine months was $1,348,000, or $.18 per share compared to $2,940,000, or $.43 per share for the first nine months of 1989.

Kees Verkerk, President and Chief Executive Officer, commented, ''We were pleased with our sales growth in all sectors for the third quarter. Commercial drug testing continues to show strong growth with a 37 percent increase over 1989's third quarter. Commercial environmental testing also showed strong growth over last year's third quarter with a 31 percent increase. Lifedata's sales growth continued and was above the same period last year. As expected, our two major governmental contracts continued to provide lower sales revenue than 1989.''

Verkerk continued, ''Notwithstanding healthy revenue increases, several developments caused our third quarter profits to fall considerably below both last year's levels and our expectations for the current year. Although receipts of commercial environmental samples improved, pricing remained depressed. This coupled with excess operating costs due to equipment failures prevented the environmental business from achieving the breakeven we had expected.

''The drug testing profit contribution was adversely affected by lower than expected military drug volume and a September drop-off in commercial pre-employment screening volume as a result of the Middle East crisis and general recession fears. Lifedata's profits were adversely affected by start-up costs for new regional offices and the recruitment of our national network of walk-in collection facilities.''

Summing up the outlook, Verkerk added, ''With the expenditure of over $1.5 million in new equipment and other steps taken to improve throughput, we should have lower operating costs in environmental testing in the subsequent quarters. While the commercial environmental outlook is still uncertain, we have recently been awarded four new EPA organic contracts versus one EPA

organic contract in effect during 1989. The EPA award has a value of $7.2 million over the next thirty months.

''Also, we have booked our first two major contracts with a combined value of $1 million, for our new mixed waste laboratory. We expect Lifedata's seasonally strong fourth quarter to leverage the fixed costs that we have put in place to expand our national coverage. Our commercial drug testing revenue could continue to be impacted by the hiring freezes and cutbacks in many sectors of our economy.''

CompuChem Corp., through its three subsidiaries, CompuChem Laboratories Inc., ChemWest Analytical Laboratories Inc., and Lifedata Medical Services Inc., provides specialized analytical testing services for the accurate measurement of toxic chemicals and hazardous wastes in the environment, urinalysis collection and testing services for the detection of drugs of abuse, as well as physical examinations for life insurance applicants.

The company also provides on-line data management systems for use by customers in managing their environmental and drug testing data bases. The company's environmental testing services are provided to major industrial companies, waste management companies, and consulting engineering firms, as well as the Environmental Protection Agency.

The company's forensic drug testing services are provided to the military, other government agencies and major industrial firms. The company's physical examination services are provided to insurance carriers nationally.

HOLYOKE, Mass. (OCT. 25) BUSINESS WIRE - Heritage Bancorp, Inc. (NASDAQ:HNIS) today announced that Fredric E. Schluter, III was elected President and Chief Operating Officer of Heritage Bancorp and Heritage Bank at a meeting of the respective Boards of Directors held October 24.

Mr. Schluter is currently Executive Vice President and Chief Financial Officer. Schluter joined Heritage in May of 1989 as Chief Financial Officer and was previously employed by Golembe Associates, Inc. of Washington, D.C. in their Boston office. Mr. Schluter holds a B.A. in Economics from Boston University and an M.B.A. in Finance from Cornell University. He is married and has two children.

The position of President has been vacant since a management restructuring in March of 1990. Elected as Chief Financial Officer to succeed Mr. Schluter was Charles Jeffrey of Northampton, presently Senior Vice President in the Finance Division.

Mr. Jeffrey joined the Bank in February, 1989 and was previously employed by Bank of America in various management positions, including Chief Financial Officer of the Payments Services Division. Mr. Jeffrey holds a B.A. in Economics from Williams College and a Masters Degree in International Economics from the Fletcher School of Law and Diplomacy. In 1971, he was awarded a Fulbright Fellowship.

In commenting on these management changes, Chairman and Chief Executive Officer Richard B. Covell stated that the promotions of both Mr. Schluter and Mr. Jeffrey to key management positions is a strongly positive move for Heritage Bank. Each of the officers brings unique and varied experience to the organization and in their new positions, enhance management depth at a time when the banking industry is undergoing severe challenges.

CHICAGO (OCT. 25) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) announced Thursday the realignment of its two Nevada gaming products and services divisions.

Effective immediately, the slot data systems business segment of the Bally Systems Division, Reno, Nev., will be integrated into the operations of the company's Bally Gaming Inc. Las Vegas division. The hospitality business segment of Bally Systems will be divested.

In commenting on the realignment, Bally Manufacturing Corp. President and Chief Operating Officer Roger N. Keesee stated, ''This move signifies a stronger gaming entity to serve the casino market and is to be viewed strictly as an operating decision. This consolidation follows Bally Gaming's relocation from Illinois to Nevada.''

Keesee further commented that this move is not related to the current review of the parent company's financial condition and operations.

Bally Manufacturing Corp. is a world leader in the gaming and fitness industries with four casino hotels, a nationwide network of fitness centers and a complete line of gaming equipment and systems, fitness equipment and lottery products and services.

DAYTON, OH (OCT. 25) BUSINESS WIRE - Moto Photo Inc. (NASDAQ:MOTO) Thursday announced that its board of directors has voted to extend the exercise period of its common stock purchase warrants to allow the exercise of such warrants through Nov. 25, 1991.

The warrants are currently exercisable at a price of $4.25 for each share of common stock. The warrants were originally issued by Moto Photo in November 1985 in connection with a public offering of units consisting of one share of $1.20 cumulative convertible preferred stock and two common stock purchase warrants. The warrants were scheduled to expire on Nov. 25, 1990.

In other news, the board of directors of Moto Photo elected Michael F. Adler, president and chief executive officer, as chairman of the board. Adler assumes the position vacated by the resignation for personal reasons of Dr. Robert J. Kegerreis. Adler said: ''We are deeply grateful for the contributions that Bob Kegerreis has made to our company and we will miss his wise counsel.''

Leslie Charm was elected as a board member. He is a principal in Youngman and Charm, a management consulting firm. Previously, Charm was president of Docktor Pet Center Inc. Adler further said: ''Les Charm brings a great deal of experience both from an operating and strategic perspective with superb

in-depth understanding of the franchising business. We are pleased to have him on our board.''

Moto Photo Inc. is a Dayton-based franchisor and operator of one-hour photo-finishing stores with 341 stores in operation and 20 under development in the United States, Canada, Norway and Sweden.

CONCORD, MA (OCT. 25) BUSINESS WIRE - GenRad Inc. Thursday reported for the third quarter ended Sept. 29, 1990, a net loss of $984,000, or $0.06 per share compared with a net loss of $3,579,000, or $0.21 per share for the third quarter of 1989.

Net sales and service revenues for the third quarter, 1990 were $43,534,000 compared to $46,097,000 for the year earlier period.

For the nine month period ended Sept. 29, 1990 the net loss was $18,150,000, or $1.05 per share compared with a net loss of $2,615,000, or $0.15 per share for the nine month period in 1989. Through the first nine months of 1990, revenues were $133,292,000 compared to $143,417,000 in the 1989 period.

The net loss for the three and nine months ended Sept. 30, 1990 includes an extraordinary gain of $5,083,000, or $0.29 per share realized through the purchase of $7,500,000 face value convertible subordinated debentures issued by the company in 1986. The nine month net loss also includes restructuring charges of $10,000,000, or $0.58 per share associated with severance pay and product line rationalization.

The net loss for three and nine months ended Sept. 30, 1989 included a reorganization charge of $3,000,000, or $0.18 per share for costs associated with severance pay, idle facilities, and product line rationalization.

GenRad Inc. is a leading worldwide supplier of integrated software systems

and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

WOOSTER, OH (OCT. 25) BUSINESS WIRE - FirstFederal Financial Services Corp (NASDAQ:FFSW), the holding company for First Federal Savings and Loan Association of Wooster, reported net earnings of $559,000 or 51 cents per share, for the third quarter of 1990 -- a 51 percent increase over the net earnings of $370,000, or 34 cents per share for the third quarter of 1989.

Net earnings for the nine months ended Sept. 30, 1990, were $1,669,000, or $1.52 per share -- up 37.5 percent over the $1,214,000, or $1.10 per share earned for the nine months ended Sept. 30, 1989.

In announcing earnings, Richard E. Herald, chairman and chief executive officer, stated, ''The core earnings of the company continue to be very strong. The improvement in earnings for both the quarter and year-to-date are primarily a result of higher net interest income, income from retail banking services and subsidiary earnings. It is gratifying to see the improved earnings performance from FirstFederal's traditional financial services of single-family mortgage lending and retail banking services,'' said Herald.

Shareholders' equity at Sept. 30, 1990, was $26.1 million, or $23.72 per share. The company's equity to assets ratio was 7.8 percent. First Federal Savings and Loan Association continues to exceed all fully phased-in capital requirements as set forth by the Office of Thrift Supervision.

On Oct. 16, 1990, the company's board of directors declared a 12 cents per

share cash dividend payable to shareholders of record as of Nov. 2, 1990. The dividend will be paid on Nov. 21, 1990.

FirstFederal Financial Services Corp's assets totaled $334 million at Sept. 30 1990. Its subsidiary, First Federal Savings and Loan Association operates nine offices in the north central Ohio counties of Wayne, Ashland, Medina and Richland.

EAST HANOVER, NJ (OCT. 25) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) said Thursday that its board of directors has voted to amend one provision of the company's Shareholder Rights Plan adopted April 11, 1990.

The amendment relaxes from 10 percent to 15 percent the beneficial ownership of Ultimate's common shares required to ''trigger'' the exercisability of rights under the Plan.

According to the announcement made by Ultimate Chairman, President and Chief

Executive Officer Michael J. O'Donnell, the Plan originally called for the exercisability of the rights by shareholders upon the accumulation by a beneficial owner of 10 percent or more of the company's shares, or by a tender or exchange offer for 20 percent or more of the company's shares.

The amendment does not affect the provision for tender or exchange offers or any other provision of the Plan.

In commenting, O'Donnell said: ''In today's market, the 10 percent trigger seemed unduly restrictive to long-term investors. The Plan protects the shareholders by encouraging a potential acquirer to negotiate with the company's board.

''After due consideration, the board decided that protection can be provided with a 15 percent trigger, and so adopted the amendment. The board still believes that this Plan is the best available means of protecting shareholders' equity investment from unfair or coercive bidding tactics.''

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia Systems.

The firm also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its domestic operations, Ultimate has subsidiaries in the United Kingdom, Canada, France and Australia.

#90298b0947 10/25/1990 ~Business Wire

NORTH ANDOVER, Mass. (OCT. 25) BUSINESS WIRE - Intrex Financial Services Inc. (NASDAQ-TREX), the parent holding company of Lawrence Savings Bank Thursday announced results of operations for the third quarter of 1990.

Intrex had a net loss for the third quarter of $2,464,000 or 58 cents per share as compared with a net loss of $3,335,000 or 79 cents per share for the same period of 1989. The net loss for the nine months ended Sept. 30, 1990 was $6,903,000 or $1.63 per share as compared to a net loss of $7,845,000 or $1.85 per share for the same period of 1989. Because of the operating loss carryforward, there is no tax benefit recorded for either quarter or either nine month period.

The net interest income totaled $2,271,000 for the third quarter 1990 as compared to $2,219,000 for the third quarter 1989. The 1990 third quarter provision for possible loan losses was $1,300,000 as compared to $3,000,000 for the third quarter of 1989. The company also had write-downs and expenses on certain real estate owned and property formerly held in a joint venture of $908,000 and $13,000 in the third quarter of 1990 and 1989, respectively.

Non-performing assets at Sept. 30, 1990 were $27,773,000 as compared to $28,942,000 at Dec. 31, 1989.

Total assets were $356,330,000 at Sept. 30, 1990, up from $354,040,000 at Dec. 31, 1989. Net loans decreased to $255,842,000 from $257,222,000 and deposits were $262,385,000 up from $253,830,000 for the same periods.

Intrex's capital-to-asset ratio was 12.66 percent at Sept. 30, 1990 as compared to 14.67 percent at Dec. 31, 1989.

Paul Miller, president and CEO of Intrex, stated that the slowdown of area's economy is expected to continue. The economy is now beginning to look like we may be entering a recession of some duration.

Intrex is headquartered in North Andover, Mass. Intrex common stock is traded over the counter on the NASDAQ National Market system. Lawrence Savings Bank has seven retail offices throughout the Greater Lawrence area.

#90298b0948 10/25/1990 ~Business Wire

GREENVILLE, SC (OCT. 25) BUSINESS WIRE - Delta Woodside Industries Inc. (NYSE: DLW) reported increased sales, but lower earnings for the quarter ended Sept. 29, 1990.

Net sales for the quarter ended Sept. 29, 1990 were $128,696,000 an increase of 8 percent over the net sales of $118,840,000 during the quarter ended Sept. 30, 1989. Of this increase, $7,201,000 was attributed to the office supply business acquired in November 1989.

Net income for the quarter ended Sept. 29, 1990 was $2,468,000 as compared to $3,824,000 in the prior year quarter - a decrease of 35 percent. On a per share basis, earnings were 13 cents per share on the 18,714,548 average shares outstanding in the quarter ended Sept. 29, 1990, as compared to 21 cents per share on the 18,604,629 average shares outstanding in the quarter ended Sept. 30, 1989.

Delta Woodside's order backlog at Sept. 29, 1990, was $131,500,000, down 12

percent from the $149,000,000 total at Sept. 30, 1989.

In commenting on the results, E. Erwin Maddrey II, president said, ''We are pleased that our net sales have grown to the point that they are now exceeding the prior year amount. We expect the net sales and the net profit comparison to be positive in our second quarter ending in December 1990.''

Delta Woodside Industries Inc., headquartered in Greenville, sells and manufactures a wide variety of textile fabrics and apparel and is also engaged in the retail distribution of office supplies and equipment.

The company, which has 8,000 employees in four states and Costa Rica, operates 33 plants, 8 garment outlet stores and one office products distribution center with 9 branches.

#90298b0949 10/25/1990 ~Business Wire

DERRY, NH (OCT. 25) BUSINESS WIRE - Cornerstone Financial Corp. (NASDAQ:CSTN) a bank holding company located in Derry, N.H., announced a net loss of $1,933,000, or $.92 per share, for the third quarter ended Sept. 30, 1990, compared to net income of $204,000, or $.10 per share, for the third quarter ended Sept. 30, 1989.

The net results in both the third quarter of 1990 and 1989 included extraordinary gains from the repurchase of Cornerstone's convertible subordinated debentures of $83,000 and $18,000, respectively. As previously announced on Oct. 10, 1990, the 1990 third quarter loss was a result of provisions relating for possible loan losses, real estate acquired through foreclosure, and the company's limited partnership interest in a real estate joint venture, aggregating $2,000,000.

The provision for estimated loan losses in the third quarter of 1989 was $93,000.

During the nine months ended Sept. 30, 1990, Cornerstone incurred a net operating loss of $2,712,000, or $1.29 per share before extraordinary gains of $124,000, or $.06 per share, resulting in a net loss of $2,588,000, or $1.23 per share. For the nine months ended Sept. 30, 1989, Cornerstone earned $840,000, or $.39 per share before extraordinary gains of $84,000 or $.04 per share, for net income of $924,000, or $.43 per share.

The balance of non-accrual status loans increased from $2,290,000 at June 30, 1990 to $3,374,000 at Sept. 30, 1990. Other real estate owned declined from $2,942,000 at June 30, 1990 to $1,855,000 at Sept. 30, 1990. The decline in

other real estate owned was a result of write-downs and sales during the third quarter. At Dec. 31, 1989 balances of non-accrual status loans and other real estate loans was $513,000 and $3,854,000, respectively. The reserve for loan losses was $2,464,000, or 2.74 percent of outstanding loans, and 73 percent of non-performing loans at Sept. 30, 1990.

John M. Terravecchia, chief executive officer of Cornerstone, stated, ''The company continues to be negatively affected by the generally adverse real estate market in New England and by other factors beyond its control. The previously announced provisions were steps taken to reflect the level of risk which management believes exists in the loan portfolio and the continuing unstable regional economy.''

Terravecchia further stated, ''While there can be no assurance as to the direction of the regional economy in the near term, we believe Cornerstone remains a strong financial institution with a primary capital ratio at Sept. 30, 1990 of approximately 9.3 percent.''

Total assets at Sept. 30, 1990 were $158,170,000, declined 2 percent from December 1989 assets of $161,682,000, while deposits increased 2 percent over the same period to $138,468.00.

Cornerstone Financial Corp. is the holding company for Cornerstone Bank. On Oct. 1, 1990 Cornerstone merged Derry Bank and Trust Co. and Cornerstone Bank under a commercial bank charter with the name ''CORNERSTONE BANK.''

#90298b0952 10/25/1990 ~Business Wire

HARTFORD, CT (OCT. 25) BUSINESS WIRE - The Advest Group Inc. Thursday reported a loss for the fourth quarter ended Sept. 30 of $4.6 million, or 45 cents per share, compared with earnings of $1.9 million, or 19 cents per share for the same period in 1989.

For the year, losses were $9 million, or 87 cents per share, compared with earnings of $7.2 million, or 70 cents per share, in fiscal 1989.

Revenues for the quarter were $54.3 million, down from $55.1 million during the year-earlier quarter. Revenues for the year were $211 million, down from $215.5 million for the previous year.

''Events in the Middle East as well as the budget stalemate in Washington had a noticeable impact as individual investors decreased their trading activities and the markets generally declined during the later part of the quarter,'' said Allen Weintraub, chief executive officer.

''The continuing deterioriation of real estate values in New England further contributed to the quarter's results. However on a positive note, we are pleased that non-performing assets at Advest Bank have improved from the previous quarter,'' he said.

The fourth quarter's loss included a $3 million provision against assets held by Advest Credit Corp. and the holding company. Also included was a $2.5 million additional loan reserve provision and $1.1 million in write downs of other real estate owned by Advest Bank. The holding company also reported realized and unrealized investment gains of $2.5 million and $0.5 million, respectively.

For the full fiscal year, the results include a $9.1 million provision against assets held by Advest Credit Corp. and The Advest Group. Also included is a write down by Advest Bank of $2.9 million for other real estate owned and investments owned as well as a $4.1 million addition to loan loss reserves.

Advest Bank reported a relatively modest net loss of $0.9 million for the year despite absorbing these charges. Advest Bank also increased loan loss reserves to $4.6 million, an increase of $2.1 million. Reserves at year-end amounted to 1.47 percent of total outstanding loans, vs. 0.71 percent at the end of 1989. Also, reserves amounted to 44 percent of nonperforming loans vs. 29 percent at the end of 1989.

Within Advest Inc., the company's broker/dealer, trading profit and commission declines as well as increased expenses were the primary causes of the $2.9 million loss. The expense growth was the result of payroll costs from two acquisitions made during the year and expenses relating to an operation that has been discontinued.

The company continued to generate positive cash flow (losses reduced by amortization, depreciation and provisions for credit losses) of $4.2 million for the quarter and $15 million for the year. The Advest Group Inc. is a diversified financial services company headquartered in Hartford, Conn. It is listed on the New York Stock Exchange and trades under the symbol ADV.

#90298b0960 10/25/1990 ~Business Wire

BAYSIDE, NY (OCT. 25) BUSINESS WIRE - The Home Savings Bank (NASDAQ:HMSB) Thursday reported net income of $486,000, or 4 cents per share, for the third quarter of 1990 compared with net income of $5 million, or 42 cents per share, in the same period of 1989.

For the nine months ended Sept. 30, net income was $7.2 million, or 59 cents per share, vs. net income of $17.4 million, or $1.45 per share, in the year-ago nine months.

The principal factors affecting the quarterly and year-to-date results in 1990 were lower levels of net interest income, resulting primarily from interest income foregone on non-performing loans, combined with higher provisions for loan losses, according to Richard A. Kraemer, chairman, president and chief executive officer. He also stated that the third quarter earnings were impacted by a write-down of Home's investment in a joint venture real estate project and expenses associated with the proposed merger with a subsidiary of H.F. Ahmanson & Co.

Net interest income after the provision for loan losses was $8.8 million for the third quarter of 1990 compared with $11.5 million in the year-ago three months. For the year to date in 1990, net interest income after the provision for loan losses was $32.1 million vs. $39 million in the same period of 1989. The net interest margin was 2.85 percent for the 1990 third quarter compared with 3.11 percent for the 1990 second quarter and 3.06 percent for the quarter ended Sept. 30, 1989.

The provision for loan losses was $1.6 million for the quarter and $2.1 million for the year to date in 1990 vs. $225,000 and $675,000 in the respective 1989 periods. ''The increase in the provision for loan losses reflects the general deterioration of the real estate market in the Bank's primary lending area,'' said Kraemer.

The allowance for loan losses amounted to $7.5 million at the end of the 1990 third quarter, up from $2.2 million at Sept. 30, 1989. Nonaccrual loans and other real estate owned were $74.7 million and $3.2 million at quarter end in 1990 compared with $62 million and $3.4 million, respectively, at June 30. Restructured loans totaled $4.5 million, at Sept. 30, unchanged since June 30.

Other operating income was $148,000 for the quarter and $1.3 million for the nine months in 1990 vs. $669,000 and $2.8 million in the respective year-ago periods. During the 1990 third quarter, the bank wrote down its investment in a joint venture real estate project, resulting in pretax losses of $456,000 for the quarter and $500,000 for the year to date. Noninterest expenses were $6.7 million and $18.2 million for the quarter and nine months in 1990 compared with $5.3 million and $16.2 million in the respective prior year periods. The increase is due primarily to expenses of approximately $485,000 and $875,000 in the quarter and nine months in 1990 associated with the proposed merger with a subsidiary of H.F. Ahmanson & Co.

At Sept. 30, total assets were $1.51 billion, loans were $1.21 billion, and deposits amounted to $1.14 billion. Shareholders' equity of $242.3 million represented 16.02 percent of total assets, or $20.14 per share.

The Home Savings Bank, with 13 full-service banking offices in the New York metropolitan area, offers deposit accounts, mortgage lending and other traditional banking services.

NEW YORK (OCT. 25) BUSINESS WIRE - A new research service specializing in consumer entertainment preference studies has been formed by the BPI Information & Research Group.

The service will provide syndicated and customized consumer research data covering major segments of the entertainment industry. These include most types of recorded music (CDs, LPs & tapes), home video and films.

''Today, entertainment preferences are segmented among a bewildering array of special interests,'' says BPI Information and Research Group President Martin R. Feely. ''Precise data is crucial for marketing in a fragmented and narrowcast environment.''

The service will provide a comprehensive package of syndicated and proprietary information that will segment consumer interests, perspectives and preferences geographically, demographically and psychographically. The information will be available to entertainment industry and consumer products companies, entertainment hardware and software retailers, and advertising agencies and marketing firms.

Depending upon the scope and goals of client needs, ''The most appropriate research methodologies will be applied to aid in client problem-solving and decision making,'' Feely says. These will range from examination of national probability panel data and telephone surveys to proprietary systems examining attitudinally and behaviorally-based market structure analysis.

The service will become operational in January of 1991 with fully staffed research and sales departments. It will be marketed through the BPI Entertainment Marketing Group and research findings will also be available through many BPI publications and databases.

BPI Information & Research Group is a BPI Communications and Affiliated Publications (NYSE:AFP) company. A FORTUNE 500 media corporation, Affiliated is best known as the publisher of the BOSTON GLOBE. BPI Communications is parent to ADWEEK, BILLBOARD, BACKSTAGE, MUSICIAN, THE HOLLYWOOD REPORTER and

other entertainment industry publications.

#90298b0967 10/25/1990 ~Business Wire

DALLAS (OCT. 25) BUSINESS WIRE - Mary Kay Corp. Thursday announced it has amended the terms of its outstanding tender offer for its 15 percent discount debentures due 2000.

The amendment increases the amount of debentures the company is offering to purchase to $122.5 million, equal to about 71 percent of the outstanding debentures. The debentures will be purchased at par plus interest accruing after Nov. 30, 1990, if the tender offer is extended beyond that date.

Holders who consent to certain proposed amendments to the terms of the debentures will also receive a cash payment of $10 per $1,000 of debentures. The tender offer is now scheduled to expire at midnight on Nov. 13. The company originally offered to purchase $110 million, or approximately 64 percent, of the outstanding debentures in an offer that was to have expired Oct. 30.

The company has also modified the terms of the consent solicitation being made in connection with its tender offer by changing the amendments it is seeking to the terms of the debentures. These modifications include the addition of a sinking fund for the debentures commencing in 1997 and certain modifications to other financial covenants.

These modifications, as well as changes to the terms of the tender offer, resulted from numerous discussions concerning appropriate convenant protection for the debenture after the tender offer. Parties to these discussions included representatives of the company, its financial advisers and several large institutional holders.

In light of the changes to the tender offer and the consent solicitation, the company has extended to midnight Nov. 2, 1990, the period during which holders of the debentures may consent to the proposed amendments and receive a consent payment. The company has also extended to midnight Nov. 2, 1990, the period during which tendered bonds would be given priority for purchase in the tender offer.

Based on its conversations with holders of debentures, the company does not expect to further extend either the solicitation period or the priority period.

The tender offer is being made in connection with the refinancing of debt of Mary Kay Cosmetics Inc. (MKCI), a wholly owned subsidiary of the company, and

the planned repurchase of approximately $17.5 million of approximately $73 million principal amount of outstanding company notes held primarily by members of the company's founding family.

The company also expects to purchase approximately $10 million of stock options from 32 key employees of the company as part of the transaction.

The tender offer is conditioned, among other things, on the receipt of all the necessary financing and of consent to the proposed amendments by the holders of a majority of the outstanding debentures. The company has received informal expressions of interest from several purchasers with respect to the purchase of sufficient MKCI debt to consummate the refinancing and recapitalization.

The tender offer is not conditioned on any minimum amount of debentures being tendered.

As of midnight Oct. 24, 1990, approximately $30,179,500 aggregate principal amount of debentures have been tendered to the Bank of New York, the depositary for the offer. The revised terms of the tender offer and consent solicitation, as well as updated company and MKCI financial information, are contained in a supplement to the company's offer to purchase.

A copy of the revised terms and updated financial information can be obtained from The First Boston Corp., the dealer-manager for the offer, or Dewe Rogerson, the information agent.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 4

ANNOUNCEMENT:

This amendment is also filed for AIM 84, AIM 85 and AIM 88. On Oct. 22, 1990, CRIIMI MAE and AIM filed a motion for preliminary injunctive relief from violations of the 1934 Securities Exchange Act. The motion was filed in connection with the complaint filed by CRIIMI MAE and AIM against AIM Capital Management Corp. On Oct. 23, CRI Insured Mortgage Assn. announced a revision to the offer lowering the preferred stock dividend the Liquidating REIT pays to CRIIMI MAE. Another revision reduces by 75 percent the fee paid to brokers when investors choose CRIIMI MAE.

WASHINGTON (OCT. 25) COMTEX - The 8-K report filed at the SEC shows effective Oct. 15, 1990, Commercial Programming Unlimited Inc's (TICKER: CPUI) wholly-owned subsidiary, Commerical Programming Unlimited of Philadelphia Inc., ceased operations.

The subsidiary was an operator of a proprietary business school in Phialdephia.

The decision to cease its school operations resulted from the school's inability to stem continuing losses and establish profitability.

Consequently, Commercial Programming Unlimited Inc. intends to proceed to liquidate and dissolve the subsidiary as soon as practicable.

#90298d0040 10/25/1990 ~French/German News Agency

PARIS (OCT 26) - Trends noted in the world electronics industry over the next five years will confirm Europe's "disastrous" position in that sector, according to a study released Thursday by the French analysts' firm Electronics International Corp. (EIC).

The report said that Europe's trade balance in electronics should decline to a hefty deficit of 50.8 billion dollars in that year, based on the 1986 exchange rate of one dollar to one European Currency Unit, or ECU.

The report said that Europe's "real problem" in the field was to be found in "unawareness of the fact that its electronics industry is in danger of death, and of everything stemming from that fact".

It added that the European situation "shows hardly any sign of a possible recovery, even if the gradual increase of foreign companies setting up in Europe may check the rate of decline".

The European electronics industry's trade deficit was only 1.5 billion (current) dollars in 1979, but hit 34.2 billion last year, the report said.

The United States, which had a surplus of 4.3 billion dollars in 1979 in the sector, suffered its first deficit in 1984, of 1.2 billion dollars.

This increased to 7.7 billion last year, and should hit 17.9 billion dollars in the year 1995, the report said.

The big winner is Japan, which even in 1979 had a surplus of 13.2 billion dollars, rising to 62.7 billion last year, with the likelihood of an 86.8 billion dollar electronics trade surplus in 1995, the study says.

The total business done by the electronics industry worldwide is estimated at 822.3 billion dollars for 1989, and it should hit 1,368 billion in 1995, a 66 per cent increase.

The study said that Japan would .be the big beneficiary, in sectors ranging from consumer goods to data processing and semi-conductors.

The report said that Europe was not "fated to fail industrially", but that success will depend on "concerted, massive and long-lasting action" carried out with world-scale industrial groups.

BEIJING (OCT. 25) - China's biggest diamond mine, Wafangdian, went into full production Wednesday after producing 480,000 carats of diamonds over a one-year trial period, it was reported Thursday.

The mine, in northeast China, has 54 percent of China's diamond reserves and is expected to reach an annual output of 1.18 million carats, the official New China News Agency said.

#90298d4370 10/25/1990 ~French/German News Agency
BANGKOK (OCT. 25) - A Thai airline launched Thursday the first direct commercial airlink to Phnom Penh, a company spokeswoman said.

Privately-owned Bangkok Airways is to operate chartered flights twice a week, on Mondays and Thursdays, from here to the Cambodian capital, she said.

Thailand has no relations with Phnom Penh's Vietnam-installed government and ranks among the countries which have assisted an anti-Phnom Penh guerrilla coalition most.

The first commercial flight to leave here was a De Havilland Dash 8 aircraft with a capacity of 36, the spokeswoman said. But she declined to disclose the number of passengers on the flight.

According to Phnom Penh-based sources, Bangkok Airways made several trial flights to the Cambodian capital over the last few months before deciding to open its service to compete with European airlines.

A Belgian charter company, Air Belgium, was also to start flights to Phnom Penh Thursday from Brussels using a Boeing 757. The airline will operate two flights a month between the two cities.

The French charter firm Air Liberte will begin weekly flights from Paris to Phnom Pehn on October 30, using an Airbus A300-600R.

In a bid to foil Phnom Penh's efforts to end its international isolation, the Beijing-backed Khmer Rouge warned governments and companies against passing agreements with Cambodia's pro-Vietnamese government.

The warning by the Khmer Rouge mentioned no specific country or firm.

But analysts here said it could be aimed at airlines establishing direct flights to Phnom Penh or countries such as France which announced recently a small bilateral cooperation package with Phnom Penh.

"Any agreement or treaty signed with the puppet regime installed in Phnom Penh

by the Vietnamese occupying forces is null and void," the Khmer Rouge said in a statement.

MANILA (OCT. 25) - The Philippine government has approved a project by the Hong Kong-based Hopewell Holdings to construct a 20 billion peso (776 million dollar) coal-fired power plant, the trade and industry department said here Thursday.

The 700-megawatt plant will be located in Batangas province, just outside Manila, and is expected to be completed in the third quarter of 1994, department spokesmen said.

The plant will be set up the build-operate-transfer system with Hopewell owning and operating the plant for at least 25 years after which it will be transferred without compensation to the state-run National Power Corp. (NPC.)

Under the terms of the contract, NPC will supply the power plant with coal and will purchase electricity from Hopewell, which in turn it will sell to smaller utilities.

Hopewell will provide 160 million dollars in equity for the plant with the balance coming from loans provided by the International Finance Corp. (IFC), the Asian Development Bank (ADB) and exporters' credits.

The plant is expected to lessen an energy shortfall in the main Philippine island of Luzon caused by the government's refusal to operate a disputed nuclear plant completed in 1985 under the administration of Ferdinand Marcos.

Hopewell Holdings is planning to form a local subsidiary called Hopewell Power Philippines to oversee the construction and operation of the plant, the spokesmen said.

It will be the second major project undertaken by Hopewell in this country. Last year, Hopewell installed a 200-megawatt gas turbine plant in the suburbs of this city, also to meet the energy shortfall.

Luzon suffered a serious shortage of electricity late last year with Manila undergoing prolonged power outages.

SEOUL (OCT. 25) - South Korea will suffer a five billion dollar trade deficit this year because of sluggish exports, the first setback since 1986, according to the trade and industry minister.

Minister Park Pil-Soo told a seminar organized by the semi-official Korea Trade Association Wednesday that exports for the year would record 64 billion dollars, one billion dollars lower than the government-set target, representing a mere 2.6 percent increase from last year.

He also calculated that imports for the year would be around 69 billion dollars, a sharp 12.3 percent rise from last year due to higher prices of oil and raw materials caused by the ongoing Middle East conflict.

Mr. Park argued that the nation's stagnant exports are due largely to the fact that they were losing price competitiveness because of rising wages, and to industry's inability to manufacture new products with new technology.

Another factor was that the workers were not working as hard as they used to, contributing to a rise in the defect ratio of export products to 5.8 per cent this year from 4.2 percent last year and three percent in 1988.

Mr. Park, deploring low morale in the workforce, said that the government will provide active support for technological development and improvement of productivity.

TOKYO (OCT. 25) - Japanese electrical machinery giant Toshiba Corp. said Thursday its net profit climbed 31 percent from a year earlier to a record 64 billion yen (464 million dollars) in the six months to September.

The company, the country's biggest electrical machinery maker after Hitachi Ltd., said sales grew eight percent in the same period to 1,584 billion yen (11.5 billion dollars), another record.

"This was largely achieved through strong domestic demand and a good performance in information-communication equipment and electronic devices," a statement said. "A strong dollar also had a favourable impact."

Sales of data communication systems and electronic devices rose eight per cent to 885 billion yen (6.4 billion dollars) while sales of heavy electrical apparatus junped 24 percent to 360 billion yen (2.6 billion dollars).

But sales of consumer products fell three percent to 339 billion yen (2.5 billion dollars), the company said. Exports, amounting to almost a third of total sales, grew two percent to 476 billion yen (3.5 billion dollars).

Toshiba said its net profit in the full year to March was expected to rise 14 percent to 110 billion yen (797 million dollars) with sales climbing six percent to 3,250 billion yen (23.6 billion dollars).

#90298d4730 10/25/1990 ~French/German News Agency
TOKYO (OCT. 25) - Japan's leading electrical machinery maker Hitachi Ltd. said Thursday its net profit grew nine percent from a year earlier to a record 60.3 billion yen (437 million dollars) in the six months to September.

Sales climbed six percent to 1,877 billion yen (13.6 billion dollars) with higher turnover in all sectors except power systems, the company said.

Hitachi said its sales of information systems and electronic devices climbed 14 percent to 879 billion yen (6.4 billion dollars) while sales of power systems fell six percent to 372 billion yen (2.7 billion dollars).

Sales of industrial systems advanced 11 percent to 189 billion yen (1.4 billion dollars) and sales of transport system grew one percent to 172 billion yen (1.3 billion dollars). Consumer product sales rose two percent to 263 billion yen (1.9 billion dollars).

Exports, amounting to almost a quarter of the company's turnover, grew 15 percent tp 455 billion yen (3.3 billion dollars).

The company said it expected its net profit in the year to March to climb 17 percent to 135 billion yen (978 million dollars) with sales increasing five percent to 3,700 billion yen (26.8 billion dollars).

#90298d4750 10/25/1990 ~French/German News Agency
NEW DELHI (OCT. 25) - India's prime minister has earned a fortnight's respite in a political battle being projected as a showdown between secular and fundamentalist forces.

The fate of Vishwanath Pratap Singh's tenuous coalition government will be decided November 7 in parliament in a test of his legislative support.

Observers said Thursday it was a battle the 59-year-old premier would rather not win ahead of inevitable snap general elections.

"V.P. Singh will prefer to lose after hammering the point that he had sacrified his government to put down the greatest challenge to India's secularism," a senior official in the ruling Janata Dal (People's Party) said.

The official, a close associate of the prime minister, said Mr. V.P. Singh had concluded that the "position of his government has become untenable" after 11 months in power during which he has battled paralysing crisis after crisis.

He would rather go to the electorate and ask for a fresh mandate on a secular, anti-fundamentalist platform than continue as a lame duck, the official told Agence France-Presse.

Mr. V.P. Singh's latest crisis erupted Tuesday when the Hindu-revivalist Bharatiya Janata Party (BJP, Indian People's Party) cut off the legislative support sustaining his minority coalition government.

The BJP acted after the government arrested its popular president, Lal Krishan Advani, to thwart its plans to build a Hindu temple on the site of a 16th century mosque.

The crisis has put a sworn BJP enemy, former prime minister Rajiv Gandhi's Congress (I) party, in a spot.

If the Congress - which with 195 MPs is the largest single block in the parliament with an effective strength of 524, votes with the BJP on November 7 to pull down the government - it would be seen to be voting on the side of religious fundamentalism.

The parliamentary motion the government plans to introduce will ask MPs to reaffirm confidence in Mr. V.P. Singh for having saved the nation from a communal conflagration.

TOKYO (OCT. 25) - Japanese trading company C. Itoh and Co. Ltd. said Thursday it had bought 5.1 percent of German steelmaker amd machine-tool manufacturer Klockner-Werke AG for 100 million marks (66 million dollars).

The company, describing the acquisition as the beginning of wide-ranging cooperation in several fields, said it would also form a 100 million mark (66 million dollar) venture with Klockner and Finnish steelmaker Rautaruukki Oy.

The new company, based in Bremen, will make galvanised steel sheets for cars, using technology from Japan's Kawasaki Steel Corp. Klockner will hold 50.1 percent while the Japanese and Finnish partners will each hold 24.95 per cent. Production is targetted at 400,000 tonnes a year by 1993, it said.

A company statement said the tie-up was prompted by the European Economic Copmmunity's planned market integration, the reunification of the two Germanys and democratisation in Eastern Europe.

Tadayoshi Nakazawa, vice president of the Japanese trading giant, told a news conference that the tie-up with Klockner was based on the need for the company to expand production to promote sales, especially in Europe.

"We have already begun talks on further cooperation in the fields of machinery and chemical products," Mr. Nakazawa said.

The statement said such tie-ups would include automotive parts, packaging machinery, plastic-mould machinery and plastic products.

"The two companies will set up a task force to study business and investment development including mergers and acqusitions, focussing on Western Europe as well as Eastern Europe, Asia and the United States," it said. C. Itoh and Klockner are already involved in joint steel production in Greece.

The announcement marks the first tie-up between leading Japanese and German companies since the unification of the two Germanys earlier this month. Japan's Mitsubishi group and German industrial giant Daimler-Benz AG announced a similar tie-up in March in fields ranging from motor vehicles to aerospace.

C. Itoh is one of Japan's major trading companies along with Mitsubishi Corp., Mitsui and Co. Ltd and Sumitomo Corp. Sales totalled 20 trillion yen (159 billion dollars) in the 12 months to March, ranking it second.

Klockner, Germany's fifth largest steelmaker with an annual capacity of 3.5 million tonnes, had annual sales of eight billion marks (five billion dollars) last year.

BRISBANE, AUSTRALIA (OCT. 25) - An ornithologist in a remote part of Queensland said Friday that he had discovered a night parrot, a bird believed extinct for more than 70 years.

The bird, unfortunately, was dead.

Walter Boles, Ornithologist at the Australian Museum in Sydney, said he found it by the roadside near Boulia, about 1,350 kilometres (850 miles) northeast of here.

The night parrot (Geopsittacus occidentalis) lives (or lived) on the ground, flying only when disturbed.

The specimen found by Mr. Boles had apparently been hit by a motor vehicle.

"I knew what it was straight away," Mr. Boles told a radio interviewer, adding that he would claim a 50,000 dollar (40,000 U.S.) prize offered by the Australian Geographic magazine for conclusive proof that the night parrot still existed.

Only 22 specimens of the bird are known to have been collected -- the first in

1845 by explorer John Stuart in the Simpson Desert, South Australia, the last in 1912 in Western Australia.

The state's Minister for Environment, Pat Comben, said he was "thoroughly delighted by one of Queensland's most exciting scientific discoveries."

Newspaper reports quoted him as saying the state government was considering purchase of grazing land around the spot where the new specimen was found.

BANGKOK (OCT. 25) - Seven Cambodian civilians were killed and 24 wounded by resistance guerrilla action in northwestern Cambodia, a Thai army officer said Thursday.

Five traders were killed and about 20 injured Wednesday when the Soviet-made Zil military truck on which they were travelling detonated a landmine planted on a bridge at Phum Tuk Thala village on strategic Highway 5, the officer said.

The officer, based in Thailand's border town of Aranyapathet, 250 kilometres (155 miles) east of here, said the landmine was believed to have been planted by saboteurs of the Khmer Rouge 450th Division.

He said the traders had hitched a ride on the army truck.

JOHANNESBURG (OCT. 25) - South African Airways was taken "totally by surprise" by a Kenyan decision to renege on an agreement to permit passenger flights between Johannesburg and Nairobi, SAA spokesman Leon Els said here Thursday.

The flights were to have begun in December after the Kenyan government announced earlier this month that it was lifting its air links embargo on South Africa.

The Kenyan decision had been criticised by Nelson Mandela, deputy President of South Africa's black nationalist African National Congress (ANC).

The official Kenya News Agency reported Kenyan President Daniel arap Moi as saying that until apartheid was fully abolished and the international community had reviewed its stance on sanctions against South Africa, he would not allow air flights between the two countries.

Mr. Els said he had not been officially informed that the December launch of flights was off.

He said the decision appeared to contradict earlier assurances he had been given that the agreement had been made between SAA and Kenya Airways and not at government level, and the Kenyan government would therefore not interfere.

As recently as Tuesday this week, airline officials had been in contact with each other to finalise plans for the Kenya Airways flight to Johannesburg every Wednesday and an SAA flight to Nairobi every Saturday, Mr. Els said.

TOKYO (OCT. 25) - Japan's Fanuc Ltd. said Thursday its net profit grew 10.9 percent from a year earlier to 18.6 billion yen (135 million dollars) in the six months to September.

The company, the world's biggest manufacturer of numerically-controlled equipment for machine tools, said sales advanced 8.9 percent to 93.3 billion yen (676 million dollars) despite a modest fall in exports.

Fanuc said sales of computerised numerically-controlled systems rose 5.8 per cent to 70.2 billion yen (509 million dollars) while industrial robot sales grew 26.1 percent to 10.6 billion yen (77 million dollars).

Sales of other computerised numerically-controlled items rose 8.7 percent to 8.1 billion yen (59 million dollars). Laser sales soared 49.8 percent to 1.6 billion yen (12 million dollars) while sales of plastic injection-moulding equipment jumped 16.9 percent to 2.8 billion yen (20 million dollars).

Exports, accounting for almost a third of all sales, declined 1.6 percent to 27 billion yen (196 million dollars).

The company, an affiliate of Japan's biggest computer manufacturer, Fujitsu Ltd., said its net profit for the entire year was forecast to reach 37 billion yen (268 million dollars) on sales of 187 billion yen (1.4 billion dollars0

#90298d5110 10/25/1990 ~French/German News Agency

TAIPEI (OCT. 25) - While admitting no wrongdoing in the 1984 murder of a controversial Chinese-American author in California, Taiwan has reached a 1.5 million U.S. dollar out-of-court settlement with the writer's widow, a newspaper reported here Thursday.

In a front-page story, the Chinese-language United Evening News quoted unnamed sources as saying the Taiwan government had agreed to a 1.5 million dollar out-of-court settlment with the widow of Henry Liu.

The widow, Helen Liu, had filed a 300 million dollar lawsuit against the Taiwan authorities before U.S. courts in late 1985, alleging that they were behind her husband's murder.

In Washington, Gerard Harper, a lawyer for Mrs. Liu said Taiwan denied any wrongdoing but agreed to pay an amount of money which he declined to specify.

The U.S. Supreme Court then dismissed the case at the request of attorneys for both sides.

Mr. Liu's killers -- Chen Chi-li, former leader of the notorious Bamboo Union gang, and his lieutenant, Wu Tun -- were sentenced to life imprisonment by a civilian court here in 1985 for gunning down the writer at his Daly City home in California on October 25, 1984.

The gangsters implicated Vice Admiral Wong Hsi-ling, former director of the now-defunct Intelligence Bureau, who was subsequently sacked and sentenced by a military court to life imprisonment.

Two of the disgraced intelligence chief's aides were also convicted of involvement in the murder. They have been released after serving 30-month prison terms.

The sentences of the two gangsters and the disgraced intelligence chief were reduced to 15 years in a clemency in memory of the late president Chiang Ching-kuo in April 1988.

The three were excluded, however, from an amnesty in May this year to mark the inauguration of President Lee Teng-hui.

Mr. Liu -- an alleged triple agent for Taipei, Beijing and Washington -- had written a critical biography of the late president.

PARIS (OCT. 25) - Albanian novelist Ismail Kadare, considered the greatest living Albanian writer, has asked for political asylum in France, his publisher, Claude Durand, of Fayard, said Thursday.

Mr. Kadare, who speaks French fluently, is currently in France which he visits frequently.

He is the author of novels including the 1980 "Nepunesi i pallatit te entrrave" (The employee of the palace of dreams), a Kafkaesque expose of totalitarianism.

He has also published a number of poems and essays.

#90298d5160 10/25/1990 ~French/German News Agency
BANGKOK (OCT. 25) - The Thai government has imposed a midnight curfew on bars and nightclubs at major tourist spots as part of energy saving measures in the wake of rising oil prices caused the Gulf crisis, officials said on Thursday.

An official at Thailand's Pattaya seaside resort said owners of entertainment businesses have been given a deadline until October 31 to comply with an Interior Ministry order to close at midnight.

Owners of entertainment establishments, who can prove that their business was promoting tourism, could submit applications to remain open until 03:00 a.m., which would be considered on a case-by-case basis, he said.

The Interior Ministry directive, issued earlier this month, was aimed at "switching off" thousands of colourful neon signs to save energy.

Authorities in Thailand's northern capital of Chiang Mai, another major tourist town some 700 kilometres (430 miles) from here, said the directive was also being implemented there with entertaniment places closing at midnight.

Officials in Phuket, Thailand's tourist island in the Andaman Sea off the southwestern coast, closing time for bars and night clubs was being imposed at midnight, local officials said.

In Bangkok, a senior police officer said go-go bars and cocktail lounges in the famous Patpong redlight strip were allowed to open until 01:00 while discotheques could stay open until 02:00.

#90298d5170 10/25/1990 ~French/German News Agency
Harare (OCT. 25) - Zimbabwe's fuel costs for the year will more than double as a result of the Gulf crisis, Minister of Energy Herbert Ushewokunzea said Thursday.

Ushewokunzea, in an interview in the daily Herald, said the government was to introduce fuel conservation ''to ensure that the country does not run out of oil''.

He did not specify what measures would be taken, but he urged motorists not to make unnecessary trips and to keep to speed limits.

Zimbabwe's fuel bill since July - for an estimated 1.3 million tonnes of oil - is now projected to rise from the 385 million Zimbabwean dollars (150 million U.S. dollars) anticipated before the Iraqi invasion of Kuwait to 935 million

Zimbabwean dollars, he said.

Zimbabwe imported all its oil from Kuwait. Since the Iraqi invasion, Harare has been forced to rely on the spot market.

It is one of five African and Indian Oceans island nations that have urged the U.N. Security Council to release a Kuwaiti tanker which was carrying oil bound for the region when it was impounded in Aden under the sanctions imposed on Iraq and Kuwait.

The rise in the oil bill comes at a critical time for Harare, which is launching a major structural adjustment programme to breathe life into the country's flagging economy.

Part of the programme involves a sharp increase in desperately-needed imports. But economists fear that the plans will be severely cut back by the need to spend more cash on fuel instead.

-30- 1665
#90298d5300 10/25/1990 ~French/German News Agency
Beirut (OCT. 25) - A roadside bomb exploded under a car in southern Lebanon late Wednesday, killing two of its occupants and injuring the third - all three of whom were members of the Shiite Amal militia, security sources said Thursday.

The injured man was identified as Abu-Fadel, 40, Amal's artillery commander. His two bodyguards were killed when the bomb exploded under their Mercedes, the sources added.

The explosive device had been place on a road in the Shiite town of Ghaziyeh, 45 kilometres south of beirut.

After the blast, the three were rushed to a hospital in the nearby port of Sidon, where the bodyguards were pronounced dead.

An Amal spokesmen accused members of the pro-Iranian fundamentalist Hezbollah of carrying out the attack. The two Shiite groups have been locked in a bitter feud since 1988 over the control of Lebanon's powerful Shiite community. Some 2,000 people have been killed in the two-year rivalry.

#90298d5310 10/25/1990 ~French/German News Agency
SEOUL (OCT. 25) - South Korea will present a list of 15 food items to be excluded from international trade talks, government officials said Thursday amid increased hopes here of a tactical alliance with Europe against Washington.

The so-called offer list will be presented at the General Agreement of Tariffs and Trade (GATT) Uruguay Round of talks going on in Geneva on setting up a world trade system by eliminating barriers such as tariffs and subsidies.

The list includes items such as rice, beef and barley, free imports of which Seoul has always resisted, but also milk products, garlic, pork, chicken, red pepper, sesame, soybean, potato, sweet potato, tangerines, Indian corn and onion.

The decision to place the 15 items on the list was taken at a Wednesday meeting of ministers called by Deputy Minister Lee Seung-Yun, though officials agree they may have to make concessions before the GATT talks end in December.

"Nobody can say that any position will be final," said an official at the Economic Planning Board.

South Korea refuses to open its market further to the cheaper foreign products saying its farmers could not withstand the onslaught and that it needs to remain self-suffient.

Farmers have staged violent demonstrations against the Uruguay Round talks and have recently been joined by radical students. Some 200 protestant pastors were to attempt a march to the U.S. Embassy Thursday to protest the talks.

The United States has been one of the most outspoken supporters of a free market system at the GATT talks, and Washington has received most of the blame, from officials as well as dissidents, for the pressure on Seoul to open up.

#90298d5370 10/25/1990 ~French/German News Agency

FRANKFURT (OCT. 25) - The German airline Lufthansa said Thursday it will launch once-weekly combined passenger-air freight services from Frankfurt to Ho Chi Minh City, formerly Saigon, next week.

The airline said it would be joining a handful of other Western air carriers to establish services to the former South Vietnamese capital, while being the first to use the Boeing 747-400 jumbo jet.

Flights originating in Frankfurt will depart on Mondays, and land the next day in Ho Chi Minh City, first stopping over in Singapore, a spokesman said.

Lufthansa was taking the step in response to the economic opening measures which the Hanoi government has introduced.

Other airlines with services to Ho Chi Minh City include Air France, Thai International, Philippine Airlines, Malaysian Airlines and Garuda. Thai

International is the sole airline of a non-communist country which also has landing rights in Hanoi.

Air industry officials said that Vietnam has plans to establish, parallel to its state-own Air Vietnam airline, a new company, Air Saigon, with the help of foreign capital. Hanoi is also looking for foreign capital partners to help expand the Hanoi and Ho Chi Minh City airports.

BERLIN (OCT. 25) - Economic and monetary union (EMU) will be introduced into the EEC at different speeds by different member countries, the president of the German central Bundesbank, Karl Otto Poehl said on Thursday.

"It is scarcely probable that all 12 members of the European Economic Community (EEC) can or want to participate in EMU at the beginning," he told the annual meeting of the Ecu Banking Association.

"All those who argue the case for rapid application of EMU must accept several levels of integration," he said.

-30- 715

#90298d5520 10/25/1990 ~French/German News Agency

Berlin (OCT. 25) - Uncertainties about property rights in the former East Germany are increasingly proving to be a stumbling block for investments and beyond that, the economic recovery of the eastern part of Germany.

Under the communists, nearly one million pieces of land, houses and companies were confiscated by the state. Now their former owners want the properties back. The economic weekly Wirtschaftswoche asked: ''Who does East Germany belong to?''

Chancellor Helmut Kohl has appealed to officials and companies to quickly remove the barriers blocking property purchases. Firms from around the world, eager to invest in eastern Germany, are now standing in line trying to buy property sites, offices or salesrooms.

The Treuhandanstalt, or official trust office established with the mission to privatise nearly 8,000 former East German state-owned firms, wants to sell real estate properties now in these companies' possession.

The office says these firms have property which they are not at all putting to use. Such property should be made available to new small-scale companies.

Before German unification, Bonn and East Berlin had agreed that the property confiscations carried out between the end of World War Two in May, 1945 and the

establishment of East Germany in October, 1949 should not be rescinded. But private property confiscated by the communist regime after 1949 should be returned.

Damascus (OCT. 25) - Soviet presidential adviser Yevgeny Primakov arrived Thursday in Damascus for talks with Syrian President Hafez Assad on the Gulf crisis.

In a statement quoted by the Syrian news agency Sana, Primakov said he was bringing a letter for Assad from Soviet President Mikhail Gorbachev.

He said Syrian-Soviet relations ''are close and we are continuing coordination and consultations with the Syrian leaders in the light of the complicated events witnessed in the region,'' Sana said.

Primakov was welcomed by Syrian Foreign Minister Farouk al-Sharaa, Sana reported.

The Soviet envoy had flown in from Cairo, where he is to return Friday for talks with Egyptian President Hosny Mubarak.

#90298d5650 10/25/1990 ~French/German News Agency

COLOMBO (OCT. 25) - Seven soldiers were killed in an ambush by suspected Tamil rebels of the Liberation Tigers of Tamil Eelam in northeastern Sri Lanka Thursday morning, military officials said.

The soldiers were returning after a routine patrol towards the northeastern port city of Trincomalee when the incident occured. The rebels took the dead soldiers' communications equipment and weapons, they said.

The incident took place as thousands of Moslems were fleeing from a northwestern island after posters appeared advising all Moslems to vacate the place by Friday. The refugees fled Mannar Island to the nearby Vavuniya and Puttalam districts.

Deputy Defence Minister Ranjan Wijeratne issued shoot-at-sight orders against anyone trying to get the Moslems off the island.

Tamil rebels were believed responsible for the posters.

#90298d5710 10/25/1990 ~French/German News Agency

EINDHOVEN, Netherlands (OCT. 25) - The Philips electronics group is to shed between 35,000 and 45,000 jobs worldwide, or about 15 per cent of the workforce, by the end of 1991, Philips president Jan Timmer said here on Thursday.

Mr. Timmer, who was appointed three months ago and charged with rescuing the company, also announced that Philips would not be paying a dividend for 1990.

The company, which had earlier announced that it was cutting 10,000 jobs, also announced a net loss of 1.8 billion guilder (1.06 billion dollars) in the first nine months of 1990, compared with a profit in the same period of last year of 685 million guilder.

Mr. Timmer said that the firm estimated losses its year would be higher than the two billion guilders (1.18 billion dollars) estimated last July because restructuring costs were higher than the 2.7 billion guilders (1.5 billion dollars) budgeted.

On September 30, 1990 Philips employed 285,700 people throughout the world, and Mr. Timmer told a press conference that the cutbacks would affect "all of the countries in which Philips is present and in all sectors of group activity".

The latest cuts will be in addition to the cuts of 10,000 in the sectors computer engineering and integrated circuits which have been responsible for the biggest losses, he said.

"It is now a matter, no longer of cutting into loss-making sectors of activity but of acting so that we produce better, simpler and cheaper," he said.

There would be no special budget for the new phase of rstructuring which would involve a "radical change in mentalities" in a stratified company, Mr. Timmer said.

"Our directors will have to act within their budgets," he stressed.

#90298d5720 10/25/1990 ~French/German News Agency

ANKARA (OCT. 25) - The International Organization for Migrations (IOM) and the European Economic Community Thursday repatriated 400 Vietnamese workers, who had crossed into Turkey from Iraq, on two chartered flights from Diyarbakir, IOM and EEC officials said.

On Wednesday two chartered Turkish Airlines jetliners flew 394 Vietnamese back to Hanoi from the eastern Turkish city.

They were the first of around 1,100 people due to be brought home by Saturday,

according to IOM and EEC sources.

The Hanoi government late last month appealed to the international community to help repatriate the estimated 16,000 Vietnamese threatened by a lack of supplies and medicine in the wake of the U.N.-imposed embargo following Iraq's annexation of Kuwait in early August.

#90298d5730 10/25/1990 ~French/German News Agency

DHAKA (OCT. 25) - Thousands of students demonstrated in Dhaka Thursday, carrying placards demanding that the government reopen the universities and other educational institutions closed indefinitely since October 13.

The demonstration called by the All-Party Students Unity group signalled growing public anger over an ordinance passed by President Hussain Muhammad Ershad which curbed university autonomy.

The government used the new law to shut down four universities and more than 500 colleges and schools, forcing students to leave campus.

Police in riot gear Thursday kept a strict watch on the road leading to the building housing the Department of Education, which was the target of student protests earlier.

University faculty and lawyers associations have challenged the new ordinance in the country's supreme court, and student leaders have threatened to go on hunger strike over the issue.

The closures were ordered amidst violent street agitation by oppositiion parties demanding the government's resignation and elections under a neutral authority.

Eight people, including two students, died in the violence which erupted on October 10.

BEIJING (OCT. 25) - Chinese lawmakers began Thursday to review draft legislation that calls for the death penalty in serious cases involving narcotics and pornography.

The official New China News Agency said an 18-point "draft resolution on banning narcotics" now before the standing committee of the National People's Congress (NPC) would both supplement and amend current anti-drug laws.

Without giving details, it said it would cover the smuggling, production, sale

and possession of illegal drugs, setting the death penalty as "the most severe punishment."

Public health and police authorities in China report a comeback in the use of opium and heroin, as the country becomes an increasingly active conduit for drugs smuggled out of Burma, bound for Western markets.

A second resolution, dealing with pornography, says execution is to be carried out when suspects "use pornographic materials to carry out criminal activities."

It also sets life imprisonment as the maximum punishment for those convicted of smuggling, producing, duplicating, publishing or selling pornographic materials "for profit."

It defines pornography as "books, films, records, videotapes and pictures that describe sexual behaviour in detail or present obscene scenes."

But it adds that medical and scientific materials, as well as "literary and artistic works with obscene contents that have artistic value" should not be regarded as pornographic.

The death penalty is already invoked regularly in major drug and pornography cases in China.

The NPC standing committee meets regularly throughout the year to discuss legislation to be approved by the entire National People's Congress, China's rubber-stamp parliament, which convenes every March.

CANBERRA (OCT. 25) - The guided missile destroyer HMAS Brisbane and the guided missile frigate HMAS Sydney will sail from here on November 12 to replace two Australian ships in the task force in the Gulf, it was announced Thursday.

Defence Minister Robert Ray said the ships would replace the guided missile frigates HMAS Adelaide and HMAS Darwin, which have been operating in the Gulf since September.

The supply ship HMAS Success "will remain on station until the arrival of her replacement, HMAS Westralia in late January," Mr. Ray said in a statement.

About 600 Australian sailors are serving on board the three vessels in the U.S.-led task force put in place after Iraq's August 2 invasion of Kuwait.

PORT MORESBY (OCT. 25) - The Papua New Guinea government confirmed Thursday that a defence force soldier was killed on Buka Island off Bougainville.

Defense Force commander Brigadier-General Rochus Lokinap said Private Andrew Torima, 23, from East New Britain had been killed but refused to give details of how he died.

Military sources said he was shot by Bougainville rebels on Wednesday and died while being taken to Rabaul.

Pvt. Torima was the first army soldier to be killed since a series of clashes between government security forces and militants four weeks ago resulted in the death -- according to government numbers -- of about 20 rebels and one soldier.

Defence Minister Benais Sabumei rejected Bougainville Revolutionary Army (BRA) claims that 32 soldiers were killed in these clashes.

The minister denied claims that security forces had destroyed villages and that the media would be banned from reporting events on the island.

"I will shortly be taking a group of journalists from Papua New Guinea to Buka to see for themselves what developments are happening," he said.

More than 300 Papua New Guinea troops are on Buka, off the northern tip of Bougainville, after regaining control of the small island from the BRA last month.

The BRA waged a 16-month secessionist war on Bougainville which cost more than 80 lives before Port Moresby's security forces withdrew in March.

Buka community leaders recently disowned the BRA and distanced themselves from its May 17 declaration of independence and signed an agreement with the national government for the restoration of services.

Port Moresby imposed a blockade on BRA-controlled territory after the declaration of independence.

Bougainville, which is separated from Buka by a 500-metre (yard) stretch of water, remains in BRA control.

PARIS (OCT. 25) - Ismail Kadare, considered the greatest living Albanian writer, has asked for political asylum in France after his appeals for

democratisation in his communist homeland went unheeded, his French publisher said Thursday.

The 54-year-old writer on Tuesday, in a surprise move, sent a letter to the hardline communist Albanian leader, Ramiz Alia, to explain his decision, he told Agence France-Presse.

"Until today I have tried to contribute to soften the regime through the means authorised in Albania," he said.

"During my meetings and in an exchange of letters with the president since last spring I expressed very clearly the imperious necessity for a very rapid, deep and total democratisation of the country."

"As there is no possibility for legal opposition in Albania, I have therefore chosen this route that I would never wished to have taken and which I would not advise to anyone," he went on.

Mr. Kadare, who speaks French fluently, is currently in France where he is a frequent visitor.

He is the author of novels including the 1980 "Nepunesi i pallatit te entrrave" (The employee of the palace of dreams), a Kafkaesque expose of totalitarianism, and the "Palace of Dreams" published here but not in Tirana.

In a noted preface to a book by Albanian writer Migjeni, Mr. Kadare writes: "Nobody can ignore that under a tyrannical regime, a great writer who is isolated is a bit like a tree which has been marked to be chopped down".

He said on Thursday that his decision to emigrate was "the logical consequence of everything that I have defended in my work until now".

Mr. Kadare, who has been on the short list for the Nobel prize for literature on several occasions, has also published a number of poems and essays.

France accepted a total 543 Albanian refugees in July after Albanians in Tirana crowded into foreign embassies seeking to emigrate. The Tirana authorities have refused to meet demands for a multi-party system.

BRUSSELS (OCT. 25) - Rwanda's rebel Patriotic Front warned here Thursday that it would resume fighting if the authorities in Kigali failed to meet its conditions for a cease-fire.

The front said it was prepared to observe a cease-fire for three weeks "provided talks on substantial political issues start immediately".

Maintaining the cease-fire would "depend on the sincerity" of President Juvenal Habyarimana and on progress in discussing substantive issues.

The rebels warned: "Any delaying tactics and deviousness on the part of President Habyarimana will be sufficient grounds to resume military operations".

On Wednesday, Belgian Foreign Minister Mark Eyskens said his Rwandan counterpart Casimir Bizimungu had telephoned to say the cease-fire had taken effect at 10 a.m. local time.

The rebels, mostly refugees from Rwanda's Tutsi minority, invaded from Uganda at the beginning of the month.

DUBLIN (OCT. 25) - Iraq is expelling the first secretary of the Irish embassy in Baghad, Adrian McDaid, the Irish foreign ministry announced here Thursday.

The move was "retaliation to the expulsion of their military attache in London who was also accredited to the Irish Republic", a ministry spokesman said.

Foreign Minister Gerard Collins said he "very much regretted" the "unjustified and disproportionate" Iraqi decision.

Mr. McDaid was likely to leave Iraq within a week or 10 days, according to the spokesman.

#90298d6010 10/25/1990 ~French/German News Agency
PARIS (OCT. 25) - Francois Leotard, with an eye on the next presidential elections, on Thursday said he would step down as leader of the centre-right Republican Party (PR) to give himself more freedom to express his views.

Forty-eight year-old Mr. Leotard, who has held the leadership for eight years,

is to announce his resignation officially at a party congress on November 24.

In a six-page letter to the PR's 2,500 elected party representatives and officials, Mr. Leotard said that his surprise decision was "not the result of weariness" but rather a bid to shake up the parliamentary right wing.

The French conservative opposition is grouped in a loose alliance dominated by the neo-gaullist Rally for the Republic (RPR) of Paris Mayor Jacques Chirac. The PR is part of the centre-right Union for French Democracy coalition, headed by former president Valery Giscard d'Estaing.

Mr. Leotard, a former culture minister, fears that the current conservative leadership is likely to produce a presidential contest in 1995 between Mr. Chirac and Mr. d'Estaing for the opposition and would result in defeat against a Socialist candidate.

By placing himself outside the party structure, Mr. Leotard may decide to run as an independent in the presidential race, observers said.

Mr. Leotard stressed in his letter that he would continue to be active within the party and remain a deputy, but would concentrate on a "broader reflection" notably on international affairs.

LONDON (OCT. 25) - The British embassy in the Iranian capital Teheran is to be reopened on Sunday with an initial staff of five diplomats, the Foreign Office said on Thursday.

The move follows the resumption of diplomatic relations between the two countries which were broken off last year over the ''death sentence'' issued against Salman Rushdie, author of ''The Satanic Verses'', by the late Ayatollah Khomeini.

A foreign office spokesman said the move was agreed last month at a meeting between Foreign Secretary Douglas Hurd and his Iranian counterpart, Ali Akhbar Velayati.

The mission will be headed by David Reddaway, who was serving in the embassy when relations were broken.

#90298d6060 10/25/1990 ~French/German News Agency

TOKYO (OCT. 25) - Prime Minister Toshiki Kaifu came under fire from his own ruling party Thursday for diluting his stand on the deployment of Japanese troops abroad despite the constraints of the nation's pacifist constitution.

Some 50 members of the faction under Shintaro Abe, Mr. Kaifu's rival in the Liberal Democratic Party, held a meeting and blasted what they called the premier's untactful handling of the matter that has disillusioned voters.

Meanwhile Foreign Minister Taro Nakayama said he would consider sending a special envoy to neighboring Asian nations to dispel fears raised by a bill before parliament aimed at creating a "peace cooperation corps" to help enforce U.N. resolutions.

"Now 100 per cent of the women are against the bill," one member of the Abe faction reportedly said at the meeting. "It will certainly affect local elections across the nation next spring."

"The bill was a hasty expediency and lacked full consultation," said another.

The premier told a lower house committee Wednesday and Thursday, "We don't intend to change our interpretation of the constitution."

He was returning to a traditional government position that it is unconstitutional for Japan's self-defense forces to join a U.N. force if its objective and mission entail the use of force.

Mr. Kaifu still said Japanese troops could give lateral, non-combat support to a U.N. force, in the fields of medical aid, transport and communications.

Following Iraqi's invasion of Kuwait, the committee is debating the bill to authorize the deployment of troops overseas for the first time since World War II, as part of international peace-keeping efforts.

The bill was drafted in response to criticism from overseas, specially the United States, of Japan's limited participation in multinational efforts in the Gulf.

The premier initially stirred up controversay when he told reporters last week that the government was adopting a new interpretation of Japan's post-World War II constitution.

Mr. Kaifu said the dispatch of Japanese self-defense force members for U.N. operations in is line with the concept of "collective security" as authorized by the U.N. Charter.

KARACHI (OCT. 25) - Serious internal and external challenges await the new Pakistani leadership emerging from Wednesday's elections, topped by a cutoff of U.S. aid, a growing trade deficit and military threats from India, analysts said Thursday.

When the Islamic Democratic Alliance forms the next elected government, it faces the immediate and uphill task of finding external resources to meet a three billion dollar balance of payments deficit.

This is in addition to the political chores of restoring stability and warding off threats from India.

The clear verdict at the polls will help to resolve a crisis of leadership, the analysts said, asserting that Benazir Bhutto fell victim to public accusations of corruption and inefficiency because of weak and divisive leadership during her 20-month rule as prime minister.

The Gulf crisis has forced Pakistan to import oil at international prices ranging between 30 to 40 dollars per barrels, up from the 15 dollars at which Kuwait used to sell its petroleum before the Iraqi invasion.

This has increased Pakistan's oil bill and trade deficit.

The balance of payments deficit of 1.5 billion dollars expected in the fiscal year to June 1991 is now estimated at double the figure, economists say.

According to government sources, Pakistan is seeking 3.57 billion dollars in the year to offset the deficit and maintain growth of five to six per cent in the gross domestic product (GDP).

The country has asked for 3.288 billion dollars from a World Bank consortium of Western nations and 282 million dollars from other sources, officials said.

The 1989-90 growth target of 5.8 per cent was narrowly missed because of shortfalls in agriculture, construction and services, and the loss of industrial production caused by lawlessness and ethnic strife in the southern province of Sindh.

The sources said that about 82 million dollars would be sought from the consortium in food aid to import an estimated 1.5 million tonnes of wheat to meet shortages and build reserves.

SIEM REAP, CAMBODIA (OCT. 25) - Phnom Penh troops and Khmer Rouge guerrilla divisions are preparing for a dry-season confrontation that threatens to engulf the decaying Angkor temple complex in this northwestern province.

The military build-up comes as stalled peace talks reopen the military option and guerrillas are rearming and attacking points within 20 kilometres (12 miles) of the provincial capital, a Phnom Penh source said.

Government forces are determined to defend to the last the temples that the Khmer people revere as symbols of nationhood and past glories, the source said.

"If we were to lose control of Angkor, it would be a catastrophe for us because it is such an important symbol for our people," said Om Phal, vice-president of the regional administration, with civil and military duties.

The provincial capital, Siem Reap, only four kilometres (two miles) from the temple grounds, is the target of a guerrilla strategy, according to the provincial official. He said resistance forces, strengthened by two elite Khmer Rouge divisions, have been stockpiling munitions in preparation for the dry season, which begins in the coming weeks.

Frustrated with the current stalemate of talks aimed at bringing peace to Cambodia, both sides are preparing to renew hostilities so that "while the negotiators negotiate, the fighters fight," he said.

"We are preparing our own offensive against guerrilla positions," said Mr. Om Phal. "The other side is also getting ready."

Provincial authorities say 3,000 resistance troops control a swath of territory in the north bording Thailand, most of them Khmer Rouge guerrillas led by Ta Mok, one of the marxist faction's most-feared commanders.

The faction is grouped in a resistance alliance with the non-communist followers of former Cambodian monarch Prince Norodom Sihanouk and the backers of the country's former prime minister, Son Sann.

According to Western human rights groups here, guerrillas are operating 50 kilometres (30 miles) to the east of the town of Siem Reap.

They launched an offensive there less than a month ago and Phnom Penh brought in Soviet advisors to monitor the situation, Western sources said.

#90298d6460 10/25/1990 ~French/German News Agency

MANAMA (OCT. 25) - ''What are we still doing here?'' complained an American soldier on an Fm radio station in Saudi Arabia. ''We've achieved our goal, prevented Saddam Hussein from invading Saudi Arabia - now let's get outta here''.

Radio Baghdad you might think. But you would be wrong. Free speech of this sort is a luxury being afforded by the Armed Forces Radio and Television Service for the U.S. forces in the Gulf.

The station has been been broadcasting with the permission of the Riyadh government for the last two weeks from a secret location in eastern Saudi Arabia.

That is not to say that Radio Baghdad has not also discovered a new group of potential listeners among the 200,000-plus American soldiers now positioned in the Gulf region.

The Iraqi Voice of Peace has been sending western music out over the airwives intermixed with messages designed to sow seeds of doubt about the mission of the U.S. forces in the region.

''Who is going to profit from a war in the Gulf?'' intones a male presenter in English on the Voice of Peace.

''A few businessmen in the Usa and the corrupt sheikhs in the Gulf,'' the voice promptly answers.

There then follows an interlude of music - oldies and rock, a bit of background muzak, but also some rap and hip hop - before a soft female voice comes on the air: ''Only you are talking about war. Our country is ready to cross the road of peace.''

#90298d6480 10/25/1990 ~French/German News Agency

ABU DHABI (OCT. 25) - Sudanese opposing the Iraqi invasion of Kuwait may face punishment from the country's military rulers, two United Arab Emirates (UAE) newspapers reported Thursday.

Al Ittihad and Al Fajr said instructions had been given to Sudanese missions in the Gulf to make a list of opponents of the August 2 invasion.

The two dailies published the text of what they said was a Sudanese foreign ministry circular issued to Khartoum's embassies in the Gulf.

"Instructions have been issued that our embassies, especially those that have intelligence sections, provide names of those who have taken stands opposing their country's official position regarding the Gulf crisis," the letter said.

The letter did not say what activities those citizens were involved in but several Sudanese groups have condemned Iraq and sent cables of support to Gulf rulers.

The paper asked embassies to focus on those who it said were "standing at the doors of kings and sultans in violation of their country's policy."

Sudan, along with Jordan, Yemen and the Palestine Liberation Organisation (PLO), has been accused of sympathising with Iraq invasion and subsequent annexation Kuwait.

Sudanese embassy officials in the region would not comment on the reports but confirmed plans by their government to issue new passports to Sudanese citizens in December.

Sudan receives nearly 500 million dollars a year in remittances from more than 200,000 Sudanese who live in the oil rich Gulf region.

DAR ES SALAAM (OCT. 25) - Former Tanzanian cabinet minister Salmin Amour, who scored a landslide victory in last Sunday's elections in semi-autonomous Zanzibar, was sworn in as new president on Thursday to succeed retired Idris Abdul-Wakil.

Dr. Amour, 48, won the presidential election on the twin islands of Zanzibar and Pemba by polling 97.7 per cent of the votes and became the fifth president since the half-a-million Zanzibaris toppled a minority Arab Sultanate rule 27 years ago.

The colourful ceremony was conducted by Chief Justice Hamid Mahnoud at Amaan Stadium on Zanzibar island and was witnessed by thousands of Zanzibaris, including its three past presidents -- Aboud Jumbe, Ali Hassan Mwinyi (now Tanzanian president), and Mr. Abdul-Wakil, who declined re-election.

Tanzania's first president, 68-year-old Julius Nyerere, also attended the ceremony. Mr. Nyerere retired from the Tanzanian presidency in 1985 and from

the ruling Chama cha Mapinduzi (CCM) party chairmanship this year and was succeeded by President Mwinyi, now 67.

The new president, who also assumes the chairmanship of the islands' Revolutionary Council, is expected to announce his cabinet next week following the installation on Monday of the House of the Representatives -- the second elected legislature since the 1964 revolution.

Zanzibar, which united with mainland Tanganyika in 1964 to form the federal United Republic of Tanzania, enjoys autonomy, except in foreign affairs, defence and monetary policies.

#90298d6500 10/25/1990 ~French/German News Agency

PARIS (OCT. 25) - The French Aerospatiale aero company made a net profit of 45 million French francs in the first half of 1990 compared with a loss of 109 million francs in the first half of 1989, the company said on Thursday.

Sales totalled 15 billion francs (three billion dollars), up more than 6.6 percent on the previous period.

Aerospatiale said that 57 percent of its sales were from abroad and that work on the European Airbus aircraft represented 37 percent of sales. The helicopter division accounted for 20 percent, as did tactical equipment, while stratgic equipment and equipment for space accounted for 23 percent.

The company said that it expected sales for the year to total 33 billion francs (six billion dollars) compared with 31.7 billion francs (6.3 billin dollars) in 1989, representing an increase of 4.1 percent.

The final result depended on the exchange rate of the dollar. The 1989 profit was 204 million fancs.

The fall of the dollar undermines the profits since Aerospatiale has costs denominated mainly in francs and and sales in dollars.

#90298d6520 10/25/1990 ~French/German News Agency

LISBON (OCT. 25) - East Timor rebel leader Major Xanana Gusmao said here Thursday he was ready to discuss a United Nations-brokered settlement to the 15-year conflict in the Indonesian territory without any prerequisites.

Negotiations should be held between the people of East Timor and Jakarta, and not Portugal, the former colonial power in East Timor, which the United Nations continues to recognize as legal administrator, Major Gusmao said in an interview with a local newspaper.

"The war that has lasted for 15 years is between Jakarta and the people of East Timor", the leader of the East Timor Armed Forces for National Liberation said.

He called on the Indonesian authorities to adopt a more flexible policy toward East Timor to end the guerilla war. "We expect Jakarta to show political maturity".

"In East Timor the day belongs to the Javanese but the night belongs to the guerilla which is the expression of our people's resistance", Major Gusmao said, adding that the Roman Catholic Church gave "political and essentially moral support to the struggle of our people".

#90298d6620 10/25/1990 ~French/German News Agency

SOFIA (OCT. 25) - A statement by a former double agent of Britain and Bulgaria that the KGB, the Soviet secret service, supplied the poison tip to an umbrella believed to have been used to kill Bulgarian dissident Georgi Markov could help advance a Bulgarian government probe into the murder.

The official investigation is the first into several cloak-and-dagger affairs in which western analysts believe the hardline regime of Bulgaria's ousted leader Todor Zhivkov was involved.

In a televised telephone interview, double agent Oleg Gordievski said Wednesday he was convinced that Sergei Gogolov of the KGB's department N1 supplied the poison and the know-how to allow Bulgarian government agents to kill Mr. Markov in London in 1978.

The means to inject the poison into the body of a victim -- "an umbrella or another weapon", according to Mr. Gordievski -- was chosen by the Bulgarian secret services, he said.

He thought the KGB probably did not know who the poison would be used against.

An investigation after Mr. Markov's death by the British authorities was unable to prove that he had been murdered.

But the dissident writer's widow, Annabel Markov, said in her first visit to Bulgaria last February that her husband had received several death threats after reading excerpts from his book on Mr. Zhivkov on the U.S.-controlled Radio Free Europe in Munich, Germany, in January 1978.

Mr. Markov had left Bulgaria illegally and also worked for the BBC.

His wife said he felt a small puncture on one leg when near Waterloo Bridge in

London on September 7, 1978 and saw an unidentified man drop an umbrella and get on a taxi.

WARSAW (OCT. 25) - One in two Polish voters -- 49.3 per cent -- is planning to vote for Prime Minister Tadeusz Mazowiecki in next month's presidential elections, an official poll said here Thursday.

The prime minister's challenger, Solidarity leader Lech Walesa, scored 33.9 per cent among those polled.

However, 41.2 per cent were confident that Mr. Walesa would sweep the presidential poll, as compared to 20.8 per cent for Mr. Mazowiecki.

The Zycie Warszawy newspaper said 44.1 per cent of those polled believed that Mr. Mazowiecki would be a better president than the Solidarity leader (24.2 per cent) but 41.2 per cent said Poles preferred Mr. Walesa to Mr. Mazowiecki (28.2 per cent).

A survey of voter intentions carried out on behalf of Mr. Walesa's electoral committee and published Tuesday said the Solidarity leader had a 45-to-31 edge over the premier.

Another independent survey published on October 7 had produced a similar result.

#90298d6670 10/25/1990 ~French/German News Agency

HONG KONG (OCT. 25) - China will eventually give a go-ahead to Hong Kong's mammoth airport and port project because Beijing has "no other choice," a locally based senior Chinese official said Thursday.

"Beijing will only embarrass itself if it says no," said the senior official of the New China News Agency (NCNA), Beijing's de facto consulate in the British colony, which is due to revert to Chinese rule in 1997.

"Britian and Hong Kong have already started to give out works contracts for the development, Beijing has no other choice but to give approval," he said.

A red light from China "will clearly scare international investors off the project," said the official, who declined to be named.

"Hong Kong will be in a mess and that is the last thing Beijing would want to see."

The NCNA official spoke as a Chinese delegation ended talks with local officials here on the 17 billion U.S. dollar plan, whose financing would stretch way beyond 1997 with about 40 per cent expected to come from the private sector.

The head of the Hong Kong delegation, Chief Secretary Sir David Ford, said Thursday that the talks had been constructive.

"As is well known, the Chinese side support what is in the interest of Hong Kong's stability," he said.

The scheme to build a new airport and port complex on nearby Lantau island has been presented by Britain as a farewell gift that would build confidence at a time when a local exodus was escalating ahead of the handover deadline.

Beijing, on the other hand, has suggested that it was a British conspiracy to leave behind a bankrupt Hong Kong. Chinese party chief Jiang Zemin in February criticised the mammoth project as "you give a banquet and I foot the bill".

"Having the Jiang statement on the record, his juniors can just keep on criticising a bit and meanwhile softening their tones a bit -- as they've done in the past few months -- to lead to an actual go-ahead," the NCNA official said.

He would not predict when the official approval would be announced, but the run-up could take months.

Ching Cheung, editor of local China-watching weekly Contemporary and a former Beijing correpondent for local leftwing daily Wen Wei Po, also said that Chinese approval was inevitable.

"It's all a matter of face," he said of the current foot-dragging.

"Beijing knows perfectly what kind of scenario lies in store should they refuse to endorse the airport business: the colonial government will lose authority and the exodus will heighten," Mr. Ching said.

While calling Chinese concerns over the issue legitimate, British and colonial officials have reaffirmed their authority to rule pre-1997 Hong Kong by stressing that Beijing could be informed but not consulted.

International bankers are keen to see an official Chinese blessing before they participate in the project. While the airport is due to be operational by 1997 the port project has no definite timetable and might carry well into the next century.

China has promised Hong Kong "a high degree of autonomy" after 1997 and said the territory should shoulder its own debts.

"Are you totally convinced of this 'high degree of autonomy'?" queried Edward Leung, chief economist of the Standard Chartered Bank here.

Mr. Leung noted that the site-choice of Chep Lap Kok on Lantau island was made from very limited geographical options, and that the colonial government has said it could afford financing the entire scheme if necessary.

"Unless the Chinese take a very pessimistic view about (the future prosperity of) Hong Kong, I can see no solid grounds for them to actually oppose the project," Mr. Leung said.

Tam Siu-cheung, head of a business research organisation based in the neighboring Chinese special economic zone of Shenzhen, said the key to the question was how the project's benefits would be shared.

Mr. Tam, president of the International Institute for Technology and Business Management, said while China "might not have technological expertise to grab major contracts, it can take part in the financing side with the Bank of China chosen as, say, a lead manager."

"That would provide a ladder for the Chinese to get off the (criticising) stage," he said.

The colonial authorities have said Hong Kong stands to lose 13 billion U.S. dollars by 2010 unless a replacement is built for Kai Tak international airport, which is nearing capacity.

#90298d6710 10/25/1990 ~French/German News Agency

MOSCOW, (OCT. 25) - A building housing Western diplomatic personnel in central Leningrad has been the target of two arson attacks since last week, French diplomatic sources said here Thursday.

Three cars bearing diplomatic license plates were burned overnight Saturday, and several days earlier arsonists attempted to set fire to the apartment of a member of the U.S. consulate, according to the sources.

The U.S. embassy refused to provide the date of the earlier incident.

The Leningrad militia has been asked to protect the building, but has either refused or demanded to be paid in hard currency, the sources said.

One of the cars belonged to an assistant with the economic bureau of the French embassy, another was a service vehicle belonging to the same department, and the third belonged to a member of the German consulate.

No one has claimed responsibility for the attacks, which have not been accompanied by any threats, according to the same sources.

The number of Soviet security personnel around diplomatic buildings has been reduced over the past several months, and certain residential areas inhabited exclusively by foreigners are no longer guarded.

The security presence was previously provided free of charge, but was principally aimed at preventing Soviet citizens from contacting foreigners, until the political liberalization instituted under President Mikhail Gorbachev.

#90298d6740 10/25/1990 ~French/German News Agency

BAGHDAD (OCT. 25) - An eight-story office building collapsed Tuesday in the city center here, killing and injuring several people, Ath-Thawra newspaper reported Thursday.

The newspaper did not provide further details on casualties nor did it say what caused the building to collapse.

But it identified the victims as office workers, pedestrians and the passengers of a taxi crushed by falling debris.

The newspaper said Interior Minister Samir Mohammad Abdelwahab inspected the site immediately after the tragedy occured.

Ath-Thawra recalled that the incident was the second of its kind this year in Baghdad, where an old building collapsed in January causing no casualties.

TEHERAN (OCT. 25) - Iran's urban militias have arrested a total of 2,137 people on drug charges over the past two weeks, including 13 Afghan nationals, official Teheran Radio reported Thursday.

The radio, citing a statement released by the urban militias, said 757 of those arrested were traffickers while 1,380 were drug addicts.

The militias dismantled five drug networks and seized 380 kilograms (836 pounds) of narcotics during several raids in the provinces of Teheran, Khorassan (east), Yazd (south) as well as the northeastern town of Gorghan.

Iran launched a tough nationwide drive in January last year to stamp out drug abuse in the country, with anyone found with more than 30 grams of heroin or more than five kilograms (11 pounds) of opium risking the death sentence.

At least 1,211 persons have been executed by hanging since that date after they were found guilty of breaking the law.

JOHANNESBURG (OCT. 25) - General Mining, the mining arm of South Africa's second-largest mining finance house, Gencor, announced on Thursday the official opening of a new gold mine near Orkney, in Orange Free State province.

The mine, named Weltevreden, was announced last December, and the first gold is to be produced during the first half of 1992 with full production in phase one to be reached in 1993.

Genmin said that Weltevreden is unique to South Africa in that the ore body is relatively shallow - 115 metres (yards) below the surface - and that mining will begin from surface with two declines (tunnels).

Phase one will provide employment for 550 people and will have the capacity to treat 30,000 tons of ore a month. Management expects initial yields to be in the region of 4.2 grams per ton.

Phase two, which will commence in 1995, will increase the mine's production to some 90,000 tons per month using a labour force of about 1,100 people.

Weltevreden's life expectancy is expected to be on the order of 25 years.

NAIROBI (OCT. 25) - The U.N. World Food Programme (WFP) is to provide 25,000 tonnes of cereals for people in the drought-affected areas of Sudan, the organisation announced in a press statement released here Thursday.

According to the statement, food relief, worth 11 million U.S. dollars, including six million dollars for internal transportation, will partly consist of 19,000 tons of wheat that the WFP had positioned in Port Sudan earlier this week.

The cereals are being moved immediately to the drought-affected areas to meet the needs, during a three-month period, of 800,000 people affected by drought and crop failure in the Kordofan and Darfur regions of western Sudan and in the Red Sea province of eastern Sudan.

WFP, in consultation with the regional authorities, Non-Governmental Organisations (NGO's) operating in the area and the Relief and Rehabilitation Commission, has identified 16 districts in the three provinces that require

urgent assistance, the statement said.

It warned, however, that a major emergency of serious proportions is imminent in Sudan during the current crop season as reports indicate that farmers and herders continued to leave their land in search of water, food, employment, and grazing pastures elsewhere following two consecutive years of drought.

METZ, FRANCE (OCT. 25) - French customs officers on Thursday seized 48 kilograms (105 pounds) of caviar which two Polish men were attempting to smuggle into the country, customs officials announced here.

The caviar, 535 90-gram (3.2 ounce) cans hidden under a piece of cloth on the back seat of the car, was discovered at the the northern border checkpoint of Saint-Avold.

The two Polish men had been planning to sell the caviar, valued at 100,000 francs (20,000 dollars) to French restaurant owners.

The men were set free after paying a penalty.

KHARTOUM (OCT. 25) - Egypt has closed its airspace to Sudan Airways planes flying to Jordan to repatriate Sudanese leaving Kuwait and Iraq, the local press reported here Thursday.

The airline's deputy chief Aladdin Mohamed Abdallah said no explanation had been given for the ban on the two weekly flights to the Jordanian port of Aqaba. They were scheduled to last until the end of next month, he said.

Egypt is a leading critic of Iraq's annexation of Kuwait, but Sudan's military junta is supportive.

NEW DELHI (OCT. 25) - A teacher and a student committed suicide to oppose a job quota scheme for the lower castes as the Supreme Court Thursday heard arguments on the plan amid noisy protests by university graduates.

Navin Ojha, an upper caste Brahmin, poisoned himself in the holy Hindu town of Mathura Thursday and in a note said he held Indian Prime Minister Vishwanath Pratap Singh responsible for his death, the Press Trust of India (PTI) said.

Schoolteacher Seema Kumari, 21, burned herself in the northern town of Nahan to protest against the government's August 7 decision to implement the scheme that blocks 49.5 per cent of all federal jobs for the lower castes.

Ms. Kumari, an upper caste Hindu, is the second schoolteacher to die in the protest suicide wave.

Her suicide takes to the number of sacrificial deaths to 53 since the protests began September 19 when Delhi University student Rajiv Goswamy set himself on fire and is presently in a critical state.

A Hindu student, Sanjay Srivastava, tried to commit suicide Wednesday in Allahabad, the hometown of the prime minister, who sanctioned the scheme benefiting 52 per cent of India's 850 million people, PTI said.

More than 50 others, including 13 in New Delhi, have attempted to kill themselves in the copycat suicide wave that forced the government to shut school and colleges.

PTI said an unnamed boy died Wednesday in the northern city of Chandigarh when the police fired on students protesting the scheme.

In the capital Thursday, Delhi University students staged noisy protests in the Supreme Court complex as a five-judge bench heard arguments on the scheme that reserves 45,000 federal jobs for the lower castes.

"Mr. V.P. Singh, don't play with fire ... we want justice," chanted the protestors as policemen with guns and canes ringed them in the red-stone complex, witnesses said.

During the debate the court rejected the defense counsel's appeal to summon all Indian political parties to express their views on the job quota scheme.

MAPUTO (OCT. 25) - Rebels of the Mozambique National Resistance (RENAMO) killed a passenger and wounded three others in an attack on a train in southern Mozambique on Wednesday, Radio Mozambique reported Thursday.

The train was travelling from South Africa to Maputo when the rebels struck about 10 kilometres (seven miles) east of the South African border, the radio said.

The passengers were mainly Mozambican migrant workers returning home from the South African mines. Two carriages were totally destroyed in the ambush and the locomotive was damaged.

Joao Azinheira, the executive director of Mozambique railways' southern division, said this was the 18th RENAMO attack on the Maputo-South Africa line this year and the third this month.

Eight carriages have been destroyed and four locomotives damaged in the attacks, he said.

Mozambique railways now has only two functioning passenger carriages for its operations in the south of the country. As a result passenger traffic to and from South Africa is likely to be interrupted until December, though the line remains open for goods traffic.

RENAMO has also stepped up attacks on the railway in central Mozambique between Zimbabwe and the port of Beira.

Radio Mozambique reported that on Monday traffic was interrupted by an explosion on the line between Mafolga and Amatongas in Manica province. However, damage to the track is said to be slight.

JERUSALEM (OCT. 25) - Israel will ignore the United Nations Security Council resolution condemning its actions on the Temple Mount incident in which 22 Palestinians were killed October 8, a top aide to Prime Minister Itzhak Shamir said Thursday.

Speaking on Israel Army Radio, Yossi Ben-Aharon, director general of the Prime Minister's office, said that Israel ''will ignore'' the resolution which was a ''survivor of past eras.''

He said that Israel would be willing to transmit the results due Friday from its own inquiry to U.N. Secretary General Perez de Cuellar to enable him to report to the Security council on the incident.

Meanwhile, the 1.7 million residents of the occupied territories remained cut

off from Israel and East Jerusalem for the second straight day following an order by Defence Mninister Moshe Arens.

However, some 5,000 to 7,000 worshippers will be allowed to attend Friday prayer services on the Temple Mount under an agreement between Israeli police and Moslem authorities, Israel Radio reported.

The Security Council had rebuked Israel Wednesday for refusing to accept a U.N. probe into the Temple Mount bloodshed, but advisers to Shamir said there was no hope that Israel would change its stance.

Israel has rejected the investigation on the grounds that it would compromise its sovereignty over Jerusalem, parts of which were captured from Jordan in the 1967 Mid-East war and annexed soon after.

Avi Pazner, Shamir's media adviser said that the government was ''disappointed'' with Washington's failure to veto the resolution and argued that the continuing debate ''helps Saddam Hussein distract attention from what is happening in the Gulf''.

KABUL (OCT. 25) - Afghan troops recaptured two security posts overrun by the mujahedeen resistance in southeastern Afghanistan as fighting across the country drew to a seasonal end, a government spokesman said Thursday.

Government forces took the two posts about four kilometres (2.5 miles) outside Kalat, the capital of the strategically important Zabul province, in the last two days, spokesman Humayun Mukammel said.

He said the government had been able to stall a major mujahedeen onslaught to seize the Afghan capital, Kabul, and at least five other unnamed key cities and towns in the past four weeks.

A major mujaheeen assault to overrun Kabul on October 9 failed after government forces hit back with rockets, heavy artillery and air strikes, Mr. Mukammel said, adding that fighting around Kabul had already died down.

However the guerrillas ended a two-week lull in shelling Kabul by firing at last six rockets into the city late Wednesday, he said.

He said two people died and six more were seriously wounded in the shelling, which affected the northern and northeastern parts of Kabul.

Diplomatic sources here said the rockets came from the direction of Chakadara, north of the city.

The government has been carrying out anti-guerrilla operations in Chakadara for the past four weeks.

Both government officials and diplomats said activities of the mujahedeen guerrillas would slow down with the onset of winter in the coming weeks.

However, in the warmer southern parts of Afghanistan sporadic fighting could still contiunue till mid-November, officials said.

They said troops in Kalat continued operations to clear a main highway of guerrilla bunkers, foxholes and mines.

The government has not given precise casualties in countering the stepped up mujahedeen attacks in the past one month, but a top general has put guerrilla losses at some 1,000 killed, wounded or captured.

More than a million people have died during the 12 years of civil war between the mujahedeen fighting to overthrow the Soviet-backed government of President Najibullah and government troops.

#90298d7510 10/25/1990 ~French/German News Agency

WASHINGTON (OCT. 25) - Iraq has raised the number of its forces in southern Iraq and Kuwait from 410,00 to about 500,000, and the United States is considering massing more troops in the Gulf region in response to the Iraqi buildup, reports said Thursday.

The New York Times newspaper quoted a senior Saudi Arabian official as saying Iraqi troops were digging in deeper in Iraq's southern city of Basra and in Kuwait which they invaded on August 2.

The unidentified ranking member of the royal decision-making apparatus told the daily that guerrillas from the Palestine Liberation Front of Abu Abbas had entered Kuwait and were supporting Iraqi troops on internal security and border patrols.

He claimed that other Palestinian forces had sent armed units to back the Iraqi army. No more details were given. The Saudi official said much of his information originated from hundreds of Iraqi soldiers who had allegedly deserted to Saudi Arabia.

The daily Washington Post reported that the U.S. administration was considering sending more troops into the Gulf region to counter the Iraqi buildup and keep the option open for a military offensive.

It quoted U.S. government sources as saying Iraqi President Saddam Hussein seemed unwilling to withdraw from Kuwait because his troops had constructed at

least three defence lines along the border with Saudi Arabia and Iraqis were being settled in Kuwait.

The defensive lines consisted of wide-scale mine fields, anti-tank installations and barbed wire, thus reducing the likelihood of an Iraqi offensive against Saudi Arabia, the sources added.

Meanwhile, Kuwait's exiled Emir, Sheikh Jaber al-Ahmed al-Sabah, Thursday briefed members of his government on the results of talks he held with French President Francois Mitterrand and British Prime Minister Margaret Thatcher in Paris and London last Monday.

#90298d7600 10/25/1990 ~French/German News Agency

HARARE (OCT. 25) - Zimbabwean students and police clashed violently Thursday, a day after authorities introduced a new law that is feared will severely curtail the freedom of the country's only university.

An unknown number of students were arrested in the late afternoon shortly after they were driven away from a demonstration outside the parliament buildings in the city centre by heavily armed police using tear gas and baton charges. In reply, students hurled bottles at police and parliament.

Earlier in the day, police stopped about 500 students as they marched from the campus of the University of Zimbabwe. The crowd taunted police with slogans condemning the government of President Robert Mugabe before being chased the two kilometres back to the campus, where they hurled rocks at police and smashed windows at the administrative block.

On Wednesday a bill was introduced into parliament proposing a variety of sweeping changes in the administration of the university following violence on the campus last year when it was closed for six months.

A statement issued by the Association of University Teachers (Aut) denounced the proposed legislation - which has yet to be debated by parliament - and warned that ''this current legislation will destroy the university.''

Under terms of the bill, the government can appoint the majority of members of the University Council, its governing body, and the government-appointed vice-chancellor, its chief executive, is granted sweeping powers. The government can also establish new forms of disciplinary committees which, said the Aut, ''make a fair and just hearing impossible.''

The bill was introduced with scarcely any delay before its appearance in parliament, and observers believe it will provoke widespread antagonism against the government.

PARIS (OCT. 25) - An Soviet-born man set fire to himself outside the Soviet embassy here Thursday to protest President Mikhail Gorbachev's upcoming visit to France, police said.

The unidentified man has reportedly been living in France since last March.

He chained himself to the embassy fence and poured petrol over his clothes before setting himself on fire. A passer-by managed to put out the fire.

The man was later treated for burns to his legs.

Mr. Gorbachev will arrive for a two-day visit to France on Sunday.

-30- 715
#90298d7720 10/25/1990 ~French/German News Agency
SANAA (OCT. 25) - Hundreds of people have staged demonstrations here in recent days to protest price hikes, notably for petroleum products.

Students Wednesday gathered in front of the Yemeni parliament and the seat of the government to deliver petitions, after demonstrations October 19 and 21.

The Yemeni government decided last week to double the price of petroleum products in response to higher world oil rates.

Officials here said price hikes, which have also affected certain food products, were necessary because of an interruption in oil deliveries from Iraq and Kuwait to a refinery at the port of Aden.

Prior to the Iraqi invasion of Kuwait August 2, the refinery treated 70,000 barrels of oil a day from Iraq and Kuwait.

#90298d7730 10/25/1990 ~French/German News Agency
FREETOWN (OCT. 25) - Sierra Leone is to stop allowing Liberians fleeing a 10-month civil war to take refuge in this neighboring West African country, foreign ministry sources said here Thursday.

The sources said the decision followed a demand by the International Monetary Fund (IMF) that Sierra Leone should stop using unbudgeted funds to assist the refugees.

A United Nations High Commissioner for Refugees (UNHCR) official here said Thursday that the number of refugees in Sierra Leone had exceeded 220,000.

Western diplomats said the role of UNHCR to assist the refugees "had come under severe criticism by government officials" who had wanted the U.N. organization to set up camps instead of integrating them into Sierra Leonean society.

Many Liberian refugees, particularly professionals, have found work in Sierra Leone.

Meanwhile, several Guinean soldiers serving in a five-nation West African expeditionary force in Liberia (ECOMOG) were airlifted to Freetown on Thursday after being stranded for weeks aboard a Guinean naval gunship near an island off the capital.

The gunship, which ran aground on a sand bank on September 26, was on its way to Guinea with hundreds of Guinean refugees from Monrovia. Several refugees and military officers drowned in the incident.

Soviet and French efforts to salvage the Russian-built frigate were abandoned, while Guinean embassy officials said the ship's captain, Ceedu Sanu, "would not leave the wrecked vessel until he has received a clearance note from (Guinean) President Lansana Conte pardoning him for the error."

#90298d7820 10/25/1990 ~French/German News Agency

PARIS (OCT. 25) - Some 30,000 demonstrators marched on the French parliament Thursday behind the leader of the pro-Communist CGT trade union, Henri Krasucki, to protest a government plan for a new 1.1 per cent social security deduction, organisers said.

Demonstrations against the new welfare deduction, which the government hopes will bring in an extra 36 billion francs (seven billion dollars) annually, were also planned in 136 French towns.

The contribution, known as the "Roc'tax" in a reference to its initiator Prime Minister Michel Rocard, is to be deducted at source by employers from next January, if the proposal is adopted by parliament next month.

Meanwhile, thousands of French students demonstrated for the third straight day to protest teacher shortages and to demand security measures after a rash of in-school violence in recent weeks.

The demonstrations, organised in French provincial towns such as Strasbourg, Saint Etienne and Lille, were called in support of Paris students who had staged protests on Tuesday and Wednesday.

#90298d8020 10/25/1990 ~French/German News Agency
WASHINGTON (OCT. 25) - Up to nine million Sudanese may starve because of anticipated poor harvests resulting from failing rains in many parts of the north African country, a top State Department official said Thursday.

Jeffrey Davidow, a deputy assistant secretary of state for African affairs, told a congressional hearing here that as a result of failing rains this year, "the harvest will be substantially below normal."

"Rough estimates are that the harvest will be at least 500,000 tonnes, and perhaps as much as a million tonnes below normal. At that upper limit, eight million to nine million people across Sudan would be at risk," he added.

"A relief program will be necessary to prevent widespread starvation in Sudan next year," he told a subcommittee on Africa of the House of Representatives.

Mr. Davidow said the United Nations along with other donor countries and the United Nations had tried to impress on the Khartoum Government the need for it to ask for a major, coordinated international relief effort.

But Khartoum is downplaying the magnitude of the crisis, he added.

Mr. Davidow also said Washington viewed Khartoum's stance in the Gulf crisis as unhelpful and attributed it to the close military relationship between Iraq and Sudan since the government of President Omar al-Bashir assumed power in June 1989.

Although Khartoum has pledged to comply with the U.S. arms and trade embargo against Iraq, it has refused to condemn the August 2 Iraqi invasion of Kuwait and has engaged in shuttle diplomacy to promote an Arab solution to the crisis.

Mr. Davidow however described as "unsubstantiated" reports that Sudan had engaged in sanction-busting and that Iraq had stationed troops, fighter and missiles on Sudanese soil.

"I would like to emphasize that Sudan's position on the Iraq-Kuwait crisis does not affect in any way our decisions on the provision of relief food to Sudan. This food goes to feed hungry people in Sudan, not the government. We are not using food as a weapon," he said.

He said U.S. efforts to revive peace talks between the Sudanese Government and the rebel Sudanese People's Liberation Army (SPLA) -- which is active in the south of the country -- had made little progress.

"We have seen little evidence that either side is willing to make the difficult concessions that will be necessary to make peace possible," he added.

#90298d8090 10/25/1990 ~French/German News Agency
LIMA (OCT. 25) - Members of the Maoist ''Shining Path'' guerrilla group have shot and killed a high-ranking Peruvian army officer who once fought them, the army said here Thursday.

It said Lieutenant-Colonel Oscar Augusto Caballero was killed by a guerrilla commando group in the streets of Lima on Wednesday. One of the killers was a woman and the group escaped, the army said without elaborating.

Caballero was based in the Ayacucho region in Peru's highlands, where Shining Path has been active for many years.

Meanwhile, the Peruvian government lifted the state of emergency in the province of Huamanga in Ayacucho, 350 kilometres southeast of the capital, for the first time in more than nine years.

But it prolonged the state of emergency by 60 days in four other provinces in Ayacucho due to repeated fighting there between government troops and Shining Path guerrillas. Emergency regulations allow for a restriction of constitutional rights.

#90298d8360 10/25/1990 ~French/German News Agency
OTTAWA (OCT 25) - Canada would consider sending an emissary to Baghdad to try to win the release of its nationals if it was not seen as a weakening of Canada's opposition to Iraq's invasion of Kuwait, Secretary of State for External Affairs Joe Clark said Thursday.

Mr. Clark said Ottawa did not want the 60 Canadians still in Iraq and the 20 in Kuwait from being used as "bargaining chips."

He also denied U.S. reports that he had received an invitation from Iraqi President Saddam Hussein to personally come to Baghdad to get his countrymen.

Responding to reporters' questions, Mr. Clark rejected a suggestion by the opposition Liberal party that a delegation of parliament members from the various parties be sent to Baghdad. But he did not rule out the possibility of sending an emissary.

"I am ready to consider specific proposals that could result in the freeing of Canadians who want to leave Iraq and Kuwait if such a gesture by Canada is not intepreted as a weakening of our determination to see Iraq withdraw from Kuwait," he said.

Speaking before the parliament's foreign affairs committee, Mr. Clark said 97

per cent of the Canadians in Iraq and Kuwait have been able to leave. Of the remaining three per cent, some want to leave and others with dual citizenship want to stay, he said.

Canadian Defense Minister Bill McKnight, who also appeared before the committee, acknowledged that the number of Canadian troops in the Gulf is growing and will climb well above 1,700.

About 100 troops from an infantry regiment based in Germany have been sent to the Gulf as "security personnel" for troops already in place. A number of others, including officers and communications specialists, will also be sent to work at the Canadian general headquarters in Bahrain.

Canada has also sent 937 Marines and helicopter pilots aboard two destroyers and a support ship, and 450 army air force personnel for the 18 CF18 fighters providing air cover for the ships.

LONDON (OCT 25) - British scientists have succeeded in getting human hair to grow in a test tube, in what may well be a step towards a cure for baldness, it was announced Thursday.

''It grows exactly like normal hair,'' Dr. Terence Kealey said at Cambridge University, while announcing the successful experiment.

The hair grew 0.3 millimetres daily and enabled scientists to study the growth of hair in great detail, perhaps allowing them to develop ways of preventing or curing baldness.

The breakthrough was based on a new method, involving removing hair follicles from the skin without damaging the roots.

#90298d8520 10/25/1990 ~French/German News Agency

BRASILIA (OCT 25) - Brazil Thursday announced it would ease import restrictions on 250 high technology products starting January 1, although 80 percent of the national computer market will remain under government protection until October 1992.

In announcing the decision, the official National Computer Council said the government would maintain an import duty of 65 percent on the products covered by the liberalization plan until next year and then scale the tariffs back to 40 percent by 1994.

Imported inputs into the products will carry a 50 percent duty next year, with

the tariff declining to 30 percent by 1994, it said.

Brazil had been at odds with its major trade partners, notably the United States, and international computer manufacturers for closing its markets to imports in a bid to protect its fledgling national industry.

Washington last year targetted Brazil for potential trade sanctions as a result of the import restrictions, but this year removed the threat as a sign of support for President Fernando Collor de Mello's stated intention to liberalize Brazil's import policies.

Under the program announced Thursday, beginning next year restrictions will be lifted on imports of fibre optics, telephone and telex switching equipment, industrial robots and some automotive electronics.

Products still on the restricted list include virtually all microcomputers and most monitors, disc drives and modems, facsimile machines, automatic bank tellers and selected telecommunications equipment.

The government said Thursday it was giving Brazilian computer makers 60 days to come up with production plans to make their wares more competitive before the market is freed up in October 1992.

Companies who fail to come up with realistic plans may see their products removed from the protected list before that date, a Computer Council spokesmen said. The idea is to "improve product quality, bring prices down and open the door to joint ventures with foreign companies," he added.

LONDON (OCT 25) - Administrators were appointed to the maker of three-wheeler cars, Reliant, here Thursday, threatening an end to production of the vehicle - which holds cult status in Britain.

Reliant is also the maker of the Scimitar, a sports car driven by the British Royal Family's Princess Anne, who was convicted of speeding earlier this week.

Recent heavy losses were deemed responsible for the company's problems.

The distinctive fibreglass-bodied Reliant Robin, originally designed as "a rot-proof car for the garageless working class", became the butt of innumerable jokes due to its unstable appearance and low speed.

However, in recent years it achieved cult status as the "company car" of the popular cockney TV character Del Boy.

#90298d8760 10/25/1990 ~French/German News Agency
PRETORIA (OCT 25) - South African Trade Minister Kent Durr and his Romanian counterpart Constantin Fota signed the first-ever trade agreement between the two countries here Thursday, Mr. Durr said.

Under the agreement a joint committee will meet annually to discuss ways of promoting mutual trade, Mr. Durr said in a statement.

"This agreement reflects the process of normalisation of relations between South Africa and Romania, which has gathered momentum over the last few months " he said.

"It further establishes the presence of South Africa officially in yet another Eastern European country."

Mr. Fota arrived Wednesday for a three-day visit featuring meetings with Reserve (Central) Bank officials, merchant bankers, industrialists and the heads of South Africa's mining houses, Mr. Durr said.

Mr. Durr hosted a banquet Thursday for Mr. Fota and four of his delegation.

South Africa's Foreign Minister Pik Botha in January paid an official visit to Hungary, and senior ministers have in the past two weeks welcomed teams from Poland and the Soviet Union who came to South Africa privately.

#90298d9730 10/25/1990 ~French/German News Agency
RIYADH, (OCT 25) - King Fahd of Saudi Arabia and U.S. President George Bush discussed the Gulf crisis in a brief telephone conversation Thursday, Riyadh Radio reported.

The two leaders also reviewed issues of mutual interest, the radio said, but gave no details.

In Washington, Saudi Ambassador Prince Bandar ibn Sultan also refused to give details of the Bush-Fahd meeting, except to say that it was "very positive, very encouraging."

Prince Bandar, the son of Saudi Defense Minister Prince Sultan ibn Abdel Aziz, spoke to reporters after meeting at the State Department with Under Secretary of State for Political Affairs Robert Kimmitt and Morris Busby, a senior State Department official in charge of counter-terrorism.

The envoy, who has been a frequent visitor at the State Department over the past few days, stressed he would not comment on intelligence or terrorism matters he discussed with U.S. officials. But he said his country had been a

target of terrorism in the past and was always on the lookout to pre-empt further attacks.

He was asked to react to U.S. Defense Secretary Dick Cheney's remarks Thursday that the United States might send as many as 100,000 more troops to the Gulf to be prepared for any contingency in the conflict with Iraq.

The United States has deployed more than 210,000 ground, air and naval forces in the area, including 150,000 ground forces in Saudi Arabia, since the August 2 Iraqi invasion of Kuwait.

BAGHDAD, (OCT 25) - Iraqi President Saddam Hussein has decided to free Bulgarian hostages held in Iraq, a joint Iraqi-Bulgarian statement said here late Thursday.

The announcement came at the end of a visit to Iraq by Bulgarian vice-president Atanas Semerdzhiev.

The statement said Mr. Hussein had "taken the initiative of letting Bulgarian workers in Iraq whose contract has expired or whose presence is no longer necessary to complete their projects to leave the country if they wish."

Their return, however, must await formal approval of the Iraqi parliament.

Mr. Semerdzhiev, arriving in Sofia late Thursday, said that more than 430 out of 690 Bulgarians held in Iraq would be returning home shortly. The 430 were workers whose contracts had expired.

The remaining Bulgarians would stay to finish work on civilian construction sites already begun by Bulgarian firms, the Bulgarian official said.

Opposition deputy Stoian Ganev, a member of the Bulgarian delegation to Iraq, told journalists in Sofia that Mr. Hussein made the decision despite President Zhelio Zhelev's stated intention of sending a Bulgarian military unit to the Gulf.

Mr. Ganev said Iraq's favorable attitude was a result of traditional economic ties between the two countries.

The joint statement in Baghdad, which praised the Iraqi leader's decision, affirmed "the need to settle peacefully all problems in the Arab region."

The two sides also "condemned recourse to war, which would be a catastrophe for humanity and the whole world."

Mr. Semerdzhiev said the problem of Iraq's debt of 1.3 billion dollars to Bulgaria had not been mentioned during his talks with Iraqi authorities.

He said he had the feeling that "President Hussein believes the crisis will be resolved by peaceful means."

Lima (OCT. 25) EFE - A group of Peruvian legislators has charged the Army with the disappearance of 60 people in the northeastern jungle region, amid a stepped-up anti-terrorist campaign following an attack on the general in command of the area.

Legislator Blanca Rocha, the spokeswoman for the group including deputies from three parties, said the Army was carrying out "indiscriminate" retaliation attacks since Gen. Mario Britto was seriously wounded in a guerrilla ambush last Friday.

"The Peruvian jungle is in a state of war. Local leaders are arrested without thinking twice, homes are violated and human rights are abused constantly, with the serious result that 60 detainees have been reported missing," Rocha said.

She added that it was not known if the people reported missing after they had been detained were dead or alive.

Anti-insurgency operations have been stepped up since the attack on Britto in the town of Tarapoto, 800 km northeast of Lima, by suspected members of the leftist Tupac Amaru Revolutionary Movement (MRTA).

The MRTA is believed to receive money and weapons from drug traffickers active in the region, in return for protecting coca leaf crops from which cocaine is made.

More than 21,000 people have died in political violence in Peru since 1980.

San Salvador (OCT. 25) EFE - More than 1,000 people have been murdered and 127 others have disappeared between January and September of this year, according to a report released by a Salvadoran human rights group.

The Human Rights Commission of El Salvador (CDHES) report, released Wednesday, said 1017 people had been murdered over that period, 813 of them by the Army.

The CDHES said leftist Farabundo Marti National Liberation Front (FMLN) rebels

were responsible for 21 of the deaths, while it was not clear who had killed the rest.

According to the report, the Armed Forces were responsible for the disappearances of the 127 people who have gone missing this year.

In the first eight months of the year, 553 people have been captured by the Armed Forces, while the FMLN has seized 79 others.

Over 75,000 people have died since the FMLN began fighting a series of U.S.-backed governments in 1980. Over half of these killings are believed to be the work of right-wing deaths squads linked to the military.

According to a report released this week by the international human rights group Amnesty International (AI), at least 45 people were killed in El Salvador between January and August this year by the death squads.

AI said this figure was more than double the number of murders denounced to the organization over the same period last year.

BOGOTA (OCT. 25) EFE - A one-time leftist guerrilla commander turned government minister is about to resign his cabinet post in hopes of getting a chance to help draft a new constitution for Colombia, news reports said Wednesday.

Bogota's Radio Caracol station said Health Minister Antonio Navarro Wolff, the former number-two commander of the leftist M-19 rebel group, would be submitting his resignation Thursday to President Cesar Gaviria.

Navarro Wolff has decided to run for a seat in the 70-member National Constituent Assembly set to be elected December 7 whose job it will be to draft a new constitution for the country, the radio reports said.

A leftist parliamentary deputy told the station that Navarro Wolff was planning to ask the 1982 winner of the Nobel Prize for Literature, Colombian novelist Gabriel Garcia Marquez, to run as an alternate on his party's list of candidates for the constitutional assembly.

Navarro Wolff did extremely well in last May's presidential elections, which were held only a few months after M-19 ended its 16-year-old insurgency under a deal with the government of Gaviria's predecessor, Virgilio Barco.

M-19 emerged as the country's third most-voted political party and survived the loss of its charismatic leader, Carlos Pizarro, who was shot dead by a hired gunman believed working for the drug trafficking gangs.

In a related development Wednesday, 30 former M-19 rebels who settled in the northeastern city of Bucaramanga announced they have all decided to become taxi drivers under a government scheme sponsoring their return to civilian life.

However, in choosing a distinctive name for their co-operative taxi company, the ex-guerrillas were true to their origins, taking the name of a peasant rebellion of the last century.

MADRID (OCT. 25) EFE - Spanish authorities Thursday continued investigations into a massive fraud by numerous Spanish companies which cheated the government out of almost dlrs 24 million in Value Added Tax (VAT).

Some 50 companies have been implicated in the tax fraud, which involved using falsified VAT receipts paid to phony suppliers to reduce the net amount of the tax owed to the government.

Police arrested a suspect in the fraud Thursday in Madrid, bringing to eight the number of people being held in the scam, authorities said.

The detainees were thought to be responsible for running the phantom companies existing only on paper which sold the phony VAT receipts to the firms under investigation.

The investigations began in Barcelona, where most of the companies implicated in the fraud so far are based, but authorities have found irregularities in the VAT accounting of at least five Madrid-based firms and two in the northern city of Pamplona.

MADRID (OCT. 25) EFE - A foreign policy adviser to Soviet President Mikhail Gorbachev, Andrei Grachev, was quoted Thursday as saying that the Warsaw Pact will formally be dissolved next year.

Grachev, in Spain preparing for Gorbachev's two-day visit beginning Friday, told the Madrid daily ABC that the East European military alliance would cease to exist "formally next year, now that in reality it disappeared at the moment of German unification."

The adviser said that the Kremlin must change its relations with the East and Germany if its wants to return become part of the new Europe.

Since German unification on October 3, there are six East European nations in the Soviet-led Warsaw Pact.

"As far as we are concerned, there now does not exist any obstacles for the reunification of Europe," Grachev said.

He added that with the new Europe, the cold war defense systems of opposing blocs has to reconsidered.

"With the dissolution of the Warsaw Pact next year we will have to work to create a collective security system in Europe that will not be aggressive, but one that will protect the interests of all Europeans," Grachev said.

Meanwhile, a popularity poll published Thursday in the Madrid daily Diario 16 showed that 57 percent of Spaniards questioned consider Gorbachev as the world leader who has done more to bring about world peace.

According to the poll, the 1990 Nobel Peace Prize recipient was well above German Chancellor Helmut Khol's 8.1 percent and U.S. President George Bush's 4.2 percent.

During Gorbachev's three-day visit to Madrid, he is expected to sign documents outlining the two countries' relations and discuss bilateral and international issues and the Gulf crisis.

He will meet with King Juan Carlos and Prime Minister Felipe Gonzalez, and discuss dlrs one billion in Spanish economic aid for Moscow following the approval last week of a plan to set up a market economy in the Soviet Union.

The aid is to be in the form of credits at preferential rates so that Soviet companies can buy goods from Spain.

Tirana (OCT. 25) EFE - The foreign ministers of the six Balkan states ended their two-day conference in communist Albania Thursday with a joint statement supporting democracy, a market economy, and the rights of minorities.

"The ministers stress the need to develop a state governed by law, pluralist democracy, democratic institutions and a market economy," read the statement.

The ministers of Albania, Bulgaria, Romania, Greece, Turkey and Yugoslavia also reaffirmed +the efforts of their countries to promote cooperation among the Balkan states in the political, economic, cultural and humanitarian areas+.

Albania backed the statement in favor of Western-style politics and economics in a further indication that it intends to move away from its Stalinist

political and economic systems, and end its international isolation.

On Tuesday, the communist government in Tirana announced free and secret balloting in future parliamentary elections.

Albania is the last East European nation to follow Marxism.

At the conference, the participants managed to put aside bilateral disputes to come up with the joint document pledging further efforts to deepen cooperation in this ethnically diverse region, which has been described by some historians as the "powder keg of Europe".

The ministers also backed Albania's application to join the 34-nation Conference on Security and Cooperation in Europe (CSCE), to which it was admitted as an observer in July.

The Balkan states +welcome Albania's request to join the CSCE and hope this will occur soon,+ the statement read.

The ministers announced that a conference of the Balkan states will be held annually and the next is to take place in Bulgaria in the autumn of 1991.

(OCT. 25) EFE - Three French tourists, a German and six Cubans, were killed when an airliner with 31 people on board crashed near the eastern city of Santiago, a hospital spokesman said Thursday.

Two other Cubans injured in the crash Wednesday were in critical condition Thursday, including popular singer Miguel Angel Pina, a spokesman for Saturnino Lora hospital in Santiago said.

Twelve Spaniards and seven other Cubans were injured but are expected to survive, the spokesman said.

Officials had said Wednesday that the Europeans killed were all Germans.

The Soviet-built Yak-40, belonging to Cubana de Aviacion airlines, crashed before dawn Wednesday near Santiago's airport, some 900 km southeast of Havana.

The flight was en route to Santiago from Camaguey, in the center of the island carrying passengers from a previous Havana- to-Santiago flight that had been diverted to Camaguey because of bad weather.

JERUSALEM (OCT. 25) EFE - A senior Palestinian leader claimed Thursday that Israel's closing off the Occupied Territories might be aimed at giving Palestinian jobs to Jewish immigrants from the Soviet Union.

Faisal al-Husseini, who was allowed out of prison on bail on Wednesday, said, "I do not know whether the decision to close off the frontiers is for security after the latest wave of violence, or economic, to give work to the new Jewish immigrants."

Husseini was jailed after being accused by the Israeli authorities of instigating the stoning of Jews praying at the Holy Mount in Jerusalem on October 8.

The incident led to some 22 Palestinians being killed by security forces.

On Wednesday the Israelis closed off the Occupied Territories of Gaza and the West Bank, preventing some 120,000 Palestinians from getting to work in Israel.

Officially the move was said to be aimed at preventing the tit-for-tat violence between Palestinians and Jews that began at the weekend and left four people dead.

But Israeli labor exchanges are now opening 12 hours a day, four more than usual, to fill new offers of jobs in a country that has 10 per cent unemployment and is expecting a flood of 180,000 Soviet Jewish immigrants this year.

Palestinian workers could have been expected to help build houses for these new citizens, as two-thirds of the jobs in the Israeli construction industry were previously held by Palestinians from the Occupied Territories.

Their jobs, normally rejected by the Israelis because of the low pay, could now go to the Soviet immigrants.

Husseini said the closure of the frontiers also threatened to break support for the intifada, the 34-month-old uprising against the Israelis.

"What we need is for the international community to be convinced that we are not seized by the law of the jungle, and that international legality is respected," he said.

"One cannot apply one U.N. resolution against one country, and not against another," he added, alluding to the Palestinians' denunciation of United Nations sanctions against Iraq when Israel ignored those made against them.

Despite the closure of the frontier, many Palestinian workers are believed to be hiding out in Tel Aviv, after being ordered to return to their homes Wednesday by Defense Minister Moshe Arens, Israeli state radio said Thursday.

They said the workers were being hiden by their Jewish employers.

The independent Yedioth Aharonoth newspaper Thursday quoted leading economist Efraim Ajiram as saying "Israel depends on Palestinian workers".

With up to 40 per cent of their population working for the Israelis, the government's closure of the borders would "intensify terrorism ...as these workers now have nothing to lose."

The president of the Association of Palestinian Jornmalists, Raduan Abu Ayesh, told the same paper that the closure was "a political victory for our people".

It recognized a "Palestinian entity separate from Israel", he added, in contrast to Israeli Prime Minister Yitzak Shamir's claims that the Occupied Territories were an integral part of Israel.

He said Israeli troops should now be substituted in the territories by U.N. forces to protect the Palestinians.

BUENOS AIRES (OCT. 25) EFE - Argentina posted a dlrs 5.7 billion trade surplus in the first eight months of the year, the National Institute of Statistics and Census (INDEC) announced Thursday.

Using provisional data for August, INDEC said the surplus was 52 percent up on the same period last year.

Most of the exports were agricultural products, but there had also been increases in fossil fuels, paper and textiles, among others.

Argentina's main market was the United States, followed by the Benelux countries (Belgium, Netherlands and Luxembourg), Brazil and the Soviet Union, while the major importers were the United States, followed by Brazil and Germany.

#90298e0041 10/25/1990 ~Latin America New Agency

BRUSSELS (OCT. 25) EFE - Soviet Armed Forces chief Gen. Mikhail Moiseyev said Thursday that negotiations on cutting nuclear arsenals should continue after the first Strategic Arms Reduction Treaty (START) is signed.

"Nobody can now see the Soviet Union as a power that challenges the rest," he said on a visit to NATO headquarters in Brussels.

The first phase of START, on which U.S. President George Bush and his Soviet counterpart, Mikhail Gorbachev, reached preliminary agreement in June, is expected to be signed before the end of the year.

But while it includes limiting intercontinental missile launchers to 1,600 on each side and long-range nuclear warheads to 6,000, other nuclear weapon systems are excluded.

Moiseyev also asked whether NATO ought to follow the same path as the Warsaw Pact alliance which, he insisted, would eventually be dissolved.

"The Soviet Union does not threaten anybody," he said. "The new Soviet strategy is based on defense. We have no territorial claims against any other state."

Gen. Vigleik Eide, president of NATO's Military Committee, which formulates the alliance's military policy, said Moiseyev had a vision of Europe "free of military blocs" with a new common security structure.

On Friday the Soviet chief will visit the NATO command center near Brussels where he will meet the Chief of Allied Forces in Europe, U.S. Gen. John Galvin.

#90298f1825 10/25/1990 ~United Press International

CHICAGO (OCT. 25) UPI - Grain and soybean futures traded in narrow ranges and were mostly lower at the close Thursday on the Chicago Board of Trade.

The prospect of good harvest weather for several days pressured corn and soybeans, as did the lack of export sales. Both corn and soybeans were at or near session lows at the final bell, but losses were tempered by light country movement and firm basis levels.

The possibility of heavy deliveries of November beans on the first notice day Wednesday also weighed on soybean values, as did the weakness in soybean oil and meal.

Corn was pressured by the harvest and profit-taking. There also were indications the Soviet Union may not buy more corn until it receives export credit guarantees.

Commercials dominated the selling in corn, although the volume was light.

Reports of excellent progress in the seeding of soft red winter wheat kept a lid on wheat futures. The lack of exports and spillover weakness from the rest of the floor contributed to the losses in wheat.

At the close, corn was off 1 3/4 to 2 3/4, soybeans unchanged to down 5 1/4, wheat off 1 to 2 3/4 and oats down 1/2 to 3/4.

NEW DELHI (OCT. 25) XINHUA - THE INDIAN PLANNING COMMISSION HAS APPROVED A BUDGET ALLOCATION OF 320 MILLION RUPEES (18.8 MILLION U.S. DOLLARS) FOR THE DEVELOPMENT OF THE FOOD PROCESSING INDUSTRY FOR 1990-91, ACCORDING TO LOCAL PRESS REPORTS TODAY.

HOWEVER, THIS IS REGARDED AS INSUFFICIENT TO MEET THE LARGE REQUIREMENT OF THE SCHEME FOR SETTING UP AND STRENGTHENING FOOD AND VEGETABLE PROCESSING.

INDIA IS BELIEVED TO BE THE THIRD LARGEST PRODUCER OF FRUITS NEXT TO BRAZIL

AND THE USA, AND THE SECOND LARGEST PRODUCER OF VEGETABLES AFTER CHINA. HOWEVER, THE FOOD PROCESSING INDUSTRY IN THE COUNTRY HAS REMAINED UNEXPLOITED.

AT PRESENT ONLY ONE PERCENT OF FRUITS AND VEGETABLES GROWN IN INDIA ARE PROCESSED.

INDIAN EXPERTS FEEL THE NEED FOR AN URGENT INTEGRATED ACTION PLAN TO TAP THE VAST POTENTIAL IN THE FOOD PROCESSING FIELD TO IMPROVE FOOD SUPPLIES, GENERATE A LARGE-SCALE EMPLOYMENT ESPECIALLY IN RURAL AREAS, PROVIDE A BOOST TO MANY DOWNSTREAM INDUSTRIES AND GARNER FOREIGN EXCHANGE THROUGH INCREASED EXPORTS, THE REPORTS SAID.

THE EXPERTS SUGGESTED THAT STEPS SHOULD BE TAKEN FOR THE ADEQUATE SUPPLY AND UPGRADATION OF THE RAW MATERIAL NEEDED FOR THE FOOD PROCESSING INDUSTRY. IT HAS ALSO BEEN SUGGESTED THAT SPECIAL INCENTIVES BE GIVEN TO THE INDUSTRY FOR UNDERTAKING RESEARCH AND DEVELOPMENT PROGRAMS TO DEVELOP HIGH-YIELDING VARIETIES OF CROPS. IN THE INITIAL STAGES THE INDUSTRY MAY BE ALLOWED DUTY-FREE IMPORT OF MACHINERY AND EQUIPMENT NOT AVAILABLE IN THE COUNTRY.

BEIJING (OCT. 25) XINHUA - A DRAFT OF CHINA'S FIRST PROTECTION LAW WHICH SAFEGUARDS THE LEGAL RIGHTS OF THE HANDICAPPED WAS SUBMITTED TO THE STANDING COMMITTEE OF THE NATIONAL PEOPLE'S CONGRESS (NPC) TODAY FOR DISCUSSION.

PREMIER LI PENG SAID IN HIS MOTION THAT THE DRAFT LAW WAS DESIGNED TO HELP THE HANDICAPPED EQUALLY PARTICIPATE IN SOCIAL LIFE AND BETTER ENJOY MATERIAL AND CULTURAL ACHIEVEMENTS OF THE SOCIETY.

CUI NAIFU, MINISTER OF CIVIL AFFAIRS, EXPLAINED THE NECESSITY, BASIS, PRINCIPLE AND CONTENTS OF THE DRAFT LAW.

"CHINA HAS MORE THAN 51 MILLION HANDICAPPED PEOPLE, WHO REPRESENT 4.9 PERCENT OF THE TOTAL POPULATION, AND 18.1 PERCENT OF THE CHINESE FAMILIES HAVE AT LEAST ONE MEMBER WHO IS HANDICAPPED," THE MINISTER SAID.

"THEREFORE, IT IS BOTH NECESSARY AND URGENT TO FORMULATE A SPECIAL LAW TO PROTECT THESE PEOPLE WHO ARE FACED WITH A MORE DIFFICULT LIFE." THE MINISTER ADDED.

DURING THE PROCESS OF DRAFTING, THE MINISTRY OF CIVIL AFFAIRS COLLECTED AND STUDIED A LARGE NUMBER OF FOREIGN MATERIAL ON THE LEGISLATURE CONCERNING THE HANDICAPPED WHILE CONSULTING DISABLED PEOPLE AND EXPERTS AT HOME.

SINCE 1980 CHINA HAS ADOPTED A NUMBER OF REGULATIONS ON THE PROTECTION OF THE RIGHTS AND INTERESTS OF THE HANDICAPPED.

#90298h0038 10/25/1990 ~Chinese News Agency

TIANJIN (OCT. 25) XINHUA - WITH A GOOD HARVEST OF AUTUMN CROPS, THE GRAIN OUTPUT OF TIANJIN MUNICIPALITY IS EXPECTED TO REACH 1,800 MILLION KG THIS YEAR AN ALL-TIME RECORD AND 100 MILLION KG MORE THAN LAST YEAR.

THIS WILL BE THE SIXTH CONSECUTIVE BUMPER HARVEST FOR TIANJIN, DESPITE THE FACT THAT THE MUNICIPALITY'S 313,000 HA OF GRAIN-GROWING FARMLAND HAS REMAINED ALMOST THE SAME. THE TOTAL OUTPUT OF GRAINS HAS INCREASED BY 100 MILLION TONS EVERY YEAR AND THE PER-HA OUTPUT HAS GROWN FROM 3,750 KG TO 5,250 KG.

THE MUNICIPAL GOVERNMENT HAS PAID SPECIAL ATTENTION TO AGRICULTURE IN THE PAST FEW YEARS. EXTRA EFFORTS HAVE BEEN MADE IN THE CONSTRUCTION OF WATER CONSERVANCY PROJECTS, THE UPGRADING OF LOW-YIELDING FARMLAND, THE USE OF FINE SEEDS AND THE IMPROVEMENT OF FIELD MANAGEMENT.

BANGKOK (OCT. 25) XINHUA - THAILAND NOW HAS A HIGH RATE OF MENTAL ILLNESS AT 32 OF EVERY 1,000 PEOPLE WITH CHILDREN AND YOUTHS AMONG THOSE MOST SEVERELY AFFECTED, ACCORDING TO A REPORT OF THE THAI PUBLIC HEALTH MINISTRY.

THE REPORT SAID CHILDREN AND YOUTHS MAKE UP A LARGE PART OF THE STATISTICS AND THEY ARE DIVIDED INTO TWO GROUPS, THOSE IN THE SCHOOL SYSTEM AND THOSE OUTSIDE THE EDUCATION SYSTEM.

THE LATTER GROUP IS MOST WORRISOME SINCE THEY OFTEN LACK THE GUIDANCE OF ADULTS AND DO NOT HAVE ANYONE TO DEPEND ON MENTALLY.

DR. SUJIN PALAKORNKUL, MEDICAL DEPARTMENT DIRECTOR-GENERAL, SAID THAT WHETHER OR NOT MENTAL HEALTH PROBLEMS FACING CHILDREN AND YOUTH COULD BE GREATLY ADDRESSED DEPENDED ON A LARGE PART ON THE PARENTS AND THE FAMILY WHICH MUST GIVE TIME AND ATTENTION TO THEM.

PARENTS SHOULD SPEND TIME WITH THEIR CHILDREN AND LISTEN TO WHAT THEY THINK AND GIVE THEM ADVICE RATHER THAN LEAVING THEM TO THEIR OWN DEVICES OR HANDING THEIR CARE TOTALLY OVER TO NANNIES, HE SAID.

A MINISTERIAL COMMITTEE WILL BE FORMED TO STUDY THE ISSUE AND MAKE PROPOSALS TO THE CABINET, SAID THE REPORT.

THE PUBLIC HEALTH MINISTRY WILL ALSO WORK WITH TEACHERS SO THAT THEY COME TO UNDERSTAND THE PROBLEMS AND BEHAVIORS OF THEIR YOUNG STUDENTS.

DAR ES SALAAM (OCT. 25) XINHUA - THE PRESIDENT-ELECT OF ZANZIBAR, SALMIN AMOUR, WAS SWORN IN TODAY AND BECAME THE FIFTH PRESIDENT OF THE ISLANDS AFTER WINNING 97.4 PERCENT OF THE VOTES IN LAST SUNDAY'S GENERAL ELECTIONS.

A CEREMONY, WHICH DREW TOGETHER ALL LEADERS OF TANZANIA, WAS HELD TODAY IN ZANZIBAR TO CELEBRATE THE VICTORY AND SUC- CESSFUL CONCLUSION OF THE GENERAL ELECTIONS ON THE ISLANDS.

MR. AMOUR WAS ELECTED THE SOLE PRESIDENTIAL CANDIDATE BY THE RULING TANZANIA REVOLUTIONARY PARTY IN AUGUST AFTER FORMER PRESIDENT IDRIS ABDUL WAKIL EXPRESSED HIS WISH FOR RETIREMENT.

THE ZANZIBAR ELECTORAL COMMISSION ON TUESDAY DECLARED AMOUR THE NEW ZANZIBAR LEADER. ZANZIBAR WON ITS INDEPENDENCE IN JANUARY, 1964 AFTER THE OVERTHROW OF THE SULTAN RULE IN AN UPRISING.

WITH A POPULATION OF 640,000, THE INDIAN OCEAN ISLANDS OF ZANZIBAR AND PEMBA UNITED WITH TANGANYIKA IN APRIL, 1964 TO FORM THE UNITED REPUBLIC OF TANZANIA. ZANZIBAR HAS ITS OWN GOVERNMENT AND PARLIAMENT UNDER THE LEADERSHIP OF THE RULING PARTY AND THE UNION PRESIDENT.

UNDER THE CONSTITUTION OF THE UNITED REPUBLIC OF TANZANIA, THE ZANZIBAR PRESIDENT WILL AUTOMATICALLY BECOME THE SECOND VICE PRESIDENT OF TANZANIA. THE GENERAL ELECTIONS OF MAINLAND TANZANIA WILL BE HELD ON OCTOBER 28.

THE NEW CABINET OF ZANZIBAR IS EXPECTED TO BE FORMED IN THE COMING DAYS WHEN THE HOUSE OF REPRESENTATIVES, THE ISLES' PARLIAMENT, OPENS AGAIN.

MR. AMOUR, 48, HAS BEEN A MEMBER OF THE PARTY CENTRAL COMMI- TTEE, THE COUNTRY'S TOP POLICY-MAKING BODY, AND THE SECRETARY RESPONSIBLE FOR ECONOMIC AFFAIRS AND PLANNING OF THE PARTY CENTRAL LEADERSHIP.

#90298k0024 10/25/1990 ~Japanese News Agency

NAGOYA (OCT. 25) KYODO - TWO ARMED MEN ABANDONED SOME 30 MILLION YEN IN FOREIGN CURRENCY AND TRAVELERS CHECKS THURSDAY AFTER FAILING TO CRACK THE VAULT IN A HIJACKED SECURITY COMPANY DELIVERY VAN.

BUT THEY MADE OFF WITH 20,000 YEN FROM THE DRIVER OF ANOTHER VAN THEY TOOK TO MAKE THEIR GETAWAY, POLICE SAID. NO ONE WAS HURT OR WOUNDED IN EITHER OF THE INCIDENTS.

THE CONTENTS OF THE DELIVERY VAN INCLUDED 125,500 AMERICAN DOLLARS AND 10,000 AUSTRALIAN DOLLARS IN CASH ALONG WITH 50,000 U.S. DOLLARS AND 5 MILLION YEN IN TRAVELERS CHECKS.

ACCORDING TO AICHI PREFECTURAL POLICE INVESTIGATORS, THE DELIVERY VEHICLE, BELONGING TO A LOCAL SECURITY FIRM, ARRIVED AT THE UNDERGROUND PARKING LOT OF THE NAGOYA BRANCH OF THE BANK OF TOKYO IN CENTRAL NAGOYA AT ABOUT 8:15 A.M. AFTER A 20-MINUTE DRIVE FROM THE SECURITY FIRM'S LOCAL DELIVERY DEPOT.

THE TWO MEN, DISGUISED IN SKI MASKS, APPROACHED THE SECURITY VEHICLE SHORTLY AFTER THE CAR REACHED THE PARKING LOT AND POINTED THEIR GUNS AT THE TWO GUARDS.

WARNING THE SECURITY OFFICERS THAT THE PISTOLS "ARE NOT FAKE," THE MASKED MEN FORCED THE GUARDS FROM THE VAN AND MADE THEM FACE THE PARKING LOT WALL.

THE ROBBERS FIRED TWO SHOTS, GRABBED THE KEYS FOR THE VAULT IN THE VAN AND DROVE THE VEHICLE AWAY.

DURING THE GETAWAY, THE ROBBERS COLLIDED WITH ANOTHER CAR IN THE PARKING LOT AND PUNCTURED ONE OF THE VEHICLES TIRES. POLICE LATER FOUND THE VAN IN ANOTHER PARKING LOT, ABOUT ONE KILOMETER AWAY, WITH THE LOCKED SAFE INTACT.

SECURITY OFFICIALS SAID THE AUTO-LOCK SAFE HAS A SPECIAL COMBINATION, AND WAS ABANDONED BY THE ROBBERS WHEN THEY COULD NOT FORCE IT OPEN.

THE TWO ARMED MEN THEN STOPPED A SECOND CAR, FORCED THE DRIVER FROM THE VEHICLE AND TOOK 20,000 YEN BEFORE DRIVING AWAY.

THE SECOND CAR WAS LATER FOUND IN MEIJO PARK, ANOTHER 500 METERS AWAY, WHERE POLICE BELIEVE THE ROBBERS CHANGED TO A THIRD CAR FOR THE FINAL LEG OF THEIR GETAWAY.

A CAR ABANDONED IN THE UNDERGROUND PARKING LOT AT THE SITE OF THE ROBBERY AND A SECOND CAR, BELIEVED TO HAVE BEEN WAITING IN THE PARK NEAR NAGOYA CASTLE, WERE REPORTED STOLEN BY A NAGOYA USED CAR DEALER WEDNESDAY.

THE GUARDS SAID THE ROBBERS APPEARED TO BE BETWEEN 25 AND 30 YEARS OF AGE. ONE WORE A JACKET AND IS ABOUT 160-165 CENTIMETERS TALL. THE OTHER WORE A RED JACKET AND IS ABOUT 170 CENTIMETERS TALL.

THE NATIONAL POLICE AGENCY SAID THURSDAY'S INCIDENT WAS THE 27TH ATTEMPT AT HIJACKING A BANK DELIVERY SINCE 1975 AND THE SIXTH ARMED ATTEMPT. FIFTEEN CASES HAVE BEEN SOLVED. IN ONLY THREE CASES, WERE SHOTS FIRED.

#90298k0030 10/25/1990 ~Japanese News Agency
HONG KONG (OCT. 25) KYODO - HONG KONG AND CHINA HAVE AGREED TO FURTHER TALKS ON THE TERRITORY'S 127 BILLION HONG KONG DOLLAR AIRPORT AND PORT DEVELOPMENT PROJECT, THE GOVERNMENT ANNOUNCED THURSDAY.

HONG KONG'S CHIEF SECRETARY DAVID FORD MADE THE ANNOUNCEMENT AFTER 10 DAYS OF TALKS BETWEEN AN EIGHT-MEMBER CHINESE TEAM AND HONG KONG OFFICIALS ON THE PORT AND AIRPORT DEVELOPMENT STRATEGY.

THE DATE OF FURTHER TALKS WILL BE DECIDED LATER THROUGH DIPLOMATIC CHANNELS, FORD SAID.

HE DESCRIBED THE RECENT TALKS AS "USEFUL, CANDID, AND CONSTRUCTIVE." CHINA AGREED ON THE NEED FOR A NEW AIRPORT IN HONG KONG, BUT HAD RESERVATIONS ABOUT ITS COST, FORD SAID.

A SPOKESMAN FOR THE CHINESE GROUP ALSO DESCRIBED THE DISCUSSIONS AS USEFUL, BUT SAID A REPORT WILL BE MADE TO BEIJING BEFORE CONCLUSIONS ARE REACHED.

HONG KONG'S AMBITIOUS PLANS TO BUILD A NEW INTERNATIONAL AIRPORT AND EXPAND PORT FACILITIES HAVE BEEN CRITICIZED BY CHINA IN RECENT MONTHS.

CHINA HAS ACCUSED THE HONG KONG GOVERNMENT OF NOT KEEPING IT INFORMED ABOUT THE PLANS. IT HAS ALSO EXPRESSED CONCERN OVER THE FINANCING OF THE MASSIVE PROJECT WHICH IS DUE TO BE COMPLETED AFTER THE 1997 RESUMPTION OF CHINESE SOVEREIGNTY OVER THE BRITISH COLONY.

HONG KONG OFFICIALS HAVE MAINTAINED THAT THE PROJECT IS A MATTER FOR THEM TO DECIDE, AND IT WILL PROCEED REGARDLESS OF CHINESE APPROVAL.

BUT WESTERN AND JAPANESE FINANCIAL AND BUSINESS INTERESTS SAY WITHOUT CHINESE SUPPORT, THEY WILL BE WARY OF BACKING THE PROJECT.

TOKYO (OCT. 25) KYODO - MATSUSHITA ELECTRIC INDUSTRIAL CO. ON THURSDAY DENIED REPORTS IN THE UNITED STATES THAT THE BUYOUT TALKS BETWEEN IT AND MCA INC. HAD BEEN SUSPENDED.

MATSUSHITA'S FINANCIAL AND AUDIO-VISUAL SOFTWARE RECORDING DIVISION VICE-PRESIDENT MASAHIKO HIRATA SAID DISCUSSIONS WITH THE U.S. ENTERTAINMENT COMPANY ARE PROCEEDING IN AN ORDERLY FASHION BUT THERE ARE NO NEW DEVELOPMENTS. HE SAID ANY REPORTS TO THE CONTRARY ARE ERRONEOUS.

TSUZO MURASE, VICE PRESIDENT OF THE INFORMATION AND COMMUNICATION AUDIO-VISUAL DEPARTMENT ALSO DENIED THE REPORTS AND SAID THE TALKS ARE CONTINUING.

THE FALL IN MCA STOCK FROM 58 DOLLARS TO 50 DOLLARS AT THE CLOSE OF WEDNESDAY'S NEW YORK TRADING ALSO REFLECTED THE POSSIBILITY OF NEGOTIATIONS TAKING LONGER THAN ORIGINALLY EXPECTED, INDUSTRY SOURCES SAID.

MATSUSHITA AND MCA HAVE BEEN TALKING SINCE SEPTEMBER ABOUT A DEAL WHICH WOULD INVOLVE THE OSAKA-BASED JAPANESE LIGHT ELECTRICAL COMPANY BUYING THE U.S. ENTERTAINMENT GIANT IN A DEAL WHICH WOULD REPORTEDLY COST ABOUT 8 BILLION DOLLARS.

AN MCA BUYOUT WOULD GIVE THE JAPANESE ELECTRONICS MANUFACTURER A BIG CHUNK OF THE U.S. ENTERTAINMENT INDUSTRY. MCA OWNS UNIVERSAL STUDIOS, WHICH PRODUCES AND DISTRIBUTES MOVIES AND TELEVISION SHOWS. IT ALSO OWNS PUTNAM PUBLISHING GROUP, WHICH PRODUCES AND PUBLISHES RECORDS AND MUSIC, AND HAS VARIOUS CINEMA AND AMUSEMENT PARK INTERESTS.

IN EARLY OCTOBER, VICTOR CO. OF JAPAN ANNOUNCED THE FORMATION OF A NEW RECORD COMPANY WITH MCA. JVC OFFICIALS SAID THE DEAL WAS NOT RELATED TO ITS PARENT COMPANY MATSUSHITA ELECTRIC INDUSTRIAL'S TALKS WITH MCA.

NEVERTHELESS, IN THE LAST FEW WEEKS, JEWISH ACTIVISTS IN THE UNITED STATES HAVE BEEN TRYING TO PRESSURE MCA CHAIRMAN LEW WASSERMAN TO BREAK OFF TALKS WITH MATSUSHITA OVER AN APPARENT BOYCOTT THAT BARS LARGE JAPANESE COMPANIES FROM TRADING WITH ISRAEL.

#90298k0059 10/25/1990 ~Japanese News Agency

TOKYO (OCT. 25) KYODO - MATSUSHITA ELECTRIC INDUSTRIAL CO. IS TALKING WITH DUTCH ELECTRONICS MAKER PHILIPS TO SUPPLY EIGHT-MILLIMETER VIDEOTAPE CAMCORDERS ON AN ORIGINAL EQUIPMENT MANUFACTURER (OEM) BASIS, COMPANY OFFICIALS SAID THURSDAY.

MATSUSHITA OFFICIALS SAID BOTH PARTIES ARE HOLDING TALKS BUT A DEFINITE AGREEMENT WITH PHILIPS IS YET TO BE SIGNED.

IF AN AGREEMENT IS REACHED THE CAMCORDERS ARE LIKELY TO BE SOLD IN THE UNITED STATES UNDER THE PHILIPS BRAND NAME MAGNAVOX, OFFICIALS SAID.

THE DUTCH ELECTRONICS MAKER CURRENTLY SELLS MATSUSHITA VHS-C RECORDERS AND VHS MOVIE RECORDERS PRODUCED BY VICTOR CO. OF JAPAN IN THE UNITED STATES UNDER THE MAGNOVOX NAME.

VHS IS A VIDEO FORMAT USED ON RECORDING AND PLAYBACK VIDEO SYSTEMS PROMOTED BY MATSUSHITA ELECTRIC INDUSTRIAL AND OTHER COMPANIES. SONY CORP. IS PROMOTING ITS OWN 8-MILLIMETER VIDEO FILM STANDARD.

THOMSON CONSUMER ELECTRONICS, A SUBSIDIARY OF FRANCE'S THOMSON S.A., SELLS HITACHI MOVIE CAMCORDERS UNDER THE RCA TRADEMARK. THOMSON PURCHASED RCA'S TELEVISION DIVISION IN 1987.

ZENITH ELECTRONICS CORP.. THE ONLY U.S. TELEVISION MANUFACTURER, SELLS SANYO ELECTRICS EIGHT-MILLIMETER MOVIE CAMCORDERS ON AN OEM BASIS.

MATSUSHITA OFFICIALS ALSO SAID THEY WILL BEGIN MARKETING HIGH-DEFINITION TELEVISION RECEIVERS FOR COMMERCIAL PURPOSES SUCH AS PRINTING AND MOVIE THEATRES FROM NEXT YEAR. A SINGLE RECEIVER WILL COST ABOUT 6 MILLION YEN.

HITACHI LTD., TOSHIBA CORP., AND SONY CORP. ARE EXPECTED TO BEGIN MARKETING HIGH-DEFINITION SYSTEMS AT ABOUT THE SAME TIME, COMPANY OFFICIALS SAID.

#90298k0069 10/25/1990 ~Japanese News Agency

TOKYO (OCT. 25) KYODO - THE ASIAN BANKERS ASSOCIATION (ABA), WHICH CONSISTS OF 107 MAJOR BANKS IN THE ASIA-PACIFIC REGION, WILL HOLD AN ANNUAL MEETING IN TOKYO ON NOVEMBER 5 AND 6, OFFICIALS AT THE ASSOCIATION SAID THURSDAY.

AT THE SEVENTH ABA ANNUAL MEETING, TETSUYA HORIE, PRESIDENT OF THE LONG-TERM CREDIT BANK OF JAPAN, WILL BE ELECTED NEW ABA CHAIRMAN, SUCCEEDING PATRICK YEOH, PRESIDENT OF DBS BANK IN SINGAPORE, AS THE HEAD OF THE REGIONAL ORGANIZATION, ACCORDING TO THE OFFICIALS.

PRIOR TO THE ANNUAL MEETING, THE ASSOCIATION WILL HOLD A SEMINAR ON THE THEME OF "THE DIRECTION OF REGIONAL COOPERATION IN ASIA-PACIFIC TOWARD THE YEAR 2000."

BANK OF JAPAN GOVERNOR YASUSHI MIENO, PROF. ROBERT A. SCALAPINO, FORMER HEAD OF THE INSTITUTE OF EAST ASIAN STUDIES AT THE UNIVERSITY OF CALIFORNIA AT BERKELEY, WILL OFFER SPEECHES AT THE FORUM, THE OFFICIALS SAID.

THE ASSOCIATION WAS FORMED IN 1981 TO PROMOTE CLOSE RELATIONS AND COOPERATION AMONG THE REGION'S FINANCIAL SECTORS.

#90298k0080 10/25/1990 ~Japanese News Agency

TOKYO (OCT. 25) KYODO - YAKULT HONSHA CO. SAID THURSDAY IT HAD SET UP A COMPANY IN DELAWARE TO HELP JAPANESE COMPANIES SEEKING BUSINESS OPPORTUNITIES IN THE UNITED STATES WITH FEASIBILITY STUDIES FOR PLANNED OPERATIONS.

THE NEW FIRM, YAKULT INTERNATIONAL (USA), IS CAPITALIZED AT 200,000 DOLLARS.

THE FIRM WILL STUDY HOW PLANNED PROJECTS CAN BE SMOOTHLY LAUNCHED IN THE

AMERICAN MARKET, RANGING FROM PRODUCTION TO SALES, WITH AN AVERAGE RESEARCH PERIOD OF ABOUT ONE YEAR, COMPANY OFFICIALS SAID.

TO COVER RESEARCH IN AREAS OF SOUTHERN CALIFORNIA, THE FIRM HAS ALREADY SET UP A BUSINESS OFFICE IN LOS ANGELES, THEY ADDED.

-30- 797

#90298k0092 10/25/1990 ~Japanese News Agency

TOKYO (OCT. 25) KYODO - ISUZU MOTORS LTD. THURSDAY ANNOUNCED THE DEVELOPMENT OF A LIGHTER AND MORE RELIABLE AUXILIARY BRAKE FOR LARGE TRUCKS AND BUSES.

THE SO-CALLED RETARDER, DEVELOPED JOINTLY WITH SUMITOMO METAL INDUSTRIES LTD., IS THE WORLD'S FIRST USING A PERMANENT MAGNET, ISUZU OFFICIALS SAID.

THEY SAID ISUZU WILL INSTALL IT IN LARGE TRUCKS STARTING IN JANUARY. THE RETARDER, INSTALLED BETWEEN THE ENGINE AND PROPELLER SHAFT, HOLDS DOWN A VEHICLE'S TORQUE SPEED, USING A CURRENT GENERATED BY MAGNETIC FORCE.

OFFICIALS SAID THE NEW RETARDER IS FAR MORE RELIABLE THAN CONVENTIONAL RETARDERS, WHICH USE ELECTROMAGNETS. IT WEIGHS ONLY ABOUT 40 KILOGRAMS, ONE-SIXTH OF THE WEIGHT OF CONVENTIONAL RETARDERS.

THE NEW RETARDER IS SAID TO BE PARTICULARLY EFFECTIVE WHEN A TRUCK OR BUS IS GOING DOWN A LONG HILL.

THE PRICE HAS NOT BEEN DETERMINED BUT IT WILL PROBABLY BE ABOUT 500,000 YEN, THEY SAID.

-30- 1072

#90298k0102 10/25/1990 ~Japanese News Agency

TOKYO (OCT. 25) KYODO - A HIGH-RANKING TAIWAN GOVERNMENT OFFICIAL SAID THURSDAY THE GOVERNMENT HAS PREVENTED A NUMBER OF PRIVATE TAIWANESE BOATS FROM SAILING TO THE DISPUTED SENKAKU ISLANDS TO ASSERT TAIPEI'S SOVEREIGNTY, ACCORDING TO A TAIWANESE SOURCE HERE.

THE OFFICIAL SAID THE TAIWAN GOVERNMENT TOOK THE PREVENTIVE MEASURES BECAUSE IT WANTED TO AVOID POSSIBLE CASUALTIES RESULTING FROM THE DISPUTE WHICH MIGHT DAMAGE TAIWAN-JAPAN RELATIONS.

JAPAN, TAIWAN, AND CHINA ALL CLAIM SOVEREIGNTY OVER THE UNINHABITED ISLANDS, CALLED DAIOYUTAI IN CHINESE.

THE OFFICIAL ALSO SAID PATROL BOATS FROM THE JAPANESE MARITIME SAFETY AGENCY SPRAYED WATER ON THE TWO TAIWANESE BOATS WHICH ATTEMPTED TO APPROACH THE ISLANDS LAST SUNDAY IN ORDER TO TURN THEM BACK, ACCORDING TO THE SOURCE.

THE OPPOSITION TAIWANESE DEMOCRATIC PROGRESSIVE PARTY HAS BEEN PLANNING TO SEND A 300-BOAT FLOTILLA TO THE ISLANDS THURSDAY, THE 45TH ANNIVERSARY OF JAPAN'S RELINQUISHING OF ITS FORMER COLONY.

#90298m0001 10/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 25) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei gains 476 points, but the FTSE is off 13 points at midday. ... The dollar is mixed. ... Brent North Sea crude is up 85 cents to $30.85. ... U.S. stocks are firm in London where MCA is up 2 on a "Wall Street Journal" article which says a merger with MATSUSHITA could be complete in a month. ... CITICORP was forced to pay a 12.5% dividend rate at an auction yesterday on about $100 million worth of its preferred stock. ... WARREN BUFFET says in a federal filing that he has bought 9.8% of WELLS FARGO stock. ... SEARS, ROEBUCK says third-quarter net income was off 30% from the same quarter last year. ... EXXON reports flat third-quarter earnings. The Big Three automakers report mid-October sales of cars and trucks rose 7.2%. ... MOODY'S INVESTORS SERVICE has downgraded $45 billion in FORD's long- term debt.

FROM THE BULLS:

Bonds "often lead the stock market," says BARRY ZISKIN, who runs the Z-SEVEN MUTUAL FUND. "Bonds turned up last week, and that's generally the way the first rally in the stock market will set up after an initial leg down in a bear market." The gains in the utility average and fewer new lows "provided powerful evidence that the stock market was ready to move higher," according to Ziskin. He says the market could rally as high as 2750. ("Investor's Daily", 10/25)

KENNETH SPENCE, director of technical analysis at SALOMON BROTHERS, says that recent strength among the broader market may mean stock prices have seen their lows for now. Despite two days of losses in the Dow this week, the broader market has remained relatively firm. "That is the first thing you look for to give you an indication that the market is starting to build a base," says Spence. (WSJ, 10/25)

FROM THE BEARS:

"Any rally would be temporary," says RON DORAN of C.L. KING. "There's an awful lot out there for investors to be worried about." He says investors are worried about corporate profits and the weak U.S. economy. (Reuters, 10/25)

If this bear market started in mid-July, there is still quite a bit of time left on the downside, says STEPHEN TODD of the "Todd Market Timer." "There is some evidence that this particular bear will be a severe one," says Todd, who believes the current economic background is much worse than in 1973-1974. He is also concerned about the enormous transfer of wealth to countries like Japan. (CNBC "World Business", 10/25)

STOCK MARKET:

WILLIAM RAFTERY, technical analyst at SMITH BARNEY, was encouraged that the market was able to hold firm yesterday. He says, "The market passed the test, and that's good. I look for a tentatively positive day today." (Reuters, 10/25)

"The market looks like it's struggling to move higher," says market letter publisher ROBERT NUROCK. While improving on a broad basis, Nurock says the market is "wasting a very good oversold condition that existed two weeks ago." He is looking for a "downward reaction" in the market within the next two months, but says it "could set up an intermediate-term bottom." ("Investor's Daily", 10/25)

"There has not been a leadership change," says technical analyst WALTER MURPHY of MERRILL LYNCH. "What it comes down to is that the same old leaders who carried the market in the first part of the year have generally been carrying this rally since last week. ... I think what you need to see is a change in leadership before you would begin to think that a rally would be anything more than a reaction to the downturn." (CNBC "Market Wrap-Up", 10/24)

"It's been a wait-and-see market," says JAMES ANDREWS, first vice president in charge of institutional trading at JANNEY MONTGOMERY SCOTT in Philadelphia. "A few more earnings torpedoes aren't going to affect the market," he says. Mr. Andrews adds that he believes the market has the underpinnings "for a little bit of stability with a positive bias." (WSJ, 10/25)

"The advance in the Dow utility index could be looked upon as a contrary sentiment indicator," says BOMAR SECURITIES president MARC CHAIKIN. "Utility stocks are a safe haven for those institutions who must stay in the stock market." He says that the rise in the utility index "means sentiment has become very bearish [and thus bullish for the stock market]." ("Investor's Daily", 10/25)

CHARLES COMER, director of research at CREDIT LYONNAIS SECURITIES, says the market might be hard pressed to get to 2650 on the Dow on the current rally, which he sees as a move in a bear market. Still, he does not recommend getting out of the market now "because, if anything, I do think the market does have a little more to carry [on the upside] over the short-term. I don't

want to overstate the downside. We are not looking for 1700 or numbers like that. I just think it is going to be a long time before it's going to be easy to make money on the long side." He doubts the market will get below 2200 and that it will be a "saw-tooth" kind of move down before "slowly turning around in '91 working back to the upside." (CNBC "Market Wrap-Up", 10/24)

"People are focusing on what's happening in Washington," says PETER VANDENBERG senior vice president at SHEARSON LEHMAN BROTHERS. "Investors are also comfortable with third-quarter earnings, and they are confident in buying stocks." (WSJ, 10/25)

If a budget agreement was not reached overnight, "a lot of problems will persist" today, says BRIAN FABBRI of MIDLAND MONTAGU. If there is an agreement, "the market will probably sigh some relief," says Fabbri. (FNN "Marketwrap", 10/24)

STOCK TIPS:

OHIO CASUALTY INSURANCE posted its first quarterly gain since 1989 as third quarter profits jumped 71% to $1.62. BILL BITTERLI of NORTHINGTON PARTNERS had been expecting a flat report and says "I was as surprised as anyone." The company had been hurt by huge payouts in the wake of Hurricane Hugo and Bitterli says better profits reflect the fact that "The weather was a lot better this year." ("Investor's Daily", 10/25)

Children's tastes in toys are turning away from video games and back to more traditional toys manufactured by American companies, says PAUL VALENTINE, toy analyst at STANDARD & POORS. "Last time this happened, it made the toy stocks the number one performing group in 1984," says Valentine who admits toymakers are now on Wall Street's naughty list after earnings disappointments. Valentine predicts another wrestling fad to hit the toy industry, eclipsing Ninja Turtles. His picks: TONKA, GALOOB and UNIVERSAL MATCHBOX. (CNN "Business Day", 10/25)

INFOTECHNOLOGY INC., controlling shareholder of FINANCIAL NEWS NETWORK and UNITED PRESS INTERNATIONAL, says it does not have enough cash to meet daily operating expenses and has replaced its founder as chief executive. ("The Washington Post", 10/25)

INLAND STEEL's joint ventures with NIPPON STEEL may carry an overall price tag of over $1 billion, but will give the company two state of the art steel plants and will be profitable over the long run. "I think it's going to be real positive for them," says JEFFREY MILLER of DUFF & PHELPS. "But as with all new technologies, you're going to have significant start-up time and take a hit [in earnings]. You can't always predict how big a hit it will be." ("Investor's Daily", 10/25)

"The market is very concerned about banks ... and that concern is most acute

for larger banks," says JAMES McDERMOTT, president of KEEFE, BRUYETTE & WOODS. "CITIBANK is very exposed to loan losses. The third-quarter report did not assuage the marketplace." ("The Washington Post," 10/25)

"CITICORP has a very strong franchise, has good management, so I guess we are more comfortable overall about the prospect for 'Citi' than maybe the marketplace is at this time," says GREGORY ROOT, president of THOMSON BANKWATCH. "On the other hand, it's hard to see how the negative sentiment will subside any time in the near future." (CNBC "Market Wrap-Up", 10/24)

GENERAL DYNAMICS stock is estimated to be selling for 3.2 times 1991 earnings and far below the company's book value. This valuation would normally attract bargain hunters, but analysts are being conservative. According to ZACKS INVESTMENT RESEARCH, 12 major brokerage houses currently publish opinions of General Dynamics. Three rate it a sell and nine rate it as a hold. "You can make a fundamental case for the stock," acknowledges MICHAEL ROSEN of SMITH BARNEY, who rates the stock a hold. "It's a well-run, well managed company. It's got $2 billion of equity on its balance sheet." The problem? General Dynamics "is everybody's idea of what a defense company is." WERTHEIM SCHRODER's JERRY CANTWELL also rateS the stock as neutral and says, "When you look at GD's book value and the stock price, it's a steal, an absolute screamer. But when you step back, you see they're lashed to the mast of defense spending, and that's tough to escape." He notes that all three of General Dynamics main production operations are headed for substantial cutbacks. (WSJ, 10/25)

"There's tremendous pricing pressure in the [computer] industry and COMPAQ is the most nimble at outmaneuvering rates," says PETER ROGERS of ROBERTSON STEPHENS & CO. ("USA Today", 10/25)

"The retail environment is not a kind one, and it's going to get worse," says ANDREW REGAN of DONALDSON, LUFKIN & JENRETTE. "The weaker players are going to get penalized." Regan may lower his profits estimates for SEARS from $3.90 to "between $3 and $3.50." ("Investor's Daily", 10/25)

-30- 9989

#90298m0002 10/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 25) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"I would not be at all surprised to see the dollar strengthen after another three cents or so on the pound," says MICHAEL SALZBANK, president of RAM ASSET MANAGEMENT. "The yen has a bit more to go on the upside than the other foreign currencies, but I believe the trading there will be very erratic. We

do have perhaps a little more downside on the dollar, but overall these foreign currencies are very overbought." (CNBC "Market Wrap-Up", 10/24)

The weak durable goods report "refocused the [currency] market's attention on the deteriorating fundamentals," hurting the greenback, says MARC CHANDLER of IDEA. ("Investor's Daily", 10/25)

Currency traders are thinking that the Fed will lower interest rates because of further signs of a weakening economy and improved chances of a pleasing budget accord. This means that "the fundamental reasons to sell dollars are still there," says BASSEM SNAIJE, first vice president at BANCA DELLA SVIZZERA ITALIANA. (WSJ, 10/25)

"The main contribution the Fed can make is to follow a steady course, taking care not to worsen the problems caused by the oil shock," says the president of the SAN FRANCISCO FEDERAL RESERVE BANK, ROBERT PARRY. "If we lose sight of our ultimate goal - to eliminate inflation - we will end up with a kind of rudderless monetary policy that tends to generate higher and higher inflation." ("Investor's Daily", 10/25)

"People are grappling with what to do once a budget gets passed," says JAMES CAPRA, a senior vice president at SHEARSON LEHMAN GOVERNMENT SECURITIES. "Because of the oncoming supply, the [bond market] consensus says sell. But I'm not sure that's the right thing to do, because it is virtually certain the Fed will ease policy after the budget gets passed." (NYT, 10/25)

Billions of dollars of Treasury paper is coming to market, but CHEMICAL's JEFFERY LEEDS says, "I think interest rates are likely to remain relatively steady. You can have some dislocations because ... of the congestion in the market." The trend in interest rates is determined by more fundamental factors such as the shape of the economy and inflation: "On that basis, by the end of the year, I think we'll see lower interest rates." (CNBC "World Business" 10/25)

"The [bond] market looks resilient at the moment, but is likely to go down on supply concerns," notes one bond trader at a U.S. bank. (Reuters, 10/25)

"The latest Federal budget proposals can help municipal bonds," says DAVID MADIGAN of MERRILL LYNCH. "Retail demand for higher-grades remains very strong compared with higher yielding names," says Madigan. ("Investor's Daily", 10/25)

"The news on the Middle East and the budget has been contradictory on an almost daily basis, and that has sort of frozen [securities] investors and the dealer community," says WILLIAM SULLIVAN JR., a senior vice president at DEAN WITTER REYNOLDS. "People just don't know what is going to happen." (NYT, 10/25)

THE ECONOMY:

"We won't see much growth in the economy over the next six to twelve months," says SWISS BANK CORP.'s KEVIN LOGAN. "Companies that might be investing by acquiring more capital equipment are postponing those decisions." ("Nightly Business Report", 10/24)

"The oil situation has had a pervasive effect on economic behavior," says GIULIO MARTINI of SANFORD BERNSTEIN. It has given "a large blow to purchasing power," but has also "caused businesses to react extremely cautiously," according to Martini. (FNN "Marketwrap", 10/24)

"The recent decline [in durable goods orders] shows that the slowdown will continue. leading to a recession in the current quarter," says WILLIAM MacREYNOLDS, an economist with the U.S. CHAMBER OF COMMERCE. GORDON RICHARDS, economist for the NATIONAL ASSOCIATION OF MANUFACTURERS, says the figures provide "further confirmation that the recession is already in progress." ("The Washington Post", 10/25)

Durable goods "was another report indicating the economy is slowing down," says ELLIOTT PLATT, director of economic research at DONALDSON, LUFKIN & JENRETTE in New York. He adds that it probably showed "that we're in a recession -- bu probably indicating the recession will be mild." (NYT, 10/25)

While the overall durable goods numbers were negative, certain sectors showed surprising strength, which can be "one more piece of evidence that the industrial economy is holding steady in the face of the unprecedented uncertainty," says EATON CORP. chief economist ADRIAN DILLON. He points out that durable goods constitutes only one-third of the "manufacturing picture" and is the most volatile section. "The volatile portion is remarkably steady " says Dillon. ("Investor's Daily", 10/25)

While indicating a weakness in the economy, the decline in durable goods orders does not "show any signs of total collapse," according to DEAN WITTER REYNOLDS senior economist RICHARD RIPPE. "This is not the kind of report you'd be getting if the economy had just plunged into a deep recession." ("Nightly Business Report", 10/24)

"Durables orders and capital spending are soft and going to get softer and that's bad news for the economy," says MARK VITNER, economist at BARNETT BANKS in Jacksonville, Fla. ("USA Today", 10/25)

Despite the oil shock, the mid-October sales figures for new cars rose dramatically. GM showed an increase of 15.1%, FORD 9.3% and CHRYSLER 5.6%. DOUGLAS LAUGHLIN of BEAR, STEARNS believes that increase is due to the fact that "What the consumer is saying is, 'We think the Mideast crisis is temporary and won't be with us forever." (FNN "Marketwrap", 10/24)

"We saw the first signs of a serious peace initiative [in the Middle East] and now people are assessing how tangible, how true that is," says CHRISTIAN GOHLER, an energy trader at MERRILL LYNCH. He says speculators are "actually buying [oil] because they don't believe the lower levels are sustainable." (CNN "Moneyline", 10/24)

IN WASHINGTON:

The Treasury could hold last week's delayed auction as early as today, says JEFFERY LEEDS, chief money market economist at CHEMICAL BANK. The money is needed to refund Treasury debt which will become due. "If the government can't hold its auction today, then the government owes investors $27 billion," says Leeds. Does it have the money to pay? "Yes it does -- it topped off the tank just before the debt ceiling expired," says Leeds. (CNBC "World Business", 10/25)

While Democratic negotiators have given up on their calls for a surcharge on the rich, "we are now focused around a mechanism which will achieve the same impact," says House Speaker REP. TOM FOLEY (D. - Wash.). Foley says it will ensure that "a fair share will be paid by high-income individuals." ("Nightly Business Report", 10/24)

-30- 7228

#90298p9286 10/25/1990 ~PR Newswire

FINDLAY, OHIO (OCT. 25) PR NEWSWIRE - OHM Corporation (NYSE: OHM), a leading environmental services firm, today announced operating results for the third quarter ended Sept. 30, 1990. Net revenues for the quarter increased 24 percent to $60,693,000, while operating income increased 17 percent to $8,196,000. Net income for the quarter was $2,976,000 or $.25 per share compared to net income of $2,849,000 or $.23 per share for the third quarter in 1989.

The increase in the company's net revenues in the quarter reflected growth in demand for all of the company's services. Net revenues from industrial clients, which accounted for 73 percent of total net revenues, increased 14 percent to $44,000,000 for the third quarter as compared to the 1989 period. Net revenues from the company's EPA Emergency Response Cleanup Services contracts decreased 16 percent to $4,266,000 while revenues from other government contracts increased 129 percent to $12,427,000, reflecting increased activity under the company's many state contracts and U.S. Army Corps of Engineers contracts.

The 1990 third quarter results reflected a nonrecurring special benefit of $423,000 or $.02 per share which primarily related to the divestiture of certain non-productive assets.

For the nine months ended Sept. 30, 1990, net revenues were $160,561,000, an

increase of 36 percent over the comparable 1989 period. Operating income for the nine months ended Sept. 30, 1990, increased 91 percent to $16,976,000 from $8,873,000 in the comparable 1989 period. Operating income for the nine months ended Sept. 30, 1990, included a nonrecurring charge of $642,000 related to the divestiture of certain non-productive assets. Net income excluding nonrecurring and special charges and gain for the first nine months of 1990 was $5,348,000 or $.45 per share, compared to $1,539,000 or $.13 per share for the first nine months of 1989. Reported net income was $10,963,000 or $.91 per share for the nine months ended Sept. 30, 1990, compared to $1,539,000 or $.13 per share in the comparable 1989 period.

OHM Corporation is a leading nationwide environmental services company with 35 locations across the United States and in Canada. The company provides a full range of environmental assessment, analytical, data management, engineering, design, remediation and waste treatment services to a broad base of industrial and government clients on both a planned and emergency basis.

#90298p9287 10/25/1990 ~PR Newswire

METHUEN, MASS. (OCT. 25) PR NEWSWIRE - NSC Corporation (NASDAQ: NSCC), a leading regional asbestos abatement services company, today announced record earnings for its third quarter ended Sept. 30, 1990. The company reported net income of $1,531,000 or $.27 per share compared to $1,320,000 or $.23 per share for the third quarter of 1989. Net revenues for the quarter increased 44 percent to $14,416,000 from $9,994,000 for the comparable 1989 period.

For the nine months ended Sept. 30, 1990, net revenues increased 53 percent to $34,431,000 from $22,528,000 for the comparable 1989 period. Net income for the first nine months of 1990 was $3,951,000 or $.69 per share, a 33 percent increase from the $2,976,000 or $.52 per share for the first nine months of 1989.

Despite the current downturn in the real estate market in the northeastern United States, NSC has continued to receive significant commitments for new work in these markets. These commitments are primarily attributable to the company's strong relationships with large commercial customers and its successful entry into the metropolitan New York City market. NSC's backlog was $15,400,000 at Sept. 30, 1990, a 51 percent increase over backlog at Sept. 30, 1989. Backlogs in the New England and metropolitan New York City markets increased 21 percent and 275 percent respectively, at Sept. 30, 1990, compared to Sept. 30, 1989.

The company noted that operating margins during the quarter were negatively affected, as compared to the first half of the year, by a greater proportion

of lower margin institutional revenues and a more competitive pricing environment. The company said it expects the impact of both of these factors to be diminished in the fourth quarter as institutional work tapers off and work for the company's traditional commercial clients increases.

NSC Corporation is a subsidiary of OHM Corporation (NYSE: OHM), a leading environmental services firm. NSC Corporation completed its initial public offering of 1,725,000 shares of its common stock in June 1990. The company provides its asbestos abatement services primarily to private sector clients at commercial, industrial and institutional properties located in the Northeastern United States.

OYSTER BAY, NY (OCT. 25) PR NEWSWIRE - Hot on the heels of the successful September release of Acclaim Entertainment, Inc.'s (NASDAQ: AKLM) first "Simpsons" hand-held video game, the company announced today that it will release its "Bartman(TM): Avenger of Evil" hand-held in November, just in time for the holiday selling season. Under an exclusive licensing agreement with Twentieth Century Fox Licensing & Merchandising Corporation, Acclaim is publishing Nintendo Entertainment System (NES)(R) and Game Boy(TM) video games as well as SuperPlay (TM) hand-helds based on the popular "Simpsons" property.

"Our first 'Simpsons' hand-held has been extremely well-received, and we anticipate 'Bartman' to also be a strong seller as the holiday shopping season fast approaches," said Robert Holmes, president of Acclaim. "With 'The Simpsons' TV show recently surpassing 'Cosby' in teen ratings, it's clear the licensing sensation of the year has a firm hold on the American public, particularly our target audience."

The Acclaim "Bartman: Avenger of Evil" SuperPlay hand-held will be available in November and is expected to retail for approximately $19.95.

Acclaim Entertainment, Inc., is a leading publisher, marketer and distributor of home entertainment products under the Acclaim and LJN labels. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

PORTLAND, OR (OCT. 25) PR NEWSWIRE - NERCO Inc. (NYSE: NER) today reported developmental drilling and operating results for its NERCO Oil & Gas Inc. unit of Vancouver, Wash., including preliminary testing of a successful new oil and gas development well located in federal waters 80 miles south of Morgan City, La.

The Ship Shoal 202 No. 5 well was successfully tested in two zones between 14,576 feet and 14,660 feet and proved up new pay horizons in the field. The two zones tested at a combined rate of 1,275 barrels of oil per day and 9.5 million cubic feet of gas per day, with 3,184 pounds per square inch flowing tubing pressure. A third zone further uphole contained only water, and completion of a fourth zone is in progress.

The Ship Shoal field consists of four producing wells and a manned, four-pile production platform. The new well is expected to be on production by early December. Current net daily production from the field is 1,650 barrels of oil and 1.7 million cubic feet of gas.

NERCO President Lawrence E. Heiner noted, "This is a good example of our strategy to increase the value of purchased properties through an effective exploration and development drilling program."

According to NERCO Oil & Gas President Roger A. Markle, "We believed at the time that we acquired these properties that significant additional development potential existed." Markle noted additional field drilling is scheduled in order to fully evaluate and develop these new oil reserves, which were acquired early in 1990 from several sellers, including the Sandefer Group.

NERCO Oil & Gas is operator of the Ship Shoal 201/202 field and has a 75 percent working interest in the property. Other working interest partners in the field are a subsidiary of Utilicorp United Inc. and Corpus Christi Oil & Gas.

A development well previously announced in late September was placed into operation yesterday at the Eugene Island 108 field, located 25 miles offshore of St. Mary Parish, La. NERCO acquired a 61 percent operating interest in the field in 1988 and 1989.

NERCO Oil & Gas is a wholly owned subsidiary of NERCO Inc., a leading North American producer of coal, gas, oil, gold and silver. Approximately 82 percent of NERCO's common stock is indirectly owned by PacifiCorp (NYSE: PPW), a diversified electric utility.

CONTACT: Robert S. Hess, 503-731-6678, or Richard T. O'Brien, 503-731-6732, both of NERCO Inc.; or John C. Cummings of NERCO Oil & Gas Inc., 503-731-6649.

#90298p9294 10/25/1990 ~PR Newswire

HADDONFIELD, NJ (OCT. 25) PR NEWSWIRE - United Medical Corp.'s (AMEX: UM) income from continuing operations for the quarter ended Sept. 30, 1990, increased to $324,000 or $.12 per share versus $287,000 or $.10 per share a year ago.

Revenue for the quarter increased to $9,580,000 in 1990 compared to $8,697,000 in 1989.

Income from continuing operations for the first nine months of 1990 was $1,219,000 or $.44 per share compared to $643,000 or $.22 per share in 1989. Revenue for the same period was $30,758,000 in 1990 versus $27,064,000 in 1989 an increase of 14 percent. Income from discontinued operations for the first nine months of 1989 was $8,834,000 or $3.00 per share and reflects the gain on the sale of Renal Care Centers Corp. Net income through Sept. 30 was $1,219,000 or $.44 per share in 1990 compared to $9,108,000 or $3.10 per share for the same period in 1989.

The quarter ended Sept. 30, 1990, marks the ninth consecutive period that income from continuing operations has increased compared to the previous year and the 11th consecutive quarter of profitability.

As previously announced, UM declared a quarterly dividend of $.05 per share of common stock payable Nov. 15, 1990, to holders of record as of Nov. 2.

UM, through its subsidiaries, offers health and research services and products which include Holter and pacemaker monitoring, comprehensive medical services for corporate clients, new drug applications, and the manufacture and sale of motorized treadmills.

TAMPA, FL (OCT. 25) PR NEWSWIRE - Belmac Corp. (AMEX: BLM), a Tampa-based pharmaceutical company, today announced that it has begun development of a new drug compound for the treatment of and protection against deadly chloroquine-resistant malaria.

Jean-Francois Rossignol, Ph.D., Belmac's CEO says, "Preclinical work on the new Belmac anti-malarial drug will begin immediately and initial human testing should begin within the next 12 to 18 months." Dr. Rossignol's work with international health organizations and the pharmaceutical industry from 1974 to 1987 led to, among other things, the development of the anti-malarial drug Halfan, marketed by SmithKline Beecham.

Drug resistant strains of malaria are having a significant medical, social and

economic impact on over 100 countries and are of major concern for people traveling to areas where certain strains of the disease can be fatal within a matter of hours. Data recently released by the World Health Organization listed malaria number one among common tropical diseases with approximately 270 million people currently infected, primarily in third world countries.

Due to the diminishing effectiveness of chloroquine against resistant strains of the malaria parasite, alternate therapy is needed.

Belmac has also begun marketing its new hemorrhoidal treatment drug, ALPHANON(R), in East Africa and expects to receive regulatory approval in France late this year. In addition to its anti-malarial and anti-hemorrhoidal drugs, Belmac's strategy is to develop a full line of pharmaceutical products in certain disease categories.

BUFFALO, NY (OCT. 25) PR NEWSWIRE - Robert G. Wilmers, president and chief executive officer of First Empire State Corporation (AMEX: FES) ("First Empire"), announced today that R. Bruce Sampsell has resigned as chief operating officer effective Nov. 1, 1990.

Sampsell joined the company in February 1990 after a 20-year career with The Quaker Oats Company, the last seven years of which he served as president of the Fisher-Price Division.

"Bruce is an able and talented manager, and we are sorry to lose him," Wilmers said. "He made a definite contribution to First Empire." Wilmers indicated that Sampsell intended to pursue other interests not related to commercial banking, but that Sampsell would remain on the board of directors of First Empire State Corporation and Manufacturers and Traders Trust Company ("M & T Bank"), its principal banking subsidiary.

In addition to M & T Bank, (Buffalo, N.Y.), First Empire's subsidiaries include The East New York Savings Bank (New York City, N.Y.) and The First National Bank of Highland (Highland, N.Y.).

#90298p9299 10/25/1990 ~PR Newswire

JACKSON, MICH. (OCT. 25) PR NEWSWIRE - For the fourth time this year, Consumers Power Company has announced it has reduced its electric rates

effective for the remainder of 1990.

Beginning with November bills, the 6-percent decrease amounts to a reduction of $2.02 on the average residential customer's monthly electric bill. In August, the company reduced its electric rates 1.5 percent, which followed previous decreases of 1.6 percent in May and 5 percent in March. This latest reduction, through the company's power supply cost recovery mechanism, is the result of the utility's efforts to lower fuel and purchased and net interchange power costs.

"This electric rate reduction is further evidence of Consumers Power's efforts to remain the lowest-cost major provider of electricity in Michigan," said Michael G. Morris, the utility's executive vice president. "We're working to maintain rates as low as possible to keep our industrial customers competitive both nationally and globally," Morris said.

Morris attributed the reduction to the company's ability to temporarily obtain significant amounts of low-cost purchased power. "The price cut also reflects the continuation of our success in negotiating a lower coal transportation contract for our power plants and renegotiating lower prices on our existing coal purchase contracts," said Morris.

Consumers Power's residential electric rates have consistently ranked in the lowest one-fifth in national surveys. The company's electric rates are about the same as they were five years ago -- a real (inflation adjusted) decrease of 17 percent. The monthly electric bill for Consumers Power's average residential customer continues to be lower than that of 80 percent of the nation's utilities.

Consumers Power serves electricity to more than 3.3 million people in a 27,800-square-mile service area encompassing 61 counties in Michigan.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90298p9303 10/25/1990 ~PR Newswire

WORCESTER, MA (OCT. 25) PR NEWSWIRE - Transgenic Sciences, Inc. (NASDAQ: TSIN) today announced that it has been awarded two Phase I Small Business Innovation Research Grants from the National Institutes of Health to develop advanced preclinical models for testing potential AIDS therapeutics and vaccines.

"The research supported by these grants is part of our strategy to build the

industry's most comprehensive portfolio of disease models for AIDS," said James P. Sherblom, chairman and CEO of TSI. "TSI currently provides pharmaceutical and biotechnology companies with preclinical AIDS testing services based on rabbit, SCID-hu mouse and simian immunodeficiency disease models." He noted that "these two grant awards also recognize our expertise in transgenic technology as well as in the development of preclinical AIDS tests."

The first grant is for the development, through transgenic technology, of a second generation rabbit model that incorporates the human CD4 receptor in its white blood cells. The CD4 receptor is a key site through which the AIDS virus (HIV) is believed to enter the immune system. The second grant is for the development of a laboratory (in vitro) test to allow researchers to assess rapidly and safely a compound's ability to block the activity of a key HIV viral enzyme called reverse transcriptase.

TSI is a life sciences company developing advanced toxicology tests and disease models based on genetic engineering and transgenic techniques to improve the efficiency of the pharmaceutical/chemical development process. TSI is also developing animal strains capable of producing commercially valuable pharmaceutical proteins, as well as strains with desirable growth and genetic characteristics.

#90298p9305 10/25/1990 ~PR Newswire

INDIANAPOLIS (OCT. 25) PR NEWSWIRE - Bindley Western Industries Inc. (NASDAQ: BIND) announced today that both sales and earnings for the quarter ending Sept. 30, 1990 were the best ever recorded for a third quarter.

Sales of $522 million were 39 percent ahead of the $376 million recorded in 1989. Net earnings increased by 13 percent to $1.34 million in 1990 from $1.19 million (before the extraordinary charge) in 1989. Per share earnings of $.20 in 1990 compared to $.19, before the extraordinary charge, and to $.10 after the charge in 1989. In September of 1989, the company settled a matter with the government and took a $523,000, or $.09 per share charge against 1989 third quarter and nine-month earnings.

For the nine months, sales increased by 29 percent to $1.44 billion from $1.11 billion in 1989. Net earnings of $4.74 million were 52 percent ahead of the 1989 nine-month period (before the extraordinary charge). Per share earnings amounted to $.71 on a primary basis and $.67 fully diluted compared to primary and fully diluted earnings of $.49 in 1989 before the extraordinary charge, and $.41 after the charge.

In commenting on the results for the quarter, chairman and CEO William E. Bindley indicated that the company was pleased with the large increase in sales and satisfied with the 13 percent increase in net income, considering that the 1990 third quarter LIFO charge was $1.4 million. This compares to $1.1 million in each of the first two quarters of 1990 and to $900,000 in each of the first three quarters of 1989. Further, he pointed out that operating cash flow (net income on a FIFO basis plus depreciation and amortization) of $3.03 million in the 1990 third quarter increased 23 percent from $2.47 million (before extraordinary charge) in the 1989 quarter. For the nine months, operating cash flow increased 34 percent to $9.36 million from $7.00 million. Bindley concluded that the company expected to meet or exceed its operating plan for 1990.

Bindley Western, with 1990 revenues expected to approach $2 billion, is one of the largest drug wholesalers in the United States and specializes in the distribution of ethical pharmaceuticals and related products. The firm serves customers in 39 states through distribution centers in Atlanta, Brockton, Mass., Charlotte, N.C., Dallas, Houston, Indianapolis, North Hollywood, Calif. Orlando, Fla., Phoenix, Ariz. and Stamford, Conn.

#90298p9314 10/25/1990 ~PR Newswire

NEW YORK (OCT. 25) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL), operator of the Negev Venture 2, issued the following statement in Israel earlier today on behalf of the venture partners:

"An early summing up of the accounts of the Yam 2 well suggest that the total expenditure of the Negev joint venture came to $43.95 million.

"All of the participants in the Negev Venture 2, with the exception of the H.E.I. Partnership, paid their participation up to the amount of $43.30

million and were requested, including H.E.I., to pay up the balance of $650,000 by Oct. 5, 1990.

"H.E.I. is late in payment in the amount of $1.78 million (without interest for late payment) and was put on notice in regard to the delay on Oct. 3, 1990.

"H.E.I. announced on Oct. 25, 1990, that a payment of $200,000 on account of its outstanding debt will be made immediately, and that the owed balance of $1.58 million is the result of the non-receipt of the grant by the government of Israel to H.E.I. at this time.

"At an operators' meeting, at which H.E.I. was not present, which took place on Oct. 24, 1990, the participants reiterated their keen desire to have H.E.I. continue its participation in oil exploration in Israel in general and specifically in the Negev Venture 2. In addition at the meeting, the operator was requested to act in accordance with the joint operating agreement and send a formal notice to H.E.I. requesting payment of the outstanding debt within five days. Otherwise, the operator will have to ask the other participants to cover H.E.I.'s debt, pro-rata to their participation in the Negev Venture 2.

"The operator acted accordingly on Oct. 24, 1990, and issued the appropriate notices to H.E.I., requesting the payment of the outstanding debt."

In issuing the statement, Joseph Elmaleh, Isramco chairman, said, "It is our belief that the Israeli government's delay in paying the full amount of its grant to H.E.I. for the Negev Venture 2 represents the increased requirements placed on its budget by such events as the immigration of Jewish people from the Soviet Union, for which the nation's infrastructure of housing and related facilities must be expanded.

"We are hopeful that discussions between the government and the H.E.I. group will be constructive and that the new, three-well, $40 million program Dr. Hammer recently announced will proceed with the support of all the participants including the government of Israel."

#90298p9315 10/25/1990 ~PR Newswire

WILMINGTON, DEL. (OCT. 25) PR NEWSWIRE - Rollins Truck Leasing Corp. (NYSE, PSE: RLC) today reported its results for the fourth fiscal quarter and the year ended Sept. 30, 1990.

For the quarter ended Sept. 30, 1990, revenues from continuing operations were $86,756,000 a 7 percent increase over the previous year. Earnings from continuing operations before income taxes were $8,749,000, a 16 percent

improvement over the prior year. Net earnings increased by 13 percent to $5,354,000 or $.28 per share compared with $4,722,000 or $.25 per share last year.

The company noted that the results for the quarter ended Sept. 30, 1990, reflected higher revenues in each of its services -- full service leasing, commercial rental, guaranteed maintenance and dedicated carriage. The company said the 7 percent revenue increase for the quarter was gratifying considering the sluggish economic conditions that existed during the period.

For the year ended Sept. 30, 1990, revenues increased by 6 percent to $331,173,000. Earnings from continuing operations increased by 7 percent over last year. Net earnings were $18,033,000 or $.96 per share compared with $17,299,000 or $.92 per share in 1989. Net earnings for 1989 included $501,000 or $.02 per share from spun-off operations.

The company said it was pleased with its results for the year, a period in which there was little or no economic growth and a period which required a constant review of costs. Despite higher bad debt, workers compensation and health care expenses for the year, the company generally maintained its operating margins by tightly managing its other operating and overhead expenses.

Rollins Truck Leasing Corp. is one of the largest full-service truck leasing and rental companies in the United States. The company services more than 20,000 vehicles from 189 locations throughout the country.

#90298p9317 10/25/1990 ~PR Newswire

ELMIRA, NY (OCT. 25) PR NEWSWIRE - Artistic Greetings Incorporated (NASDAQ: ARTG) today announced earnings of $316,222 or $.08 per share, for the third quarter ended Sept. 30, versus $123,184 or $.05 for the year earlier.

The company also posted an increase in revenues to $7,794,968 from $4,043,875 for the year earlier. Approximately $700,000 is attributed to the discontinuation of a joint venture in which sales and costs were shared by both parties. This year, Artistic books all expenses and revenues.

Year to date net 1990 income results were reported as $900,165, or $.30 per share, versus $475,154, or $.21 per share for the prior year. Sales were $26,706,613 versus $12,979,431 for the nine months ended Sept. 30, 1990 vs. 1989, respectively.

Average number of shares for the quarter jumped from 2,325,624 in the year

earlier to 3,825,624. Shares for the nine months increased to 3,035,764 versus 2,285,764 for the year previous. Both increases in common shares outstanding are the result of Artistic's sale of 1,500,000 shares to American Greetings Corporation (NASDAQ: AGREA) of Cleveland, in May 1990.

Finally, the company said it was extremely pleased with the results from a quarter that historically is considered weak. The improved sales results are attributed to better catalog responses for its products. The fourth quarter, historically, has been the company's best quarter of the year.

#90298p9318 10/25/1990 ~PR Newswire

WILMINGTON, DEL. (OCT. 25) PR NEWSWIRE - Rollins Environmental Services Inc. (NYSE, PSE: REN) today reported results for the fourth fiscal quarter and the year ended Sept. 30, 1990.

For the fourth quarter ended Sept. 30, 1990, revenues from continuing operations increased 19 percent to $53,551,000 from $45,018,000 in the prior year. Net earnings improved 37 percent to $8,713,000 from $6,375,000, while earnings per share increased to 14 cents compared to 11 cents for the prior year.

For the year ended Sept. 30, 1990, revenues from continuing operations increased 23 percent to $200,043,000 from $162,794,000 in the prior year. Earnings from continuing operations, before special charge, improved 49 percent to $27,892,000, or 46 cents per share, from $18,665,000, or 31 cents per share in the prior year. The company reported a special charge of $48,600,000 ($32,708,000 after tax benefit or 54 cents per share) and a loss from discontinued operations of $5,942,000 or 10 cents per share in 1989. As shown below net earnings for the year were 46 cents per share compared to a loss of 33 cents per share in 1989.

Year Ended Sept. 30	1990	1989
Earnings (loss) per share:		
Operations	$.46	$.31
Special charge	--	(.54)
Continuing operations	.46	(.23)
Discontinued operations	--	(.10)
Net earnings (loss)	.46	(.33)

The company continues to improve its financial performance with solid operating results from its incineration and service operations.

The company is a technological leader for commercial incineration in the chemical waste treatment and disposal industry and operates facilities in Baton Rouge and Plaquemine, La., Bridgeport, N.J.; and Deer Park, Texas.

Chempak treatment and disposal services for small quantity generators of hazardous waste are provided through offices located in Delaware, North Carolina, Michigan, Illinois, Louisiana, Texas, New Mexico and California. The company also operates waste processing, recycling and repackaging facilities in Tipton, Mo., and Los Angeles, and a major laboratory facility in Ann Arbor, Mich.

#90298p9320 10/25/1990 ~PR Newswire

SAN DIEGO (OCT. 25) PR NEWSWIRE - Medical Imaging Centers of America Inc. (MICA) (NASDAQ: MIKA) announced today consolidated revenues for the third quarter 1990 rose 113 percent to $21,377,000 from $10,049,000 for the third quarter 1989. For the nine months ended Sept. 30, consolidated revenues increased 92 percent to $55,648,000 in 1990 from $28,987,000 in 1989. Net income for the third quarter 1990 was $1,856,000 ($.17 per share), compared to $1,194,000 ($.16 per share) in 1989, an increase of 55 percent. On a year-to-date basis, net income in 1990 was $4,095,000 ($.43 per share), compared to net income of $2,753,000 ($.38 per share) in 1989, a 49 percent increase.

According to Antone J. Lazos, chief executive officer, "Since our tax loss carryforward was completely utilized in 1989, we are fully taxable in 1990. Our pre-tax income of $3,024,000 for the third quarter 1990 increased 146 percent over pre-tax income of $1,228,000 for the third quarter 1989. On a year-to-date basis, 1990 pre-tax income increased 136 percent to $6,662,000, compared to 1989 pre-tax income of $2,828,000. The high technology services market offers considerable opportunity for continued growth and expansion."

MICA provides high-technology medical services to the hospital and physician communities.

CHICAGO (OCT. 25) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE) today announced record earnings for the first quarter ended Sept. 29.

Net income for the quarter rose 13.4 percent to $106.3 million from $93.8 million reported for the same period last year. Primary earnings per share increased 10.5 percent to $.42, compared with $.38 a year ago. Net sales for the quarter were $3.1 billion, up 11.6 percent over last year's $2.7 billion.

"Our 1991 first quarter results for each of our businesses met or exceeded our expectations," said John H. Bryan, chairman and chief executive officer. "We achieved good sales and earnings growth in our personal products businesses and particularly strong results from our international operations -- coffee and grocery and household and personal care. Profits continue to be somewhat soft in our packaged meats and bakery business."

Sales for packaged meats and bakery rose due to increased meat volumes and higher hog prices. The decline in operating income for this business reflects lower bakery profits. Unit volume for Sara Lee packaged meats increased 2 percent with particular strength in luncheon meats and smoked sausage. Sara Lee bakery reported a 5 percent unit volume decrease although international unit sales continued to be strong. PYA/Monarch, the corporation's foodservice business, reported an 8 percent unit volume increase.

Sara Lee coffee and grocery reported an increase in sales and operating income. Retail coffee volumes rose 8 percent in the quarter, and margins expanded due to cost-cutting efforts and strong market positions. In addition, this line benefited from the strengthening of foreign currencies relative to the U.S. dollar.

Sara Lee Corporation, an international food and consumer products company, markets a wide variety of brand-name products including Hanes, Hanes Her Way, L'eggs, Champion, Kiwi, Ball Park, Jimmy Dean, Douwe Egberts, Dim and, of course, Sara Lee.

SAN DIEGO (OCT. 25) PR NEWSWIRE - Supercomputing Solutions Inc. (NASDAQ: SUPR) today announced its financial results for the third quarter and nine months ended Sept. 30, 1990.

For the third quarter ended Sept. 30, 1990, the company reported revenues of $345,166 and a net loss of $710,078, or $.11 per share. This compares with revenues of $311,888 and a net loss of $1,099,948, or $.24 per share, recorded in the three months ended Sept. 30, 1989.

For the nine months ended Sept. 30, 1990, the company incurred a net loss of $3,216,046, or $.49 per share, on increased revenues of $1,474,982. These results compare to a 1989 nine-month loss of $2,341,763, or $.54 per share, on revenues of $1,129,251 recorded during the nine months ended Sept. 30, 1989.

Improvements in revenues reflect completion in 1990 of the initial phase of

the Direct Solution of Turbulence (DST) contract, completion of contracts with TRW Inc. (NYSE: TRW) and Northrop Corp. (NYSE: NOC) and partial completion of a contract to port (i.e. integrate) a software code onto the company's CAPPS 9064 supercomputer.

In addition to the cost reductions, the company announced that it raised approximately $400,000 from a private offering of convertible preferred stock; that John A. Hoffman, formerly executive vice president, was no longer with the company; that Marshall Geller resigned as a director of the company for personal reasons; and that it had resolved a long-standing contract dispute with Northrop Corp. for its predecessor B-32 computer, resulting in the final payment on the contract of $96,000.

Supercomputing Solutions Inc. designs, manufactures and sells supercomputers, minisupercomputers and software to the aerospace, defense and electronics industries and to agencies of the U.S. Government. The company also owns and markets the copyrighted STARDYNE software package for structural analysis.

SAN DIEGO (OCT. 25) PR NEWSWIRE - Supercomputing Solutions Inc. (NASDAQ: SUPR) today announced its financial results for the third quarter and nine months ended Sept. 30, 1990.

For the third quarter ended Sept. 30, 1990, the company reported revenues of $345,166 and a net loss of $710,078, or $.11 per share. This compares with revenues of $311,888 and a net loss of $1,099,948, or $.24 per share, recorded in the three months ended Sept. 30, 1989.

For the nine months ended Sept. 30, 1990, the company incurred a net loss of $3,216,046, or $.49 per share, on increased revenues of $1,474,982. These results compare to a 1989 nine-month loss of $2,341,763, or $.54 per share, on revenues of $1,129,251 recorded during the nine months ended Sept. 30, 1989.

Improvements in revenues reflect completion in 1990 of the initial phase of the Direct Solution of Turbulence (DST) contract, completion of contracts with TRW Inc. (NYSE: TRW) and Northrop Corp. (NYSE: NOC) and partial completion of a contract to port (i.e. integrate) a software code onto the company's CAPPS 9064 supercomputer.

"The company's marketplace during the third quarter was and continues to be dominated by important world and national events. Middle East tensions, the U.S. Government's delay in establishing a fiscal budget and the onset of an economic recession have combined to partially paralyze potential buyers of supercomputers, resulting in their postponement of capital investment

decisions. The government's fiscal budget delays have impacted the timing of the award of the next phase of the DST contract. These results, in turn, negatively impact the company's fiscal condition and critical cash position," said Allan D. Simon, chairman of the board.

"However, we have engineered a marked reduction in the company's cash needs, the result of several cost saving actions implemented during the summer months. When compared to the second quarter of 1990, the third quarter saw an $800,000 decrease in operating costs and expenses and a reduction of the quarterly loss of $400,000. We will continue to frugally invest our resources during this current 'marketplace malaise' and focus our energies on achieving the award of the next phase of the DST contract." Simon went on to add that the company's proposal for the next phase of the DST contract could result in revenues of $6.5 million over a 26-month period, with an option exercisable by the U.S. Government after nine months into the program for an additional $4.5 million. "Although there can be no assurances we will be awarded the DST contract, we believe such an award would be the singular event that would move the company to a greater stature in the marketplace," said Simon.

In addition to the cost reductions, the company announced that it raised approximately $400,000 from a private offering of convertible preferred stock; that John A. Hoffman, formerly executive vice president, was no longer with the company; that Marshall Geller resigned as a director of the company for personal reasons; and that it had resolved a long-standing contract dispute with Northrop Corp. for its predecessor B-32 computer, resulting in the final payment on the contract of $96,000.

Supercomputing Solutions Inc. designs, manufactures and sells supercomputers, minisupercomputers and software to the aerospace, defense and electronics industries and to agencies of the U.S. Government. The company also owns and markets the copyrighted STARDYNE software package for structural analysis.

ANCHORAGE, ALASKA (OCT. 25) PR NEWSWIRE - An exploration well in Alaska's Cook Inlet has been plugged and abandoned after failing to discover commercial accumulations of hydrocarbons.

ARCO Alaska Inc. was operator for the exploratory venture on the Sturgeon prospect and contributed 50 percent of the cost of the well. Partners were Beard Oil Co. (25 percent), Union Pacific Resources Co., a subsidiary of Union Pacific Corp. (20 percent), and Rowan Petroleum Inc. (5 percent). Drilling began in late August.

The drilling rig used for the venture, Global Marine's Adriatic VIII, is being prepared for towing to the port of Seward.

LOS ANGELES (OCT. 25) PR NEWSWIRE - Bell Industries Inc. (NYSE PSE: BI) today reported continued improvement in operating results for the first fiscal quarter ended Sept. 30, 1990.

Net income advanced 8 percent to $2,337,000, equal to $.40 a share, compared with $2,163,000, or $.37 a share, for the similar quarter last year.

Operating income (income before interest, corporate expense and taxes on income), rose 10 percent to $6,814,000. Interest income declined to $36,000 from $207,000 last year, while interest expense increased to $723,000 from $652,000. The principal factor for the change in interest expense/income was the utilization of funds to pay the first installment of the special $4.00 a share cash dividend, which occurred in March 1990.

Sales increased nearly 3 percent to $103,976,000 from $101,291,000 for the corresponding prior year period.

Theodore Williams, president and chief executive officer, noted that this marks the fifth consecutive quarter-to-quarter improvement in earnings. "While growth in sales was nominal, it did represent a reversal of the trend which prevailed throughout last year," Williams stated. Since the December

1989 quarter, sales have increased on a sequential basis.

Reviewing the first quarter performance, Williams said the period was highlighted by the following:

-- Operating income from electronics distribution improved 5 percent on approximately the same sales volume as last year.

-- Gross margins in electronics distribution were maintained at 26.4 percent. Corporate-wide gross margins held steady at 24.8 percent.

-- The Building Products Group was the best performer, registering a 92 percent gain in operating income on a 13 percent increase in sales.

The company continues to maintain a strong financial condition. At Sept. 30, working capital was $96,000,000; the current ratio was 2.8:1; and shareholders' equity totaled $97,000,000 or $16.63 a share. Bell Industries Inc. distributes and manufactures products for the electronics, computer, building and other markets.

MEMPHIS, TENN. (OCT. 25) PR NEWSWIRE - Perkins Family Restaurants, L.P. (NYSE: PFR) today reported that net income for the third quarter of 1990 increased 10.1 percent to $5,051,000 or $.49 per unit, as compared with $4,587,000 or $.45 per unit for the third quarter last year. The results for the third quarters of both 1990 and 1989 reflect net gains from property transactions of approximately $500,000.

Net income for the nine months ended September 30, 1990 increased 16.4 percent over the nine months ended September 30, 1989. Net income for the first nine months of 1990 was $11,385,000 or $1.11 per unit, as compared with $9,778,000 or $.96 per unit for the comparable period last year.

Total revenues for the third quarter increased to $46,827,000 from $44,906,000 in the comparable period last year, a 4.3 percent increase. Total revenues for the first nine months of 1990 were $132,796,000, a 5.4 percent increase over the $125,995,000 reported in the first nine months of 1989.

Same store sales for company-operated restaurants were up .8 percent for the third quarter and 3.4 percent for the first nine months of 1990.

"We achieved a net income margin of 10.8 percent during the third quarter of 1990, which is higher than the same quarter of the prior year. Management's

emphasis on cost controls helped us achieve this higher margin even though same store sales were up only .8 percent due to the uncertain economy and its adverse impact on consumer spending. We look forward to continued success in the fourth quarter, when at least 10 new franchised restaurants will open. The programs we have implemented and refined over the last three years will facilitate continued expansion of the Perkins system despite the general lack of consumer confidence in the months ahead," said Donald N. Smith, Chairman and Chief Executive Officer.

As of September 30, 1990, Perkins Family Restaurants, L.P. a Delaware limited partnership, owned and operated 114 Perkins Family Restaurants and franchised an additional 275 restaurants in 28 states and Canada.

MARIETTA, PA (OCT. 25) PR NEWSWIRE - Donegal Group Inc. (NASDAQ: DGIC) today reported operating results for the third quarter ended Sept. 30, 1990.

The company's strong earnings and favorable operating results continued with net income of $1,199,712, or 41 cents per share, for the quarter ended Sept. 30, 1990, and $3,663,277, or $1.24 per share, for the nine months ended Sept. 30, 1990.

Book value per share increased to $9.10 as of Sept. 30, 1990. Prospects for a continuation of the company's favorable underwriting results were bolstered by approval of a rate increase in its Pennsylvania Private Passenger Automobile business. This increase, which amounted to a 9.3 percent overall rate adjustment, was granted under the Extraordinary Circumstances Relief Section of the new Pennsylvania Auto Law, which took effect July 1, 1990.

NEWARK, N.J. (OCT. 25) PR NEWSWIRE - Environmental Services of America, Inc. (NASDAQ: ENSA) today announced record results for both the third quarter and nine months ended Sept. 30, 1990.

In the three month period ended Sept. 30, 1990, net sales increased 74 percent to $2,944,605 compared with $1,693,353 during the third quarter of 1989. Income from operations, in the quarter, advanced to $381,811 from $97,871 for the comparable 1989 period, while net income rose to $268,800, or 4 cents per share, up from $52,732 in the third quarter of 1989.

Net income for the nine months ended Sept. 30, 1990, totaled $645,818 on net sales of $9,316,098 compared to net income of $106,199 on net sales of $4,808,886 for the same 1989 period. These results represent a 508 percent increase in net income and a 94 percent increase in net sales over the prior period of 1989. Earnings per common share increased to 11 cents per share from 3 cents per share for the comparable period of 1989.

Jon Colin, president, noted, "The company continues to strengthen its internal business segments. The results of improved marketing integration between our operating subsidiaries has allowed the company to bid successfully for larger industrial remediation projects. As we approach year end, we continue to seek strategic acquisitions that will provide additional revenue and earnings growth."

Environmental Services of America, Inc. is a diversified environmental services firm specializing in the identification, management, remediation, preparation, transportation and disposal of hazardous waste and non-hazardous waste. Additionally, the company provides consulting services related to geological testing and underground storage tank compliance services for private and public entities. The company operates a TSD facility (treatment, storage and disposal) in New York State, which provides drum waste transfer and bulking services to clients in the mid-Atlantic and New England states.

#90298p9345 10/25/1990 ~PR Newswire

HANCOCK, MI (OCT. 25) PR NEWSWIRE - D&N Financial Corporation (NASDAQ: DNFC) today reported a net loss of $2.0 million, or $0.55 per share, for the third quarter of 1990. This compares to net income of $1.1 million, or $0.30 per share, for the third quarter of 1989.

Earnings for the current quarter were offset by the addition of $5.3 million to loan loss reserves, additions to reserves for the third quarter of 1989 were $309,000.

According to D&N Chairman and CEO Kenneth D. Seaton, "D&N remains a solid company with a positive outlook. We are profitable year to date, and we exceed all regulatory capital requirements. Additionally, steps have been taken which, though difficult in the short term, will benefit our stockholders in the long run. We recently announced a reduction of our dividend and cost reductions through decreases in our workforce, which represent aggressive strides the company is making in expense control and conservation of capital."

During the quarter, net interest income rose to $9.5 million, compared with $9.1 million for the third quarter of 1989. For the first nine months of the year, net interest income was $32.0 million, up 15.2 percent over the $27.8 million earned in the same period of 1989.

Core income (defined as net income, excluding net gains/losses on sale of loans and securities other than mortgage banking inventory) showed a $3.5 million loss for the quarter, compared to core income of $2.5 million reported for the 1989 third quarter. The additional loan loss reserves were largely responsible for the loss for the quarter; however, excluding additions to loan loss reserves, core income for the first nine months of the year was $9.9 million, up 67.8 percent over the $5.9 million reported for the year-ago first nine months.

Owing to a healthy consumer lending business and continued growth in deposit-related fees, non-interest income rose during the quarter, totaling $2.7 million, up 44 percent over the $1.9 million for the 1989 third quarter. For the first nine months of the year, non-interest income of $7.4 million represented a 26.1-percent increase over the $5.9 million reported for the same period in 1989.

With the economy slowing and demand softening, loan production held steady from the prior quarter at $99.9 million. This is down significantly from 1989's third-quarter production of $117.9 million, due primarily to the curtailment in 1990 of commercial real estate lending and indirect consumer lending.

"Aggressive expense control remains a priority," said Seaton, noting that the recently announced workforce reduction is projected to save $1.5 million annually. Year-to-date expenses increased by 3.5 percent compared with 1989 expenses, reflecting the continuing effect of the costs associated with the proxy contest earlier in the year.

In discussing this quarter's addition to loss reserves, Seaton acknowledged the trend across the country of banks making significant loss provision additions.

"In D&N's case, although no additional portfolio problems were identified during the quarter," said Seaton, "we undertook a thorough review of our loan portfolio at quarter end. We found our reserve levels adequate against our three-year loss history. However, with the strong possibility of a recession and its potential impact on the already weak commercial real estate market, we decided to move our general reserve levels higher."

Seaton noted that D&N will continue to take a conservative approach to reserve levels, adding, "With over 70 percent of our portfolio in low-risk residential real estate loans, our current reserve level of 1.38 percent of total loans puts us in a better position for the future."

Seaton noted that D&N's total assets declined to $1.9 billion from $2.1 billion at Sept. 30, 1989. "We have continued to shrink the balance sheet as we follow our stated plan to allow our mortgage derivative portfolio to run off," he stated. At quarter end, total deposits were $1.1 billion, down from $1.2 billion at Sept. 30, 1989.

In other news during the quarter, D&N Financial Corp.'s sole subsidiary changed its name from D&N Savings Bank, FSB to D&N Bank, a Federal Savings Bank. "This is one of several steps we are taking as we continue to aim toward a community banking business philosophy," said Seaton.

Subsequent to quarter-end, at the regular meeting of the board of directors on

Oct. 22, 1990, George J. Butvilas and Daniel P. Kearney were appointed to the board, each for terms expiring in 1993. These appointments represent an expansion of the board from 11 to 13 seats.

Butvilas, who is president of D&N Financial Corporation, joined D&N in June 1990. He formerly was executive vice president of Boulevard Bancorp, Inc., of Chicago, a $1.6 billion multi-bank holding company, as well as chairman and CEO of Citizens National Bank of Downers Grove, one of Boulevard Bancorp's four wholly owned community banks.

Kearney resides in Marblehead, Mass., and is a private consultant in the area of real estate and mortgage financing. He has served as president and CEO of the Resolution Trust Corporation Oversight Board, which formulates policy and reviews programs of the federal government's Resolution Trust Corporation. Prior to that, in addition to private law practice, Kearney was a principal at Aldrich, Eastman & Waltch, Inc. of Boston, where he specialized in mortgage financing, was a managing director at Salomon Brothers, Inc., in New York, and has served as president of the Government National Mortgage Association (Ginnie Mae).

Commenting on the two appointments, Seaton said, "These two individuals offer extremely valuable contributions to D&N's board. Mr. Butvilas' 16 years of community and commercial banking experience add a very timely strategic perspective as differences rapidly disappear between the thrift and commercial banking industries. Mr. Kearney brings unique insights to the capital markets and government policy making and regulation that can directly aid the company to reach its long-term strategic objectives."

D&N Financial Corp., through its subsidiary, D&N Bank, FSB, has financial services offices throughout Michigan's Upper Peninsula and mid-Michigan, as well as mortgage banking operations in Arizona, Illinois, Michigan, North Carolina and Texas. D&N is the fourth-largest thrift institution in Michigan based on asset size. D&N Financial Corp.'s stock is traded over the counter and is quoted on the NASDAQ National Market System under the symbol DNFC.

#90298p9346 10/25/1990 ~PR Newswire

LOS ANGELES (OCT. 25) PR NEWSWIRE - CalMat Co. (NYSE: CZM) today reported earnings for the third quarter of 1990 of $58,305,000 or $1.96 per share on revenues of $113,715,000, compared with 1989's third quarter earnings of $16,535,000 or $0.53 per share on revenues of $129,031,000. Figures for both the third quarter of 1990 and the first nine months of 1990 include a gain of $47,310,000 or $1.59 per share, from the recently announced disposition of California Portland Cement Co. (CPC).

The stock of CPC, which was a wholly-owned subsidiary of CalMat, was exchanged for 5,834,070 shares of CalMat stock held by Onoda California Inc. These shares were subsequently retired, and earnings per share in subsequent periods will reflect the lower number of outstanding shares. Earnings for the nine-month period ending Sept. 30, 1990 were $80,505,000 or $2.69 per share, compared with earnings of $46,866,000 or $1.51 per share, for the comparable 1989 period. Revenues for the nine-month period were $318,889,000 in 1990, versus $351,451,000 in 1989. Revenue amounts exclude CPC revenues. Income from operations of CPC, less applicable income taxes, and the non-taxable gain from the disposition of CPC, are included in net income as discontinued operations.

The company classifies its property sales as those in connection with ongoing operations and those of assets held for sale as a result of the company's previously announced program to dispose of its developed and developable properties. After-tax gains from ongoing property sales in the company's properties division were $116,000 or less than $0.01 per share in the third quarter of 1990, compared with $3,023,000 or $0.10 per share in the third quarter of 1989. Gains were $664,000 or $0.02 per share for the nine months ending Sept. 30, 1990, compared with $8,075,000 or $0.26 per share for the comparable 1989 period.

Operating results of, and gains from disposition of, assets held for sale included in net earnings were as follows: $1,942,000 or $0.07 per share in the

third quarter of 1990, compared with a loss of $204,000 or ($0.01) per share in the third quarter of 1989; and $9,715,000 or $0.32 per share for the nine months ending Sept. 30, 1990, compared with $3,009,000 or $0.10 per share for the comparable 1989 period.

The transaction with Onoda California Inc., effective Sept. 30, 1990, completes the company's exit from a lower-margin, capital-intensive cement industry and reduces its ready-mixed concrete operations. The company plans to concentrate on its core businesses of construction aggregates and asphalt by internal growth and through acquisition.

PITTSBURGH (OCT. 25) PR NEWSWIRE - National Intergroup Inc. (NYSE: NII) announced today that a preliminary count indicates that the holders of a sufficient number of preference units of Permian Partners, L.P., have consented to the previously described amendment to the Permian Partnership Agreement to allow its adoption.

Assuming that the final tally confirms this count, and assuming all other conditions to NII's pending tender offer for Permian preference units are met when the tender offer expires (currently scheduled for 5 p.m., New York City time on Oct. 26, 1990), NII intends to purchase in the tender offer all preference units validly tendered pursuant thereto.

Since the results of the consent solicitation are not yet final, unitholders are encouraged to continue to deliver consents.

CONTACT: Judith A. Hale of NII, (412) 394-4305.

FAIRFIELD, NJ (OCT. 25) PR NEWSWIRE - Ogden Projects, Inc. (NYSE: OPI), the leading developer of waste-to-energy facilities in the United States, today reported a sharp increase in net income for the three months ended Sept. 30, 1990, to $11.2 million from $6.6 million for the same period last year. For the nine months, net income climbed 45 percent to $27.1 million from $18.7 million in the prior year.

Earnings per share jumped 67 percent year-over-year to $.30 from $.18 for the quarter, and rose 44 percent year-over-year to $.75 from $.52 for the nine-month period.

R. Richard Ablon, chairman of the board and chief executive officer, stated

that "earnings per share for the nine-month period exceed the $.74 per share earned for all of 1989, and we are proud of the continued growth and performance demonstrated by that accomplishment."

Income before taxes increased year-over-year to $14.2 million from $8.1 million for the quarter, and to $33.4 million from $22.6 million for the nine-month period.

OPI designs, builds and operates waste-to-energy facilities for municipalities under long-term contracts through its subsidiary, Ogden Martin Systems, Inc. OPI currently operates 15 such facilities, is constructing four and has been awarded seven more. OPI is 85.6 percent owned by Ogden Corporation.

Headquartered in New York, Ogden Corporation (NYSE: OG) is a diversified services company which also has major subsidiaries engaged in the provision of energy and environmental consulting and provides a wide range of services to the federal government. In other service activities, Ogden Entertainment Services is a leader in the management of sports and entertainment centers and the promotion of live entertainment events, and Ogden's Aviation Services division is a leading international provider of support services to the airline industry.

NEW YORK (OCT. 25) PR NEWSWIRE - Jack Clark, chairman of the board of Stage II Apparel Corp. (AMEX: SA), announced in a written statement that the corporation's board of directors had authorized the company to buy up to 50,000 shares of its common stock, or about 1 percent of its total outstanding shares in the open market from time to time.

This new authorization to repurchase 50,000 shares is in addition to previous share repurchase authorizations of 50,000 shares, 100,000 shares, and 100,000 shares voted by the board on Dec. 10, 1987, March 14, 1990 and Aug. 14, 1990, respectively. Pursuant to these authorizations, the corporation to date has repurchased a total of approximately 224,000 shares.

The company had 4,079,625 of its shares outstanding as of Oct. 16, 1990.

NEW YORK (OCT. 25) PR NEWSWIRE - The Greater New York Savings Bank (NASDAQ: GRTR) announced today that its board of directors voted a dividend of 12 cents per common share. It is the 12th consecutive quarterly dividend since the bank converted from mutual to stock ownership on June 24, 1987. The dividend is payable on Dec. 1, 1990, to stockholders of record at the close of business on Nov. 13, 1990.

The Greater New York Savings Bank is an FDIC insured, New York chartered stock savings bank with assets of $3.1 billion, deposits of $2.2 billion and total stockholders' equity of $211 million at Sept. 30, 1990. Nine of its 14 banking offices are located in Brooklyn, where The Greater was originally chartered in 1897, and its five other offices are located in Manhattan, Queens Nassau and Suffolk.

#90298p9362 10/25/1990 ~PR Newswire

POMPANO BEACH, FLA. (OCT. 25) PR NEWSWIRE - The Federal Deposit Insurance Corporation has ordered the sale, by auction, of over 50 properties throughout the state of Florida. These properties, with appraised value in excess of $14 million include homes, condominiums, commercial buildings, a horse farm, office buildings, warehouse, waterfront lots, development sites and more. These properties represent one of the largest FDIC auctions ever conducted in the Southeastern United States.

Fisher Auction Company, a national auction firm headquartered in Pompano Beach Fla., was the company selected by the FDIC. The auctions will be held on Nov. 13, 14 and 15 in Fort Lauderdale, Jacksonville, and Tampa, Fla., respectively.

Louis Fisher, executive vice president of Fisher Auction Company said, "The Auction-Marketing Method of turning properties into cash, was primarily selected by the FDIC because an auction can rapidly and effectively determine a property's true market value, and produce qualified investor-buyers for a prompt, competitive sale and closing."

Inspection dates for each property will be set up well in advance of the auction so that interested purchasers can preview the properties of their choice prior to the auction. Also, bidders seminars will be conducted in each of the three metropolitan areas for first-time auction buyers.

EDEN PRAIRIE (OCT. 25) PR NEWSWIRE - Roe H. Hatlen, chairman, president and CEO of Buffets, Inc. (NASDAQ: BOCB), reported third quarter earnings increased 25 percent to $2,010,000 on a sales increase of 21 percent to $34,515,000. Earnings per share increased 24 percent to $.21 per share on 9,602,000 shares, compared to $.17 per share on 9,548,000 shares in 1989.

For the forty weeks ended Oct. 10, 1990, net earnings increased 43 percent to $6,496,000 and earnings per share increased 42 percent to $.68 per share. Restaurant sales for the forty week period increased to $109,262,000 from $85,506,000 in 1989.

The company opened five restaurants during the quarter and expects six company-owned restaurants and one franchised restaurant to open during the remainder of 1990. Currently, Buffets, Inc. operates 78 Old Country Buffet restaurants in 12 states and franchises nine restaurants in four states.

The company also announced that Mr. Scott, a co-founder of the company, recently resigned from the board of directors of the company and is pursuing other interests. Mr. Scott will be replaced on the board by D.M. Winton, and experienced food industry investor from Minneapolis who has been a significant shareholder of the company since it was founded.

The company also stated that its previously announced intent to develop Old Country Buffet restaurants in Texas with Mr. Scott has been terminated. The company will be developing Texas as a company-owned market.

#90298p9365 10/25/1990 ~PR Newswire

WHITE PLAINS, NY (OCT. 25) PR NEWSWIRE - American Savings Bank (NYSE: ASB) today announced a net loss of $6.4 million, or $1.29 per share, for the third quarter of 1990. For the same three months of 1989, the bank reported a net loss of $10.3 million, or $1.93 per share. For the nine months ended Sept. 30, 1990, American had a net loss of $55.8 million, or $9.96 per share. The bank

reported net income of $3.6 million for the first nine months of 1989, resulting in a net loss after payment of preferred stock dividends of $0.04 per share.

The 1990 third quarter results reflected a decrease in net interest income and other income, as well as a previously announced loss on the disposition of a non-performing construction loan. These factors were partly offset by a decrease in the level of American's quarterly provision for loan and asset losses and lower operating expenses. The principal factor affecting the bank's results for the first nine months of 1990 was a sizable provision for loan and asset losses in the second quarter of this year.

The bank's ratio of total regulatory capital to average assets was 6.03 percent at Sept. 30, 1990 as compared with the current FDIC total capital requirement of 6 percent. American's total risk-based capital ratio was 7.81 percent at the end of the 1990 third quarter, and was in excess of the 7.25 percent FDIC requirement. Regulatory capital at Sept. 30, 1990 was reduced by the operating loss for the third quarter and by the reclassification or previously established reserves from "general" to "specific". These reductions were partially offset by lower overall asset levels. The reserve reclassification was a result of the foreclosure action commenced in the third quarter on the Yonkers construction loan. Total stockholders' equity was $117.8 million at the end of the latest quarter.

Total assets at Sept. 30, 1990, were $4.09 billion, a decrease of $336.6 million during the past nine months. This was the result of an ongoing management effort to reduce asset levels in order to enhance the capital ratio. American had $3.51 billion in loans and mortgage-backed securities and $3.15 billion in deposits at the end of the 1990 third quarter.

HOUSTON (OCT. 25) PR NEWSWIRE - Dow B. Hickam, Inc. (NASDAQ-NMS: DBHI), today reported third quarter 1990 net income of $83,000, or four cents per common share, on sales of $3,336,000 for the quarter ending Sept. 30, 1990. For the same quarter in 1989, the company had reported net earnings of $203,000, equal to nine cents per share, on sales of $2,970,000.

Net earnings for the first nine months of 1990 totaled $306,000, or 14 cents per share, on sales of $9,695,000. For the first nine months of 1989, net earnings were $614,000, or 28 cents per share, on sales of $8,554,000.

"The company's new product line, Sorbsan(R), a specialty wound care product, continues to grow rapidly and exceeds company expectations," according to Dow

B. Hickam, president and chief executive officer. He further explained that "the lower than expected third quarter profitability reflected reduced sales of our Granulex(R) product line."

Hickam emphasized that the company continues its active search for additional products like Sorbsan, that will upgrade the product line and strengthen the company's earnings potential.

Dow B. Hickam, Inc., is a manufacturer and nationwide marketer of health care and pharmaceutical products.

#90298p9373 10/25/1990 ~PR Newswire

ATLANTA (OCT. 25) PR NEWSWIRE - Contel Cellular Inc. (NASDAQ: CCXLA) today reported strong revenue and subscriber growth for the third 1990 quarter and year to date.

For the quarter ended Sept. 30, revenues increased to $46.5 million, compared with $18.2 million reported in the prior year quarter. Third quarter 1990 service revenues, which exclude equipment sales, were $40.3 million, substantially higher than the $16.3 million reported in the prior year period.

Normalized subscriber growth in company-controlled markets, which excludes subscribers gained through the February 1990 acquisition of 13 southeastern cellular properties, increased 55 percent for the 12-month period ended Sept. 30, and at an annualized rate of 45 percent for the third 1990 quarter. At Sept. 30, total subscribers were 215,000, including Contel Cellular's proportional share of subscribers in noncontrolled markets, and subscribers in company-controlled markts totaled 133,000.

Contel Cellular continued to report higher than industry average revenues per subscriber, with third quarter 1990 monthly revenues per subscriber averaging $107, compared with $112 in the second 1990 quarter.

As expected, the company posted a net loss of $29.7 million, or $.30 per share for the third quarter of 1990, compared with $.9 million in net income, or $.01 per share, in the year earlier period. The net loss resulted primarily from $32.4 million in third quarter 1990 financing costs and amortization of goodwill related to the southeastern properties acquisition.

The company's operating cash flow (operating income before depreciation and amortization) was $4.2 million for the third quarter of 1990, an increase of $4.4 million from the corresponding period of 1989.

For the nine months ended Sept. 30, Contel Cellular reported revenues of $115.5 million, compared with $46.1 million for the corresponding 1989 period. Service revenues were $100.4 million, compared with $40.6 million for the first nine months of 1989. The company reported a net loss of $71.5 million, or $.72 per share, for the nine month 1990 period, compared with net income of $2.5 million, or $.03 per share, for the same 1989 period.

#90298p9374 10/25/1990 ~PR Newswire

DALLAS (OCT. 25) PR NEWSWIRE - Intellicall, Inc. (NYSE: ICL) today reported that net income for the third quarter of 1990 increased approximately 82 percent compared with the third quarter of 1989, on the strength of an increase in sales and revenues of $28,617,000.

For the three months ended Sept. 30, 1990, Intellicall earned $2,018,000 on sales and revenues of $57,216,000, or $.29 per share on 6,913,000 average

shares outstanding. For the same period in 1989, the company reported earnings of $1,111,000 on sales and revenues of $28,599,000, or $.21 per share on 5,281,000 average shares outstanding.

For the first nine months of 1990, Intellicall's net income totaled $5,541,000 or $.79 per share on 6,973,000 average shares outstanding, representing an increase of approximately 102 percent from net income of $2,747,000, or $.52 per share on 5,237,000 average shares outstanding, for the comparable period in 1989. Sales and revenues for the current nine-month period totaled $149,169,000, compared with sales and revenues of $66,144,000 for the first nine months of 1989.

During the third quarter, Intellicall continued to ship its proprietary Intelli(asterisk)Star circuit boards for placement in new and existing private pay telephones owned by the company's customers. Intelli(asterisk)Star installations automate many types of services for pay telephones and provide an ongoing source of revenue for the company. Call revenues generated by Intelli(asterisk)Star continued to increase during the third quarter -- from approximately $34 million in second- quarter 1990 to approximately $41 million in the current quarter -- indicating continued strong acceptance for this patented technology.

Polley said the company has now sold more than 200 systems to be installed in hotels and resorts throughout the United States, including the Hotel Crescent Court in Dallas, Parc-55 in San Francisco, and select Embassy Suites hotels.

Intellicall, Inc. is a diversified telecommunications company providing innovative technology and services to private pay telephone networks throughout the United States. The nation's largest manufacturer of privately owned pay telephones and automated pay telephone systems, Intellicall provides communications products and services through its customers nationwide at locations such as Los Angeles International Airport, Walt Disney World, Marriott hotels and Embassy Suites hotels. Company stock is listed in alphabetical quotations as "Intellicall" or "Intelcal."

WATERTOWN, MASS. (OCT. 25) PR NEWSWIRE - Ionics, Incorporated (NYSE: ION) announced today that it has listed its securities on the New York Stock Exchange (NYSE). The company's common stock, which was previously traded on the American Stock Exchange under the trading symbol "ION", will now be traded beginning today, on the NYSE under the same trading symbol.

"We are pleased to become a New York Stock Exchange listed company," said Arthur L. Goldstein, chairman and chief executive officer of Ionics. "As a leading international company in the field of water purification, we believe that listing on the Exchange will benefit Ionics and its shareholders in several ways, including a broader public market for our shares and increased visibility to investors, not just in this country but also overseas."

Ionics is a separations technology company involved worldwide in the manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and in the sale of bottled water and home water purifiers. Revenues in 1989 were $109 million.

#90298p9377 10/25/1990 ~PR Newswire

HOUSTON (OCT. 25) PR NEWSWIRE - Tenneco Inc. (NYSE: TGT) today reported third quarter net income of $91 million or 70 cents per common share compared with $90 million or 68 cents per common share for the third quarter of 1989.

Operating income (pre-interest and pre-tax) was $261 million for the quarter compared with $253 million for the same period of 1989. Revenues for the third quarter were $3.4 billion, compared with $3.2 billion in the 1989 third quarter.

Net income for the first nine months of 1990 was $431 million or $3.34 per common share compared with $379 million or $2.88 per share for the same period in 1989. Operating income totaled $1.02 billion compared with $896 million for the first nine months of 1989. Revenues were $10.6 billion compared with $10.2 billion in the same period of 1989.

"The uncertain business environment overall, and deterioration in some of the industries in which we do business, has begun to impact our financial performance and is likely to continue impacting our businesses during the balance of 1990. In the third quarter, this affected our farm and construction equipment and chemical businesses," said James L. Ketelsen, Tenneco's chairman and chief executive officer.

"As a result, it now appears that our earnings in the fourth quarter will not match the strong earnings we posted in the fourth quarter of 1989. However, based on year-to-date results, our earnings for the total year should well exceed those of 1989."

Operating income for Tenneco Gas totaled $54 million during the third quarter compared with $56 million for the same period in 1989. Jurisdictional transportation volumes rose 17 percent due to continued efforts to capture

additional markets and to the initiation of open access transportation on the company's Midwestern Gas Transmission system.

However, the rise in volume, improvements in natural gas liquids and a decrease in operating expenses were more than offset by lower margins resulting from mandated rate decreases.

Third quarter operating income for J. I. Case was $26 million for 1990, a $6 million improvement over 1989. Benefits from higher sales volumes and plant shutdowns rescheduled from the third quarter to the second quarter of 1990 were partially offset by higher operating costs, new product development costs and unfavorable foreign exchange rates.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals, and minerals.

WATERTOWN, MASS. (OCT. 25) PR NEWSWIRE - Ionics, Incorporated (NYSE: ION) today reported results for the quarter and nine months ended Sept. 30, 1990. For the quarter, the company reported net income of $1.26 million, or 29 cents per share, up 35.3 percent compared to net income of $932,000 or 22 cents per share in the third quarter of 1989. Revenues for the quarter were $30.3 million, up 10.8 percent compared to $27.3 million one year earlier. For the nine-month period, net income of $3.3 million, or 78 cents per share, was up 33.0 percent compared to $2.5 million, or 60 cents per share, one year earlier and revenues of $91.8 million were up 16.4 percent. Backlog on Sept. 30th was $66.2 million, up 50.6 percent from that one year earlier.

Commenting on the company's performance, Arthur L. Goldstein, Ionics' chairman and chief executive officer, noted that the third quarter of 1990 represented the 13th consecutive quarter of improving revenues, net income and earnings per share performance compared to the same quarter in the prior year. Revenues, net income and earnings per share for the nine-month period also represented new records for the company. He also noted that the Sept. 30 backlog did not reflect any amount for the water supply contract signed in September with the city of Santa Barabara, Calif. Depending on the capacity of the facility, which will be selected by the city prior to June 30, 1991, the revenues from the Santa Barbara contract are expected to range from $25 million to $100 million over a five-year period.

Ionics is a separations technology company involved worldwide in the manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and

in the sale of bottled water and home water purifiers.

#90298p9383 10/25/1990 ~PR Newswire

PHILADELPHIA (OCT. 25) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) announced today that rates for its 344,000 suburban gas customers will be reduced effective Dec. 1, 1990, primarily resulting from a revision to its gas cost rate approved by the Pennsylvania Public Utility Commission.

The annual bill for an average home heating customer will decrease 6.1 percent from $889 to $835.

Kenneth G. Lawrence, vice president for Gas Operations said "At a time when the cost of many other energy products is increasing, we are pleased that our gas customers will enjoy lower rates for the 12-month period beginning Dec. 1. The reduction is due to stable natural gas prices and to a longer term outlook for a stable natural gas market."

The rate reduction further increases the advantage now being experienced by PE home heating customers compared to those heating with oil. The price of PE natural gas used for home heating on Dec. 1 will be $6.48 per thousand cubic feet, which equates to about 87 cents per gallon for home heating oil. According to the Pennsylvania Energy Office, home heating oil as of Oct. 1 was selling for $1.24 per gallon. At those prices, oil customers are spending 42 percent more for home heating than PE natural gas customers.

According to Lawrence, "This favorable price advantage is translating into significant interest in natural gas by home owners now using oil."

PE said that as a result of the Middle East Crisis, the response this fall by the public to a gas conversion marketing campaign is double the response of previous years.

"Our current efforts are to respond quickly to all customers seeking additional information and to schedule those customers choosing to convert and to complete the conversion as expeditiously as possible," Lawrence said.

PE converted more than 2,300 customers to natural gas in 1989 and will exceed that total by at least 30 percent in 1990.

PE supplies gas to customers in Bucks, Chester, Delaware and Montgomery counties.

CINCINNATI (OCT. 25) PR NEWSWIRE - Multi-Color Corporation (NASDAQ: LABL) today announced results for its second quarter ending Sept. 30, 1990.

Net sales for the second quarter of fiscal 1991 increased 12.7 percent to $17,467,000 from $15,495,000. Net income for the period was $14,000, a decline from the $489,000 reported in the prior year period. Earnings per share declined to $.01 per share from $.22 per share in the prior year period.

For the first half of fiscal 1991, sales increased by 1.4 percent to $31,487,000, up from $31,058,000 in the first half of the prior fiscal year. Multi-Color reported a loss of $691,000 or $.31 per share for the period compared to net income of $948,000 or $.43 per share for the prior year period.

John C. Court, president of Multi-Color, commented, "The decline in earnings in the second quarter resulted from the continued costs of the two new plant startups. Operating efficiencies have improved at both locations and we continue to expect them to make a contribution to profit this fiscal year."

Multi-Color Coporation is one of the largest manufacturers of printed labels for branded consumer products in the United States. The company's shares are traded over the counter under the National Market Systems symbol LABL.

#90298p9392 10/25/1990 ~PR Newswire

STAMFORD, CT (OCT. 25) PR NEWSWIRE - Sprague Technologies, Inc. (NYSE: SPG) today reported net income for the third quarter of 1990 of $0.8 million, or $0.04 per share, compared to breakeven, or $0.00 per share, for the third quarter of 1989.

Operating income from continuing operations was $3.2 million, vs. last year's $3.7 million which included a pension plan curtailment gain of $1 million. Net sales for the period were $78.4 million, vs. $76.9 million for the similar quarter in 1989.

Sprague reported net income for the nine months ended Sept. 30, 1990, of $4.2 million, or $0.23 per share, compared to a net loss of $45.3 million, or $2.49 per share, for the comparable period in 1989. Operating income from continuing operations was $11.2 million vs. an operating loss of $34.3 million in 1989.

The operating loss for 1989 included a $39.2 million provision for restructuring. Net sales were $247.8 million for the nine-month period of 1990 compared to $272.9 million in 1989. Net sales on a comparable year-to-year basis were five percent higher.

Included in the nine months of 1989 are revenues and operating losses of $25.4 million and $4.5 million, respectively, for the company's Fil-Mag and ceramic capacitor operations which were transferred to businesses held for sale as of June 30, 1989.

Edward F. Kosnik, president and chief executive officer, commented, "Third-quarter results reflect a moderate improvement in operations. Earnings for the quarter reflect the impact of seasonal factors as well as weak economic conditions."

Sprague Technologies, Inc. is a worldwide manufacturer of capacitors and other electronic components.

BOSTON (OCT. 25) PR NEWSWIRE - Boston Edison Company (NYSE: BSE) today reported earnings (loss) per common share for the three, nine and 12 months ended Sept. 30, 1990. Earnings (loss) per share for the three months ended were $1.35 compared to $1.42 last year; for the nine months ended were $1.87 vs. $1.54; and for the trailing 12 months earnings (loss) were 52 cents vs. $1.86 for the same period last year. The results of operation for the three, nine and 12 months ended Sept. 30, 1989 include a gain of 14 cents per share from an eminent domain taking of certain company property. Results for the nine and 12 months ended Sept. 30, 1990 includes 41 cents per common share due

to the cumulative effect of a change in accounting principle to begin recording unbilled revenues, effective Jan. 1, 1990. This accounting change provides a better matching of revenues and expenses by recording an estimate of customer usage which is unbilled at the end of each month. Results for the 12 months ended Sept. 30, 1990, also included an after-tax charge of $106,280,000 relating to provisions for Pilgrim Nuclear Power Station litigation and rate proceedings recorded in the fourth quarter of 1989.

#90298p9397 10/25/1990 ~PR Newswire

ATLANTA (OCT. 25) PR NEWSWIRE - The Federal Communications Commmission has granted BellSouth Enterprises an experimental radio service license to conduct the two-phase Personal Communications Network trial which was announced on July 24, 1990. The license became effective on Oct. 19, 1990 and is active through Dec. 31, 1991.

BellSouth Enterprises will immediately begin to evaluate radio wave propagation and building penetration in three frequency ranges: 866-869 MHz, 902-928 MHz and 1850-1990 MHz.

In the second phase of the trial, an operating testbed system will be constructed in the Midtown section of Atlanta. This part of the study will focus on the way that potential business customers would use a PCN system. It will include up to 12 base stations and as many as 300 handsets.

"We are pleased that our license has been awarded, and we are beginning the first phase of this trial immediately," said Eric Ensor, assistant vice president for Worldwide Wireless Strategy Development. "BellSouth believes that this trial will provide significant information on how Personal Communications Services address a customer's needs and how they change the communications patterns of our customers. This kind of information is essential in formulating our approach to the future of wireless communications."

BellSouth Enterprises is a wholly owned subsidiary of BellSouth Corporation, which is an Atlanta-based international telecommunications holding company. BellSouth's subsidiaries offer local telephone service in nine Southeastern states and mobile communications service worldwide, provide advertising and publishing services, and market and maintain stand-alone and fully integrated communications systems.

#90298p9405 10/25/1990 ~PR Newswire

NEW YORK (OCT. 25) PR NEWSWIRE - United Capital Corp (AMEX: ICU) today reported results for the third quarter of 1990. Total revenue for the quarter was $15,591,000 vs. $14,733,000 for the third quarter of 1989. Net income for the quarter was $768,000 or $.07 per share as compared to $1,121,000 or $.10 per share for the corresponding period in 1989. Year-to-date loss was $4,505,000 or $.42 per share on $49,775,000 of revenues vs. earnings of $2,613,000 or $.24 per share on $38,390,000 of revenues during the comparable 1989 period.

In commenting on the results, A.F. Petrocelli, chairman of United Capital Corp., noted quarterly revenues continue to reflect the strong operating performance of the Metex operating companies. Income from operations for the third quarter exceeds that of the comparable 1989 period while a decrease in the valuation allowance of marketable securities recorded in 1989 accounts for the overall decrease in quarterly earnings.

The 1990 year-to-date loss reflects the first quarter write-down of the company's investment in General Development Corporation, which filed for protection under Chapter 11 of the U.S. Bankruptcy Code in April of this year. Increases in year-to-date revenues are principally due to the inclusion of the results of Metex Corporation, acquired in March 1989, for a full nine months in 1990.

In addition to the Metex business which provides engineered products to aviation, industrial and automotive markets worldwide, United Capital Corp. owns and manages real estate assets.

#90298p9406 10/25/1990 ~PR Newswire

MEDIA, PA (OCT. 25) PR NEWSWIRE - VWR Corp. (NASDAQ: VWRX) today reported that income from operations for the third quarter was $4,842,000 up 33 percent over the last year.

Sales of $112,316,000 for the quarter increased 21 percent, a record for the company. Net income from continuing operations of $2,020,000 (38 cents per share) represented an improvement of 35 percent over third quarter 1989 results.

For the nine-month period, income from operations rose 17 percent, sales were up 20 percent, and net income from continuing operations increased 10 percent, compared to the same period in 1989. Earnings per share from continuing operations for the nine months were $1.05, compared to 94 cents for the same period in 1989.

The company noted that the record sales gain for the third quarter was a result of growth in VWR's core scientific business and positive effects from the acquisitions of Sargent-Welch Scientific Co. and Oxford Scientific Laboratories of London, Ontario, Canada. The companies were acquired, respectively, in September 1989 and April 1990.

"All segments of the company showed solid sales gains," said Jerrold B. Harris president and chief executive officer of VWR Corp. "Our core scientific business had a strong third quarter with improvements in both market share and selling margins. Order rates for Sargent-Welch science/education products have substantially improved. This business is now meeting our goal of regaining its market position as a result of positive reaction by our high school through junior college customers to significant improvements we have made in service."

Harris also noted that VWR had announced the implementation of an ESOP (Employee Stock Ownership Plan) during the quarter. "The plan, which will eventually provide for up to 6 percent employee ownership, supports our company's commitment to strong employee involvement," Harris said. "We also believe it will have a positive impact on long- term shareholder value."

Looking to the future, Harris said that the company had not experienced any downturns as a result of the current economic uncertainty. "While remaining cautious, we are proceeding with planned investments and commitments which will provide long-term benefits for VWR Corp."

VWR Corp., headquartered in Media, is the nation's second largest distributor of laboratory supplies and equipment, with annual sales in excess of $400 million.

#90298p9407 10/25/1990 ~PR Newswire

DEERFIELD, IL (OCT. 25) PR NEWSWIRE - Premark International, Inc. (NYSE: PMI) reported today that third quarter 1990 net income declined 69 percent to $4.2 million, or 14 cents per share, from $13.5 million, or 38 cents per share in the prior year period. Sales increased about 12 percent to $669 million.

Included in third quarter results is a previously announced $11.9 million pretax charge resulting from settlement of lawsuits associated with food equipment patents. Excluding that charge, net income would have been $11.6 million, or 38 cents per share. Net income before the charge declined due to higher interest expense, which more than offset a modest increase in segment profit from the June 1990 acquisition of Sikes Corp. and favorable foreign exchange rates. Earnings per share before the charge were flat due to the impact of a share repurchase program completed earlier this year.

Tupperware profit in the third quarter was even with the prior year period despite a $2.5 million gain reported last year from the sale of real estate. Strength in Latin American operations more than offset continued declines in the United States and Japan. Excluding the charge, Food Equipment Group profit increased on a modest rise in sales. The results primarily reflect improvement in U.S. operations and favorable foreign exchange rate comparisons. In the Consumer and Decorative Products Segment, the acquisition of Sikes Corp. and continued strength at Precor more than offset lower results at Tibbals, West Bend and Ralph Wilson Plastics, all of which have been negatively affected by poor market conditions.

"Results reflect the tough market conditions we face in our food equipment and decorative products businesses, as well as the continued difficulties in our U.S. and Japanese Tupperware businesses," said Warren L. Batts, chairman and chief executive officer. "While we believe that our strategies to improve each of our businesses are on the right track, it is difficult to predict the timing of significant improvement because of the uncertainties facing the U.S.

economy."

For the first nine months of 1990, Premark reported net income of $24.2 million, or 75 cents per share, compared with $59.6 million, or $1.70 per share in 1989. Results in 1990 include a second-quarter pretax charge of $25.3 million related to restructuring at Tupperware and the $11.9 million third-quarter charge concerning settlement of lawsuits. Excluding those charges, net income would have declined 20 percent to $47.5 million, or $1.47 per share, due to lower segment profit, primarily at Tupperware and the Food Equipment Group, as well as higher interest expense. Sales for the first nine months were $2 billion, a 6 percent increase from the first nine months last year.

Premark International, Inc. is a $2.6 billion multinational company that markets premium products under leading brand names such as Tupperware, Wilsonart, Hobart, Vulcan, Hartco, Florida Tile, West Bend and Precor. Premark is listed on the New York, Pacific and London Stock Exchanges.

#90298p9412 10/25/1990 ~PR Newswire

DALLAS (OCT. 25) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) today announced completion of the sale of certain oil and gas properties for $95 million in four separate transactions.

Proceeds net of taxes should be $68 million. An after-tax gain of $29 million will be recorded in the fourth quarter. The total proved reserves associated with these properties represent about 1.5 percent of Oryx Energy's worldwide proved reserves; total daily production from these properties has averaged 7,600 equivalent barrels per day.

The largest of the four transactions, a sale to Geodyne Resources, Inc., for $59 million, involves interests in 14 oil and gas fields located in five states. In the other sales, Oryx Energy divested its interests in its offshore California Hillhouse and Henry platforms, along with five non-producing blocks; its share of the Levelland oil field in Texas; and its interests in the West Moran oil field in Wyoming. These sales follow the $109 million sale of assets announced in late September and are part of the company's previously announced plan to raise $750 million in asset sales by September 1991 to help repay debt from the repurchase last month of 18 million shares of its common stock from the Glenmede Trust Company.

Dallas-based Oryx Energy Company is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P. (NYSE: SLP), of which it

is the managing general partner and 98-percent owner.

#90298p9413 10/25/1990 ~PR Newswire

SOUTHFIELD, MI (OCT. 25) PR NEWSWIRE - Franklin Savings Bank, FSB (NASDAQ: FSVB) reported net income of $156,889, or $0.17 per share for the quarter ended Sept. 30, 1990. This is a 3.5-percent improvement over net income for the bank's first fiscal quarter ended Sept. 30, 1989, of $151,524, or $0.16 per share.

Net interest income increased 22 percent in quarter to quarter comparisons. For the quarter ended Sept. 30, 1990, net interest income was $2,086,012, compared to $1,714,359, for the same quarter last year. Net interest income for the current period covered the bank's operating expenses of $1,944,636, by 107 percent.

"We continue to press for and achieve net interest margin improvement," reported President and CEO Read P. Dunn. "For the most part, this has been accomplished through seeking lower cost deposits and emphasis on more attractively priced home equity loans."

Franklin's net interest margin for the quarter ended Sept. 30, 1990, was 2.11 percent, a 20-percent improvement compared to 1.76 percent for the comparable quarter last year.

Total assets at Sept. 30, 1990, were $405,797,325, a slight reduction from $411,554,069, at fiscal year end June 30, 1990. Continuing moderate asset reduction is consistent with Franklin's on- going strategy to improve its capital ratios. Stockholders' equity at Sept. 30, 1990, was $14.1 million compared to $13.7 million at June 30, 1990. Book value at Sept. 30, 1990, reached $14.87 per share.

The Office of Thrift Supervision ("OTS") is currently completing its regularly scheduled examination of Franklin. Widespread concern over real estate lending has resulted in financial regulators seeking to increase the general loan loss allowances of most institutions. It is anticipated that Franklin will also be required to increase its general loan loss allowance in the future, and any substantial increase would adversely impact earnings. Franklin continues to experience insubstantial loan losses and manageable delinquencies measured by industry standards. Nevertheless, management is currently reviewing the adequacy of Franklin's loan loss allowance.

Franklin Savings Bank has administrative offices and one regional branch in Southfield, with additional regional offices in Grosse Pointe Woods and

Birmingham. Wholly owned subsidiaries, Franklin Commercial Mortgage Group and Franklin Home Lending Group are located in the Southfield admininstrative offices.

CHICAGO (OCT. 25) PR NEWSWIRE - Sara Lee Corporation's (NYSE: SLE) board of directors today voted to increase the corporation's common stock dividend by

11.9 percent and authorized the repurchase of 8 million shares of the company's common stock, John H. Bryan announced at the corporation's 50th annual meeting of stockholders.

The quarterly dividend rate on the company's common stock will increase to $.235 per share from $.21, which will raise the annual rate to $.94 per share from the current $.84. Sara Lee directors also declared a dividend of $.859375 per share on the corporation's convertible adjustable preferred stock.

This is the 15th consecutive common stock dividend increase and the 179th consecutive dividend declared by the corporation. Both dividends are payable Jan. 1, 1991, to stockholders of record Dec. 3, 1990.

The stock purchases will be made from time to time through the open market and block transactions at prevailing market prices.

Sara Lee Corporation, an international food and consumer products company, markets a wide variety of brand-name products including Hanes, Hanes Her Way, L'eggs, Champion, Kiwi, Ball Park, Jimmy Dean, Douwe Egberts, Dim and, of course, Sara Lee.

#90298p9420 10/25/1990 ~PR Newswire

NEW YORK (OCT. 25) PR NEWSWIRE - The Greater New York Savings Bank (NASDAQ: GRTR) announced today that its net income for the third quarter of 1990 was $1.2 million. For the nine months ended Sept. 30, 1990, net income amounted to $7.5 million. This compares with $5.9 million for the third quarter of 1989 and $17.9 million for the nine months ended Sept. 30, 1989. The decline in income was principally due to the effects of a higher level of non-performing assets, an increase in the provision for loan losses, and expenses associated with ORE and non- performing loan activities.

Non-performing assets increased to $144.9 million at Sept. 30, 1990, from $130.3 million at June 30, 1990. The 1990 third-quarter provision for loan losses increased to $3.5 million from $0.9 million in the comparable 1989 period. For the nine months ended Sept. 30, 1990, the provision for loan losses increased to $8.5 million from $2.7 million in the comparable 1989 period. At Sept. 30, 1990, the allowance for loan losses amounted to $17.1 million.

In commenting on the third-quarter results, Charles J. Ohlig, chairman and chief executive officer of The Greater, stated: "The deterioration of our economic environment combined with weak real estate markets continues to plague our industry. Obviously, we are not immune to their effects. While I

am pleased that we have remained profitable during these difficult times, and that all of our non-performing assets are secured, I am concerned that there is no evidence of a turnaround in the real estate markets. Therefore, the level of non-performing assets may well continue to increase in the future."

At Sept. 30, 1990, The Greater's primary capital ratio was 7.33 percent, and its risk-based capital ratio was approximately 11.7 percent. These ratios far exceed the regulatory minimums of 5.5 percent and 7.25 percent, respectively, and compare favorably with industry norms.

Primary earnings per share were 6 cents for the third quarter of 1990, and 42 cents for the comparable 1989 period. Additionally, primary earnings per share were 48 cents for the nine months ended Sept. 30, 1990, and $1.30 for the comparable 1989 period.

The bank's net interest margin was 2.29 percent in the third quarter of 1990, up from 2.16 percent in the second quarter of 1990. Additionally, for the nine months ended Sept. 30, 1990, the net interest margin improved by 5 basis points to 2.26 percent in comparison to the nine-month period ended Sept. 30, 1989.

The Greater's operating expense to average assets ratio was 1.71 percent for the third quarter of 1990. For the nine months ended Sept. 30, 1990, the ratio was 1.65 percent. Excluding ORE and non- performing loan activities expense, the ratio would have been 1.58 percent and 1.52 percent for these periods, respectively.

During the third quarter, The Greater's second new branch of the year was opened in Oceanside, Long Island. Additionally, all regulatory approvals have been received for the pending sale of the bank's only Manhattan branch to Chemical Bank. This transaction is expected to be completed during the fourth quarter of 1990.

The Greater New York Savings Bank is an FDIC-insured, New York- chartered stock savings bank with assets of $3.1 billion, deposits of $2.2 billion and total stockholders' equity of $211 million at Sept. 30, 1990. Nine of its 14 banking offices are located in Brooklyn, where The Greater was originally chartered in 1897, and its five other offices are located in Manhattan, Queens Nassau and Suffolk.

HARRISBURG, PA (OCT. 25) PR NEWSWIRE - First Harrisburg Bancor Inc. (NASDAQ-NMS: FFHP) (FHB), parent company of First Federal Savings and Loan Association of Harrisburg, today reported third quarter earnings of $499,700 or $.63 per share.

This compares to the 1989 third quarter earnings of $652,400 or $.82 per share. The decrease in net income was due to the $192,400 extraordinary item in the third quarter 1989 which was the effect of consolidating the subsidiaries for tax purposes. Net interest income increased in the 1990 quarter over the 1989 quarter by $189,900 or 12.4 percent.

For the nine months ended, FHB reported net income of $153,000 or $.19 per share, compared to a net income of $1.6 million or $1.99 per share in the same period of 1989.

Robert H. Trewhella, president and chief executive officer, noted the decrease in the nine-month period ended Sept. 30, 1990, was attributed to the second quarter addition to loan loss reserves and provision for real estate loan losses. These decreases were partially offset by profit on the sale of Federal Home Loan Mortgage Corp. stock in the second quarter and an increase in net interest income of $195,400, during the 1990 nine-month period.

The board of directors declared a cash dividend of $.10 per share payable Nov. 15, 1990, to shareholders of record Nov. 5, a 25 percent increase over the previous period.

First Harrisburg Bancor is a Pennsylvania-chartered stock company trading on the NASDAQ National Market System, under the symbol "FFHP."

#90298p9427 10/25/1990 ~PR Newswire

CARTHAGE, MO (OCT. 25) PR NEWSWIRE - Leggett & Platt Inc. (NYSE: LEG) today reported results for the third quarter and first nine months of 1990. For the quarter, earnings were $10.46 million on sales of $285 million (up 13 percent) and fully diluted earnings per share were 58 cents (down 13 percent) - both compared with the like period a year earlier.

These results are consistent with the company's previously announced expectations that earnings per share for this year's third quarter would be about 15 percent lower than the third quarter of 1989. As also expected, sales for the quarter, excluding acquisitions, were down about one percent when compared with the like period a year earlier.

For the first nine months of 1990, earnings were $35.76 million on sales of $829 million (up 11 percent) and fully diluted earnings per share were $1.98 (down one percent) - both compared with the first nine months of 1989.

Excluding acquisitions, sales for the nine months increased one percent. Comparative summaries of the results of operations for the third quarter and first nine months of 1990 and 1989 are shown below.

The company also said that management continues to believe that fully diluted earnings for all of 1990 should approximate $46.1 million ($2.50 per share) on sales of $1.07 billion, if recent business conditions remain about unchanged throughout the fourth quarter.

Headquartered in Carthage, Leggett & Platt is a Fortune 500 company that specializes in manufacturing and marketing a broad line of components used by companies making furniture and bedding for homes, offices and institutions.

Other home furnishings products include select lines of finished furniture and carpet cushioning materials. A variety of diversified products are also produced and sold in several different markets unrelated to the home furnishings industry. The company's common stock is listed on The New York and Pacific Stock Exchanges.

#90298p9429 10/25/1990 ~PR Newswire

LOS ANGELES (OCT. 25) PR NEWSWIRE - Farr Co.'s (NASDAQ: FARC) string of record quarterly results continued in the third quarter, as net income increased 31 percent to $754,000 equal to 23 cent per share, from $577,000, or 16 cents per share, a year ago as adjusted for the 5-for-4 stock split effected on Sept. 7, 1990. Sales advanced 11 percent to $20,088,000 from $18,164,000 last year.

For the first nine months, profits grew by 32 percent to $2,534,000 from $1,917,000 in the same period last year, and earnings per share increased to 72 cents per share from 53 cents in 1989, as adjusted for the previously mentioned stock split. Nine months sales were $63,493,000 up 12 percent from $56,448,000 last year.

Allan B. Foy, chairman and president said: "The strong third quarter extends to four the number of consecutive quarters in which we have had record sales. The third quarter and nine months results were especially strong in Europe. In terms of markets, the major gain was in gas turbine filter houses which are very active at this time. Sales of heating, ventilating and air conditioning filters also increased in Europe, the United States, and the Far East.

"The improvement in profits was largely in the United States and Europe as a result of increased sales volume coupled with tight control over domestic costs."

Foy continued: "While we are endeavoring to minimize costs, we are not doing so at the expense of our long-term growth. We continue to invest substantial amounts on new products such as the development and start-up of the HEPA filter line, which is now ready to commence full scale production."

He concluded: "In terms of the future, our concerns are what is going to happen to the economy and the world situation. Assuming things stay on a fairly even keel, we anticipate a good fourth quarter."

Farr Co. is a leading producer of filters for particulate, liquid and gaseous filtration systems. The company has nine manufacturing facilities in the United States as well as plants in Canada and England.

TROY, MICH. (OCT. 25) PR NEWSWIRE - Entertainment Publishing Corp. (AMEX: ENT), the leading publisher of discount coupon books, reported its customary first-quarter loss today. Revenues for the three months ended Sept. 30, 1990, were $4,500,000, compared with $4,296,000, for the same period last year.

The first-quarter loss increased to $5,024,000 ($.88 per share on 5,736,000 average shares outstanding), compared to a loss of $4,044,000 ($.74 per share on 5,473,000 average shares outstanding), from the same period last year.

The company's business is seasonal. Publication of ENTERTAINMENT(R) coupon book editions is generally completed in October of each year with significant sales beginning thereafter. Very few sales are made in the company's first fiscal quarter and, accordingly, the company incurs a substantial loss in that quarter.

#90298p9441 10/25/1990 ~PR Newswire

CLEVELAND (OCT. 25) PR NEWSWIRE - Park-Ohio Industries, Inc. (NASDAQ: PKOH) today reported increased earnings for the third quarter of 1990.

The diversified Cleveland-based manufacturing company had net income of $516,000, equal to 9 cents per share of common stock, for the three months ended September 30. This compares with net income of $93,000, or 2 cents a share, in the 1989 third quarter. Included in 1990 results was a net gain of $289,000 or 5 cents a share on the sale of assets. Sales for the 1990 third quarter were $32,585,000 compared with $34,328,000 in the same period a year ago.

For the first nine months of 1990, Park-Ohio's sales were $100,533,000 compared with $113,448,000 a year earlier. The Company had a net loss of $1,715,000, equal to 31 cents a share, compared with 1989 net income of $1,561,000 or 27 cents a share. The 1990 results include a net charge of $1,144,000 or 21 cents a share related to the closing of the Company's Fairfield, Ohio abrasives plant offset by a gain from the disposal of the Company's facility in Bedford Heights, Ohio.

Richard S. Sheetz, chairman and chief executive officer, reported that performance improvements at Park-Ohio's Bennett Industries and Tocco units paced the increase in third quarter operating income. "Bennett's container business was up strongly for both the third quarter and first nine months of 1990 and Tocco, as anticipated, had its best quarter of the year," Sheetz said.

"We continue to incur costs related to the expansion of our abrasives business including the start-up of production at our Butler, Pennsylvania plant and the phase-out of our older, less efficient Fairfield facility," Sheetz continued. "In addition, we are beginning to see a leveling off of losses at our Park Drop Forge unit.

"Overall, our operations have been profitable for six of the past seven consecutive quarters," he said. "Increased plant efficiencies, in part the result of capital equipment additions, continue to offset rising materials costs and lower volumes.

"There are also signs of increasing economic sluggishness in certain of the key markets we serve, which should add to the operating challenges we face

during the fourth quarter," Sheetz continued. "Nevertheless, we anticipate continued operating improvement during the last three months of 1990."

Park-Ohio is a diversified manufacturer whose operations include plastic and steel containers, forged and machined products, induction heating systems, industrial rubber products and metal abrasives. The Company's common stock is publicly traded on the national over-the-counter market.

MINNEAPOLIS (OCT. 25) PR NEWSWIRE - Datakey, Inc. (NASDAQ: DKEY) today reported total revenue for the third quarter ended Sept. 28, 1990, of $2,113,116, compared with $2,644,054 for the same period in 1989. The net income for the 1990 third quarter was $364,672, or 10 cents per share, versus $793,963, or 22 cents per share, last year.

The company's nine month revenue was $6,586,350, compared with $7,382,348 in the year ago period. Net income after three quarters was $1,593,489, or 44 cents per share fully taxed in 1990, versus $2,534,638, or 71 cents per share, for the first nine months of 1989. The 1989 results included extraordinary gains and tax credits totaling $461,000, or 13 cents per share.

According to John H. Underwood, president and chief executive officer, "Total revenue for the three quarters just ended is down from the same period a year ago, primarily due to lower sales in the government market. Government business continued to contribute the major portion of total sales but, overall decreased 19 percent. On the other hand, our commercial sales have nearly doubled so far this year.

"The lower government sales levels resulted from fewer shipments of key and receptacle products to the manufacturers of the secure telephone units," Underwood noted. "In addition, last year during this period, the company benefited from a short-term acceleration of scheduled key shipments to the government in support of this same program."

Datakey, Inc. designs, produces and markets specialty-class portable data carriers in the form of keys, cards and custom-shaped devices to OEMs in an application-oriented marketplace. These small, semiconductor memory-based, portable devices serve as a convenient way to provide machine-readable electronic information for use in a variety of micro-processor-based equipment. The company's portable data devices are packaged to withstand the adverse elements found in transportable human environments. Datakey also designs, produces and markets supporting peripheral equipment for these portable data carrier devices. Shares of Datakey's common stock are traded on the NASDAQ/NMS market under the symbol DKEY.

#90298p9445 10/25/1990 ~PR Newswire

MINNEAPOLIS (OCT. 25) PR NEWSWIRE - MGI PHARMA, INC. (NASDAQ: MOGN) reported today that revenues for the third quarter ended Sept. 30, 1990 totalled $1,936,258, which compares favorably to $974,617 for the third quarter of 1989 and $1,429,016 and $1,403,562 for the first and second quarters of 1990, respectively. As expected, the third quarter showed a net loss of $1,413,813 or 18 cents per share compared to net income of $183,051 or 1 cent per share in the third quarter of 1989 and a net loss of $1,442,019 or 18 cents per share in the preceding 1990 quarter.

For the nine months ended Sept. 30, 1990, MGI PHARMA reported a net loss from continuing operations of $4,313,468 or 54 cents per share. This compares with net income from continuing operations of $1,125,804 or 12 cents per share for the first nine months of 1989. Results for the current nine month period were affected by the amortization of DIDRONEL(R) I.V. Infusion purchase price (a $1,644,051 non-cash item).

Third quarter results were influenced by two items: a surge in DIDRONEL I.V. Infusion sales and the company's continued aggressive investment in clinical studies for MGI 136 and MGI 647. DRIDONEL I.V. Infusion's customers built up their inventories, positively impacting third quarter revenue. The company expects distributors' inventories to normalize during the next quarter. The company's substantial investment in its clinical studies reflects the intensity in which it has been signing up clinics to participate in the final studies for its two lead compounds, MGI 136 and MGI 647. Dr. Kenneth Tempero, chairman and chief executive, said, "We currently have more than 20 clinics actively participating in each program and will continue with our aggressive development plans for these compounds as long as they appear medically and scientifically worthy."

"The company is financially strong," said Dr. Tempero. "We have $27,020,000 in cash and cash equivalents as well as revenue streams from DIDRONEL I.V. Infusion, royalties from MGI 805 (Lyme Disease Vaccine), and our co-marketing arrangement for oral DIDRONEL."

As previously reported, MGI PHARMA entered into two new licensing arrangements during the third quarter: one with Zila, Inc., by which MGI PHARMA will market a new oral analgesic product based on Zila's patented film-forming technology, and one with Wyeth-Ayerst, whereby Wyeth-Ayerst will develop and market the Lyme Disease Vaccine for humans for which MGI PHARMA holds the patent rights.

MGI PAHRMA, INC., is in the business of acquiring, developing and marketing pharmaceuticals prescribed by oncologists and other medical specialists. The company has acquired a portfolio of compounds, several of which have significant therapeutic and commercial potential. The company has three compounds in human clinical trials and currently sells DIDRONEL I.V. Infusion

for the treatment of hypercalcemia in cancer patients.

NEW HAVEN, CT (OCT. 25) PR NEWSWIRE - Amity Bancorp, Inc., (NASDAQ-NMS: AMTY) holding company for Amity Bank and Amity Loans, Inc., today reported a consolidated net loss for the three months ended Sept. 30, 1990 of $1,216,000 or $1.25 per common share as compared to consolidated net income of $441,000 or $.42 per common share for the third quarter of 1989.

As a result of the loss for the third quarter of 1990, Amity Bancorp reported a consolidated net loss for the nine months ended Sept. 30, 1990 of $1,442,000 or $1.53 per common share. For the nine months ended Sept. 30, 1989, Amity Bancorp reported net income of $1,343,000 or $1.27 per common share.

Total assets decreased to $197,351,000 at Sept. 30, 1990 as compared to $199,158,000 at June 30, 1990.

The third quarter loss is primarily the result of Amity Bank's substantially increased provision for loan losses. On a consolidated basis, Amity Bancorp's provision for loan losses in the third quarter of 1990 amounted to $2,548,000, as compared with a provision of $281,000 in the same period last year. For the nine months ended Sept. 30, 1990, Amity Bancorp's provision for loan losses was $4,253,000 compared with $1,246,000 in the year earlier period. As a result, at Sept. 30, 1990, Amity Bancorp's allowance for loan losses rose to $3,124,000, representing 2.09 percent of total loans outstanding.

Amity Bank operates its main office in Woodbridge, Conn., with offices in New Haven, Branford, Norwalk and Stamford. Amity Loans, Inc. maintains offices in the states of California, Colorado, Kansas, Kentucky, North Carolina and Texas.

HOUSTON (OCT. 25) PR NEWSWIRE - L.B. (Buck) Gatewood has been named to the additional position of president of Panhandle Trading Company (PTC), the Panhandle Eastern Corporation (NYSE: PEL) affiliate operating as an independent broker and reseller of natural gas in the national spot market. He will report to Carl B. King, senior vice president and general counsel, on the activities of PTC.

"I am very pleased to have the opportunity to work with the team of dedicated professionals at Panhandle Trading Company," Gatewood said. "We will focus on developing new market opportunities while continuing to provide top quality services to natural gas producers, pipelines, and consumers."

Gatewood also is president and chief operating officer of Trunkline LNG Company, a Panhandle Eastern subsidiary that operates a liquefied natural gas terminal and regasification plant. He will continue reporting Trunkline LNG Company activities to Dennis A. Staley, group vice president of PEC and chairman and chief executive officer of Trunkline LNG.

Before being named to his current position at Trunkline LNG, Gatewood was president of La Gloria Oil and Gas Company, the Texas Eastern refining and marketing subsidiary sold by Panhandle Eastern in 1989. He joined Texas Eastern in 1978 as manager of economics and became manager of marketing and supply for La Gloria in 1981. He had several positions of increasing responsibility at La Gloria before being named president in 1986.

Gatewood serves on the board of directors of the American Leadership Forum and Innovate Houston. He is currently chairman of the Panhandle Eastern Corporation Political Action Committee and serves on the company's Quality Improvement Process steering committee.

On Nov. 1, David R. Liles, director of gas sales for PTC, will become vice president of gas sales, and Mark A. Wetzel, currently director of gas supply for PTC, will become vice president of gas supply. Both will report to Gatewood.

Panhandle Eastern Corporation operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

CONTACT: John P. Barnett, (713) 627-4072, or (investors) Dorothy M. Ables, (713) 627-4600, both of Panhandle Eastern Corporation.

SEATTLE (OCT. 25) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) reported that its board of directors declared a cash dividend of $1.21875 per share on its preferred stock, Series 1, payable Dec. 1, 1990, to holders of record at the close of business on Nov. 15, 1990. This dividend covers the period from June 1, 1990 through Nov. 30, 1990.

NeoRx Corporation, incorporated in May 1984, is developing monoclonal antibody-based pharmaceutical products for in vivo detection and treatment of certain types of cancer.

The company has five cancer clinical trials in progress and has filed for marketing approval with the FDA for two OncoTrac(R) Imaging products to detect metastatic melanoma and small cell lung cancer.

CONTACT: Robert M. Littauer, vice president and chief financial officer of NeoRx, (206) 281-7001, ext. 519, or Anthony J. Russo or Susan A. Noonan of Noonan/Russo Communications, (212) 979-9180, for NeoRx.

GREEN BAY, WIS. (OCT. 25) PR NEWSWIRE - Terex Corporation (NASDAQ: TERX) today reported sales and earnings for its third-quarter and nine-month periods ended Sept. 30, 1990.

For the third quarter, revenues were $240 million, and net income was $5.2 million, or $0.53 per share. In the third quarter in 1989, revenues were $261 million, and net income was $5.7 million, or $0.58 per share. Notwithstanding the decrease in revenues, operating income in the third quarter of 1990 increased to $12.6 million, a 6 percent increase from the operating income of $11.9 in the third quarter last year.

Revenues for the nine months increased to $793 million and net income was $15.3 million, or $1.55 per share. In the same period last year, revenues

were $486 million, and net income was $14.6 million, or $1.49 per share. Operating income for the nine months of 1990 was $40.1 million, a 47 percent increase over the operating income of $27.3 million in the comparable period in the prior year.

Earnings per share figures for 1990 reflect the five-for-four stock split on May 24, 1990.

Commenting on the results, Randolph W. Lenz, chairman of the board, said, "We are pleased that the restructuring programs and the operating efficiencies that we have achieved have provided resistance against the effects of the current economic conditions, resulting in only a minimal impact upon our net results. In fact, it should be noted that our operating income increased this quarter, and if the interest rates available to us now as a result of the refinancing of the Fruehauf debt had been in effect in the third quarter, a 15 percent bottom-line increase would have resulted, yielding net income of $0.61 per share.

Terex's Fruehauf Trailers subsidiary is the world's leading manufacturer of truck trailers, making a wide range of van refrigerated, platform, tank, dump trailer and other models. Terex's heavy equipment group -- which includes Terex Equipment Limited, Koehring Cranes & Excavators, Unit Rig and Northwest Engineering -- designs, manufactures and markets heavy-duty, off-highway, earthmoving, construction and materials handling equipment for the mining, construction, logging and other industries.

FORT LAUDERDALE, FLA. (OCT. 25) PR NEWSWIRE - Bio-Monitor Inc. (NASDAQ: BMON) announced today that it has completed its previously announced agreement with MD America of Fort Lauderdale, Fla., and has combined their Medical Depot Superstore franchise operations through an exchange of stock.

Bio-Monitor has issued 2,910,000 shares of Bio-Monitor common stock for 100 percent of MD America common stock. MD America shareholders now own 48 percent of the combined company, which has 6,046,000 shares outstanding, with approximately 10 percent publicly traded.

The combined company now owns 12 franchises and franchise rights to 49 Medical Depot Superstores. Most of the 61 combined stores, franchises and rights are for locations in Florida, Arizona, Georgia, Pennsylvania, Ohio and the Metropolitan Washington, D.C. area.

William Kramer has been elected president of Bio-Monitor and James Whidden

will remain as chairman. The board of directors of Bio-Monitor are James Whidden and William Amzallag, current members and William Kramer, the senior officer of MD America. Two other members are to be selected.

Whidden stated, "The combination with MD America strengthens our position, particularly in Florida, as the largest franchisee of Medical Depot." Currently, there are five Medical Depot Superstores open in Florida.

The Medical Depot franchise is a retail store offering a complete selection of durable and disposable medical equipment, supplies and comfort items...selling to the public (retail) and segments of the health care industry (wholesale). The "depot" concept is modeled after the popular Home Depot and Office Depot concepts.

NEW YORK (OCT. 25) PR NEWSWIRE - Imperial Chemical Industries PLC (ADRs - NYSE: ICI) of London, England, today reported income before extraordinary items of $180 million for the third quarter of 1990, compared with $340 million on the same quarter in 1989. Income per ADR before extraordinary items was $1.02 on sales of $5.60 billion, which compares with $1.97 per ADR on sales of $6.01 billion in the third quarter of 1989.

This brings net income before extraordinary items for the first nine months of 1990 to $1,062 million, or $6.07 per ADR, on sales of $18.36 billion, which compares with $1,391 million, or $8.10 per ADR, on sales of $18.43 billion, in the comparative 1989 period.

The results for the third quarter and the first nine months of 1990 are summarized in the following table, together with comparative figures for 1989:

IMPERIAL CHEMICAL INDUSTRIES PLC

Periods ended	Three Months		Nine Months	
Sept. 30	1990	1989	1990	1989
Sales (billions)	$ 5.60	$ 6.01	$18.36	$18.43
Income before tax (millions)	$ 299	$ 572	$1,670	$2,302
Income before extraordinary items (millions)	$ 180	$ 340	$1,062	$1,391
Net income after extraord. items (millions)	$1,152	$ 340	$1,848	$1,391
Earnings per ADR before extraordinary items	$ 1.02	$ 1.97	$ 6.07	$ 8.10
Earnings per ADR after extraordinary items	$ 6.58	$ 1.97	$10.55	$ 8.10

Results for all periods have been expressed above in U.S. dollars at an exchange rate of $1.87 to the pound, the rate prevailing on Sept. 30, 1990.

#90298p9470 10/25/1990 ~PR Newswire

GALVESTON, TEXAS (OCT. 25) PR NEWSWIRE - Hornbeck Offshore Services, Inc. (NASDAQ: HOSS) today announced earnings for the nine month and three month periods ended Sept. 30, 1990.

HORNBECK OFFSHORE SERVICES, INC.

Periods ended	Three Months		Nine Months	
Sept. 30	1989	1990	1989	1990
Revenues	$ 2,239	$ 6,791	$ 3,451	$ 17,847
Net income (loss)	382	1,556	(1,981)	3,423
Earnings (loss) per share				
Primary	$ .10	$ .15	$(.80)	$ .42
Fully diluted	$ .10	$ .15	$(.80)	$ .41

Revenues were $17,847,000 and net income totaled $3,423,000 ($.42 per share; $.41 per share on a fully diluted basis) for the nine months ended Sept. 30, 1990. In the nine months ended Sept. 30, 1989, the company reported revenues of $3,451,000 and a net loss of $1,981,000 ($(.80) per share) which resulted primarily from non-recurring partnership restructuring costs of $2,223,000 recorded in the second quarter of 1989.

For the quarter ended Sept. 30, 1990, revenues totaled $6,791,000 and net income was $1,556,000 ($.15 per share). For the quarter ended Sept. 30, 1989, revenues totaled $2,239,000 and net income was $382,000 ($.10 per share).

Larry D. Hornbeck, chairman of the board, president and chief executive officer stated that higher revenues and earnings in 1990 were caused by several factors including the purchase of vessels in the second half of 1989 and in January of 1990 and the improved day rates and utilization rates for the company's vessels as compared to 1989. The third quarter also benefited from higher interest income earned on investment of funds from a public offering of common stock on May 1990 and from lower interest payments due to reduction of debt. Hornbeck also commented that the company's objectives are being met by simplifying our capital structure through elimination of two series of preferred stock and by reduction of debt by $9,800,000 or 39 percent. Additionally, the company has continued its vessel purchases with the acquisition of two supply vessels on Oct. 1, 1990 increasing our fleet size to 30 vessels.

Hornbeck Offshore Services, Inc. is engaged in the offshore marine services

business, primarily serving the oil and gas industry in the Gulf of Mexico through its operation and management of supply, tug- supply, utility, crew and geophysical vessels.

#90298p9473 10/25/1990 ~PR Newswire

CHICAGO (OCT. 25) PR NEWSWIRE - R. R. Donnelley and Sons Co. (NYSE: DNY), North America's largest printer, reported third-quarter sales of $898.3 million, an increase of 13.1 percent over the same period in 1989. Net income of $62.8 million, equivalent to 81 cents per share, increased 5.8 percent (4 cents per share), after normalizing third quarter 1989 net income for a nonrecurring net gain relating primarily to the sale of certain land. For the nine months, sales increased 7.1 percent to $2.38 billion. Net income of $157.7 million, or $2.03 per share, increased 4.8 percent (9 cents per share) over 1989's normalized net income for the comparable period.

"Our sales gains represent real growth and result from a higher volume of services," said John R. Walter, Donnelley chairman, president and chief executive officer. "These were achieved despite several continuing factors, which have adversely affected us all year. Many customers across all areas of the business are cautious, reflecting concerns with general economic conditions, the federal deficit, unstable capital markets, and the political situation in the Middle East."

The company reported that generally weak advertising conditions persist and continued to adversely affect magazine pages and counts. Book activity levels improved somewhat, but continued to reflect the caution of book publishers. Catalog and newspaper insert levels reflected good demand, particularly given the economic and financial uncertainties affecting some of the company's customers and the retail markets. Directory and computer documentation printing operated at reasonably good levels during the periods. Financial printing levels were good, despite declining overall demand in the worldwide capital markets. The operating results of the Meredith/Burda companies, acquired on Sept. 4, 1990, were included in the consolidated results since the date of acquisition.

Earnings from operations, pre-tax earnings and net income continued to grow during the third quarter. Earnings grew slower than sales, as expected, because of increases in depreciation and amortization expenses, and the effects of the acquisition of the Meredith/Burda companies.

Donnelley's program to expand, upgrade and re-equip printing operations continued. Capital invested through Sept. 30 was $182.6 million. The company continued to project full-year capital investments at $250 million. This is

in addition to that invested to acquire the Meredith/Burda companies.

The Donnelley board of directors today declared a quarterly dividend of 24 cents per share, payable on Dec. 1, 1990, to shareholders of record on Nov. 9, 1990.

#90298p9474 10/25/1990 ~PR Newswire

MIAMI (OCT. 25) PR NEWSWIRE - American Savings & Loan Association of Florida (NASDAQ: ASLA) announced today that it has filed an application with the Office of Thrift Supervision (OTS) for approval of conversion of its charter from a Florida state-chartered stock association into a Federal stock savings bank having the name American Savings of Florida, F.S.B.

According to Harris C. Friedman, American Savings' chairman and chief executive officer, "following the passage of FIRREA, the advantages of remaining a state-chartered thrift were largely eliminated." Friedman added, "the conversion, if approved, would provide meaningful savings in operating expenses."

Effectiveness of the charter conversion is subject to receipt of stockholder and OTS approval. The conversion is not expected to become effective before May 1991.

American Savings currently operates a network of five mortgage offices and 55 retail banking offices in Dade, Broward, Palm Beach, Pinellas, Hernando, and Pasco counties. American Savings is a member of the Federal Home Loan Bank System and its deposits are Federally insured. American Savings' common shares are traded on NASDAQ under the symbol ASLA.

#90298p9475 10/25/1990 ~PR Newswire

ST. PAUL, MN (OCT. 25) PR NEWSWIRE - The St. Paul Companies' (NASDAQ: STPL) third quarter operating results outperformed the first two quarters of 1990 as well as the comparable 1989 period. The worldwide insurance organization, which released third quarter financial results today, also hit the billion-dollar mark in quarterly revenues for the first time in its 137-year history.

Third quarter consolidated operating income (excluding realized investment

gains) was $102.8 million, or $2.30 per share, compared with $65.1 million, or $1.32 per share, for the comparable period in 1989.

After-tax realized investment gains were $4.4 million in third quarter compared with gains of $13.7 million in the same quarter of 1989. Net income was $107.2 million, or $2.40 per share, compared with $78.8 million, or $1.60 per share, for third quarter 1989. All per share figures are fully diluted.

Revenues, which include pretax investment gains, were $1.0 billion, compared with $944.9 million in the same quarter of 1989.

"Barring the kind of catastrophic losses that we saw last year with Hurricane Hugo and the San Francisco earthquake, our 1990 operating earnings should surpass 1988's record," said Douglas W. Leatherdale, chairman and chief executive officer of The St. Paul Companies. "All three of our business segments have contributed to our strong results so far this year."

Leatherdale also noted The St. Paul's solid financial position and healthy balance sheet.

"We don't invest in junk bonds or real estate mortgages," Leatherdale said. "Our financial strength is reflected in the AAA rating Standard & Poor's gives our claim-paying ability and the AA rating it gives our publicly issued debt."

For nine months 1990, consolidated operating income was $292.5 million, or $6.14 per share, compared with $233.1 million, or $4.77 per share, for the comparable 1989 period.

Nine months net income was $297.9 million, or $6.25 per share, compared with $271.6 million, or $5.55 per share, for the comparable period in 1989. Net income for nine months 1990 included after-tax realized investment gains of $5.4 million. Gains in the same period of 1989 were $38.5 million.

Revenues for nine months 1990 totaled $2.9 billion, compared with $2.8 billion for nine months 1989. Underwriting Operations

Leatherdale added, "While some comparisons with third quarter 1989 are affected by the catastrophic losses of Hurricane Hugo, underwriting still had a very good third quarter this year. We continue to see promising growth from those market niches where we are an acknowledged specialist and leader."

THE ST. PAUL COMPANIES
THIRD QUARTER UNDERWRITING OPERATIONS HIGHLIGHTS

	Three Months Ended	
	9/30/90	9/30/89
Property-liability written premiums	$817,760,000	$736,722,000
Underwriting loss	($39,809,000)	($78,615,000)
Net investment income	$157,067,000	$152,850,000

Pretax operating income (A)	$116,218,000	$67,763,000
Combined ratio	103.2	110.4

(A) Excluding realized investment gains.

THE ST. PAUL COMPANIES

NINE MONTHS UNDERWRITING OPERATIONS HIGHLIGHTS

	Nine Months Ended	
	9/30/90	9/30/89
Property-liability written premiums	$2,291,215,000	$2,102,902,000
Underwriting loss	($95,474,000)	($136,895,000)
Net investment income	$467,171,000	$458,595,000
Pretax operating income (A)	$356,036,000	$272,787,000
Combined ratio	103.2	105.7

(A) Excluding realized investment gains. Insurance Brokerage Operations

Insurance brokerage operations had pretax income of $19.2 million for third quarter 1990, compared with pretax income of $23.8 million for the same 1989 quarter. For nine months of 1990, insurance brokerage operations had pretax income of $20.1 million, compared with pretax income of $16.3 million for the same 1989 period.

"The third quarter is usually good for our brokerage operations," Leatherdale said. "Broking solidly maintained that tradition this quarter although slightly behind third quarter 1989." Investment Banking Operations

Investment banking had pretax operating income of $10.8 million for third quarter 1990, compared with $6.1 million for the same period of 1989. Nine months 1990 pretax operating income was $30.9 million, compared with $26.4 million for the same period of 1989. Consolidated Financial Position

Consolidated assets for The St. Paul Companies as of Sept. 30, 1990, were $11.8 billion, compared with $11.0 billion as of Dec. 31, 1989.

Book value per common share was $49.70 on 42,273,606 shares of common stock outstanding on Sept. 30, 1990. Comparable book value on Dec. 31, 1989, was $47.65 on 49,303,881 shares.

WASHINGTON (OCT. 25) PR NEWSWIRE - The National Association of Securities Dealers, Inc. (NASD) today announced that it had exercised its option to acquire the nationwide network of PLATO Professional Development Centers from The Roach Organization, Inc. (TRO).

The acquisition, which will become effective on Jan. 1, 1991, includes more than 60 test center sites located in major U.S. cities, a staff of 200 and related equipment.

The NASD, the largest user of the test center network, said it acquired the centers to gain increased efficiencies in carrying out its regulatory function of administering qualification examinations to prospective registered representatives and principals of member firms.

The NASD has been using the PLATO network for more than a decade to administer as many as 250,000 securities industry qualification tests a year on the centers' 600 computers. In addition to administering its own qualification examinations, the NASD administers a variety of examinations on behalf of other self-regulatory organizations, the states, the commodities industry and other certifying organizations. The entire securities industry qualification program is now delivered in automated form.

TRO will continue to manage the computer system and operating software for all centers and it will market the system's unique computer-based testing services to certifying and licensing agencies in both the private and public sectors. The NASD will retain responsibility for marketing the testing services to securities-related fields and banking.

"We are inextricably involved in the testing business and direct ownership of the network will enable us to better control costs as well as upgrade the technology and software that drive the system," said NASD President Joseph R. Hardiman. "In partnership with TRO, new opportunities to provide testing and certification in fields outside the securities industry will be explored."

"TRO feels a keen responsibility to provide the best possible products and services, and this reinforced relationship with the NASD will allow us to focus on expanding and enhancing service to our clients," said TRO Chairman William R. Roach. "We will aggressively explore new fields which can benefit from computer-based testing."

The NASD is the self-regulatory organization for NASDAQ and the over-the-counter securities markets. It has nearly 6,000 securities firms as members and over 425,000 securities industry professionals registered as representatives. It owns and operates the NASDAQ System, the automated communications facility for The NASDAQ Stock Market, the second largest equity market in the United States and one of the largest in the world.

#90298p9477 10/25/1990 ~PR Newswire

MAYNARD, MA (OCT. 25) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today enhanced its leadership VAX VMS line with the two additional capabilities users most want -- openness and better price/performance. The company announced increased support for open system standards on the VMS operating system, along with significant performance increases and price enhancements for three new VAX systems. At the same time, Digital announced its intention to incorporate RISC CPU technology into VAX VMS systems.

According to Kenneth H. Olsen, President of Digital Equipment Corporation, "The enormous popularity of the VAX computer over the past 13 years is due primarily to the software it runs. VAX VMS software provides leadership dependability, growth, networking, and software development. Openness and price/performance enhancements will give users strong incentives to move to the VAX VMS platform, or to add to their current VAX VMS installations. This announcement reflects Digital's growth-oriented posture."

The VMS operating system will provide support for key standards (POSIX) from the Institute of Electrical and Electronics Engineers (IEEE), X/Open, and the Open Software Foundation (OSF). Digital also will apply for certification and "branding" of VMS by X/Open, the international standards consortium. The support for open systems standards will make VMS the operating system of choice for users who want application portability and full-function computing.

Today's announcement included major performance and price/ performance gains for three of its most popular systems -- the VAX 6000, VAXstation 3100, and MicroVAX 3100. The new VAX 6000 series of systems offers triple the I/O throughput of current VAX 6000 models by using RISC I/O technology. The new VAX 6000 model 500 systems offer 85 percent more CPU performance for only an 18 percent price increment, and the popular Models 410 and 310 are reduced in price by an average of 27 percent. A new model of the VAXstation 3100 workstation offers twice the performance of current VAXstation models for only $4,000 more. The new MicroVAX 3100 system offers 45 percent more performance at the same price as its predecessor.

Digital announced it intends to add support to the VMS operating system for the widely accepted Portable Operating System Interface (POSIX) standards of the IEEE. Next quarter, Digital will field-test the POSIX standards 1003.1, 1003.2, and 1003.4 on VMS systems, and will deliver all three simultaneously in 1991.

Digital also announced it intends to apply for certification and branding of the VMS operating system by X/Open, the non-profit consortium of many of the world's major information system suppliers. X/Open defines a Common Application Environment (CAE) based on defacto and international standards. The company will incorporate into VMS standards outlined by the latest version of the X/Open Portability Guide (XPG3), to receive X/Open base system branding. "X/Open is extremely enthusiastic and very supportive of Digital Equipment Corporation's strategy to brand VMS," said Geoff Morris, President of X/Open.

Digital also announced it intends to support key standards from OSF's Distributed Computing Environment (DCE) on VMS systems. The Distributed Computing Environment, a highly integrated set of technologies that address transparent computing in multivendor environments, is an integrated set of open systems technologies built in accordance with OSF compliance guidelines. Digital has already announced VMS support for OSF/Motif, OSF's industry-standard graphical user interface, and currently is shipping it to software developers.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services.

#90298p9480 10/25/1990 ~PR Newswire

MELVILLE, NY (OCT. 25) PR NEWSWIRE - Anchor Savings Bank, FSB (NASDAQ: ABKR), today reported net income for the first fiscal quarter ended Sept. 30, 1990, of $6.1 million before the accumulation of preferred stock dividends of $3.3 million as compared to a net loss of $12.4 million before preferred stock dividend payments of $3.3 million for the first quarter of last year. This amounted to net income per common share of $.16 for the first fiscal quarter of 1991 as compared to a net loss of $.89 per common share for the comparable prior-year quarter.

James M. Large, Jr., chairman and chief executive officer, stated, "As anticipated in last quarter's earnings release, Anchor's upward earnings trend was temporarily halted in the first quarter of fiscal 1991 due to the negative earnings impact of the capital raising asset sales and mortgage servicing sales that occurred in the fourth quarter of fiscal 1990 and the excess liquidity being maintained in anticipation of closing the pending branch sales." Excluding the after-tax impact of gains on the sale of earning assets net core income for the quarter amounted to $1.0 million, down somewhat from the $1.9 million core income reported in the fourth quarter of fiscal 1990, but a marked improvement from the $12.3 million core loss reported in the comparable quarter last year.

During the quarter, Anchor continued the implementation of its capital plan and entered into sale contracts for three branches in New Jersey and one in Western New York. All but four offices in Georgia have been contracted for sale and letters of intent were entered into for the sale of six offices in Florida. Large commented, "The branch sale strategy has been our current focus, and progress continues albeit at a slower rate than originally anticipated."

Significant progress has also been achieved in qualifying the preferred stock as regulatory capital. On Sept. 25, 1990, the board of directors of the Federal Deposit Insurance Corporation (FDIC) approved a plan whereby the FSLIC Resolution Fund (FRF) would exchange the $157 million of Anchor's Class A cumulative preferred stock for a similar equity instrument of a holding

company to be formed. The sole purpose of this holding company would be to hold the capital stock issued by Anchor. When completed, this exchange will increase tangible capital of the bank by $157 million. The formation of a holding company requires the filing of a registration statement with the Securities and Exchange Commission and approval of Anchor's common stockholders. This may well trigger a substantial adjustment in Anchor's existing goodwill amortization policies are not accepted by the Securities and Exchange Commission. Anchor believes that these policies which had been approved by the OTS' predecessor, the Federal Home Loan Bank Board, are appropriate.

At Sept. 30, 1990, Anchor's tangible capital was a negative $141.4 million as compared with a deficit of $150.8 million at June 30, 1990. Assuming exchange of the preferred stock, Anchor would be in compliance with the required Sept. 30, 1990, capital levels as outlined in the capital plan with a positive tangible capital of $15.6 million at the end of the current quarter.

Large cautioned that while Anchor's core operating losses have been halted and excellent progress has been made during the last five fiscal quarters, it still has a long ways to go before it reaches its goal of becoming a fully profitable, well capitalized financial institution supporting its customers in the Northern New Jersey/Metropolitan New York markets. As in the past, he indicated that it would be some time before this goal was met and that until it had regained further strength, it remained vulnerable to changes in the economic environment.

First Quarter Fiscal 1991 Operating Statistics Net interest income amounted to $38.5 million in the first quarter of fiscal 1991 as compared to $29.3 million in the comparable prior year period, an increase of 31 percent. The net yield on average earnings assets amounted to 1.85 percent, a significant improvement from the 1.51 percent reported in the first quarter of last year. The decline of short term rates and the return of the yield curve to a more normal shape were the principal factors underlying the improvement. The cost of deposits declined to 7.51 percent in the current quarter from 8.04 percent in the first quarter of fiscal 1990.

The total provision for credit losses amounted to $5.1 million for the current quarter as compared with $5.7 million in the comparable prior year period. Net loans charged off to the allowance for credit losses were $2.3 million in the current quarter as compared to $5.1 million in the first quarter of fiscal 1990. Anchor's allowance for credit losses amounted to $24.3 million with non-accrual loans and real estate owned of $77.4 million or 0.84 percent of total assets at Sept. 30, 1990, as compared to the allowance for credit losses of $20.7 million and non-accrual loans and real estate owned of $79.7 million or 0.91 percent of total assets at Sept. 30, 1989. Large commented, "Anchor to date appears to be somewhat insulated from the real

estate loan problems afflicting many of the thrifts in the northeast due to its conservative underwriting standards and its current portfolio focus on 1 to 4 family loans; however, given the external environment, Anchor does not necessarily expect or predict that these low delinquency levels will continue to exist."

Gain on the sale of earnings assets, primarily mortgage backed securities and assets backed paper amounted to $6.0 million during the quarter as compared to $1.0 million in the comparable prior year period.

Mortgage banking income amounted to $3.5 million, down significantly from the $8.1 million earned in the comparable prior year quarter. This reduction was reflective of the sale of Residential Funding Corporation (RFC), a nationwide mortgage banking conduit, in the third quarter of fiscal 1990 and the sale of $1.5 billion in mortgage servicing rights in the fourth quarter of fiscal 1990.

Other non-interest income increased $1.2 million to $4.8 million during the current quarter as compared to the first quarter of last year primarily as a result of increased deposit based fees and annuity commissions.

The aggressive cost control program instituted early in fiscal 1990 was largely responsible for the continuing decline in general and administrative expenses. First quarter 1991 expenses amounted to $35.8 million as compared to $41.0 million in the first quarter of fiscal 1990 which included $3.9 million of expenses associated with the operations of RFC. The cost reduction relates in large part to compensation and benefits, as the total full time equivalent employee count of Anchor was reduced to the 1,934 level on Sept. 30 1990. Anchor's staffing level was in excess of 3,200 in early fiscal 1989.

Goodwill amortization expense amounted to $3.5 million in the current quarter, down $2.1 million from the level existing in the comparable quarter of last year. This reduction was due to the write- off of $175.0 million in goodwill in the third quarter of fiscal 1990.

At Sept. 30, 1990, Anchor's total assets amounted to $9.2 billion, an increase of $0.1 billion from the prior fiscal year end. Growth was experienced in mortgage backed securities while money market investments and loans outstanding declined. Deposits increased $.1 billion in support of this asset growth.

Anchor Savings Bank is among the 25 largest U.S. thrifts with deposits of $7.4 billion at Sept. 30, 1990. It operates branches in four market areas: Metropolitan New York/New Jersey, upstate New York, Georgia and Florida.

NEW YORK (OCT. 25) PR NEWSWIRE - Tentation, one of the most successful caterers in New York, has been selected by Potel & Chabot, the largest and oldest caterer in France to be their American representative, it was announced today by Jean- Christophe Le Picart, and co-owner Emmanuel de Chaunac of Tentation.

The new affiliation will not only give Tentation and Potel & Chabot an exchange association between France and America, but through a Moscow

affiliate, will create the largest and only international catering business in the world.

Le Picart said that the new association "is a reflection of internationalization of both the business and private communities throughout the world. It has become very common for people and corporations in all parts of the universe to want to give both small and elaborate parties for many reasons all over the world. The new alliance between America, France and Russia will facilitate what has been up until now, a nightmare of logistics for those entertaining in foreign countries.

Tentation was founded in New York City in 1985 by two young Frenchman, Jean-Christophe Le Picart and Emmanuel de Chaunac. The collective experience in France in hotel and restaurant management and their commitment to maintaining the highest culinary standards have made Tentation a tremendous success with an extensive client list that includes a large majority of the biggest corporations based in New York -- including American Express, Merrill Lynch, AT&T, Citibank, Hermes, and Elizabeth Arden. These parties have numbered from small groups of four to gatherings literally ranging into the thousands.

Potel & Chabot began business in 1789 in France and was the direct result of the French Revolution. A man named Hilaire Germain Chevet, who was Marie Antoinette's gardener at the Tuileries in Paris at the time, decided it was time to get rid of his roses and vegetables and then started a boutique at the Palais Royal. His reputation spread and he was soon serving Talleyrand, Lazare Carnot, and Bonaparte. His sons successfully replaced him and quickly spread to England, Germany and Switzerland and just before being taken over by Potel & Chabot, catered the dinners for Gustave Eiffel for the opening of the Eiffel Tower in 1889.

GRAYLING, MI (OCT. 25) PR NEWSWIRE - CMS Energy Corporation's independent power production unit, CMS Generation Company, and Grayling Development Partners today announced construction has begun on the Grayling Generating Station near Grayling. CMS Generation and Grayling Development Partners each hold a 50-percent ownership interest in the project.

Grayling Development Partners includes Primary Power, Inc. of Saginaw, Mich., and a subsidiary of Decker Energy International of Winter Park, Fla.

The 34-megawatt waste-wood-fueled cogeneration plant will sell electric generating capacity and energy to Consumers Power Company under a long-term contract, and up to 10,000 pounds per hour of industrial process steam to AJD Forest Products of Grayling for use in lumber-drying kilns. Completion of the plant, with a projected cost of over $60 million, is scheduled by fall 1992.

"The Grayling Generating Station represents an important addition to the growing CMS Generation family of independent power projects. We're pleased to be a partner in it," said James W. Cook, president and chief executive officer of CMS Generation. Cook added that the plant will benefit the Grayling area economy by adding 25 permanent operating jobs. During construction the project work force will reach 350 people.

"The Grayling project will provide much-needed generating capacity to meet Michigan's growing power needs," said Macauley Whiting Jr., president and chief executive officer of Decker Energy International.

"It will employ state-of-the-art environmental protection equipment to meet all applicable federal, state and local regulations, including the proposed new federal Clean Air Act. Because wood is an inherently clean fuel, the Grayling facility will be one of the most environmentally sound power plants in the United States," said Whiting.

Initial work on the project site in Grayling Township southeast of the City of Grayling began this week. Black & Veatch of Kansas City, Mo., is the prime contractor for the project's engineering, procurement and construction. Townsend & Bottum of Ann Arbor and Christman Co. of Lansing are constructing the facility under subcontract to Black & Veatch. CMS Generation will oversee construction and operate the plant under contract to the partnership.

CMS Energy's independent power activities are among the largest in the U.S., with ownership interests in five operating plants totaling about 1,500 megawatts of electricity.

Two additional plants are currently under construction, with several others in

various stages of development. CMS Energy's interests include a 49-percent ownership in The Oxford Energy Company, an American Stock Exchange (AMEX: OEN) company involved in developing tires-to-energy projects throughout the U.S.

#90298p9489 10/25/1990 ~PR Newswire

ATLANTA (OCT. 25) PR NEWSWIRE - Intermet Corp. (NASDAQ: INMT) today announced third quarter sales of $94.2 million, up 10 percent from the third quarter sales of 1989.

The sales increase brought a 37 percent rise in operating income, but higher effective tax rates and interest charges resulted in net income for the period of $203,000 ($0.01 per share), compared to $422,000 ($0.02 per share) achieved in the same period of the prior year.

"Our wholly owned domestic plants, which account for approximately 70 percent of our consolidated sales, registered a 165 percent gain in net profit on a 6 percent increase in sales, compared to the weak third quarter last year," George W. Mathews Jr., chairman and chief executive, explained. "That strong performance was offset by the losses that we continue to experience at our INTAT joint venture in Rushville, Indiana, and at our Ronneby, Sweden, plant. Although both these plants showed solid improvement over their results in the second quarter of this year, the effect of their losses is magnified on the bottom line by the fact that we cannot get a current tax deduction for them (although we are building a potentially valuable tax loss carryforward)."

Mathews said losses at the Indiana and Sweden plants reduced consolidated net income by about $0.16 in the 1990 third quarter, compared to about $0.06 in the third quarter of 1989 and $0.25 in the previous quarter of 1990.

For the first nine months of 1990, net sales were down 2 percent from the same period of 1989 to $296.3 million, while net income fell to $1.18 million ($0.06 per share) compared to $11.36 million ($0.53 per share) in the same period a year earlier.

The results are unaudited and subject to adjustment.

The Intermet board of directors today declared its regular quarterly dividend of $0.05 per share payable Nov. 21 to shareholders of record Nov. 8.

Atlanta-based Intermet Corp. and its subsidiaries, with foundries in six states and three foreign countries, manufacture precision iron parts for automotive and industrial customers in North America, Europe and Asia. Intermet is the world's leading independent manufacturer of iron castings.

#90298p9494 10/25/1990 ~PR Newswire

WASHINGTON (OCT. 25) PR NEWSWIRE - National Cooperative Bank (NCB) reported net income of $4 million for the three months ended Sept. 30, 1990, an increase of 12.6 percent from the same period last year.

For the first nine months net income was $11.6 million, an increase of 10.6 percent from last year. Total assets were $437.5 million, an increase of 1.7 percent from Dec. 31, 1989, and an 8.1 percent increase from Sept. 30, 1989.

During the first nine months of 1990, loans increased 3.8 percent to $388.2 million or 12.5 percent from a year ago. For the first nine months real estate loans increased 22.1 percent to $160.3 million while commercial loans decreased 6.1 percent to 227.9 million. Loans serviced for outside investors increased 14.3 percent to $494.4 million at Sept. 30, 1990, from year-end 1989.

In the first nine months deposits increased 62.9 percent to $31.6 million at Sept. 30, 1990. Most of the deposit growth was from sales of certificates of deposits to NCB member cooperatives. Charles E. Snyder, chief financial officer, stated: "NCB members provide a growing source of funding for NCB which helps to diversify liabilities. With asset sales and the addition of various other funding sources, short-term draws on NCB's line of credit account for only 13 percent of total funding. NCB was adversely impacted by the recent turmoil in the commercial paper market and subsequently sought other sources of funds. We have positioned ourselves so that we have adequate funding sources through 1991.

Credit quality in the third quarter improved as the level of non-performing loan decreased. Non-performing loans were $9 million, or 2.3 percent of loans outstanding, as compared to $13.7 million, or 3.8 percent at year-end 1989. The allowance for credit losses at Sept. 30, 1990, was $5.9 million or 1.5 percent of loans or 65.2 percent of non-performing loans. Non-performing loans as a percent of equity decreased to 8.9 percent. The provision for credit losses was $1.3 million or 33 basis points of average loans outstanding.

Non-interest income for the first nine months was $2.6 million up 92.8 percent from the prior year. Approximately 50 percent of the increase in non-interest income was attributable to one-time gains from sale of loans, real estate owned and investment securities.

Non-interest expense increased 11 percent to $11.6 million. Increases in salary expense and depreciation of new computer hardware and software were the main contributing factors.

National Cooperative Bank, based in Washington, provides mortgage banking, commercial lending, capital markets and depository services to cooperative enterprises nationwide, serving cooperatives and their members through these related companies: NCB Business Credit Corp.; NCB Capital Corp.; NCB Capital Markets, Inc.; NCB Development Corp.; NCB Mortgage Corp.; and NCB Savings Association.

NEW YORK (OCT. 25) PR NEWSWIRE - The Cooper Companies, Inc. (NYSE: COO) has acquired substantially all of the assets of Spectra Pharmaceutical Services,

Inc., it was announced today by Gary A. Singer and Bruce D. Sturman, co-chairmen of The Cooper Companies, Inc.

Included in the transaction, completed by the company's CooperVision operating division, are Spectra's I-Scrub and Lipo-Tears products together with the related trademarks, patents and proprietary technologies.

"This acquisition, consistent with our corporate growth strategy in health care for the 1990s, builds upon our core business of contact lenses in the U.S. and Canada, and also positions our growing health care group in the ophthalmic pharmaceutical field," Sturman said.

I-Scrub is a hypo-allergenic cleanser used to treat topical conditions and blepharitis (chronic disease of the eye and surrounding peri-ocular area). Lipo-Tears, the only non-aqueous ocular tear lubricant on the market, is used as a eye-drop remedy for the temporary relief of Sjogrens' Syndrome ("dry eye").

Terms of the transaction were not disclosed. The Cooper Companies, Inc. develops, manufactures and markets optometric and ophthalmic products in the United States and Canada through its CooperVision subsidiary.

MAYNARD, MASS. (OCT. 25) PR NEWSWIRE - In an announcement aimed at positioning Digital Equipment Corporation (NYSE: DEC) as a recognized leader in the world of Open Systems, the company today outlined its plans to make the VMS operating system compliant with IEEE's POSIX interfaces, and the X/Open Portability Guide (XPG3) through X/Open branding. At the same time, the company reaffirmed its strategic commitment to the Open Software Foundation by announcing VMS support of key elements of the OSF Distributed Computing Environment. The company previously announced VMS support for the OSF/Motif user interface, and now is shipping it to software developers. Digital's UNIX-based systems are already compliant with these open standard interfaces.

"This is the strongest statement we can make to current and future customers about our ability to deliver Open Systems. Our strategic platforms are based on recognized industry standard interfaces and will offer customers a level of application portability, interoperability, and multivendor integration that will be difficult for competitors to match," said John F. Smith, Digital's senior vice president of Operations.

"For many years Digital has excelled at selling one system from desktop to data center -- VAX VMS," said Kenneth H. Olsen, president of Digital Equipment

Corporation. "Our focus on selling one architecture, and our outstanding success with it, have caused some people in the industry to wonder if we are really serious about UNIX. On the other hand, some other people wonder if UNIX is our new one architecture, and we will eventually stop selling VAX VMS. Both viewpoints are wrong. We are an Open Systems company, with open standards spanning our VAX VMS and UNIX lines."

"Industry standards are the key to our strategy," observed Domenic J. LaCava, Digital's vice president of UNIX-based Software and Systems. "All the enhancements we're making to VMS today are compatible with major open systems initiatives, including OSF, X/Open, and IEEE, all of which are supported by all major computing vendors. Because we build to industry standards, users can choose with confidence the right systems for their application needs, knowing that the investments they make in both VAX-based systems and Digital's UNIX-based systems today will stand the test of time," LaCava added.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

NEW YORK (OCT. 25) PR NEWSWIRE - John R. Stafford, chairman and chief executive officer of American Home Products Corporation (NYSE: AHP) announced today that Louis L. Hoynes Jr. has been named the company's senior vice president and general counsel, effective Nov. 1.

Hoynes, 55, was formerly a senior partner and member of the executive committee of Willkie Farr and Gallagher, the New York law firm with which he has been associated since 1962. He succeeds Charles F. Hagan, acting general counsel.

During his career with Willkie Farr, Hoynes was active in both corporate law and litigation. He is perhaps best known for his work as general counsel to The National League of Professional Baseball Clubs, a post he held since 1970, including successfully representing Major League Baseball in several important court cases. He has served as an outside counsel to American Home Products for more than 15 years and played an important role in the company's acquisition of A.H. Robins in 1989.

"After many years of benefiting from Lou's wise counsel, we are delighted to have convinced him to become part of our management team so we can draw on his formidable talents full time," Stafford said.

Hoynes commented: "I have had the pleasure of working with American Home Products for a number of years and have gained a great deal of respect for Jack Stafford and his entire organization. This is a unique and challenging new opportunity with a special company. I look forward to contributing to its continuing success."

Hoynes received his A.B. from Columbia University in 1957 and his J.D., cum laude, from Harvard University in 1962. He has three children and three stepchildren and resides with his wife, Virginia, in Sands Point, N.Y.

American Home Products is a worldwide manufacturer and marketer of prescription drugs and medical supplies, packaged medicines and food products.

JACKSONVILLE, FLA. (OCT. 25) PR NEWSWIRE - Operating earnings for the three months and nine months ended Sept. 30, 1990 were reported today by American Heritage Life Investment Corporation (NYSE: AHL).

Earnings from operations, excluding net realized investment gains, for the three months ended Sept. 30, 1990 were $3,316,865, up 12.6 percent from the $2,945,409 for the same period in 1989. This represents $.56 per share for the third quarter of 1990 vs. $.49 for the third quarter of 1989.

Net earnings in the third quarter reached $3,320,811, up 13.6 percent from the $2,923,165 for the same period last year. On a per share basis, net earnings were $.56 compared to $.49 last year.

Earnings from operations, excluding net realized investment gains, for the nine months ended Sept. 30, 1990 were $10,059,416, up 12.6 percent from the $8,936,377 for the same period in 1989. This represents $1.69 per share for the first nine months of 1990 vs. $1.49 for the same period last year.

Net earnings for the nine months ended Sept. 30, 1990 were $10,133,433, up 11.5 percent from the $9,092,207 for the same period in 1989. On a per share basis, net earnings were $1.70 compared to $1.52 last year.

Total income for the nine months ended Sept. 30, 1990 was $166,055,983 compared to $150,798,474 for the same period last year, up 10.1 percent.

The company's assets at Sept. 30, 1990 were $656,409,388 compared to $591,359,229 at Sept. 30, 1989; equity per share at Sept. 30, 1990 was $18.93 compared to $17.28 at Sept. 30, 1989.

At the board of directors meeting today, the company declared three $.085 monthly dividends, payable Nov. 23, Dec. 21, 1990 and Jan. 25, 1991, to shareholders of record on Nov. 12, Dec. 10, 1990 and Jan. 14, 1991, respectively.

LAKE SUCCESS, N.Y. (OCT. 25) PR NEWSWIRE - Tambrands Inc. (NYSE: TMB) announced today that it has signed an agreement to sell its Long Island headquarters facility to Astoria Federal Savings of Jackson Heights, Queens. The closing of the transaction is scheduled to take place in the fourth quarter of 1990. Tambrands will continue to occupy the facility under lease from Astoria Federal until Tambrands moves to a new headquarters in Westchester County in 1991. Financial terms of the transaction are not being disclosed.

Martin F.C. Emmett, chairman, president and chief executive officer of Tambrands, said, "The sale of our headquarters facility is an important step in the restructuring program we announced in December 1989. Our workforce reductions and our sales of operations unrelated to our core Tampax business have made it appropriate for us to relocate to a smaller facility. We are pleased that Astoria Federal is able to take advantage of our current location. Their presence will be a great asset to Nassau County."

Tambrands' planned move to Westchester County will improve access to the company's Technical Center in Palmer, Mass., and the company's existing manufacturing plants in New England and upstate New York. By relocating to a smaller facility, Tambrands also will reduce its operating expenses and increase its cash resources. The company has not yet finalized its choice of a site in Westchester County.

Tambrands is a multinational manufacturer and marketer of personal care products, including Tampax(R) tampons and Maxithins(R) sanitary pads.

#90298p9508 10/25/1990 ~PR Newswire

HOUSTON (OCT. 25) PR NEWSWIRE - Third-quarter share earnings of Cooper Industries Inc. (NYSE: CBE) increased to 72 cents, 11 percent higher than the 65 cents reported in the third quarter of 1989.

For the three months ended Sept. 30, 1990, net income rose to $92.7 million on revenues of $1.5 billion, compared with net income of $68.1 million on revenues of $1.3 billion in the 1989 third quarter.

Net income for the first nine months of this year grew to $252.3 million or $1.94 a share, compared with $177.9 million or $1.71 a fully diluted share in the same period of 1989. Revenues rose to $4.6 billion from $3.7 billion in the same period of 1989.

Chairman and President Robert Cizik said demand for the company's products has been mixed. Energy markets have continued to improve, resulting in increased orders for oil and natural gas production and transmission equipment. On the other hand, growth in sales of electrical and automotive products has levelled off as the economy has weakened. The prolonged depression in the homebuilding industry has adversely affected sales of tools and hardware and electrical power equipment.

The notable rise in earnings resulted primarily from the improvement in the oil and gas markets. Additional increases came from operating improvements in several businesses, Cizik said. Greater sales volume, better product prices and improved plant efficiencies contributed to significant earnings growth in the Petroleum & Industrial Equipment segment. Efforts to refocus and reposition the automotive aftermarket businesses added to third-quarter earnings and will provide a foundation for further improvement.

Manufacturing improvement and cost management programs continue throughout the company's operations, Cizik explained. Gains from these kinds of investments have become a reliable contributor to Cooper's earnings growth.

"Despite growing signs that the economy is weakening, we expect stable demand

to continue for most of our products, because many of them are used in essential maintenance, repair and replacement applications," Cizik said. "In addition, our diversification program over the past 20 years has resulted in a balance among our markets that permits steady earnings growth."

Benefits from the integration of acquisitions and changes within the automotive aftermarket business should contribute to Cooper's future earnings growth. Energy-related businesses also should provide a boost as those markets recover further. "Stable revenues and increased earnings will enable us to continue investing in cost improvement programs while we profit from similar actions taken in the past," Cizik concluded.

Cooper Industries, with 1989 revenues of $5.1 billion, is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

#90298p9513 10/25/1990 ~PR Newswire

CHICAGO (OCT. 25) PR NEWSWIRE - UAL Corporation (NYSE: UAL) -- the holding company whose primary subsidiary is United Airlines -- today reported third quarter net earnings of $106.1 million or $4.87 per share of common stock, which compare to third quarter 1989 net earnings of $110.9 million or $5.11 per share.

UAL Corporation's third quarter operating revenues were $2.97 billion versus third quarter 1989 revenues of $2.58 billion. Revenue passenger miles were up 11.8 percent while yield (passenger revenue per mile flown) was up 4.2 percent

to 12.14 cents. Third quarter operating expenses were $2.84 billion versus third quarter 1989 expenses of $2.45 billion. Third quarter operating earnings of $129.0 million compare to $131.8 million in third quarter 1989.

Included in nonoperating income is a gain of $93 million on the disposition of property, principally four B727-100, seven DC8 and one DC10-10 aircraft, compared to similar gains of $45.8 million recorded in the third quarter of 1989. This gain is partially offset by $30 million in expenses incurred in connection with the buyout proposal, which was terminated on Oct. 9.

UAL Corporation Chairman, President and Chief Executive Officer Stephen M. Wolf commented, "In response to the rapid rise of jet fuel in the third quarter, United's average price per gallon of fuel rose to 73.0 cents from 61.3 cents last year. Moreover, we expect the average price to be significantly higher in the fourth quarter as the full effect of current increases are felt and as the demand for home heating oil rises with the onset of winter.

"We are very concerned about the effects of these increases on United's earnings and continue to scrutinize all expenses closely."

Wolf went on to say, "This quarter, United took delivery of 20 new aircraft while retiring nine less fuel-efficient aircraft, bringing our fleet to a total of 455, up 8 percent from year ago.

"As we continue to expand our operation worldwide, we are realizing the benefits of a younger and more modern fleet. For example, our new Boeing 737-300s burn an average 560 fewer gallons of fuel per hour than the B727-100s they have replaced. That translates into significant savings per aircraft; in the third quarter, fuel consumption was up only 9 percent while capacity increased nearly 14 percent. And, in today's environment, fuel efficiency is critical."

Commenting on the balance sheet and the current economics of the business, Wolf noted, "We are in a period of economic uncertainty with high and volatile fuel costs and a softening economy, seriously impacting all airlines. Fourth quarter projections for the industry are nothing short of alarming. We are, however, comforted in knowing that UAL's conservative balance sheet is one of the strongest in the industry. As of the end of the quarter, we had total debt, including short-term borrowings and capital lease obligations, of $1.8 billion. With equity of $1.8 billion and cash and cash equivalents of $1.6 billion, we feel United is well positioned to weather any economic and industry storm."

United flew 21.6 billion revenue passenger miles in the third quarter of 1990. Available seat miles were up 13.7 percent to 30.6 billion. Passenger load factor of 70.8 percent was down 1.1 points from 71.9 percent in 1989.

For the nine months ended Sept. 30, 1990, UAL Corporation had operating revenues of $8.23 billion versus $7.43 billion in the same period last year. Operating earnings of $260.3 million compare to $496.2 million in 1989. Net earnings of $218.0 million compare to $317.4 million for the first nine months of 1989.

TAMPA, FL (OCT. 25) PR NEWSWIRE - FLS Holdings, Inc. (NASDAQ-NMS: FLSH), parent company of Florida Steel Corporation, reported consolidated net sales for the year ended Sept. 30, 1990, of $534.5 million and net income of $8.0 million compared with net sales of $532.4 million and net income of $13.1 million for the year ended Sept. 30, 1989.

Consolidated net sales for the fourth quarter ended Sept. 30, 1990 were $135.4 million and the net loss for the quarter was $804,000. Net sales for the quarter ended Sept. 30, 1989, were $144.4 million and the net income for the same quarter was $4.5 million. Net sales for the fiscal year ended Sept. 30, 1990, were higher vs. a year ago as a result of increased tons of steel products shipped.

The impact of these increased shipments, however, was reduced by lower average unit selling prices. Although tons shipped in the fourth quarter ended Sept. 30, 1990 were higher than the comparable quarter in 1989, the lower selling prices more than offset the effect of the increased tons shipped in the quarter.

Competitive pricing pressures, and the continued high cost of scrap are the primary causes of the lower operating income. Operating results for the 1990 fiscal year were also negatively impacted by start-up costs in the first quarter associated with the completed modernization and expansion of the Charlotte Steel Mill melting facility and the additional costs at the Tampa Mill during the modernization of the melt shop in the fourth quarter.

These additional costs at the Tampa Mill are expected to continue into the next quarter when the project should be completed. The 1990 fiscal year included approximately $1.1 million of amortization of deferred financing costs vs. approximately $6.2 million for the 1989 fiscal year.

FLS HOLDINGS INC.

	Year Ended Sept. 30,		Three Months Ended Sept. 30,

NEW YORK (OCT. 25) PR NEWSWIRE - The American Stock Exchange announced that Michael Anthony Jewelers, Inc. of Mount Vernon, N.Y., began trading 5,981,000 common shares today.

Michael Anthony Jewelers is a jewelry products company that designs, manufactures and markets handcrafted 14 karat gold jewelry throughout the

United States. The company previously traded in the NASDAQ National Market System under the symbol "MAJL." Trading under the ticker symbol "MAJ," the common stock opened on 2,000 shares at 2-5/8.

Michael Anthony Jewelers' product lines are based on company designs and offer customers a variety of styles of charms and pendants, chains, rings, watches, bracelets, earrings, bangle bracelet tubing, and other items.

The company's jewelry is marketed by more than 10,000 retail outlets including wholesalers, retail and department stores and chains, catalogue showrooms, mass merchandisers, and video home shopping clubs.

In July, Michael Anthony Jewelers' wholly owned subsidiary acquired the DBA Jardinay Division of Berisford International PLC Group. The DBA Jardinay Division realized sales exceeding $40 million in its two most recent fiscal years.

Michael Anthony Jewelers reported net income of $2,206,000, or $.44 per share, on revenues of $85,388,000 for the fiscal year ended June 30, 1990, compared with net income of $659,000, or $.13 per share, on revenues of $95,468,000 for the prior year.

MINNETONKA, MINN. (OCT. 25) PR NEWSWIRE - Investors Savings Corp. (NASDAQ: INVS) reported after tax earnings for the September quarter of $408,000 or $.18 per share, compared to $377,000 or $.16 per share, for the September 1989 quarter according to James M. Burkholder, president. For the nine month period ended Sept. 30, 1990 after tax earnings were $1,574,000 or $.68 per share, compared to $1,036,000 or $.44 per share for the nine month period last year.

Net interest income, after the provision for loan loss reserves, increased 53 percent from the same period last year to $3.1 million. Other income decreased 13 percent to $1.8 million during the quarter, compared to the same period the previous year. The bank's net interest rate margin increased to 246 basis points, a 69 basis point increase from the September quarter last year. Average interest-earning assets increased by 12 percent to $560 million for the quarter compared to the same quarter last year.

The bank increased its loan loss and real estate loss reserves during the quarter by $320,000 to $1.5 million, a 69 percent increase in loan loss reserves from Sept. 30, 1989. The bank's loan loss and real estate reserves have recently been reviewed by the Office of Thrift Supervision and the Federal Deposit Insurance Corporation in conjunction with a regularly scheduled examination of the bank. No material reserve adjustments have been

required as a result of these examinations.

Residential mortgage loan originations were $120 million, up 2 percent; mortgage loans purchased through the correspondent department totaled $22 million, up from $15 million; and loan application volume was $149 million, down 8 percent from the September quarter last year. Mortgage loan and loan servicing sales totaled $118 million and $51 million, respectively, compared with $94 million and $36 million, respectively, for the same quarter last year. Deposits ended the quarter at $509 million, a $24 million increase for the period, and $54 million above the September 1989 total.

Investors Savings Corp. is a savings and loan holding company whose principal asset is Investors Savings Bank, F.S.B., a federally chartered savings bank with seven savings offices and six residential mortgage production offices in the Twin Cities and three residential mortgage production offices in Chicago.

ST. PAUL, MN (OCT. 25) PR NEWSWIRE - Astrocom Corporation (NASDAQ/NMS: ACOM) today reported net income of $54,000 or $.02 per share for its third quarter ended Sept. 30, 1990. Revenues were $1,672,000 in the third quarter, up 28 percent from revenues of $1,302,000 in the third quarter of 1989. The company had a net loss in the third quarter of 1989 of $393,000 or $.15 per share.

For the first nine months, Astrocom had a net income of $119,000 or $.04 per share on revenues of $4,742,000. This compares with a net loss of $1,013,000 or $.38 per share on revenues of $4,078,000 in the first nine months of last year.

Stephen C. O'Hara, chief executive officer, commented: "Our business is growing steadily with an increasing backlog of orders. New tariffs favorable to Fractional T1 along with growing demand for video conferencing and LAN networking have resulted in growing requirements for our NX product family.

Astrocom Corporation designs, manufacturers and markets advanced digital communications equipment for the data transmission needs of corporations and other large organizations. Astrocom multiplexers and data sets provide cost-effective, long-distance communications via digital public data networks. In a local environment, Astrocom fiber optic and coaxial multiplexers support a broad range of different manufacturers' networks.

MINNEAPOLIS (OCT. 25) PR NEWSWIRE - John Schofield has been named senior vice president for sales and marketing of Telex Communications Inc. Commensurately, he also became a corporate officer and was named to the company's executive committee. Most recently he was vice president of the Airline Systems Business Group of the Memorex Telex Corp. Tulsa, Okla.

Schofield, a native Australian earned a BSEE from NSW Institute of Technology in Sydney. He worked as a HF radio and telephone systems engineer for the Australian Overseas Telecommunications Commission. He then held a variety of sales, marketing and general management positions in Australia, Europe and the United States for Raytheon Data Systems and subsequently the Memorex Telex organizations.

Telex Communications President, Jeffrey S. Wetherell, said that Schofield's technical background and extensive experience in international marketing and managing of high growth business are essential to the company's strategic objectives.

James S. Arrington, who previously held the senior marketing position, has opted for a transitional role to retirement. He will continue as vice president and work with Wetherell on special projects and maintain important customer relations with high profile accounts such as the NFL. He will also serve in an advisory capacity for sales and marketing strategies.

#90298p9530 10/25/1990 ~PR Newswire
SOUTHFIELD, MI (OCT. 25) PR NEWSWIRE - Dennis J. Gormley, chairman and chief executive officer of Federal-Mogul Corporation (NYSE: FMO) today reported third-quarter earnings of 17 cents a share.

Gormley said sales for the quarter ended Sept. 30, 1990, were $274.3 million compared to $250.2 million in the same 1989 quarter. This represents an increase of nearly 10 percent over the depressed level of sales in the third quarter of 1989. The increase is due to improved international aftermarket sales, a 22-percent increase in the sales of fastening systems and moderate sales growth in the original equipment sector as compared to the prior year. Also contributing to the improvement was a 6-percent increase in domestic aftermarket sales as a result of lighting product lines acquired from the R.E. Dietz Co. earlier this year.

Earnings available for common shares amounted to $3.8 million or 17 cents a share for the 1990 third quarter compared with $5.1 million or 22 cents a share in the same 1989 quarter. The decline of 5 cents a share is primarily the result of high sourcing costs from the prior owner of Dietz and start-up costs as Federal-Mogul integrates these lighting products into its manufacturing and distribution operations.

Sales for the nine-month period ended Sept. 30, 1990, reached $844 million compared with $833.8 million in the same period of 1989. The 1989 amount included $32.0 million of sales from two business units which were sold during that period. Excluding those divestitures, sales for the 1990 nine-month period reflect a 5-percent increase over the previous year.

Earnings available for common shares during the first nine months of 1990 were $13.2 million or 59 cents a share. For the same 1989 period, earnings were $28.4 million or $1.22 a share which included a $5.3 million or 23 cents a

share after-tax net gain from reorganization activities.

FEDERAL-MOGUL CORPORATION
FINANCIAL HIGHLIGHTS
Quarter and Nine Months Ended Sept. 30
(Thousands of dollars, except per-share data)

	Quarter Ended		Nine Months Ended	
	1990	1989	1990	1989

#90298p9531 10/25/1990 ~PR Newswire

HOUSTON (OCT. 25) PR NEWSWIRE - Continental Airlines today announced it has substantially expanded its fuel conservation task force to help reduce skyrocketing fuel expenses.

Although the price of jet fuel has abated in recent days, in mid-October Continental's fuel costs were more than double what they were in the early summer. With a monthly fuel bill that is about $80 million more than was anticipated, fuel has become the airline's largest single expense.

"Our fuel conservation task force is redoubling its efforts to take us to the next level of efficiency, identifying additional opportunities beyond the practices we already employ to conserve fuel," said Lewis Jordan, executive

vice president and system general manager. "The task force is setting new goals for cutting fuel consumption, recognizing that every measurable reduction will translate into significant savings for the company."

Based on its annual usage of more than 1.3 billion gallons and a current price of about $1.20 per gallon, Continental would save nearly $16 million by burning one percent less fuel.

The task force includes representatives from the airline's flight operations, technical operations and customer services divisions.

While Continental pilots already practice fuel conservation techniques under an innovative fuel gainsharing incentive program, the company believes a thorough review of all operating practices will yield additional valuable savings. The task force will examine changes as small as removing unneeded weight from cabins and galleys on its domestic aircraft, since over time every pound increases total fuel burn.

Ground equipment conversion to alternative fuel sources is being considered. The cost of power back versus push back is being reevaluated and the use of ground power to replace the use of on-board auxiliary power units is being analyzed. In some cases, the purchase of ground equipment may result in very fast return on investment through fuel savings. Even aerodynamic cleanliness, aircraft wash programs and tire tread depth will be considered. "Because of the value of fuel savings no stone will be left unturned," added Jordan.

MANASSAS, VA. (OCT. 25) PR NEWSWIRE - Memory Sciences Corporation (MSC) of Manassas, Va., has received an order from Computer Sciences Corporation for $190,000 worth of MSC's FASTOR(R) solid state memory storage.

CSC will use the FASTOR memory system to increase its productivity on an Ada development project.

FASTOR is a solid state memory storage system manufactured by MSC and used to increase productivity on IBM, Amdahl and DEC mainframe computers. FASTOR makes it possible to access data from memory at one millionth of a second

speed as opposed to magnetic disk storage which requires many thousands of a second.

Because of the compilations and linkage of Ada code, Ada is highly I/O intensive in that it requires fast execution of a large number of access operations. MSC estimates that a one hour Ada program compilation can be run in 20 minutes using FASTOR.

MSC President, Douglass M. Parnell, said that this is the second time CSC will install FASTOR to accelerate the development of a system using Ada as the programming language.

"Input/output has been a major bottleneck in computer productivity," Parnell said. "Only about 30 records per second can be retrieved from a disk. But FASTOR moves data 500 percent to 100 percent faster than disk. High activity files such as systems disk files, application code, paging files, electronic mail, and data base management systems are ideal candidates for this all-electronic storage media.

FASTOR's ability to store and retrieve random records 65 times faster than conventional disk drive storage frees up CPU time, reduces wait time for work station users and increases staff productivity.

Memory Sciences Corporation is located at 9028 Prince William Street, Manassas Virginia 22110, Telephone (703) 361-9745.

ROANOKE, VA (OCT. 25) PR NEWSWIRE - Appalachian Power Company today announced that it will request Nov. 8 that the Industrial Development Authority of Russell County, Va., redeem two entire series of Pollution Control Revenue Bonds, subject to the issuance of a new series of bonds.

If the authority, as presently expected, issues $17,500,000 aggregate principal amount of 7.70 percent Pollution Control Revenue Bonds (Appalachian Power Company Project), Series G on April 8, the authority will then act to redeem on Dec. 15, 1990 its entire $11,000,000 outstanding 9-1/8 percent Pollution Control Revenue Bonds (Appalachian Power Company Project), Series C, dated Nov. 1, 1979 and due Nov. 1, 2009, and that it redeem on Feb. 1, 1991 its entire $6,500,000 outstanding 11-1/2 percent Pollution Control Revenue Bonds (Appalachian Power Company Project), Series E, dated Feb. 1, 1981 and due Feb. 1, 2006. Such redemptions would be effected through application of the proceeds of the Series G Bonds together with other funds provided by the company.

The redemption price for the Series C and E Bonds will be 102.5 percent and 103 percent, respectively, of their respective principal amounts, plus accrued interest to the date of redemption, to be paid upon presentation.

The action is being taken under terms of the indenture under which the Series C and E Bonds were issued, which permit the authority to redeem such bonds prior to maturity.

The notice of redemption is expected to be given on or about Nov. 9 to holders of record. Dominion Trust Company, Roanoke, is the redemption agent and trustee. Appalachian Power is an operating electric utility subsidiary of American Electric Power Company (NYSE: AEP), Columbus, Ohio.

CONTACT: Marshall O. Julien of the American Electric Power Company, (614) 223-1660.

OAK BROOK, ILL. (OCT. 25) PR NEWSWIRE - Spiegel Inc. (NASDAQ-NMS: SPGLA) today reported net earnings of $10.1 million or $0.20 per share for the

quarter ended Sept. 30, 1990. This compares to $10.8 million or $0.21 per share for the same period last year. Total revenues were $426.0 million, an increase of 14 percent from $372.9 million in the third quarter 1989.

In announcing the quarterly results, Spiegel attributed the earnings decline principally to softness in the retail industry, the possibility of a strike by United Parcel Service which was settled in early August, and an uncertain economic outlook. "We are sensing consumer nervousness about the Middle East crisis, soaring oil prices and the threat of a recession," said John J. Shea, Spiegel vice chairman, president and chief executive officer.

Gross profit margin on net sales declined in the quarter due to increased promotional sales activity. Although sales were below plan for the quarter, strong cost controls held selling, general and administrative expenses as a percent to total revenues under last year's third quarter.

For the nine months ended Sept. 30, 1990, total revenues were $1,219.6 million a 19 percent increase from $1,025.7 million in the same period last year. Net earnings year-to-date were $25.6 million or $0.49 per share, compared to $23.8 million or $0.46 per share last year, a 7 percent increase.

"As of Sept. 30, 1990, inventories were on target and we are encouraged by the initial reaction to our 1990 Holiday Collection," Shea said.

Spiegel, Inc. is the nation's largest in-home direct marketer and a leading specialty retailer. The company markets wearing apparel, household furnishings and other merchandise through semi-annual and specialty catalogs distributed to more than 30 million U.S. households.

#90298p9550 10/25/1990 ~PR Newswire

PORTLAND, OR (OCT. 25) PR NEWSWIRE - NERCO Inc. (NYSE: NER) today announced the natural resource company's minerals unit is suspending mining activities at the Candelaria silver mine in Nevada and has begun to reduce the mine's workforce because of depressed silver prices. This action does not affect NERCO's other precious metals operations.

The reduction in force at the Candelaria mine, acquired by a subsidiary of NERCO Minerals Co. in 1983, involves about 90 employees immediately and approximately 80 workers over the next 30 days.

Within six months, the company expects that approximately 22 employees of its 200-person workforce at the mine will remain at the trickle-down operations in effect at the mine. Those employees initially affected were in the mining operations area. A NERCO Minerals subsidiary is providing pay in lieu of

notice, severance pay and extended benefits to the affected employees, as well as outplacement services.

Through the end of 1989, NERCO has produced 19.6 million ounces of silver and more than 75,000 ounces of gold at the mine since 1983, and has added 32.7 million ounces of silver and 112,000 ounces of gold to the mine's reserves over that time.

According to Thomas Albanese, chief operating officer of NERCO Minerals Co., "The suspension of mining operations at the Candelaria Mine is a result of the serious economic conditions that are affecting the silver industry -- with prices currently at a 15-year low -- and we do not expect to resume full operations at this mine until silver prices rebound for a sustained period."

Albanese noted that the mine, through its workforce, had reduced Candelaria's operating cash costs by about 50 percent since 1983 as a result of improved grade control, mining techniques and increased overall efficiencies. "Although we have been one of the lowest-cost primary silver producers in America, we cannot maintain our Candelaria operations at these historically low silver prices. We regret the actions which needed to be taken today."

Albanese added, "These actions do not impact our other minerals operations in the U.S. or Canada."

NERCO Inc. is a major North American producer of coal, gold, silver, gas and oil. Approximately 82 percent of the company's common stock is indirectly held by PacifiCorp (NYSE: PPW), a diversified electric utility also based in Portland.

MINNEAPOLIS (OCT. 25) PR NEWSWIRE - Techne Corp. (NASDAQ: TECH) today announced that for the three months ended Sept. 30, 1990, Techne's consolidated revenues were $4,011,655, net income after provision for income taxes was $198,976 and earnings per share were 2.3 cents. Compared to the first quarter of FY90 revenues increased by $827,155 (26 percent) and earnings after tax increased by $114,722.

The primary difference between the results of the first quarter of FY90 and FY91 was the performance of Techne's R & D Systems subsidiary. Compared to the first quarter of FY90, R & D's sales increased $731,442 (35 percent) and net earnings increased from $102,643 to $307,417 as a result of the increased sales partially offset by higher selling, general and research expenses.

Techne's Hycel S.A. subsidiary's sales increased $95,713 (7 percent) from the first quarter of FY90 while net loss increased from $15,320 to $76,398 as a result of increases in cost of sales and marketing costs.

Techne Corp. has two operating subsidiaries: Research and Diagnostic Systems (R & D Systems) of Minneapolis; and Hycel S.A. located in France. R & D Systems is a specialty manufacturer of biological products and Hycel manufactures and distributes various laboratory instruments and reagents which are sold to hospitals, clinical, and physician laboratories in Europe.

CHICAGO (OCT. 25) PR NEWSWIRE - Charles S. Locke, chairman and chief executive officer of Morton International (NYSE: MII), today predicted earnings from operations for the current fiscal year ending June 30, 1991, in the range of $2.85 to $3.15 per share of common stock. Last year the company had earnings of $2.80 per share.

Locke said, "The 30 cents range between the high and low ends of the prediction is larger than I have used in past years because of all the economic and political uncertainties in the world today." He added, "Our businesses have never been better positioned for strong growth going forward, but our near-term profits would inevitably be impacted if there are additional negative economic developments during the balance of our fiscal year."

Morton International is a Chicago-based manufacturer and marketer of specialty chemicals, salt and automotive inflatable restraint systems.

LOS ANGELES (OCT. 25) PR NEWSWIRE - Logicon Inc. (NYSE: LGN) today announced that James F. Harvey has been named vice president and general manager of the company's Tactical & Training Systems Division in San Diego.

Harvey succeeds Donald L. Farr, who intends to retire at the end of Logicon's fiscal year. Farr continues as a corporate vice president and will support marketing and technical activities as a member of the corporate staff. Harvey will continue his duties as president of Logicon Eagle Technology Inc., located in Winter Park, Fla.

Harvey has headed Logicon's Eagle Technology subsidiary since 1984. Logicon acquired the operation in July 1989. Earlier he held senior technical management positions with the U.S. Naval Training Systems Center and with General Electric's Advanced Technology Division. He holds a Ph.D. degree in chemistry from the University of London (England).

Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

ANNAPOLIS, MD. (OCT. 25) PR NEWSWIRE - UNC Incorporated (NYSE: UNC) today reported that third quarter earnings from continuing operations increased 20 percent as a result of improved performances in the company's seven operating units.

For the first nine months of 1990, the company reported a 103 percent improvement in earnings from continuing operations compared to restated results for the previous year.

Sales in the 1990 third quarter were $92.4 million, 9 percent higher than the $84.4 million in the third quarter of 1989. Income from operations rose 25 percent to $7.8 million compared with $6.2 million a year earlier. Earnings

from continuing operations were $1.5 million, or $.09 per share, compared with $1.3 million, or $.07 per share, in the 1989 third quarter. Net earnings for the quarter were $1.5 million, or $.09 per share, compared with $1.8 million, or $.11 per share, which included $.6 million of earnings from discontinued operations in last year's quarter.

The company said that the improvement in earnings from continuing operations in the quarter was primarily a result of higher income from the engine overhaul and engine parts manufacture businesses.

For the first nine months of 1990, the company said sales rose 18 percent to $264.6 million compared with $224.5 million in 1989. Income from operations at $20.7 million was 35 percent higher than $15.3 million in 1989. Earnings from continuing operations in the first nine months of 1990 were $3.4 million, or $.20 per share, compared with $1.7 million, or $.10 per share, reported for 1989. Net earnings for the first nine months of 1990 were $3.3 million, or $.19 per share, compared with $5.5 million, or $.33 per share, which included $3.8 million of earnings from discontinued operations in the 1989 period.

The improvement in earnings from continuing operations for the year to date was due to higher income in the engine and accessory overhaul and contract services businesses despite a higher overall tax rate.

UNC Incorporated, listed on the New York Stock Exchange, is engaged in overhauling aircraft engines and aircraft components; manufacturing and repairing jet engine parts; and providing contract aviation services.

SEATTLE (OCT. 25) PR NEWSWIRE - Westmark International Inc. (NASDAQ: WMRK) announced today that its subsidiary, SpaceLabs Inc., introduced five new products at the annual meeting of the American Society of Anesthesiologists (ASA) including "UltraView(TM)," the industry's first product to allow simultaneous viewing of real-time ultrasound images and vital sign data on a patient monitor. Westmark Also said that it expects to continue to introduce a series of new products and features over the next six months from both of its subsidiary companies, SpaceLabs and Advanced Technology Laboratories (ATL).

"UltraView provides anesthesiologists and surgeons with a single point of display for vital sign, alarm, trending and ultrasound information on SpaceLabs' PC2 monitor and PCMS remote displays," said Carl A. Lombardi, president of SpaceLabs. "We designed UltraView to support the growing use of transesophageal imaging as a monitoring modality in the operating room, and it is our first product to demonstrate the synergies between SpaceLabs and ATL." UltraView displayed images from ATL's Ultramark(R) 7 system during ASA.

The Ultramark 7 system introduced by ATL in March 1990 offers color flow Doppler capability with bi-plane transesophageal imaging in a mid-price range.

UltraView demonstrates the power and flexibility of SpaceLabs' leading Patient Care Management System (PCMS1/8TM3/8) and allows two display options. With Transparent View, monitoring data and waveforms are superimposed on the ultrasound images. With Dual View, ultrasound images are seen in the primary window with the ECG waveform displayed on the screen. In either view, all monitoring functions, including alarms and trending, are fully operational.

Convenient touchscreen controls allow the clinician to change modes by pressing a single touch-key on the screen. Image display controls are independent of those on the ultrasound system's display.

In addition to being displayed on the PC2 monitor, the ultrasound image can also be displayed on SpaceLabs' remote display which due to its location in the operating room allows the surgeon to view it as well. UltraView supports both color and high-resolution gray-scale displays. UltraView is compatible with any ultrasound system with standard video outputs. The company expects to make first customer deliveries in March 1991, 510K approval on UltraView is pending.

SpaceLabs introduces four other products which further expand the capabilities and clinical utility of the PCMS -- PC DataMaster(TM), PC2 Configurable Remote Display, PCMS Multisensor Pulse Oximetry Module and a four waveform option for the PC Express(TM).

PC DataMaster is a new option for the PC2 monitor that allows it to run special-purpose clinical applications in addition to serving as a fully functional patient monitor. All monitoring functions, including alarms and trending, remain operational, and the clinician can return to full-screen monitoring at the touch of a key. The PC DataMaster includes PC Mode, a 32-MB hard disk, and a user-friendly menuing system that allows the clinician to load and run a program by simply touching the screen.

SpaceLabs also made available two clinical application programs for the PC DataMaster -- a drug interaction database developed by Medi-Span that lets the clinician quickly determine whether a prescribed drug is likely to cause an adverse reaction; and the Medi-Sim Critical Care Nursing Simulations, a core curriculum of more than 50 programs developed in conjunction with the American Association of Critical Care Nurses and approved for Category A continuing education credits.

The PC2 Configurable Remote Display Option when connected to a PC2 monitor allows surgeons and perfusionists to make data viewing selections independent of the anesthesiologist's configuration on the PC2. Configurable features include the waveforms displayed, colors displayed, order of waveforms, numeric values displayed, waveform size and sweep speed and scales.

The new PCMS Multisensor Pulse Oximetry Module is the first to use sensors from multiple manufacturers. The module is compatible with all SpaceLabs PCMS monitors and works with SpaceLabs, Nellcor and Novametrix pulse oximeter sensors. The SaO2 module measures oxygen saturation in the blood an is useful for a wide range of applications and for all types of patients -- neonatal, pediatric and adult.

SpaceLabs also expanded the capability of PC Express, the first fully modular, portable monitor to display up to 4 waveforms and up to 11 vital signs. The added capability makes PC Express an excellent monitor for the general operating room, particularly where space is at a premium. PC Express is fully compatible with SpaceLabs' Ethernet(TM)-based network.

SpaceLabs Inc. is a leading manufacturer of clinical information systems, patient monitoring equipment, diagnostic monitoring products and semi-automatic defibrillators.

Westmark, with headquarters in Seattle, is a worldwide developer, manufacturer and distributor of diagnostic ultrasound systems and electronic patient monitoring systems through its subsidiaries, Advanced Technology Laboratories Inc. in Bothell, Wash., and SpaceLabs Inc. in Redmond, Wash.

Westmark's common stock is quoted on the NASDAQ National Market System under the symbol WMRK.

DES MOINES, IA (OCT. 25) PR NEWSWIRE - Pioneer Hi-Bred International, Inc. (NASDAQ-NMS: PHYB) today announced that earnings for fiscal 1990, ended Aug. 31, totalled $72,652,000, or $2.33 per share, on revenues of $964,453,000.

In the previous year, the company's continuing operations earned $81,910,000, or $2.58 per share, on revenues of $867,295,000. In fiscal 1989, Pioneer also realized a net gain of $16,254,000, or $.51 per share, on the sale of two

discontinued businesses, boosting earnings to $98,164,000, or $3.09 per share.

Thomas N. Urban, chairman and president, noted that 1989 earnings of $2.58 per share included a $.27 net gain realized from the company's sale of its equity interest in AGRION Corp. "On an 'apples-to-apples' basis, earnings for 1990 were about flat with last year," he said.

During the year, the company encountered a number of difficulties and unusual events, according to Urban. Among the difficulties, he cited the drought in Europe and changes in European Economic Community farm policies. The discontinuance of the hard wheat seed products had an adverse effect on earnings. "The effort to stem the erosion in our seed corn market share in North America was successful but expensive," he noted.

Urban is encouraged with the prospects for fiscal 1991. The pace of early orders in North America has been brisk. Product performance around the world is encouraging. He added that the seed crops have been harvested and quality has been excellent.

"As usual," he says, "it's impossible to accurately predict results for the coming year." In the U.S., farm programs will surely have a bearing on planted acreages and those programs have not been approved. There will likely be changes in EEC programs. The Middle East problems might have far ranging effects on agriculture as well as all other businesses.

"Nevertheless, we are cautiously optimistic about 1991," he concludes, "because the positives at this point outweigh the negatives."

RESTON, VA (OCT. 25) PR NEWSWIRE - Freddie Mac (NYSE: FRE) today announced that a civil lawsuit was filed by the estate of Theodore Machalaba in the U.S. District Court of the District of Columbia. The suit names Freddie Mac and its chairman and chief e8YutivYPoffi,Y9V .+4I9dsel, as defendants.

The action has been brought on behalf of a purported class of investors which allegedly includes all people who purchased Freddie Mac's voting common stock between May 7, 1990, and Oct. 18, 1990, and seeks damages in an unspecified amount. The plaintiff alleges, among other things, that Freddie Mac's disclosures regarding multifamily mortgage losses during this period failed to adequately inform investors of the severity of losses experienced and, thus, violated federal securities laws.

Based on its preliminary analysis, Freddie Mac believes that the allegations are without merit and intends to contest the action vigorously.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of homeownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over

the years, Freddie Mac has helped finance one in eight American homes, including more than 700,000 apartment units.

TROY, MI (OCT. 25) PR NEWSWIRE - OIS Optical Imaging Systems, Inc. (OTC: OVON) ("OIS") announced that, following its news release of Oct. 12, 1990, which indicated that OIS does not comply with the minimum NASD requirement for capital and surplus, OIS requested a hearing.

It has been advised that a possible delisting will be delayed until a scheduled hearing takes place on Nov. 14, 1990.

OIS is making every effort to rectify this situation. Additional equity invested in OIS may avoid delisting, but no assurance can be given that adequate, if any, equity will be raised.

INVER GROVE HEIGHTS, Minn. (OCT. 25) PR NEWSWIRE - Surgidyne, Inc. today announced third quarter and nine month results.

The 59 percent decrease in the nine month net loss can be attributed to substantially reduced selling and administrative expenses, and also to improved production efficiencies. The company expects additional sales revenues to begin in 1991 resulting from market introduction of its postoperative orthopedic VariDyne Autotransfusion System which is currently in final stages of development and for which FDA approvals for marketing has been received. The company makes portable battery powered vacuum controllers and disposable suction and collection products for surgical wound drainage and other medical applications.

Surgidyne's common stock is traded in the local over-the-counter market. The company's executive offices are located at 9605 West Jefferson Trail, Inver Grove Heights, MN 55077.

WORCESTER, MA (OCT. 25) PR NEWSWIRE - Cambridge Biotech Corporation (NASDAQ: CBCX) today announced it has received approval from the U.S. Department of Agriculture for a recombinant vaccine against feline leukemia, a leading killer of cats. The vaccine, developed jointly between Cambridge and the French animal health company Virbac SA, will be sold in the United States and in Canada under the trade name GenetiVac(TM)FeLV by Pitman-Moore, Inc., a wholly-owned subsidiary of IMCERA Group, Inc. (NYSE: IMA).

GenetVac FeLV is the first recombinant, or genetically-engineered, vaccine to be used against a retrovirus in animals. Instead of utilizing whole virus, as do most classical vaccines, it contains a recombinant antigen, created from isolated and purified portions of the virus' outer envelope, and a proprietary adjuvant called Stimulon(TM), which has been shown to amplify the body's immune response to a recombinant antigen more effectively than other adjuvant compounds.

Commenting on the approval, Cambridge Biotech President and CEO Patrick J. Leonard said, "The approval of GenetiVac FelV brings not only a significant new product to CBC's portfolio, but again demonstrates the ability of the company to use its strong technological base to bring unique products to the market quickly. The recombinant technology used to create GenetiVac FeLV has potential applications for many other vaccines for both animals and humans, both existing and proposed.

Rigorous clinical trials conducted by both CBC and Pitman-Moore in the United States and Vibrac in France show the vaccine to be both safe and effective against FeLV. A very high protection rate was achieved against a viral challenge far more aggressive than would occur in nature.

The new vaccine has been marketed under the trade name of Leucogen(R) in France through CBC's collaborator Virbac SA for two years and in Switzerland for almost a year. The vaccine now commands a 65 percent market share in France, according to Virbac officials.

Pitman-Moore's requirement for product will be manufactured by Cambridge Biotech, which will also participate in a royalty arrangement on sales worldwide. The vaccine is available to veterinarians immediately.

Virbac is the largest independent French animal health company, as well as the

world's largest independent company dealing exclusively with animal health.

Pitman-Moore manufactures and markets a broad range of animal health products for livestock, poultry and companion animals. The company, a wholly-owned subsidiary of IMCERA Group, Inc. (formerly International Minerals & Chemical Corp.), has a significant share of the animal vaccine market. The estimated market for FeLV vaccine worldwide is $50 million.

Cambridge Biotech Corporation is a leader in the development of recombinant technology and a major producer of viral diagnostic screening and confirmatory products. The company utilizes recombinant technology in the development and production of antigens. The company also develops adjuvants and monoclonal antibodies as the basis for diagnostic, vaccine and therapeutic products for humans and animals.

DRESHER, PA. (OCT. 25) PR NEWSWIRE - Selas Corporation of America (AMEX: SLS) today reported income before extraordinary item for the nine months ended Sept. 30, 1990, of $3,209,000 or $1.32 per share on sales of $42,290,000 compared to income before extraordinary item of $1,637,000 or $.74 per share on sales of $29,803,000 reported for the nine months ended Sept. 30, 1989.

The extraordinary item is a tax benefit from a net operating loss carryforward in 1990 of $475,000 or $.20 per share and $266,000 or $.12 per share in 1989. Net income after tax benefit for the nine months ended Sept. 30, 1990, is $3,684,000 or $1.52 per share compared to $1,903,000 or $.86 per share for the same period in 1989.

For the quarter ended Sept. 30, 1990, income before extraordinary item was $890,000 or $.33 per share on sales of $10,862,000, compared to income before extraordinary item of $838,000 or $.38 per share on sales of $11,535,000 reported for the same period in 1989. The prior year's extraordinary item represents a tax benefit from a net operating loss carryforward of $230,000 or $.10 per share from European operations. Net income after tax benefit for the quarter ended Sept. 30, 1990, is $890,000 or $.33 per share compared to $1,068,000 or $.48 per share for the same period in 1989.

Company President and Chief Executive Officer Stephen F. Ryan said that the third quarter was adversely affected by reduced sales and earnings of the Deuer Manufacturing subsidiary due to a one-month, model-changeover shutdown by one of the firm's major automotive customers. Production is now back to normal.

Ryan said, "We continue to be optimistic for the balance of the year and we anticipate several new orders for our heat processing business within the next few quarters."

Selas is an international design, development, engineering and manufacturing company.

BOSTON (OCT. 25) PR NEWSWIRE - Record drug testing revenues for the third quarter of 1990 were reported today by Psychemedics Corp. (NASDAQ: PCMC).

Drug testing revenue for the three months ended Sept. 30, 1990, was $568,636, a 490 percent increase over the $96,342 reported for the same period in 1989. (Total revenues for 1989 of $115,092 included $18,750 for license fees.)

Net loss decreased to $451,930 from the loss of $497,090 reported during the quarter ended Sept. 30, 1989. The loss per share for the three month periods ended Sept. 30, 1990 and 1989 were $0.04 and $0.05, respectively.

For the nine month period ended Sept. 30, 1990, drug testing revenue totaled $1,120,559, a 338 percent increase over the $255,867 reported for the first three quarters of 1989. (Total revenue for 1989 of $605,867 included $350,000 for license fees.)

Net loss increased to $1,795,853 from the loss of $612,858 reported for the nine month period ended Sept. 30, 1989. The loss per share for the nine month periods ended Sept. 30, 1990 and 1989 were $0.18 and $0.07, respectively.

The increased losses for the first two quarters of 1990 as compared to 1989 are attributable to the company's aggressive sales and marketing programs and the addition of personnel in the laboratory and customer service groups due to the significant increase in volume in 1990. The company believes that its current personnel levels are sufficient to allow the company to reach breakeven as volume increases in the near future.

Lawrence A. Kaufman, president and chief executive officer, said: "We are pleased with the results of the quarter and for the first nine months of 1990 because they indicate that the company's proprietary drug testing method (RIAH) using hair instead of urine is gaining acceptance. Our company currently has over 120 customer accounts which includes 90 corporate accounts using RIAH for pre- employment and employee testing."

MONROE, LA (OCT. 25) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) recorded a net loss of $51,627,000 ($1.27 per share) for the quarter ended Sept. 30, according to Thomas J. Roeck Jr., Delta's senior vice president - finance and chief financial officer.

The company's loss from operations was $73,616,000. For the quarter ended Sept. 30, 1989, net income was $133,142,000 ($2.53 per share) and operating income was $190,620,000.

For the nine months ended Sept. 30, 1990, net income was $53,780,000 ($0.85 primary and $0.81 fully diluted earnings per share) compared to $408,940,000 ($8.12 primary and $7.92 fully diluted earnings per share) in the corresponding 1989 period.

Roeck stated: "This is the first loss Delta has had in a September quarter since 1982. The disappointing results stem from a number of factors. First, the average price of jet fuel, responding to the threat of war in the Middle East, rose 27 percent to 70.65 cents per gallon, adding $78.1 million to Delta's expenses.

"Second, passenger revenue grew only two percent over the previous year's quarter, reflecting strong competition in the domestic market, softening demand due to the uncertain economy, and a full quarter's operation by a major competitor who, in the 1989 quarter, was rebuilding its operation following a strike. If these trends continue, the company expects to report a loss for the full calendar year."

In addition to these factors, Roeck noted that Delta's results were reduced by an out-of-period accrual for potential additional bad debts, reflecting the heightened possibility that one or more airlines could fail due to the current fuel situation.

Operating revenues for the September 1990 quarter were $2.217 billion, up two percent from the 1989 quarter. Passenger revenues grew two percent to $2.081

billion as revenue passenger miles remained unchanged and the passenger mile yield increased two percent from the September 1989 quarter. Cargo revenues were up seven percent to $105.9 million, and other revenues totaled $30.8 million.

Operating expenses in the September 1990 quarter were $2.291 billion, up 16 percent from the $1.983 billion recorded in the 1989 quarter. Operating capacity increased seven percent to 25.915 billion available seat miles, and revenue aircraft miles were up six percent.

The board of directors declared the regular cash dividend of 30 cents per share payable Dec. 1, 1990, to stockholders of record on Nov. 8, 1990.

CHICAGO (OCT. 25) PR NEWSWIRE - Morton International today announced it was decentralizing its specialty chemicals group into four separate and independent groups and electing as corporate officers Thomas S. Russell, Richard B. Kron, Stephen A. Gerow, and Perry R. Grace.

In addition, Robert B. Covalt was elected to a newly created position of corporate executive vice president responsible for the development, implementation, and management of corporate-wide programs in the areas of health, safety and environmental affairs, materials management, central engineering, quality management, technology development, and acquisition and divestitures. Also elected as a corporate officer was Kenneth D. Holmgren, group vice president and president of Morton's Automotive Safety Products Group.

Russell, 45, was promoted to group vice president and president of the adhesives and specialty polymers group. He has been with Morton for 14 years, and has served in several executive positions including chief financial officer, president of the Canadian Salt Company, corporate vice president of administration, and most recently executive vice president of the adhesives operations.

Kron, 63, was promoted to group vice president and president of specialty chemicals products group. Kron has been with Morton for 30 years, holding several positions in the specialty chemicals area. He had most recently been executive vice president of the colors and polymers operations.

Gerow, 48, was promoted to group vice president and president of the coatings group. Gerow joined Morton as executive vice president of the coatings operations in April 1990. He had been group vice president of Parker Amchem, a division of Henkel.

Grace, 49, was promoted to group vice president and president of the electronic materials group. Grace has been with Morton 14 years, and has held several positions at both the corporate and operating levels. He has been executive vice president and president of the electronic materials operations for the past two years.

Covalt, 58, has been with Morton for 34 years, beginning as a development engineer and moving within the engineering and manufacturing operations. He became group vice president of the Specialty Chemicals Group in 1987.

Holmgren, 60, was elected a corporate vice president. He has been with Morton since 1957, joining as manufacturing supervisor. He has held numerous executive positions, most recently president of Morton's Automotive Safety Products Group, which manufactures automotive inflatable restraint systems.

Morton International is a Chicago-based manufacturer and marketer of specialty chemicals, salt and automotive inflatable restraint systems.

NAPERVILLE, ILL. (OCT. 25) PR NEWSWIRE - Nalco Chemical Company (NYSE: NLC) reported third quarter increases in both sales and earnings today. In addition, the board of directors voted to increase the quarterly dividend 8 percent to 40 cents a share from 37 cents a share, payable Dec. 10, 1990 to shareholders of record Nov. 20, 1990.

Net earnings rose to $32.7 million, compared to $32.5 million for the same quarter last year; for the first nine months, they increased 9 percent to $95.5 million from $87.3 million reported a year ago. On a primary per share basis, third quarter earnings increased by 8 percent to 86 cents a share

compared to 80 cents a share for the third quarter last year. Primary earnings per share for the first nine months were up 13 percent to $2.47 a share from $2.19 a share a year ago. Fully diluted earnings for the quarter were 5 cents a share less than primary earnings, and 14 cents a share less for the first nine months. These figures take into account the assumed conversion of convertible preferred stock issued to the Nalco Employee Stock Ownership Plan (ESOP).

Third quarter sales were up 11 percent to $300.3 million from $270.0 million for the similar period last year. Sales for the first nine months increased 13 percent to $886.8 million from $787.6 million recorded last year.

Four of Nalco's five operating units reported double digit sales increases during the quarter. The international division led the way with a substantial 14 percent sales gain while the three domestic divisions followed closely behind. Among the company's 20 domestic units, pulp and paper chemicals, basic industry, Day-Glo Color Corp. and WATERGY(R) were the leaders -- reporting significant sales increases during the quarter. Other notable performances were turned in by UNISOLV(R), RPC Chemicals, Visco Chemicals, Utility Chemicals and Functional Chemicals. Outside the U.S., substantial sales performances were achieved by our companies in Italy, Germany, France, Spain and Austria.

#90298p9647 10/25/1990 ~PR Newswire

OIL CITY, Pa. (OCT. 25) PR NEWSWIRE - Quaker State Corporation (NYSE: KSF) reported increased sales and earnings for the third quarter and first nine months of 1990, compared to the same periods of 1989.

At its monthly meeting, the board of directors voted a regular, quarterly dividend of 20 cents per share, payable on Dec. 14 to stockholders of record on Nov. 15, 1990.

For the third quarter, net income was $4,208,000 (15 cents per share) on sales and operating revenues of $225,070,000. This compares to net income of $1,664,000 (six cents per share) on sales and operating revenues of $207,308,000 in third quarter 1989.

For nine months, Quaker State registered sales of $656,788,000 and net income of $15,029,000 (55 cents per share) compared to $613,980,000 and $9,450,000 (35 cents per share) in 1989.

Operating profits in the third quarter totaled $9,709,000, compared to $6,969,000 in the same period a year ago. The gains were achieved primarily in the core petroleum business and fast lube subsidiaries.

Quaker State's core petroleum segment reported operating profits of $7,113,000 compared to $3,103,000 in third quarter 1989. Profits were held down significantly by the company's inability to raise the price of motor oil and light fuels as rapidly as crude oil costs increased. However, oil and gas production profits increased by $477,000 to $1,444,000 as a result of higher

crude oil prices.

Quaker State's fast lube subsidiaries reported operating profits of $1,764,000 up from $979,000 in third quarter 1989. Both Quaker State Minit-Lube, Inc., and McQuik's Oilube, Inc., improved margins through higher unit selling prices.

Profits of the company's Heritage Insurance Group declined from $1,743,000 in third quarter 1989 to $856,000 in this year's quarter. Heritage continues to be negatively impacted by the soft new car market and above normal claims experience.

The Valley Camp Coal Company reported a loss of $1,328,000, versus a profit of $186,000 in third quarter 1989. Continued operating difficulties at Helen Mining Company, higher than expected start-up costs at Shrewsbury Mine, and lower production at Donaldson Mine because the customer's generating plant is on temporary shutdown all contributed to the operating loss.

The company's other businesses experienced modest gains. Operating profits of Truck-Lite Company, Inc., rose from $718,000 a year ago to $803,000 in the third quarter as improved sales to the auto industry offset a slight decline to the heavy duty truck market. The dock facilities reported operating profits of $685,000, a gain of $213,000 over third quarter 1989.

Vice Chairman and Chief Executive Officer Jack W. Corn commented that, "Along with improved earnings, Quaker State maintained a strong cash flow and a low debt to capital ratio of about 18 percent in the third quarter. Motor oil price increases announced during the period are scheduled to be implemented in the fourth quarter, but crude oil price fluctuations will continue to impact future earnings."

MINNETONKA, MN (OCT. 25) PR NEWSWIRE - LecTec Corporation (NASDAQ: LECT) today released its fiscal 1991 first quarter results. Operating income increased 31 percent over the previous quarter from $208,000 to $273,000. Earnings rose 6 percent from $207,585 to $219,560 over the same period a year ago. Total revenues were $1,889,000 for the period last year versus $1,689,000 for the current period. The company cited benefits from cost reduction programs and previous investments that resulted in increased earnings over the previous quarter and the same period of last year.

A company spokesperson noted that current and potential customers are unanimous in their support of the decision to disengage from acquisition activities of NDM and merger plans with MEI Diversified. Customers were concerned that LecTec might dilute its focus in developing and producing leading edge medical technologies.

"Growth, both domestically and overseas, in our medical markets will accelerate faster with our renewed focus. We are now back on track. Sales and earnings for the second quarter (October-December) are strong and, we believe, will show continued increases over previous quarters," commented LecTec President and CEO George B. Ingebrand.

LecTec Corporation is a medical company focusing on development and manufacturing of non-invasive products. Among the company's products are cardiac electrodes, medical tapes, transdermal drug delivery systems, and component materials for use with electromedical equipment. LecTec is publicly traded on NASDAQ under the symbol LECT.

#90298p9649 10/25/1990 ~PR Newswire

HOUSTON (OCT. 25) PR NEWSWIRE - Vista Chemical Co. (NYSE: VC) today announced earnings per share of $5.97, and net income of $63.3 million, for the fiscal year ended Sept. 30, 1990. This compares to earnings of $8.56 per share, and

net income of $119.9 million, for fiscal 1989. The company adopted in fiscal 1990 the F.A.S.B. Statement No. 96, "Accounting for Income Taxes." Fiscal 1990 results reflect $4.7 million of income from the cumulative effect of the change.

"The decline in earnings was due primarily to reduced prices, especially for polyvinyl chloride (PVC), and to costs associated with the ethylene plant expansion and modernization project in Lake Charles, which is scheduled for completion in November," said John D. Burns, chairman, president and chief executive officer. These effects were partly offset by increased sales volumes and the cumulative effect of the accounting change. Higher interest expense resulting from the financial restructuring completed in July 1989 also contributed to lower net income. On a per share basis, the effect of the higher interest expense was offset by the reduction in shares outstanding resulting from stock repurchase in fiscal 1989.

Sales for the year were $718.8 million, compared to $778.9 million reported for the same period last year. The decline in sales reflects a 14 percent decline in product prices, partly offset by a six percent increase in sales volumes.

Earnings per share were 74 cents in the fourth quarter ended Sept. 30, compared to $1.89 per share reported for the same quarter last year and $1.93 for the third quarter of fiscal 1990. Net income for the fourth fiscal quarter was $7.8 million compared to $21.1 million reported for the same quarter in fiscal 1989 and $20.4 million in the previous quarter.

According to Burns, Vista's fourth quarter results were impacted by higher costs associated with commissioning the ethylene project, and costs of non-recurring environmental projects. "In addition, earnings reflect the dramatic increase in hydrocarbon feedstock costs resulting from Iraq's invasion of Kuwait in August," he explained.

"Vista is operating in a very difficult, uncertain business environment, characterized by volatile oil prices," Burns observed. However, our business operations remain strong. We've seen increased demand for virtually all of our products this year, especially in our surfactants and specialties product line, which brought in record revenues for the most recent quarter and the fiscal year.

"Vista believes in the strength of our underlying operations. While we can't control the situation in the Middle East, we can control other factors to ensure our competitiveness and profitability through these uncertain times," Burns continued. "For example, Vista began to pass through some of its increased feedstock costs to customers, beginning Sept. 1. In addition, Vista has initiated company-wide internal cost control measures. We expect that cash flow from our businesses in fiscal 1991 should enable us to maintain our dividend program at current levels, support an appropriate capital program and

reduce debt."

#90298p9650 10/25/1990 ~PR Newswire

SPOKANE, WA (OCT. 25) PR NEWSWIRE - Key Tronic Corp. (NASDAQ: KTCC), a leading manufacturer of keyboards and other computer products, has announced a new family of keyboards for portable computers. Included in the family are unenclosed keyboards for A and A4-size notebook computers and laptop computers. Standard keyboards may be ordered from stock or configured with a number of custom options, such as an embedded pointing device, electrical interfaces and/or custom enclosures.

"The portable computing market is one of the fastest growing segments in the computer industry," stated A.T. (Fred) Zirkle, Key Tronic president. "Our OEM customers require quality keyboard designs and high-volume manufacturing expertise to meet the increased demand for smaller-size, lightweight computer equipment. With our worldwide reputation for quality keyboards and our ability to provide unique custom configurations, OEMs are coming to us for support," he added.

According to Zirkle, there is high demand for keyboards in both laptop and notebook portable computing environments. Key Tronic's laptop keyboards are designed exclusively for use with the laptop class of portable computers which emulate many of the features of desktop computers. The 82-key laptop keyboard features 12 function keys across the top and a separate, T-shaped cursor pad. Both areas utilize a narrow key shape and are separated from the typewriter area of the keyboard for ease of use.

Key Tronic's notebook keyboard line includes designs to fit both A- and A4-size notebook computers, corresponding to U.S. and International paper sizes respectively. Both size keyboards feature stepped keys, a top row of function keys, separate cursor keys, and an embedded numeric keypad.

The 84-key A4 model is slightly larger than the A-size to accommodate four separate page movement keys. Cursor keys on A4 models are in a T-configuration. A-size models feature cursor keys in a horizontal line.

Both laptop and notebook keyboards use Key Tronic's patented full-travel membrane technology, and can be customized to suit user preference. For example, OEMs may specify a custom configuration with Key Tronic's new KeyMouse(TM) option, a pointing device integrated into the enclosure that provides users the point-and-click capabilities of a mouse or trackball. Key Tronic has also designed a daughter card that can be purchased separately to provide the electrical interface between the keyboard and CPU. Other custom options are available upon request.

"The custom keyboard requirements of our OEM customers are an exciting match with Key Tronic's vertically integrated manufacturing capabilities," said Steve Edison, Key Tronic's director of marketing. "No other manufacturer can supply them with the quality product and service we offer," he concluded.

The portable keyboards will initially be manufactured in Key Tronic's U.S. facilities in the Spokane area. They will also be produced later in Key Tronic's overseas plants in Taiwan and Ireland to serve Asian and European markets respectively. The keyboards will be marketed through Key Tronic's worldwide network of independent sales representatives.

Key Tronic is a publicly held corporation, traded over the counter under the NASDAQ symbol KTCC.

PITTSBURGH (OCT. 25) PR NEWSWIRE - Dravo Corp. (NYSE: DRV) today reported net income for the third quarter of $8.4 million on revenue of $82.1 million, compared to $7.5 million on revenue of $76.9 million a year ago.

Earnings for the quarter were 52 cents per share after preferred dividends, compared to 46 cents per share last year. Third quarter profits include an extraordinary item of $1.8 million, or 12 cents per share, from the use of operating loss carryforwards which reduce tax liabilities. Last year's third-quarter results included an operating loss carryforward extraordinary item of $1.4 million, or 9 cents per share.

Nine-month results were net income of $17.1 million on revenues of $224.1 million, compared to $14.3 milion on revenues of $210.7 million last year. Earnings per share after preferred dividends for the three quarters just ended were $1.02, compared to 83 cents in 1989. Nine-month profits include an extraordinary item of $3.6 million, or 24 cents per share, from the use of operating loss carryforwards which reduce tax liabilities. The operating loss carryforwards extraordinary item for the corresponding period last year was $2.7 million, or 18 cents per share.

"Our operating earnings reflect a continuation of flat performance levels in our basic materials business during the third quarter and for the nine-month period," commented Carl A. Torbert Jr., Dravo's president and chief executive officer.

"Strong construction aggregates market conditions in the Pittsburgh, Cincinnati and West Virginia areas were offset by poorer than expected conditions in the Southeast.

"Our lime business, on the other hand, had a very strong third quarter, exceeding results from a year ago. Shipments to our existing utility customers continued at a high level, and the long-term prospects for this important market received a significant boost with the progress made in Congress this week toward enactment of a new federal Clean Air Act. The development of improved lime-based flue gas desulfurization (FGD) technology is key to our success in the post-Clean Air Act FGD market, and the contract awarded to Dravo Lime Co. during the third quarter by the U.S. Department of Energy to continue the development of a nitrogen oxides (NOx) removal process compatible with our Thiosorbic(R) process for sulfur-dioxide (SO2) removal represents and important step in that direction," Torbert added.

ATLANTA (OCT. 25) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) today named Peter S. Sealey to the new position of Director, Global Marketing.

In this new position, Mr. Sealey will have responsibility for the corporate departments of advertising, media services, marketing research, sports and licensing, planning, promotions, new product development, and the marketing aspects of packaging. In addition, he will be responsible for international marketing services and international post-mix.

Mr. Sealey will report to Ira C. Herbert, executive vice president of The Coca-Cola Company.

"Peter Sealey brings a breadth of experience to this position, including a track record of success within the Coca-Cola system," said Mr. Herbert. "We are confident he will continue that success in his new role."

Mr. Sealey originally joined The Coca-Cola Company in 1969 after considerable experience in consumer goods marketing. He held a number of key marketing positions in the Company before becoming vice president, marketing planning for Coca-Cola USA in 1976. In 1982 he became vice president, marketing operations, for The Coca-Cola Company. He subsequently joined Columbia Pictures Industries Inc. in 1985 and was named president of marketing and distribution for Columbia.

Mr. Sealey will assume his new position on Dec. 1, 1990. He is completing doctoral studies in strategic management at the Peter F. Drucker Graduate Management Center of Claremont Graduate School in California.

MIAMI (OCT. 25) PR NEWSWIRE - Allen Blattner, chairman of Jetborne International, Inc. (NASDAQ: JETS) (the "company"), announced today that it had received an offer to sell its wholly owned subsidiary, Aircraft Modular Products, Inc. At the same time, the AMP public offering previously announced has been suspended. Total consideration over the period of at least four years will amount to approximately $12,000,000.

The consummation of the transaction will virtually leave the company debt free.

The transaction is subject to a definitive contract, board approval and certain other matters.

Blattner is considering presenting a proposal to the board of directors to use the excess cash consideration received from AMP sale after payment of debts to repurchase shares of its common stock and indicated that this proposal is tentative and subject to a board approval and receipt of a written report from an outside expert investment banking firm.

The company subsidiary commenced the executive seat manufacturing in 1983. AMP later added a flight control repair division and more recently became a manufacturer of first and business class aircraft seats for commercial aircraft as well as interior components and galleys. Blattner estimated that the net sales of AMP during the fiscal year ended April 30, 1990 were approximately $8,500,000 and the group sales for the same period were approximately $23,000,000.

Allen Blattner stated that the transaction hopefully should be approved by the board of directors and would be finalized by Dec. 1, 1990.

CHULA VISTA, CA (OCT. 25) PR NEWSWIRE - First International Bank (OTC "Pink Sheets") released its 1990 third quarter earnings report, indicating continued progress toward the fulfillment of its 1990 growth objectives. Total earnings for this period were $168,000, a 205 percent increase over the same period in 1989 when total earnings were $55,000.

First International Bank's performance measurements for the first nine months of 1990, as compared with 1989, are as follows: asset growth was 40 percent, to $54.8 million from $39.1 million; net loans increased 62 percent, to $39.2 million from $24.2 million; deposits increased 41 percent to $50.2 million from $35.6 million; net earnings increased 29 percent to $441,000 from $341,000 (this represents $.15 per share, compared to $.11 per share in 1989); shareholder equity and reserves increased 30 percent to $4.7 million from $3.6 million. The gross capital asset ratio is 8.5 percent.

Strong performances in all areas are reflected in this third quarter report with significant contributions from commercial business loans, particularly SBA export lending, construction lending for residential and industrial projects and the expanded sale of money orders through the bank's statewide network.

Additional services now available through the Professional Lending Department include customized credit and deposit services to professionals, including time-saving courier service and home equity lines of credit.

First International Bank's own Gold Visa and Mastercards are now available, along with high-yielding annuities and free accidental death insurance on time certificates of deposit.

The bank continues its active community involvement with local chambers of commerce and business leaders in Chula Vista, National City and Otay Mesa, Calif., to promote new business opportunities and work toward the positive resolution of local issues.

Pleased with the third quarter report, First International Bank President Norman E. Richins stated, "The Bank is well focused on accomplishing its goals for 1990. Additionally, we continue to take particular pride in the quality of service provided by our employees; and, most important, customer satisfaction remains the best measurement of our efforts."

#90298p9685 10/25/1990 ~PR Newswire

BOSTON (OCT. 25) PR NEWSWIRE - As previously announced, Bank of Boston Corporation (NYSE: BKB) reported today a net loss for the third quarter and first nine months of 1990. The net loss amounted to $255 million, or $3.53 per common share fully diluted, for the quarter ended Sept. 30, 1990. This compares with a net loss of $125 million, or $1.82 per share, for the same quarter a year ago. For the first nine months, the net loss was $208 million, or $3.01 per share, compared with net income of $62 million, or 72 cents per share, for the same period a year ealier.

During the quarter, nonperforming assets declined $100 million to $1,857 million at Sept. 30 from $1,957 million at June 30. The June 30 balance had also declined from $1,981 million at March 31, 1990.

Results for the third quarter included:

-- provision for credit losses of $200 million and net loan losses of $175 million;

-- OREO valuation write-downs of $35 million;
-- restructuring charge of $50 million related, in part, to the announced planned reduction of at least 1,500 employees;

-- tax charge of $37 million related to the inability to use foreign tax credits currently, and

-- extraordinary gain of $20 million, net of tax, from the repurchase of some of the corporation's debt.

Chairman and chief executive officer Ira Stepanian said, "This quarter's results reflect our intense efforts to respond to the significant challenges of a declining economy and a weakened real estate market. Our determination to act aggressively is evidenced by the fact that our continued pro-active management of credit helped us reduce nonperformers for the second consecutive quarter in 1990. We have dedicated substantial resources to managing these credits and we are working vigorously to sustain this positive trend. In addition, our recently announced expense reduction program, with its goals to be achieved by the third quarter of 1991, is another critical element in positioning our franchise for future profitability." Stepanian noted that capital and reserves for credit losses were $2.8 billion, and that the corporation exceeds regulatory requirements for capital adequacy. He also pointed out that the corporation maintains over $7 billion of liquid assets.

Bank of Boston Corporation with assets of $37 billion at Sept. 30, 1990, is a New England-based superregional bank holding company with both national and international operations.

#90298p9686 10/25/1990 ~PR Newswire

ABBOTT PARK, IL (OCT. 25) Abbott Laboratories (NYSE: ABT) announced today that the Food and Drug Administration has approved the marketing of Lupron Depot for the treatment of endometriosis, a disease that affects an estimated 1 in 15 women of reproductive age and is a leading cause of infertility. Lupron Depot (leuprolide acetate), a synthetic analog of the naturally occurring gonadotropin releasing hormone (GnRH), is marketed by TAP Pharmaceuticals, a joint venture between Abbott Laboratories and Takeda Chemical Industries of Japan.

Hank Pietraszek, president of TAP Pharmaceuticals, said "This approval is the result of our continuing research and development efforts to examine the benefits that GnRH analogs can bring to women suffering from a variety of gynecologic disorders. We now have clinical studies underway in the treatment of fibroid tumors and infertility, and are committed to maintaining our leadership position in this promising field of research.

Endometriosis is an often painful condition in which endometrial tissue, the tissue that lines the uterus, grows elsewhere in the body -- often on the ovaries and other organs in the pelvic cavity. Like the lining of the uterus, areas of endometriosis respond to the hormones of the menstrual cycle. They build up tissue each month then breakdown and bleed during menstruation. This process causes local irritation in the pelvis which can result in pain and the formation of scar tissue.

Endometriosis and the resulting scar tissue can lead to infertility, chronic pelvic pain, painful urination and bowel movements, pain during sexual intercourse and increasingly painful menstrual discomfort.

Endometriosis affects five million women in the U.S., according to the Endometriosis Association, a patient support and educational organization based in Milwaukee.

When taken over a period of six months, Lupron Depot causes a sustained decrease in the production of estrogen, which interrupts the menstrual cycle and produces a reversible medically induced menopause. As a result, endometrial implants shrink, providing significant relief from the pain associated with the disease.

Current treatment for endometriosis includes conservative surgery to eliminate or reduce the size of the endometrial lesions; surgical removal of the ovaries (which produce estrogen); removal of the uterus (hysterectomy) with removal of

the ovaries; drug treatment with danazol, a synthetic androgen; or medical treatment with GnRH analogs.

TAP Pharmaceuticals, which was formed in 1977, is headquartered in Deerfield, Ill.

Abbott Laboratories is a worldwide manufacturer of health care products, employing 42,000 people. In 1989 the company's sales and net earnings were $5.4 billion and $860 million, respectively, with earnings per share of $1.93.

PITTSBURGH (OCT. 25) PR NEWSWIRE - Cyclops Industries Inc. (NYSE: CYC) reported net income of $1.7 million or $.24 per share on sales of $299.2 million, for the three months ended Sept. 30, 1990, compared with net income of $9.5 million or $1.31 per share on sales of $320.2 million for the same period in 1989, it was announced today.

For the nine-month period ended Sept. 30, 1990, the company reported a net loss of $6.0 million or ($.86) per share which includes restructuring charges taken in the second quarter. Excluding the charges, the company earned net income of $3.3 million or $.46 per share for the nine-month period. This compares with net income of $32.6 million or $4.54 per share in the previous year.

James F. Will, president and chief executive officer, said, "Depressed earnings from our flat-rolled operations coupled with a loss from the high performance alloy products segment reduced overall company income before taxes to a breakeven position. However, a net tax adjustment related to the restructuring charges brought earnings to $.24 per share for the quarter," he said. "As we announced when the high performance alloys operations were restructured in the second quarter," said Will, "they will likely show a loss for the remainder of the year."

Will said, "A year ago this time, we reported strong performance in flat-rolled products. In contrast, during the third quarter of this year, lower sales volumes, lower selling prices and higher manufacturing costs resulted in reduced profitability for this segment, particularly for carbon flat-rolled products. Manufacturing cost increases were due primarily to labor scrap and other raw materials."

Will said the flat-rolled segment is feeling the impact of a slowdown in consumer spending, particularly in automobiles and housing, coupled with cautious buying from steel distributors. He said, "Price increases for carbon

steels and some stainless products have been announced but will not take effect until later in the quarter or early in 1991.

"Cyclops tubular steel products posted higher earnings than a year ago," said Will, "primarily as a result of increased shipments. This segment continues to show strength, particularly in pipe for oil and gas transmission.

DETROIT (OCT. 25) PR NEWSWIRE - Carlo Environmental Technologies (CET), Inc., a soil remediation and chemical fixation firm, has been contracted by the City of Detroit to perform a unique site remediative service on Detroit's Porterfield's Marina Village, a 62-acre luxury marina development scheduled for opening on the Detroit River in the spring of 1991.

The announcement was made by J. Michael Carlo, president of Carlo Environmental Technologies, Inc.

"Essentially, we are utilizing Slurry Wall technology to safely and effectively treat a few small isolated areas of land where lead deposits were found," said Mr. Carlo.

According to Mr. Carlo, Slurry Wall technology is a unique and modern construction technique in which a contaminated area of soil is treated on site by isolating it with a wall of impermeable bentonite compound. The specialized wall is flexible to compensate for any land shifts, yet is wholly impermeable.

"The major benefit of a Slurry Wall is that we are making use of land that would otherwise have to be evacuated," said Mr. Carlo. "Before this technology a developer was really faced with a no-win situation in terms of what could be done to treat the contaminant."

Carlo said that less than 1,200 feet of Slurry Wall on the 62-acre development was being constructed on site, and that once the Slurry Wall was complete, the land would be used as a parking facility for Porterfield's Marina Village.

Carlo Environmental Technologies, Inc. is a soil remediation chemical fixation firm specializing in providing waste treatment and management services to commercial, industrial and governmental generators of waste, as well as to developers and property owners who confront waste crises in their development projects.

"The Slurry Wall remediative process is one facet of our remediative services " said Mr. Carlo. "We have the ability to perform all waste management

operations under the sole direction and responsibility of Carlo Environmental Technologies."

ROSEMONT, IL (OCT. 25) PR NEWSWIRE - At the regular meeting of Lindberg Corp.'s (NASDAQ: LIND) board of directors today, Chairman and Chief Executive Officer George H. Bodeen announced his retirement from the position of chief executive officer of Lindberg Corp. effective Jan. 1, 1991. He will retain his position as chairman of the board.

Leo G. Thompson, currently president and chief operating officer, will assume the position of chief executive officer on that date. He has held his current position since Sept. 27, 1987.

It was also announced at the meeting that John E. Jones has been elected to the company's board of directors, effective today. Jones is chairman of the board, president and chief executive officer of CBI Industries, Inc. in Oak Brook, Ill., and also serves as a director of Allied Products Corp. and Interlake Corp. This increases the number of directors on the Lindberg board to seven.

Finally, the board of directors today also declared a regular quarterly dividend of $.07 per common share. The dividend paid in the previous quarter was $.07 per share. The dividend is payable Dec. 1, 1990 to shareholders of record Nov. 9, 1990. The company has 4,669,207 common shares outstanding.

WALTHAM, MASS. (OCT. 25) PR NEWSWIRE - MaxCom USA, Inc. announced today that it has added a document translation capability to its public electronic mail service Maxlink International.

The new capability, offered in conjunction with WORDNET, Inc. of Acton, Mass., allows Maxlink subscribers to send and receive documents via e-mail, fax or telex for translation into foreign languages.

"Maxlink users, which are primarily international enterprises, can now send documents to hundreds of subject-qualified foreign language translators, and receive their translations electronically," said Max Locatelli, MaxCom's sales manager.

WORDNET translations cost $25 per hundred words within a minimum of $50 per translation. For special projects the charges will vary depending on document length and number of target languages selected. Job estimates and volume discounts are available.

MaxCom develops and markets electronic messaging systems including the Maxlink International public service, which is available on a subscription basis from over 700 cities worldwide, and the COMET Electronic Mail system for DEC computers.

NEW ORLEANS (OCT. 25) PR NEWSWIRE - Ocean Drilling & Exploration Co. (ODECO) (NYSE: ODR) reported net income of $18,470,000, or $0.36 per common share, for

the quarter ended Sept. 30.

Such net income, which was all attributable to the company's continuing oil and gas operations, included an after-tax gain of $20,556,000, or $0.40 per common share, on the sale of a 2.125 percent interest in the Ninian field located in the U.K. sector of the North Sea. The current quarter also included a non-cash charge of $9,342,000, or $0.18 per common share, for the writedown of the carrying value of the Gaviota field, offshore Spain, as a result of a reserve study completed during the current quarter.

For the quarter ended Sept. 30, 1989, the company reported a net loss of $46,920,000, or $0.91 per common share, which included a loss from the continuing oil and gas operations of $513,000, or $0.01 per common share. The net loss for the third quarter of 1989 also included income from discontinued diving operations of $4,510,000, or $0.09 per common share, and a loss from discontinued contract drilling operations of $13,676,000 or $0.27 per common share. In addition, the quarter ended Sept. 30, 1989, included an estimated loss on disposal of the contract drilling operations of $37,241,000, or $0.72 per common share. Such amount reflected certain costs associated with the company's restructuring efforts pertaining to its contract drilling business and a $32,326,000 provision for estimated future losses of the contract drilling business from Oct. 1, 1989, through the expected completion date of restructuring.

Revenues for the quarter ended Sept. 30, 1990, were $82,370,000 compared to third quarter 1989 revenues of $55,015,000. Such revenues included oil and gas revenues of $53,921,000 ($51,758,000 in 1989), and interest and other revenues of $28,449,000 ($3,257,000 in 1989). Other revenues in the third quarter of 1990 included a pre-tax gain of $23,886,000 from the sale of the interest in the Ninian field. Exploratory expenses, including dry hole costs, were $6,788,000 in the current quarter compared with $7,790,000 a year earlier.

Drilling and related revenues of the discontinued contract drilling operations which are no longer included in the company's results of operations, totaled $39,147,000 for the third quarter of 1990 compared to $25,585,000 in the third quarter of 1989. The loss from operations totaled $5,201,000 in the current quarter compared to the $13,676,000 loss of a year ago. The third quarter of 1990 benefited from a reduction in depreciation of approximately $3,150,000 as a result of an extension in the estimated remaining useful lives of certain drilling barges.

PAOLI, PA (OCT. 25) PR NEWSWIRE - Frank S. Hermance, 41, will join Ametek Inc. (NYSE: AME) on Nov. 12 as group vice president with responsibility for the operations of the diversified manufacturer's two largest instrument businesses, according to Walter E. Blankley, Ametek's president and chief executive officer.

In this new position, Hermance will report to Roger K. Derr, the corporation's executive vice president and chief operating officer.

Hermance will work from the company's Paoli headquarters, Blankley said. Reporting to Hermance as group vice president will be Ametek's U.S. Gauge division headquartered in Sellersville, Pa., and the company's Aerospace Products Inc. subsidiary in Wilmington, Mass. Together these businesses employ more than 2,500 people and are the largest components of Ametek's $300 million (annual sales) Precision Instruments group.

Hermance moves to Ametek from Tektronix, of Beavertown, Ore., where he was manager of several instrument divisions and most recently served as general manager of that company's largest operation, the Waveform Measurement division the world's leading oscilloscope producer with about half of its sales to customers outside of the United States.

Previous to that Hermance was senior vice president of operations for Combustion Engineering's Taylor Instrument Co., in Rochester, N.Y. A native of Kingston, N.Y., he joined Taylor Instrument as an engineer after earning an undergraduate degree in electrical engineering from Rochester Institute of Technology in 1971 and two years later was awarded a master's degree in electrical engineering from the same school. Hermance was named vice president of engineering at Taylor Instrument in 1981 and later served as vice president of engineering and marketing before becoming senior vice president in 1983.

He and his wife, the former Cheryl Donahue, have a son, David, who is a graduate student at Oregon State University.

Ametek, a Fortune 500 industrial manufacturer listed on the New York Stock Exchange since 1930, has 20 plants in the Unites States and four in Europe which produced sales last year of $588 million.

#90298p9713 10/25/1990 ~PR Newswire

EVANSVILLE, IND. (OCT. 25) PR NEWSWIRE - American General Finance, the nation's fifth largest consumer finance company, today announced record third quarter earnings of $31.7 million. This represents a 55 percent increase over 1989 third quarter earnings of $20.5 million. This strong third quarter performance follows a record for earnings established in the second quarter. Total net income for the nine-month period was $89.4 million compared with $64.2 million during the same period of 1989 -- an increase of nearly 40 percent.

Roy W. Haley, president and chief executive officer, said he believes the record results are directly attributable to continuous improvement in customer improvement in customer service: "We're listening to customers nationwide, understanding the unique qualities of different market segments, and developing needed products and services. And consumers are responding."

Outstanding receivables for the quarter and year-to-date 1990 increased when compared with the same periods in 1989, and continued growth is expected. The credit quality of the total loan portfolio has also improved, reflecting sound lending practices and high stability in the company's customer base.

"These achievements are the result of effective marketing and operational control," Haley said. "We are encouraged by the positive trends and strong operating results, since the industry typically shows its strongest performance in the fourth quarter of the year."

American General Finance, headquartered in Evansville, Ind., operates a branch network of nearly 1,200 offices in 42 states, Puerto Rico and the Virgin Islands. The company, a subsidiary of American General Corporation (NYSE: AGC) of Houston, provides nearly two million customers with consumer and home equity loans; indirect retail financing; life, health, and property insurance; and credit card services.

#90298p9718 10/25/1990 ~PR Newswire

TORONTO (OCT. 25) PR NEWSWIRE - Fahnestock Viner Holdings Inc. today reported

the following third quarter and nine month results:

FAHNESTOCK VINER HOLDINGS INC.
(Unaudited -- expressed in thousands of US$)

	Third quarter		Nine months	
Periods ended Sept. 30;	1990	1989	1990	1989
Revenue	$ 22,731	$ 21,052	$ 64,703	$ 63,503
Net profit	$ 530	$ 1,741	$ 1,801	$ 3,890
Net profit per share	$ 0.05	$ 0.15	$ 0.16	$ 0.35

Earnings for the nine months ended Sept. 30, 1990 were US$1,801,000 or 16 cents per share, compared to US$3,890,000 or 35 cents per share for the corresponding period in 1989.

Third quarter earnings for 1990 were US$530,000 or 5 cents per share compared to US$1,741,000 or 15 cents per share in 1989.

The results for 1990 include the operations of the ten B.C. Christopher branches since their acquisition on March 26, 1990.

Trading volumes in the U.S. securities markets are at a very low level. The current uncertainties about the resolution of the Mid-East crisis, recessionary worries about the U.S. economy, and the failure of Congress in the United States to pass a budget have left the marketplace in the doldrums since the end of August 1990. Until these issues are resolved, the company does not see an end to the low volumes presently encountered.

With the addition of the branches acquired from B.C Christopher, the company has maintained its overall revenue base in these difficult economic times. The larger network is in place, operating smoothly, and poised to take advantage of any breaks the market offers.

Effective Oct. 17, 1990, the company became fully registered on the same basis as a U.S. domestic company with the SEC and will file reports on Forms 10-K and 10-Q.

#90298p9719 10/25/1990 ~PR Newswire

NEW YORK (OCT. 25) PR NEWSWIRE - Citibank said today that its Card Acceptance Services unit is introducing a new service that provides businesses nationally with faster authorizations on credit card transactions, while reducing chargebacks and fraud associated with card purchases.

The product, called DirectSolutions, is designed to increase the number and

speed of credit card transaction approvals and sales for direct mail companies catalog retailers, and businesses in repetitive billing industries. It also provides a wide range of authorization, settlement, and information services on transactions paid for by customers with credit cards.

DirectSolutions will be officially introduced at the Direct Marketing Association Annual Conference and Exhibition held in San Francisco beginning on Oct. 28.

"Companies need fast, accurate, and convenient card processing. They also need innovative services to reduce the impact of fraud and chargebacks," said Bruce M. Weber, president of Citicorp Card Acceptance Services (CAS). "We deliver against these important needs through DirectSolutions -- a system designed to help our clients increase their card transaction approvals and, ultimately, their profitability. It's programs like DirectSolutions that specifically address a business's requirements, plus our commitment to service excellence, that set Citibank apart from the competition."

The Key benefits of the totally automated DirectSolutions services, Mr. Weber pointed out, are fast and immediate authorizations, improved address verification systems and enhanced chargeback protection "expert system" programs aimed at cutting down on reversed credit card transactions. This includes advance notification of potential chargebacks and automated tracking, analysis, and reversal of incoming chargebacks.

Through DirectSolutions, clients obtain access to Citibank's 29 million cardholders by publishing their customer service telephone numbers on the cardholder's billing statement. This service can help further reduce chargebacks and increase sales.

Other features of DirectSolutions include enhanced settlement, deposit, and funds availability, customized management reports and analysis, and a wide variety of networking capabilities.

CAS provides a full range of credit card processing services, including support for all Visa, MasterCard, Diner's Club, Carte Blanche, Discover and American Express, as well as check guarantee services. Headquartered in Melville, Long Island, CAS has operating and customer service facilities in Hagerstown, Maryland and Sioux Falls, South Dakota.

#90298p9720 10/25/1990 ~PR Newswire

MT. HOLLY, NJ (OCT. 25) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) today announced a loss for the second quarter ended Sept. 30, 1990, of $1,802,000 or $.27 per share compared with earnings of $1,355,000

or $.20 per share for the same quarter one year ago.

Sales were $17,726,000, 18 percent lower than sales of $21,515,000 reported in 1989. For the six months ended Sept. 30, 1990, sales were $29,762,000, 8 percent lower than those of $32,289,000 for the comparable period last year. The company lost $4,580,000 for the six months, or $.70 per share, as compared with earnings of $134,000 or $.02 per share in the same period last year.

Morton E. David, Franklin's chairman, said, "The lower level of sales was caused in part by the sluggish economy and in part by retailers, maintaining lower inventory levels and postponing their purchase of Christmas merchandise until later in the season. The company's losses include charges of $790,000 in connection with the consolidation of four facilities into one."

David also stated, "Franklin met its goal to place its inventories in line by the end of the September quarter. Our inventories decreased to $12,200,000 at September 30 from $25,300,000 a year ago. The company now stands poised to reap the benefits of higher gross margins. With new, cost reduced products now being produced, we feel that we can return to profitability in the second half of our fiscal year."

Franklin publishes a library of 20 hand-held electronic reference products with more than 3 million sold throughout the world, including the popular Spelling Ace(R) spelling corrector, Language Master(TM) electronic dictionaries, and Wordmaster(R) electronic thesauruses. Franklin's publication list is being broadened to include hand-held electronic versions of "The Columbia Concise Encyclopedia" and "Bartlett's Familiar Quotations."

#90298p9721 10/25/1990 ~PR Newswire

DOWNEY, CA (OCT. 25) PR NEWSWIRE - Rockwell International Corp.'s (NYSE: ROK) Space Systems Division (SSD) has been named a recipient of the National Aeronautics and Space Administration's (NASA) 1990 George M. Low Trophy, the federal space agency's highest industry performance award.

Presenting the award Wednesday at the Seventh Annual NASA/Contractors Conference in Grenelefe, Fla., NASA Deputy Administrator J.R. Thompson Jr., said the trophy was given in recognition of Rockwell SSD's "exceptional performance in attaining a level of quality and productivity that commands our respect and deep appreciation." Rockwell SSD is prime contractor for NASA's Space Shuttle orbiters and is involved in the design, development, production and integration of other manned and unmanned space vehicles and supporting hardware for NASA and the Department of Defense.

Accepting the award on behalf of the division and its subcontractor and supplier partners, Rockwell SSD President Robert G. Minor called the honor a significant milestone in the division's history. "Since the inception of the space program, Rockwell has been a pacesetter in support of NASA manned space technology and operations," he said. "We are tremendously honored to receive this recognition from NASA, and know that it will serve as a catalyst for further quality and productivity gains in support of America's space objectives. I'm proud of the thousands of people whose contributions have made this prestigious honor possible."

The George M. Low Trophy, formerly known as the NASA Excellence Award for Quality and Productivity, recognizes NASA prime contractors, subcontractors and suppliers for outstanding achievement in quality and productivity improvement and Total Quality Management (TQM). The award is designed to institutionalize quality and productivity practices and TQM processes throughout NASA and its contractors and to transfer performance improvement methods of the award recipients to others.

Nine finalists were selected to compete for the 1990 award. Finalists were chosen by NASA's Excellence Award Evaluation Committee following a six-month application and review process. Validation teams then visited finalists' facilities to verify performance and process achievements.

Marotta Scientific Controls Inc., Montville, N.J., also received the award in the newly established small business category.

Rockwell SSD is headquartered in Downey and has major facilities in Houston; Huntsville, Ala.; and Cape Canaveral, Fla., supporting NASA's Johnson Space Center, Marshall Space Flight Center and Kennedy Space Center, respectively. Other SSD facilities are located in Palmdale and Bell, Calif.; and at the John C. Stennis Space Center, Miss. Total division employment is approximately 12,000.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

#90298p9723 10/25/1990 ~PR Newswire

NEW YORK (OCT. 25) PR NEWSWIRE - ASARCO Incorporated (NYSE: AR) today reported net earnings of $59,399,000 or $1.43 per common share, for the third quarter ended September 30, 1990, compared with net earnings of $52,717,000, or $1.25 per share, for the third quarter of 1989.

Sales of products and services were $594,280,000 in the third quarter of 1990, compared with $522,254,000 in the same period of 1989.

For the nine-months ended Sept. 30, 1990, Asarco reported net earnings of $145,365,000, or $3.50 per share, compared with net earnings of $172,052,000, or $4.08 per share, in the comparable period in 1989.

Sales of products and services for the first nine months of 1990 were $1,658,659,000 compared with $1,679,747,000 in 1989.

The increase in sales in the 1990 third quarter, compared with those of the prior-year period, was the result of higher prices and volumes for copper and lead despite lower prices for silver. Net earnings for the 1990 third quarter compared favorably with those of the prior-year period due both to higher prices in the quarter for copper and lead and to $6.4 million net after tax of non-recurring charges taken in the 1989 third quarter. Earnings in the current quarter were also affected by lower silver prices and to a lesser extent by higher costs at its Ray Mine in Arizona, whose production was affected by adverse weather conditions in July and August and a three-week labor strike in July.

Commenting on third-quarter earnings, Richard de J. Osborne, chairman, president and chief executive officer of Asarco said, "The company's results in the 1990 third quarter reflect good operating performance and good demand for the base metals we produce. Market demand for copper, lead and zinc remained strong in the quarter despite some economic weakness in certain of the industries we serve. We see continued strong demand for our products for the balance of the year."

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

ALLENTOWN, PA. (OCT. 25) PR NEWSWIRE - Joseph C. Krum of Lancaster, vice president of Pennsylvania Power & Light Co.'s (NYSE: PPL) Lancaster division, has been appointed senior vice president-division operations, effective Nov. 12, the company announced today.

He will succeed Bruce D. Kenyon who has resigned as senior vice president-division operations, effective Nov. 9, to become president and chief operating officer of South Carolina Electric & Gas Co. in Columbia, S.C.

Krum will be succeeded by Alden F. Wagner Jr. of Willow Street, superintendent of plant-Holtwood operations.

As senior vice president-division operations, Krum will be a member of PP&L's corporate management committee. He will report directly to William F. Hecht, executive vice president-operations. Wagner will report to Krum.

As head of division operations, Krum will have the overall responsibility for the company's operating, marketing and economic development and customer services functions.

Wagner, as head of the Lancaster division, will have responsibility for the marketing and economic development, customer service and operating functions in a 1,200 square-mile division areas that takes in all of Lancaster County and parts of Berks, Chester, Lebanon and York counties.

He will have overall responsibility for nearly 365 employees who provide quality electric service to about 200,000 customers.

PP&L supplies electric service to a 10,000-square-mile area of 29 counties of Central Eastern Pennsylvania. Among the communities it serves are Allentown, Bethlehem, Harrisburg, Hazleton, Lancaster, Scranton, Wilkes-Barre and Williamsport.

#90298p9728 10/25/1990 ~PR Newswire
KEARNY, NJ (OCT. 25) PR NEWSWIRE - Goody Products, Inc. (NASDAQ: GOOD) today reported a significant improvement in net earnings on a slight decline in sales for the third quarter ended Sept. 30, 1990. The company achieved net earnings in the 1990 third quarter of $380,000, equal to $.06 per share, versus a year earlier third quarter loss of $992,000 or $.15 per share. Third quarter net sales were $52,246,000 compared with $53,753,000 in the similar 1989 period.

For the first nine months of 1990, net sales were $174,909,000 with resultant net income of $4,301,000 or $.66 per share. This compares with net sales of $180,239,000 and net earnings of $2,345,000 or $.36 per share for the first nine months of 1989.

Leonard Goodman, chairman and chief executive officer, said that, as was the case in the second quarter, gross margins improved significantly despite lower sales, reflecting a combination of reduced factory costs and higher selling prices. The small decline in third quarter sales can primarily be attributed to soft economic conditions which resulted in cautious purchasing by retailers. "Not only did we witness this in the United States, but our Goody Canada subsidiary also experienced a decline in sales," Goodman said.

Goodman also noted that interest expense declined in the three month period due to the success of Goody's inventory reduction programs which resulted in a lower level of borrowings. Moreover, interest income rose as a result of the company's short term liquid investments.

Goody Products, Inc. is engaged in the design, manufacture and marketing of a wide variety of hair accessories and owns and operates three additional consumer products subsidiaries and divisions; Opti-Ray, a designer and marketer of high quality fashion sunglasses; Ace Comb, a manufacturer of premium, quality hard rubber combs and Pretty Neat Products, a producer of plastic cosmetic organizers.

COSTA MESA, CA (OCT. 25) PR NEWSWIRE - Irvine Sensors Corp. (NASDAQ: IRSN) announced today the receipt of a $2,575,000 contract award from the U.S. Army Strategic Defense Command, Huntsville, Ala., to demonstrate advanced technology for a new generation of Kinetic Energy Weapon (KEW) homing guidance sensors. The Army contract award is a 33-month follow-on to earlier work performed by Irvine under Small Business Innovation Research ("SBIR") programs funded by the Strategic Defense Initiative Organization ("SDIO"), Innovative Science and Technology Office.

The objective of this new effort is to demonstrate a small, lightweight infrared guidance sensor for a "hit-to-kill" missile which is a homing interceptor. Such an interceptor must detect its target as early as possible and process a rapid series of "looks" at that target within the last few seconds of the missile's flight. Very high data rates are required during the "end game" homing in order to achieve enough terminal guidance accuracy to destroy the target by impact rather than blast effects. Irvine plans to demonstrate technology on the Army program which could both allow the target to be recognized earlier and marketedly increase the number of "looks" that can be processed by the interceptor.

Irvine's approach to extending the target recognition range involves the use of an innovative technique called "Dynamite Stare" which permits motion discrimination directly on a sensor's focal plane. Such a discrimination provides for earlier recognition of a target's motion against background clutter and adds valuable time to the interceptor's terminal guidance phase maneuver.

To improve processing speed and accuracy during the terminal guidance phase itself, Irvine plans to use its pioneering technology for stacking integrated circuits to package over 16,000 signal processing channels directly on the sensor's focal plane in a volume about the size of a sugar cube. Each of these channels will continuously amplify, interpret and digitize the output of a separate detector element. This massively parallel architecture is similar to the computational approach utilized by modern supercomputers. The technique will allow the missile sensor to saturate its field of view with virtually continuous coverage and rapidly isolate those detector elements which are viewing the target. The speed of this process is far faster than conventional off-focal plane processing and is the fundamental reason for the improved terminal accuracy possible with Irvine's approach.

Irvine Sensors, headquartered in Costa Mesa, is primarily engaged in the development of infrared devices and high density packages of computer electronics which are intended to have broad applications in military and commercial systems.

#90298p9736 10/25/1990 ~PR Newswire
MINNEAPOLIS (OCT. 25) PR NEWSWIRE - Michael Foods (NASDAQ: MIKL) today announced record earnings for the third quarter ended Sept. 30, 1990. Net earnings were $4.5 million, or $.40 per share, as compared with $3.1 million, or $.28 per share, reported in 1989's third quarter. This represented a 43 percent increase in earnings. Net sales rose to $112.4 million from $65.5 million in the previous year's third quarter.

Nine month results were also at record levels. Net earnings rose 74 percent for the nine months ended Sept. 30, 1990, standing at $13.9 million, or $1.25 per share, versus $8.0 million, or $.70 per share, in the same period in 1989. Net sales were $345.0 million versus $178.7 million.

Richard G. Olson, president and chief executive officer, said that sales and earnings were up in all divisions and that the company's Easy Eggs(TM) plant continues to operate profitably. "Our strategies are working," Olson said. "We are definitely seeing the benefits of having consolidated all of our egg businesses earlier this year and we continue to improve our position as a low-cost operator.

"In both our refrigerated distribution division and our potato division we have introduced new products and we are achieving broader geographic sales coverage every quarter. We are also beginning to realize the effects of a good 1990 potato harvest," Olson continued. "Our dairy division operated near capacity during the summer months and we are seeing the benefits from new products in this business as well.

"While we are gratified by the strong results for the first nine months, our strategic focus continues to be on building for the long- term, which we believe will produce the greatest returns for our shareholders."

1990 results reflect the consolidation of the Milton G. Waldbaum Company, as Michael Foods acquired the second half of Waldbaum in the first quarter. During 1989, half of Waldbaum's earnings were recorded within Michael Foods on

the equity basis. Pro forma sales for last year's third quarter and first nine months would have been $97.1 million and $275.1 million, respectively, if Waldbaum had been wholly owned in those periods.

Additionally, the Michael Foods board of directors today unanimously passed a resolution raising the company's regular quarterly cash dividend from $.05 per share to $.075 per share. The new annualized dividend rate is $.30 as compared to the previous $.20 level. The dividend declared today is payable Nov. 19, 1990 to shareholders of record as of Nov. 5, 1990.

Michael Foods is a diversified food processor and distributor with particular interests in eggs and egg products, refrigerator case products, frozen and refrigerated potato products, and dairy products, including ultrapasteurized ice milk mix, milk and specialty products. Subsidiaries include the Milton G. Waldbaum Company, Crystal Foods, Inc., Northern Star Company, Kohler Mix Specialties, Inc., Morning Glory Eggs, Inc., Wisco Farm Cooperative, Farm Fresh Foods, Inc., Drallos Potato Co., Inc., Country Queen, Inc. and Reddi Egg America, Inc.

SEATTLE (OCT. 25) PR NEWSWIRE - Air China took delivery today of its first widebody freighter, a Boeing 747-200F, Boeing Commercial Airplane Group announced.

Air China Vice President Yan Shi An accepted the plane during delivery ceremonies at Boeing headquarters in Seattle for Boeing's headquarters.

The airline will use the world's largest commercial cargo plane to transport textiles, apparel and other goods from Beijing to Los Angeles, San Francisco, London, Paris and Hong Kong, Yan said. Return flights will carry computers and other electronic items, he added.

The Boeing 747-200 freighter can transport up to 111,500 kilograms of cargo 6,500 kilometers (or lesser amounts more than 10,000 kilometers). Nose-up entry and side cargo doors enable easy loading and unloading of pallets and containers. In addition, the fuselage is environmentally controlled for transport of live animals, perishable foods or temperature-sensitive electronic goods.

Nearly 50 airlines fly Boeing 747 freighters and combination passenger/cargo super jets.

Air China currently operates six 747 combi aircraft, including three new 747-400 combis, the first of which was delivered in October of last year.

"We believe, on the basis of using combis in the past, that we can utilize the all-cargo freighter very well," Yan explained.

He added that Boeing management "up and down the organization" has been extremely helpful during the delivery process.

Boeing has been a partner with China in commercial aviation since 1972, when the Civil Aviation Administration of China (CAAC) ordered 10 Boeing 707s. China since has ordered more than 100 Boeing jets, nearly two-thirds of which have been delivered. On May 31, CAAC placed its largest Boeing order--for 36 aircraft with options for 36 more. Included in the $4-billion(U.S.) order are five advanced-technology 747-400s, four widebody 767-300s, 13 757s and 13 737-300s.

#90298p9741 10/25/1990 ~PR Newswire

NEW YORK (OCT. 25) PR NEWSWIRE - Lufthansa German Airlines will operate close to 400 flights weekly out of Berlin starting Sunday in its first Berlin timetable in 50 years, the airline announced today. The airline will offer a total of 386 domestic and international connections to the city that has once again become the capital of a unified Germany.

Lufthansa will fly from Tegal Airport in western Berlin to eight German and 12 European cities, and it will fly from Schoenefeld Airport in eastern Berlin to New York (Newark), Tokyo and Moscow.

For more than four decades, Allied regulations have barred the German flag carrier from flying to the city where it was founded in 1926. Lufthansa's chairman, Heinz Ruhnau, recently thanked all those who have helped pave the way for Lufthansa's return to Berlin.

On the German domestic network, Lufthansa will link Berlin with the following cities: Hamburg (Monday to Friday five flights daily/31 connections weekly); Dusseldorf (six flights daily/38 connections weekly); Cologne/Bonn (eight flights daily/51 connections weekly); Frankfurt/Main (16 flights daily/102 connections weekly); Nuremberg (two flights daily/11 connections weekly); Stuttgart (three flights daily/19 connections weekly); Fredrichshafen (one flight daily/five connections weekly) and Munich (five flights daily/32 connections weekly).

Altogether in the 1990-91 winter timetable, Lufthansa will offer 289 weekly connections in and out of Tegal Airport. From Monday through Friday, 46 German domestic connections with Berlin will be available daily in the new timetable.

On intra-Eruopean routes, Lufthansa will have direct flights to Tegel from Helsinki (three connections weekly); Stockholm (four); London-Gatwick (12); Brussels (17); Paris-Charles De Gaulle (12); Basel (10); Zurich (five); Vienna (five); Milan (seven); Barcelona (three) and Madrid (four). There will also be daily flights to Moscow from Schoenefeld Airport. In all, Lufthansa will link Berlin 89 times weekly with other European cities.

Lufthansa's daily flights between Berlin and the United States will operate from Newark International Airport beginning Oct. 28. In the winter timetable, the flight will operate four times weekly via Hamburg and three times weekly via Cologne/Bonn Airport. In April 1991, the flight will become non-stop. Lufthansa's other intercontinental route from Berlin will be a weekly Boeing 747 flight to Tokyo.

Initially, some of these Berlin flights will be flown by Pan Am and EuroBerlin on behalf of Lufthansa.

Further information on flights and fares is available from travel agents or by calling Lufthansa at 800-645-3880 or 718-895-1277.

#90298p9751 10/25/1990 ~PR Newswire

CALHOUN, GA (OCT. 25) PR NEWSWIRE - Horizon Industries, Inc. (NASDAQ: HRZN) today announced unaudited results for the fourth quarter and twelve months ended Sept. 29, 1990. For the quarter net sales were $77,126,000 which represents a 2.2 percent decrease from the $78,883,000 recorded in the prior year's fourth quarter. The company returned to profitability in the quarter with net earnings of $860,000, or $.16 per share, compared to $855,000, or $.16 per share, in the same period last year.

For fiscal year 1990 sales were $306,006,000 representing a 1.4 percent increase over fiscal year 1989's net sales of $301,718,000. Net losses for the year were $1,543,000, or $.28 per share. For fiscal 1989, net earnings were $5,111,000, or $1.10 per share. At Sept. 29, 1990 Horizon's book value was $10.11 per share.

Commenting on the results, Peter R. Spirer, chairman, stated, "We are pleased to report that in its fourth fiscal quarter, Horizon returned to profitability with the most significant progress made in residential carpet operations. Consolidated pretax profit for the fourth quarter was $1,645,000 compared to $1,069,000 for the previous year's fourth quarter, underscoring the real strength of the turnaround. Looking ahead, we expect the current weak economic climate to make the winter selling season more difficult. Accordingly, we are taking the necessary actions to further reduce costs and generate profitable sales."

Horizons Industries, Inc. manufactures a broad range of residential and commercial carpets marketed through specialty retailers, department stores, design centers, and wholesale distributors. The company also manufactures specialized lines of commercial carpets for the corporate, hospitality and institutional markets through its subsidiary, The Harbinger Company, Inc.

#90298p9753 10/25/1990 ~PR Newswire

FORT LAUDERDALE, FL (OCT. 25) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX), announced today that revenues for the third quarter ended Sept. 30, 1990 were $16,056,000 compared to $17,561,000 for the corresponding 1989 period. The company reported a net loss for the third quarter of ($576,000), equivalent to ($.03) per share, compared to net income of $779,000 or $.05 per share, for the comparable period in 1989.

In the third quarter of 1990, the company had a loss from operations of ($708,000) as compared to $1,125,000 of income from operations during the comparable 1989 period. This decline is attributable to an 8.6 percent decrease in sales, lower gross profit margins resulting primarily from the effects of fixed manufacturing expenditures, and a 6.8 percent overall increase in operating expenses.

For the nine month period ended Sept. 30, 1990, Telematics reported a 10.2 percent increase in revenues to $48,728,000 from $44,227,000 for the corresponding 1989 period. The net loss was ($1,020,000), or ($.06) per share compared to a net loss of ($8,215,000), or ($.49) per share, which included a $3,518,000 unusual charge in the second quarter of 1989 related to the write-off of the company's investment in Globenet and a loss from equity investments of $1,382,000. The loss from operations of ($955,000) for the nine month period ended Sept. 30, 1990 is down from a ($4,470,000) loss during the comparable 1989 period.

William A. Hightower, president and chief executive officer, stated, "To date, 1990 domestic sales are up 41 percent, operating losses have been reduced by $3.5 million and net losses reduced by $7.2 million as compared to the nine month period in 1989." He added, "The company's cash flow position continues to improve with a $3.0 million increase in cash, up to $10.1 million, and a $1.1 million decrease in debt, down to $5.9 million from Dec. 31, 1989."

Additionally, Hightower said, "In support of the company's objectives of improving long-term profitability and increasing shareholder value, Telematics is in the process of reducing spending in many aspects of business and reducing its workforce by approximately 15 percent. Although we expect a short-term impact from repositioning the company that will include a charge in the fourth quarter for anticipated expenses, we believe these actions will lower Telematics' cost of doing business longer-term and are key to the company's improvement in the future."

Founded in 1982, Telematics designs, manufactures and markets computer systems and software products designed specifically for voice and data communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and

switches, T1 multiplexers, and frame relay switches. Headquartered in Fort Lauderdale, Fla., Telematics also has facilities in Calabasas and San Mateo, Calif.; Herndon, Va.; Seminole, Fla.; New York; Houston; Chicago; Altanta; Basingstoke, England; Paris; Frankfurt, Germany.

DETROIT, (OCT. 25) PR NEWSWIRE - Quest BioTechnology, Inc., (NASDAQ: QBIO) announced today that its wholly owned subsidiary, PolyCell, Inc., has received payment by a leading Japanese pharmaceutical company to non-exclusively license the QUADROMA(TM) technology in the area of thrombolytic therapy, for the reduction of blood clots through fibrinolysis.

Under the agreement, PolyCell may receive additional milestone payments and royalties on product sales. Sumitomo Corporation of Japan, PolyCell's agent and distributor, represented PolyCell in the transaction. Sumitomo continues to seek additional strategic alliances for product development of the QUADROMA technology.

Each year, in the United States alone, there are about 1.5 million heart attacks causing 500,000 deaths. It has been estimated that current thrombolytic therapy has the potential to save over 100,000 lives annually. The use of PolyCell's bispecific monoclonal antibody technology to effectively target fibrinolytic agents such as tissue Plasminogen Activator ("t-PA"), streptokinase or urokinase, to the site of blood clots has been shown to enhance the fibrin binding of these agents, resulting in improved fibrinolysis and a reduction in the size of the blood clot. Studies have also indicated the QUADROMA technology may enable the use of decreased doses of fibrinolytic agents, thereby reducing potential side effects and costs.

"This agreement represents our first alliance with a leading Japanese pharmaceutical company for the development of a therapeutic product and represents a major achievement in our program to commercialize the QUADROMA technology, in the field of cardiovascular therapy," said Jayson D. Pankin, chairman and president of PolyCell and vice president of Quest.

PolyCell, Inc. is a development stage company organized to develop and commercialize the proprietary QUADROMA technology which biologically produces bispecific monoclonal antibodies primarily for cancer, cardiovascular and autoimmune disease therapy and diagnostics applications. PolyCell has corporate relationships with Cetus Corporation, Centocor, Inc., Medicorp, Inc. Sumitomo Corporation and MCA Development BV.

Quest BioTechnology, Inc. is a development stage company organized to acquire, develop and commercialize biotechnology and human health care products and processes. Quest is organized into two groups: the Technology Development Group, which manages Quest's two wholly owned subsidiaries, PolyCell and Quest Blood Substitute, Inc.; and the Clinical Diagnostics Group, formed to

implement turnarounds of diagnostic-based businesses.

#90298p9758 10/25/1990 ~PR Newswire

MARIETTA, GA (OCT. 25) PR NEWSWIRE - Healthdyne Inc. (NASDAQ: HDYN) announced today that its revenues increased 25 percent in the third quarter of 1990 to $34.8 million, with a 47 percent increase in earnings to $2.2 million, or $0.14 per share, from $1.5 million, or $0.09 per share, for the same period in 1989.

Performance for the nine months ended Sept. 30 was also up substantially with earnings of $7.3 million, or $0.45 per share, on revenues of $100 million, compared to earnings of $1.8 million, or $0.11 per share, on revenues of $74 million during the first nine months of 1989.

Home Nutritional Services ("HNS"), the 66 percent-owned home infusion therapy subsidiary of the company, had net earnings for the third quarter of $2.1 million on revenues of $21 million, compared to net earnings of $1.8 million on revenues of $17 million in the third quarter of 1989. Healthdyne Technologies continued its strong performance with a 28 percent increase in revenues for the quarter to $8.3 million and a 27 percent increase in operating earnings to $1.1 million over the same quarter in 1989. As previously announced, Healthdyne Perinatal Services launched a new product and service during the third quarter for the care of pregnant women who suffer from hypertension. The expenses associated with the national introduction of this service contributed to an operating loss of $1.67 million for the quarter compared to a loss of $590,000 during the third quarter of 1989, despite a 56 percent increase in revenues during the quarter. Hypertensive patients previously were treated only through hospitalization, but with the use of the new Healthdyne product approved for marketing by the FDA in late July, Healthdyne Perinatal Services becomes the first national company to care for these patients in the home, which offers substantial savings to the health care system and an increase in comfort to the patient.

Parker H. Petit, chairman and chief executive officer of Healthdyne stated: "Although HNS had a shortfall in their September revenues, we feel that this is only a temporary matter that is not related to infusion therapy industry issues. The home infusion therapy industry is a major contributor to reducing overall health care costs, and HNS will be introducing new and alternate site therapies in 1991 which have not previously been utilized. Therefore, we feel very good about the outlook for HNS. In addition, we expect the growth rate of our Perinatal Services Division in 1991 to increase because of the recent introduction of our new product and services for treating pregnancy induced hypertension. This division now has the capabilities to serve two distinct pregnancy related problems -- preterm delivery and pregnancy induced

hypertension. Although the national introduction of the hypertension program increased expenses in the third quarter, we have noted a recent rapid increase in the rate of patient adds and revenues in this division. We are committed to entering 1991 with this division in a profitable mode."

Healthdyne is a national provider of high technology home care medical services, including infusion therapy through its partially owned subsidiary, HNS, and home obstetrical care through its Perinatal Services Division, and a manufacturer of high tech home care products through its Healthdyne Technologies Division.

SAGINAW, Mich. (OCT. 25) PR NEWSWIRE - Garb-Ko, Inc., a Michigan company since 1969, headquartered in Saginaw, will continue to own and operate 7-Eleven stores throughout most of Michigan, despite the recent financial reorganization of the Southland Corporation.

Garb-Ko manages and develops a network of 160 7-Eleven stores in Michigan, Ohio, Indiana and Kentucky. In most of its stores, Garb-Ko is in partnership with a franchisee who lives in the community where the store is located.

Garb-Ko and its franchisees operate all the Michigan 7-Eleven stores outside the Detroit metropolitan area, including Flint, Saginaw, Bay City, Grand Rapids, Lansing, Traverse City, Alpena and the many cities and towns in between.

"We want our customers to know that when they shop at 7-Eleven, they're supporting Michigan business as well as the franchisees within their communities," said Ron Fountain, Garb-Ko director of marketing.

Garb-Ko is a licensee of the Southland Corporation and is not affected by Southland's current restructuring efforts. Garb-Ko will continue to develop stores in Michigan and other midwestern states.

"This will not affect the operation of Garb-Ko 7-Eleven stores," said Fountain. "We've been a Michigan business for 20 years and plan on being here a long time."

RESTON, VA (OCT. 25) PR NEWSWIRE - Barbara J. Allen has been promoted to the position of director, risk management of DynCorp (NASDAQ: DYNPP), a professional and technical services firm headquartered in Reston.

Allen has been with DynCorp since February 1988 as the assistant manager of the Risk Management Department. She replaces James A. Stuart who is currently on medical leave of absence.

Prior to joining DynCorp, Allen spent five years at the Harris Corporation, Government Electronic Systems Division, as an administrative planner, working on such programs as TDRSS, the Galileo Space Telescope, the shuttle, B-1B and FEMA. Following her employment at Harris, Allen spent two years at Planning Research Corporation (PRC) as the risk administrator.

According to DynCorp President and Chief Executive Officer Dan R. Bannister: "We are pleased to welcome Barbara as a member of our corporate management team. She combines a strong government contracting background with experience in the insurance field and I am certain that in her new position she will prove to be a valuable asset as we position the company for the future."

With more than 18,000 employees, DynCorp is one of the largest employee-owned firms in the nation, serving a variety of customers in the government and commercial aviation industries.

TORONTO (OCT. 25) PR NEWSWIRE - Minera Rayrock Inc. (Toronto: MRN) announced today that Westlake Industries Ltd. (Vancouver: WLK) shareholders have approved the plan of arrangement to merge with Minera.

Under the arrangement, Westlake will amalgamate with a wholly owned subsidiary of Minera and Westlake shareholders will receive 11 Minera shares for every 20 shares of Westlake held. No fractional shares will be issued. Final court approval will be sought on Oct. 29. Subject to receipt of the necessary approvals, it is anticipated that the arrangement will be completed on or about Oct. 31.

Minera Rayrock Inc. is an exploration and mining development company active in Chile and Costa Rica. It currently has two advanced projects being evaluated for mine development -- the Ivan copper property in northern Chile and the Bellavista gold-silver property in Costa Rica.

#90298p9769 10/25/1990 ~PR Newswire

JOHNSTOWN, PA (OCT. 25) PR NEWSWIRE - BT Financial Corp.'s (NASDAQ-NMS: BTFC) third quarter of 1990 ended with continued growth and outstanding performance, the company announced today.

Consolidated net income for the three months was $1,834,000, an increase of

17.04 percent compared with the $1,567,000 earned for the same period the previous year.

For the nine months ended Sept. 30, 1990, net income was $5,330,000, an increase of 31.44 percent compared with the $4,055,000 earned in the same period last year. Net income per share increased from $.51 to $.61 or 19.61 percent for the third quarter and from $1.31 to $1.76 or 34.35 percent for the nine months.

The weighted average number of shares outstanding for the three-month period ended Sept. 30, 1990, decreased 89,795 to 2,997,693 and for the nine-month period decreased 60,624 to 3,026,864. The decreased weighted average number of shares outstanding is a result of BT Financial Corp.'s plan to repurchase up to 100,000 shares of common stock from time to time in the open market at prevailing prices. The per share data reported for the third quarter and for the nine months partially reflects the effect of the decrease in the weighted average number of shares outstanding.

BT Financial Corp. has worked diligently to produce good clean assets, maintain net interest margin and adequate reserves against unknown losses. At a time when most banking organizations are making major additions to their reserves for loan losses, BT Financial Corp. believes its reserves are ample to absorb any potential losses from the present loan portfolio. Furthermore, in relation to their peer group, the restructured and non-accrual loans remain low. In order to maintain an adequate net interest margin, BT Financial Corp. has avoided purchasing jumbo time deposits, which result in a planned program of asset reduction but greater profitability. When the economy permits, it will once again renew its emphasis on the jumbo time deposit gathering process.

During the third quarter, the conversion to new banking application software was completed. As a result of this action, BT Financial Corp. is consolidating the operations, data processing and customer accounts programs, which will provide increased service and product capabilities. The reorganization also is expected to provide ongoing effective control of operating expenses. On Oct. 1 1990, the Cherry Tree Office of Fayette Bank and Trust Co., located at Route 21, South Union Township, Uniontown, Pa., opened for business. The branch office of Laurel Bank, located at Route 286, White Township, Indiana, Pa., will be available for occupancy sometime in the fourth quarter. The extension of these BT Financial Corp. offices will enhance their ability to provide convenient personal banking services in their market area. BT Management Trust Co., the trust affiliate, continues to provide innovative trust and investment management services. As indicated in the Consolidated Statement of Income, the increased net income of this corporation is substantial.

To continue the ability of BT Financial Corp.'s affiliates to be market driven they have developed business and product development programs to support the corporation's proven sales culture and array of products and services. BT Financial Corp. will continue to effectively apply expense controls which are

hallmarks of its organization, and as always, will remain committed to quality customer service, improved profitability and the enhancement of shareholder value.

BT Financial is pleased with a positive research report on its corporation as published by Robert Kanters, analyst, Legg, Mason, Wood, Walker, Pittsburgh, on Sept. 25, 1990. A copy of the report was mailed to each of the shareholders.

George S. Ashman, M.D., Ophthalmic Associates, Johnstown, Pa., was appointed to the board of directors of Johnstown Bank and Trust Co., effective Oct. 17, 1990. BT Financial Corp. is pleased to welcome Ashman to its corporate family.

On Oct. 24, 1990, the board of directors of BT Financial Corp. declared a cash dividend of $.22 per share to shareholders of record on Nov. 5, 1990, payable Dec. 1, 1990.

The financial results achieved by BT Financial Corp. during the third quarter and first nine months reached record levels. BT Financial Corp. is confident the corporation is well positioned to maintain its earnings progress through the remainder of this year.

BT Financial Corp. is a bank holding company, with assets of $800 million, headquartered in Johnstown, Pa. Banking affiliates include Johnstown Bank and Trust Co., Johnstown, Pa.; Laurel Bank, Ebensburg, Pa.; and Fayette Bank and Trust Co., Uniontown, Pa. Together they comprise a total of 42 offices serving Cambria, Somerset, Beford, Blair, Indiana, Westmoreland and Fayette counties. BT Financial Corp.'s other affiliates are BT Management Trust Co., a Pennyslvania state-chartered trust company, and Beford Associates Inc., a real estate company.

#90298p9776 10/25/1990 ~PR Newswire

BORDEAUX, FRANCE (OCT. 25) PR NEWSWIRE - This October, top scientists -- including pharmacologists, biochemists and physicians -- met to report their latest research findings on Pycnogenol, the potent free-radical scavenging compound extracted from the bark of a local coastal pine, pinus maritima.

First speaker -- Professor Peter Rohdewald of the Institute of Pharmacology, University of Muenster, Germany -- attested to the remarkably low toxicity of the natural compound and to its lack of carcinogenic properties. Emphasizing Pycnogenol's lack of toxic side- effects in man, the professor produced results to demonstrate its effectiveness in reducing the fragility of the smaller blood vessels and thus its usefulness in patients with veinous insufficiency and swollen legs.

Consultant physician Dr. Duncan Bell, 1990 Hunterian professor at the Royal College of Surgeons of England and leader of a team of biochemists working on various effects of Pycnogenol, took up its anti- inflammatory effects and went on to discuss its anti-allergy properties and its use in inhibiting tumor promotion. He described the product as "an extremely potent free-radical scavenger" and introduced a colleague who presented exciting preliminary results of tests on prevention of carcinogen formation in the liver by inhibition of reactive oxygen metabolics.

A second biochemist on Bell's team discussed in great depth the powerful free-radical scavenging activities of this compound and produced preliminary results to show the reduction in the conversion of LDL cholesterol to an oxidized form which was more atherogenic.

Bell added that Pycnogenol had been shown to inhibit stress ulcer formation in rats, and summed up by saying that this naturally occurring plant flavonoid was safe, non-toxic and possessed a number of exciting therapeutic properties. He strongly suspected that its true therapeutic usefulness had not yet been fully realized and urged his audience to "watch this space."

The Pycnogenol conference was sponsored by Horphag Research, Ltd, UK, and included a tour of the Pycnogenol manufacturing near Bordeaux.

Pycnogenol has been patented (U.S. Pat. No. 4,698,360) and can be found worldwide. Pycnogenol was recently introduced to the U.S. and Canadian publics through the North American health products retail market.

ATLANTA (OCT. 25) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) will raise domestic fares by 5.8 percent in response to fuel costs that have more than doubled since July 31.

The increase will be effective for tickets purchased on or after Oct. 31, 1990.

Delta said that its system-wide cost for jet fuel had risen 115 percent from 57.1 cents per gallon on July 31, to 122.7 cents per gallon as of Oct. 23. On an annualized basis, this increase represents $1.3 billion in additional expense to Delta.

"We take this action reluctantly, but previous fare hikes in response to rising fuel prices have fallen well short of levels necessary to offset these increased costs," said Whit Hawkins, Delta's executive vice president - marketing and stations.

SAN DIEGO (OCT. 25) PR NEWSWIRE - Great American Bank, a Federal Savings Bank (NYSE: GTA), has named F. Anthony Kurtz chief financial officer and senior executive vice president. He will be responsible for accounting, finance, institutional investments, investor relations, strategic planning and internal consulting.

Kurtz has nearly 30 years experience in the financial services industry. He was most recently executive vice president and chief financial officer for The Price Company (NASDAQ: PCLB), where he was responsible for all accounting, financial reporting and planning activities, including cash planning and investment management as well as responsibility for management information systems (MIS) and internal audit. From 1968 to 1989, Kurtz was employed by H.F. Ahmanson & Co. (NYSE: AHM), parent company of Home Savings of America. At H.F. Ahmanson, Kurtz most recently served as senior vice president and chief financial officer. Previously, he was controller for Trans-Coast Investment Company of Los Angeles and senior accountant for Price Waterhouse & Company of Los Angeles.

"Tony Kurtz has a strong background in finance and business administration," said Robert L. Kemper, chairman, chief executive officer and president of Great American. "He will be a valuable asset to this company as we move forward in accordance with a new business plan that is currently under review by the Office of Thrift Supervision."

A graduate of California State University, Northridge, with a bachelor's degree in accounting, Kurtz also completed the Harvard Business School-Corporate Financial Management Program. He is a certified public accountant and a member of the American Institute of Certified Public Accountants, California Society of Certified Public Accountants and the Financial Executives Institute.

Kurtz is a member of the Board of Advisors for Crespi Carmelite High School in Encino, Calif. He serves on the board of directors for the California State University, Northridge, Trust Fund, and he is a member of the Council of Advisors for California State University, Northridge, School of Business.

Kurtz replaces James A. Krzeminski, who is leaving Great American to pursue other business interests.

#90298p9786 10/25/1990 ~PR Newswire

MINNEAPOLIS (OCT. 25) PR NEWSWIRE - Ciatti's, Inc. (NASDAQ: CIATU) today reported results for its first quarter ended Sept. 30, 1990. The company

earned $67,591 or two cents per share, on sales of $4,349,146. That compares with earnings of $213,730, equal to six cents per share, on sales of $3,784,367 in the first quarter last year.

William C. Ferril, president and chief executive officer, said: "Where sales increased 14.9 percent over the comparable quarter last year, our results reflect the effects of the sluggish economy we are operating in. Quarterly results are slightly down from the fourth quarter ended June 30, 1990. And, comparable sales of our five mature restaurants, which have been operating for more than 24 months, are off 1.2 percent. Gross profit margins remain unchanged but earnings decreased 68 percent largely due to preopening costs associated with two new restaurants during the past nine months. This was coupled with higher percentage operating expenses and income taxes that rose as our tax loss carryforward benefit decreases."

Ferril stated, "Our business began to feel the effects of the slowing economy toward the end of our fiscal year and we have initiated steps to have costs more closely correlate with revenue expectations."

Ferril concluded, expressing confidence in the company's long-term business prospects, saying, "While we do not see significant opportunities to improve 1991 earnings over the prior year, we are focused on operating expenses. Our balance sheet is particularly strong, with little debt and a good cash position. With nine restaurants, we are well positioned in our markets, and have a marketing program that appears to be effective. We are proceeding with our expansion plans and will open the tenth Ciatti's restaurant Nov. 20 in the Centre Square development in St. Cloud, Minn., one of the state's fastest growing communities."

Ciatti's Inc. (NASDAQ: CIATU) is a Minneapolis-based corporation operating nine Italian restaurants in Minnesota and Wisconsin.

#90298p9796 10/25/1990 ~PR Newswire
NASHVILLE, TN (OCT. 25) PR NEWSWIRE - GENESCO Inc. (NYSE: GCO) announced today plans to sell or close an unprofitable footwear wholesale company and to close a footwear components manufacturing operation. The Company's board of directors approved the establishment of a reserve to cover severance and shutdown costs.

As a result of this action and favorable adjustments to reserves relating to previously divested operations, including the substantial completion of an environmental remediation project at less than originally estimated costs, the Company expects to make a net charge of approximately $1.3 million ($.06 per share) against earnings in the third quarter ending Oct. 31, 1990.

Operations to be sold or closed are the Company's Charm Step/Easy Street women's wholesale footwear division and a footwear components plant in Reynosa Mexico. Approximately 200 of GENESCO's 7,000 employees are affected.

"GENESCO is committed to controlling costs and tackling weak spots in our operations," William S. Wire II, chairman and chief executive officer, said. "Today's decision was reached after careful review. The Company will benefit by eliminating these operations which have been losing money and have little chance of being successful."

As a result of the establishment of the reserve, GENESCO may report a loss for its fiscal third quarter. "In recent weeks, we have seen increased consumer caution due to the uncertain and slowing U.S. economy," Wire said. "Before today's action, we expected a slight operating profit in the third quarter."

While the Charm Step/Easy Street business has been showing some improvement, it continues to be unprofitable and does not fit with the rest of GENESCO's business. It is the Company's only women's footwear wholesale operation, according to Wire. The Reynosa facility is a small operation that has been operating at a loss for some time.

GENESCO, headquartered in Nashville, Tenn., is a consumer products company with operations concentrated in footwear and apparel.

KANSAS CITY, MO (OCT. 25) PR NEWSWIRE - SAZTEC International Inc. (NASDAQ: SAZZ), a leader in information management, announced today the successful completion of the acquisition of Advanced Automation Associates Inc. (AAA), a New England data management company. A letter of intent was signed and announced May 18, 1990.

According to Gary N. Abernathy, vice chairman of SAZTEC, the agreement will have a significant affect on SAZTEC operations.

"The AAA acquisition is a major step to expand SAZTEC's operations and services. AAA will increase the company's revenue base by more than 30 percent and provide added domestic production capacity of more than 200 people. It also will open the Northeast geographically for additional business, and enable the company to establish Information Conversion Express (ICM)(SM) in the New England area," said Abernathy.

Headquartered in Chelmsford, Mass., AAA has been active in the Information processing industry for more than 24 years. The company currently has four information conversion centers within the New England area and an affiliation with a Jamaican data conversion company.

In addition, AAA provides services in the area of direct marketing, including direct mail, subscription fulfillment and reader service cards.

SAZTEC International, a world leader in information management, provides services for database construction and information conversion utilizing computer processing, electronic imaging, optical character recognition, data entry and other technologies.

SAZTEC International, is traded in the over-the-counter market and is quoted on NASDAQ under the symbol SAZZ. For more information, contact Donald E. Mack senior vice president, marketing, SAZTEC International Inc., 6700 Corporate Dr., Kansas City, Mo. 64120, 816-483-6900.

NEW YORK (OCT. 25) PR NEWSWIRE - First American Bank of New York, a wholly owned subsidiary of First American Bankshares, Inc., today announced the sale of 8.95 percent Auto Loan Pass Through Certificates in the amount of $75 million. The issue was underwritten by BT Securities Corporation, a wholly owned subsidiary of Bankers Trust New York Corporation (NYSE: BT). FABNY 1990-A Grantor Trust is the issuer and First American Bank of New York is the seller/servicer.

William M. Duncan, chairman of First American Bank of New York, said, "The sale of these assets in the securitization market represents an additional source of funding for the bank. This transaction also enables First American Bank of New York to build upon its important and growing consumer installment lending activities."

The issue will be rated Aaa by Moody's Investor Services, which provided the same rating last year to a $108 million securitization of automobile installment loans by three subsidiaries of First American Bankshares located in the Washington, D.C., metropolitan area.

#90298p9803 10/25/1990 ~PR Newswire

PITTSBURGH (OCT. 25) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) today announced a consolidated net loss for the third quarter of 1990 of $18,838,000 or $1.66 per common share.

For comparison, Equimark reported a net loss of $15,525,000 or $1.38 per

common share in the second quarter of 1990 and net income of $6,047,000 or $0.48 per share in the third quarter of 1989.

Equimark's consolidated net loss for the nine months ended Sept. 30, 1990, totaled $49,810,000, equal to a net loss per common share of $4.37. For the nine months ended Sept. 30, 1989, Equimark reported net income of $15,750,000 or $1.31 per common share.

The reported loss in the third quarter of 1990 primarily reflects Equimark's further efforts to strengthen its reserve for possible loan losses in recognition of the continuing deterioration of the overall economic environment, primarily with respect to declining real estate values in the market area of Equimark's Liberty Bank subsidiary, headquartered in Philadelphia. As a result, Equimark's consolidated reserve for possible loan losses was increased by 21.1 percent during the third quarter to $65,546,000 or 2.55 percent of loans outstanding, at Sept. 30, 1990, from $54,121,000 or 2.18 percent of loans outstanding at June 30, 1990. At year-end 1989, the consolidated reserve for possible loan losses totaled $41,955,000 or 1.48 percent of loans. The increase of $11,425,000 in the reserve for possible loan losses from June 30 to Sept. 30, 1990, accounts for 61 percent of the third quarter net loss and includes an increase of $8,407,000 in Liberty Bank's reserve.

Equimark's nonearning assets, which include nonaccrual loans and other assets held for resale, totaled $80,770,000 at Sept. 30, 1990, representing an increase of 23.1 percent over the June 30, 1990, level of $65,608,000. At year-end 1989, consolidated nonearning assets totaled $66,828,000. Approximately 94 percent of the increase in the 1990 third quarter is attributable to loans in the Liberty Bank subsidiary, primarily in its commercial real estate portfolio.

The quarterly net loss is higher than the range of corporate net loss projected and announced on Oct. 2, 1990. Due to recent events with regard to certain borrowers in the Philadelphia area, Equimark has further bolstered the reserve for possible loan losses of Liberty Bank above the reserve level anticipated in the forecast news release.

Equimark's provison for possible loan losses was $21,380,000 in the third quarter of 1990, a decrease of 21.3 percent from the provision of $27,151,000 in the second quarter of 1990. Net loan chargeoffs totaling $9,955,000 in the third quarter of 1990 were 53 percent lower than the 1990 second quarter amount of $21,330,000. A significant portion of the reduction in quarterly net loan chargeoffs relates to the reduction of losses associated with deliquent credit card loan balances which were not a part of the April 1990 credit card portfolio sale. Net loan losses on this retained portfolio totaled $6,059,000 during the second quarter of 1990 and $763,000 in the 1990 third quarter. Net loan chargeoffs in the commercial, commercial mortgage, and construction portfolios totaled $2,619,000 in the third quarter of 1990, a

decline of 58 percent from $6,214,000 in the second quarter of 1990 and 69 percent from $8,552,000 in the first quarter of 1990.

Net interest income decreased $2,500,000, or 6.2 percent, to $38,065,000 in the third quarter of 1990 from the second quarter of 1990. This decline resulted from the full quarter effect of the sale of $349.1 million of credit card loans effective April 30, 1990. Consolidated average earning assets totaled $3.19 billion in the 1990 third quarter, as compared to $3.26 billion in the 1990 second quarter. Equimark's net yield on average earning assets decreased to 4.71 percent in the 1990 third quarter from 4.95 percent in the second quarter of 1990, principally as the result of the sale of the comparatively high yielding credit card loans.

Non-interest income totaled $8,162,000 in the third quarter of 1990, compared to $26,106,000 in the 1990 second quarter. Included in non-interest income in the second quarter was a net gain of $14.3 million from the sale of credit card loans and related operations in Wilmington, Del. In addition, consulting and other service fee revenue declined to $834,000 in the third quarter of 1990 from $4,136,000 in the 1990 second quarter.

Operating expenses totaled $43,690,000 in the third quarter of 1990, a reduction of $11,332,000, or 20.6 percent, from the second quarter of 1990. This quarter-to-quarter decrease is attributable to the following: (1) legal costs, relating to litigation, loan collection, and other matters, decreased from $6,078,000 in the second quarter of 1990 to $1,574,000 in the 1990 third quarter; (2) approximately $3.7 million of residual expenses were absorbed in the second quarter of 1990 relating to the termination of Equimark's recapitalization of a Texas bank holding company; and (3) a loss of $4.1 million was recorded on the sale of an underperforming balance sheet hedge in the second quarter of 1990.

At Sept. 30, 1990, Equimark's ratio of primary capital and reserves to assets totaled 8.03 percent, which is in excess of the regulatory minimum. Additionally, the primary capital positions of its banking subsidiaries are also above the minimum regulatory requirements.

Equimark Corp. is a diversified financial services institution with total assets of approximately $3.5 billion. Equimark's principal subsidiaries are Equibank, The Liberty Financial Group Inc., EquiManagement Inc. and Treasure Valley Bancorp Inc. Equibank, with assets of approximately $2.8 billion, operates 55 branch offices in Southwestern Pennsylvania. Liberty is the parent of Liberty Savings Bank, a Philadelphia-based, FDIC-insured savings bank with 21 branch offices and assets of approximately $652 million. EquiManagement provides management consulting services, primarily to financial institutions. Treasure Valley Bancorp Inc. is the parent of Treasure Valley Bank, an FDIC-insured bank with assets of approximately $87 million and 10 branch offices in Southwestern Idaho.

#90298p9804 10/25/1990 ~PR Newswire

HAUPPAUGE, N.Y. (OCT. 25) PR NEWSWIRE - The first low radiation video display terminals (VDT) at a price attractive to the mass market were introduced Monday by Applied Digital Data Systems (ADDS), a subsidiary of NCR Corporation (NYSE: NCR).

"We believe that an affordable low radiation terminal is the single best solution to the electromagnetic radiation debate," stated David G. Laws, ADDS president and chief executive officer, in making the announcement. "By removing the pricing obstacle, we hope to make these VDT's the product of choice among our customers."

The two ADDS terminals -- the 4000 RST (list price $625) and the 4320 RST (list price $595) -- are the lowest priced such products currently in volume production, according to company officials. Other low radiation terminals currently in the marketplace carry prices up to 50 percent higher than the ADDS 4000 RST.

"The pricing breakthrough is the result of a unique terminal design developed at ADDS on which there is a patent pending," said Vincent P. Luciano, director of marketing. "The design eliminates the need for expensive shielding or complicated retro-fitting on the customers part."

"We found that building emission control right into the design of the product allows us to manufacture on an economic basis," Laws said. "Because our market is so price sensitive, this was imperative if we were going to be able to reach a significant portion of the end-user community with this important technology."

The low radiation terminals will be manufactured at ADDS' Hauppauge, N.Y. headquarters using the company's flexible manufacturing line. In 1989, ADDS became the first terminal maker to return its production and manufacturing to U.S. shores, where it now controls product design, test, measurement, quality control and assembly all under one roof.

The 4000 RST is a highly reliable ASCII/ANSI/PC terminal with dual session capability. This feature enables the 4000 RST to connect with two computer ports simultaneously, allowing one terminal to do the work of two. The 4320 RST offers full Digital Equipment Corporation (DEC) VT320 compatibility and a choice of either VT-style or PC-style keyboards.

ADDS, a subsidiary of NCR Corporation, has been a leading manufacturer of general-purpose display terminals since 1969.

COLUMBUS, OHIO (OCT. 25) PR NEWSWIRE - Rax Restaurants, Inc. (NASDAQ: RAXR) closed 16 underperforming stores -- 11 in Louisiana on Monday and five in the Tampa area today -- as part of its cost cutting program.

"The store closings bring a significant cash flow benefit to our chain's operations and are consistent with our strategic plan to focus resources on restaurants in the chain's strongest markets," said Ira Hermann, president and chief executive officer. "In Louisiana markets and the Tampa area, we simply lacked the necessary penetration to efficiently market our restaurants."

Rax Restaurants owns, operates, develops and franchises restaurants that feature a variety of specialty sandwiches and other fast foods. Based in Columbus, Ohio, the company has nearly 450 company-owned and franchised stores in 29 U.S. states and in Canada. Incorporated in 1977, the publicly held company is traded over-the-counter on the NASDAQ National Market System under the RAXR symbol.

#90298p9812 10/25/1990 ~PR Newswire

BLUE BELL, PA (OCT. 25) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) today reported a net loss of $356.8 million for the third quarter ended Sept. 30, 1990.

After allowing for preferred dividends, the loss per common share was $2.42. These results include a special pretax charge of $181 million to cover planned reductions in workforce and operational consolidations. In the third quarter a year ago, the company reported a net loss of $648.2 million or $4.25 per common share. The prior year results included a special charge of $231 million.

Revenue was $2.40 billion compared to $2.35 billion in the year ago quarter which had benefited from accelerated shipment of new 2200 Series mainframe systems.

For the nine months ended Sept. 30, 1990, the net loss was $348.2 million on revenue of $7.18 billion. After allowing for preferred dividends, the loss per common share was $2.72. In the same period one year ago, the net loss was $673.3 million on revenue of $7.13 billion. After allowing for preferred

dividends, the loss per common share was $4.75.

Unisys said that this quarter's special charge will cover a reduction in force which will eliminate 5,000 jobs, mostly by mid- year 1991. This represents an acceleration of the company's program of reducing headcount via hiring limitations and attrition. The planned reductions will affect most operating units but will leave unimpaired the company's direct sales activity, the critical support provided to customers, and the R&D investment in future core products. As part of a stringent cost control and reduction program, the staffing actions alone will reduce costs by more than $200 million annually.

CONTACT: J. Peter Hynes of Unisys, 215-986-6948

#90298p9816 10/25/1990 ~PR Newswire

RALEIGH, N.C. (OCT. 25) PR NEWSWIRE - Workers will top out the First Union Capitol Center Oct. 26, as they lay the final steel beam atop the 29-story building at 4:30 p.m.

To celebrate the topping out, community leaders, future tenants of the building and others are invited to a reception hosted by First Union National Bank of North Carolina and Southwind, Ltd., developer of the $65 million building. The reception will be held from 5 to 7 p.m. at the Southwind office at 133 Fayetteville Mall, directly across from the construction site.

First Union will anchor the polished-granite building, occupying approximately 92,000 square feet on four-and-a-half floors, including a full-service branch on the ground floor. The building is scheduled to open in mid-1991.

"We believe that First Union Capitol Center will be a catalyst for development in downtown Raleigh," said Ronald C. Fowler, executive vice president of First Union's Raleigh-based Eastern Region. "We are committed to fully developing the 100 block of the Fayetteville Mall with quality projects that will complement the capitol, existing towers and other under construction."

Ed Bagwell, Chairman of the Board and Chief Executive Officer of Southwind, Ltd., said the 500,000-square-foot office building will contain about 7,000 square feet of retail space. Water features, shade trees and flowering plants will accent a public seating area.

In designing First Union Capitol Center, we sought and used the guidance of many public and private citizens in Raleigh and found the widely accepted Urban Design Guidelines very helpful," Bagwell said. "We have a building that fits comfortably into its surroundings, is aesthetically beautiful and operationally quite efficient."

"Our plaza and shopping areas will really help to enliven the 100 block and

boost retail business," Bagwell added. "We believe the Capitol Center will have a great impact on downtown Raleigh."

In addition to First Union, three major tenants have signed leases for space. Smith, Anderson, Blount, Dorsett, Mitchell & Jernigan, one of North Carolina's oldest and most respected law firms, will lease 56,000 square feet. It was founded by former United States Senator Willis Smith.

First Union National Bank of North Carolina is a major subsidiary of Charlotte-based First Union Corporation (NYSE: FTU FTUpr), which reported assets of $39.1 billion as of Sept. 30, 1990, and operated 764 banking offices in North Carolina, South Carolina, Georgia and Florida, one banking office in Tennessee and 277 nonbanking offices in 36 states.

Southwind, Ltd., headquartered in Columbia, S.C., is a leading developer of upscale executive office space in the Southeast.

#90298p9820 10/25/1990 ~PR Newswire

CHICAGO, (OCT. 25) PR NEWSWIRE - UNR Industries, Inc. (NASD: UNRI) reported that sales in the third quarter of 1990 were $95.8 million, down 4 percent from the $99.4 million reported in the third quarter of 1989. Net income for the quarter was $4.9 million, down 9 percent from the $5.4 million reported in 1989 before extraordinary items.

Sales for the nine months ended Sept. 30, 1990, were $300.1 million, up 5 percent from $285.1 million reported for the same period in the prior year. Operating income for the same period was $18.4 million, up 4 percent from $17.7 million reported in 1989. Net income comparisons between 1990 and 1989 are not meaningful due to insurance recoveries of $45.6 million and reorganization charges of $109.6 million recorded in 1989.

The company's Commercial Segment had sales of $44.7 million for the third quarter of 1990 compared to $39.9 million last year. Operating profit for the same period improved by 46 percent to $4.0 million from $2.7 million in 1989.

The company's Industrial Segment reported sales of $51.1 million for the third quarter of 1990 compared to $59.5 million in 1989. Operating profit of $3.4 million was 42 percent below last year's third-quarter operating profit of $5.8 million.

William F. Andrews, president and CEO of the company, stated, "A major reason for the decreased sales and income in the third quarter was due to the UNR-Leavitt Division. The Division reported a decrease in sales of $8.3

million and a decrease in operating income of $1.1 million below that of the third quarter last year. This is a result of the current softness in the steel tubing market and the resulting inability to pass through a steel mill price increase in July. We lost business during July until we rescinded most of our price increase. This offset the income growth in our other operations."

(a) Net of reserve for LIFO valuation of inventories of $14.3 million and $15.1 million at Sept. 30, 1990, and Dec. 31, 1989, respectively.

UNR INDUSTRIES, INC. NOTES TO FINANCIAL STATEMENTS

(1) On July 29, 1982, UNR Industries, Inc. and certain subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the Bankruptcy Code. The filings were precipitated by contingent liabilities resulting from litigation arising out of asbestos-related operations owned by UNR's predecessor corporations. On June 2, 1989, the company's Plan of Reorganization (the "Plan") was confirmed by the Bankruptcy Court following acceptance of the Plan by the company's creditors and stockholders. The Plan relieves the company of the burden of defending and settling thousands of asbestos lawsuits. This was accomplished through the creation of the UNR Asbestos-Disease Claims Trust, which will assume responsibility for, administer, settle and pay all asbestos-related claims. In lieu of bringing actions against the company, asbestos claimants must assert their claims against this trust, which owns 29,437,004 shares of common stock of the company. The order confirming the Plan of Reorganization, the Injunction Order and the Federal Bankruptcy Code prohibit all persons from taking any actions against the company with respect to any past, present or future asbestos-related liabilities.

On June 9, 1989, an appeal was filed from the order confirming the Plan of Reorganization. A motion is pending in the U.S. District Court to dismiss the appeal as moot. The company and its counsel expect the company to prevail on the motion. Requests for stays of the effect of the confirmation order have been denied by the Bankruptcy Court, the U.S. District Court and the U.S. Court of Appeals for the Seventh Circuit.

By another order effective June 2, 1989, the Bankruptcy Court permanently enjoined any actions against the company by asbestos-disease claimants and others. An appeal from the injunction order is pending. The company and its counsel believe that the appeal has no merit and the company expects to prevail.

(2) For financial reporting purposes, the company has net operating loss carry-forwards of over $150 million. The extraordinary reorganization charges included in the 1989 Statement of Income are not deductible for income tax purposes until the year distributions are actually made by the UNR Asbestos-Disease Claims Trust to claimants. Approximately $2.5 million of expenditures have been made by the Trust and the related tax benefits have been recorded by the company in 1990. However, the timing of future distributions is undeterminable. The related deductions will result in a reduction of that year's current tax liability and may also generate tax loss carry-backs or carry-forwards. Net operation losses resulting from the payment of tort claims could be subject to the limitations of Section 382 of the Internal Revenue Code.

(3) The interim determination of inventories under the LIFO method is based on the management's estimates of the expected year-end inventory levels and costs and as such, interim financial results are subject to final year-end inventory amounts.

HUTCHINSON, KA (OCT. 25) PR NEWSWIRE - Doskocil Companies Incorporated (NASDAQ: DOSKQ) today announced that it had entered into a letter of intent to sell the edible fats and oils refinery (part of its subsidiary, Wilson Foods Corporation) located in Oklahoma City.

The prospective buyer is a corporation to be formed by Valley National Investors; M.L. Oklahoma Venture Partners, L.P., an affiliate of Merrill Lynch Venture Capital, Inc., and a management group of the refinery. The purchase price to be paid for the refinery is approximately $8.6 million, subject to adjustments and costs associated with the separation of the facility. Under terms of the letter of intent it is anticipated that the sale would be consummated by Dec. 31, 1990. The sale is subject to the execution of a definitive purchase agreement, based on the non-binding letter of intent, and the approval of the bankruptcy court.

Theodore A. Myers, senior vice president and chief financial officer, stated that the "proposed sale is consistent with Doskocil's strategic plan to concentrate on high value-added products. The net proceeds of the sale will be used to reduce the company's debt."

The refinery division manufactures and sells branded shortening and vegetable oils to the retail market, primarily under the "Bake-Rite" trade name, and to the foodservice and food manufacturing market. The letter of intent contemplates that the buyer will continue operations at the refinery facility with the current workforce.

Doskocil Companies Incorporated specializes in formulating, processing and marketing high value-added boneless hams, dry sausage and other precooked meat products for foodservice, delicatessen and retail markets.

MINNEAPOLIS (OCT. 25) PR NEWSWIRE - Colony Hotels & Resorts today announced it signed two-year agreements with three different resident/owner associations at the Hilton Head Island Beach & Tennis Resort. The announcement was made by John Russell, president and CEO of Colony Hotels & Resorts, the resort arm of the Carlson Hospitality Group.

"Colony and the Hilton Head Island Beach & Tennis Resort owners' associations have been partners for eight years. This latest agreement will provide an opportunity for us to further develop our relationship and make the resort a comfortable retreat for our owners and guests," said Russell.

The Hilton Head Island Beach & Tennis Resort is conveniently located 40 miles north of historic Savannah, Ga. The property consists of more than 800 condominium and rental units. The facility features ten on- site tennis courts, a spectacular private beach, pool, water sports, horseback riding, a restaurant and lounge. All of the units feature one- or two-bedrooms, fully-equipped kitchens, color TV and private balconies.

The resort offers 12,000 square feet of conference space and meeting space for groups up to 800 people. Also, it has completed a $1 million, three-year renovation program.

"We are pleased to represent this resort in the Hilton Head Island area. It has been and will continue to be an important resort location," said Russell. Colony Hotels & Resorts provides international marketing and reservation programs, facility management, and staff hiring and training to the three owners' associations.

Colony Hotels & Resorts is America's fastest growing resort company with more than 42 locations in the United States and around the world. The chain is part

of the Carlson Hospitality Group, Inc., which includes Radisson Hotels International, Country Lodging By Carlson(SM), T.G.I. Friday's restaurants and Country Kitchen(R) restaurants. Carlson Hospitality is currently implementing an international strategic growth plan calling for a total of 500 locations by the end of 1992. Corporate headquarters are located in Minneapolis, Minn.

ATLANTA, (OCT. 25) PR NEWSWIRE - Academy Insurance Group Inc. (NASDAQ: ACIG) announced that its board of directors at a meeting held today, approved a merger agreement with a corporation formed by certain large shareholders and members of management, owning in the aggregate approximately 50 percent of the outstanding common shares of the company (Investor Group).

The terms of the merger and merger agreement were recommended to the board of directors by a Special Committee of the board following negotiations among representatives of the Investor Group and the Special Committee. The Special Committee was advised by Smith Barney, Harris Upham & Co. Inc.

The merger agreement provides for a "cash out" merger in which all of the shares of the remaining shareholders, plus a small portion of the shares of the Investor Group, (aggregating approximately 35,300,000 shares) will be "cashed out" at a price of $1.325 per share, up from $1.30 per share, the price originally proposed by the Investor Group. The Investor Group advised the company that it has a bank commitment which will provide sufficient funds to consummate the merger. The merger is conditioned, among other things, upon certain regulatory approvals and the approval of the holders of a majority of the outstanding shares of the company, other than the Investor Group, who vote on the merger.

Consistent with the terms of the merger agreement, the Special Committee expects to retain an advisor to solicit and entertain better offers. The company may extend the closing date or terminate the merger to consider a better offer. If the Special Committee receives an all-cash offer to buy all of the outstanding common shares of the company or substantially all of the assets of the company on terms more favorable to all shareholders than the merger, the Investor Group has advised the company that it will sell to the person making the better offer, provided the transaction is approved by the board of directors and by the holders of a majority of the shares of the company, other than the Investor Group, voting on that proposal.

The board of directors, acting on the recommendation of the Special Committee, has determined to recommend the acceptance of the merger agreement to the company's shareholders. The board has scheduled a special meeting of shareholders to consider the merger agreement for Dec. 27. Shareholders of

record as of Nov. 15 will be entitled to vote at that meeting.

Academy Insurance Group Inc. is an insurance and financial services company that provides life, health and property/casualty products to specialty or "niche" markets. The company's primary market is noncommissioned and petty officers and their families. Academy's products are endorsed by the Non Commissioned Officers Association (NCOA).

HOUSTON (OCT. 25) PR NEWSWIRE - American General Corp. (NYSE:AGC) today announced third quarter net income $151.1 million or $1.26 per share, compared to $93.3 million or 77 cents per share reported for the third quarter of 1989. Operating earnings, which exclude realized investment gains, increased 20 percent to 91 cents per share in the 1990 third quarter, compared to 76 cents per share in the third quarter of 1989.

American General also announced that its board of directors today declared a quarterly cash dividend of 80 cents per common share, payable Dec. 1, 1990, to holders of record on Nov. 7, 1990. This represent a common dividend payout of 88 percent of operating earnings and 63 eprcent of net income for the third quarter. This dividend is a continuation of the rate announced on May 2, 1990 which is intended to provide shareholders with an additional return while they wait for the sale process to be completed.

American General's board also set a Dec. 3, 1990 deadline for submitting bids in connection with the pending sale process. This deadline applies to both the proposed sale of the company as a whole, announced on May 2, 1990, and the restructuring plan providing for the sale of the Home Service insurance companies, announced on Sept. 19, 1990.

In commenting on the bid deadline, Harold S. Hook, chairman and chief executive officer, said, "The board has determined that after almost six months, the time has come to bring the sale process to an orderly conclusion and determine whether a sale, or other course of action, will best serve the interests of our shareholders. While there can be no assurance that any sale will take place, a number of parties have indicated that they are interested in the Home Service companies and that they will be able to complete their evaluations and make their proposals within this time frame."

American General's board, in order to fully involve all parties in the sale process, also authorized management to make confidential information available without requiring restrictions that certain parties found objectionable. Hook added that, "The board reached this decision based on its judgment that it was more important to bring the sale process to a conclusion than to insist that

all parties abide by the original terms of the confidentiality agreement."

#90298p9881 10/25/1990 ~PR Newswire

MESA, AZ (OCT. 25) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) has received a $40.1 million contract from the U.S. Army for spare main rotor blades for the AH-64 Apache multi-mission combat helicopter.

Under the contract awarded to McDonnell Douglas Helicopter Co. in mid-October, the Army will purchase 573 blades to restock its supply system.

The supply system was significantly impacted in late 1989 following storms in Texas and South Carolina.

During those storms, 111 Apaches were damaged. Approximately 160 main rotor blades were damaged beyond repair.

This 573-blade order, an increase from the original request for 329 blades, will bring the number of main rotor blades in the Army pipeline to a level necessary to meet anticipated needs.

Apaches are stationed throughout the United States and overseas. Additionally, Apaches are in the Middle East supporting Operation Desert Shield.

The blades on order will include modifications made over the past two years. Other blades in this same configuration are in service and already have logged more than 1,400 hours without blade removal. The Army standard is 1,500 hours between removal for repair.

The first blades from this order will be delivered in mid- 1991 at a rate of

approximately 40 per month. Apache main rotor blades are manufactured by the Composites Structures Division of Alcoa Inc., in Monrovia, Calif.

Cost of each blade is approximately $70,000. Apaches have four main rotor blades, each approximately 22 feet long. The Apache is a twin-engine combat helicopter designed to perform its missions day or night and in adverse weather.

Through September, the Army had accepted 617 of the 807 Apaches it has on order. In addition, McDonnell Douglas is under contract to produce Apaches for Egypt and Israel and has received interest from several other nations around the world.

EVERETT, WASH. (OCT. 25) PR NEWSWIRE - INTERMEC Corp. (NASDAQ: INTR) recently announced a new line of FCC approved spread spectrum radio frequency products which provide a wireless network for automated data collection. To date, INTERMEC Corp. is the first and only manufacturer of automated data collection products to have FCC approval to offer spread spectrum technology.

With spread spectrum technology, information is transmitted over a broad band of frequencies instead of a single FCC assigned frequency. Data is digitally broken down into discreet bits, encoded and transmitted across the whole spectrum of frequencies. Spread spectrum wide band radio frequency technology incorporates wireless network data communications at high speeds with low susceptibility to transimission interference.

According to INTERMEC Chairman John W. Paxton, INTERMEC also offers narrow band radio frequency technology, a cost effective solution for those not requiring the high speed capabilities of spread spectrum. "The combination of these two solution sets uniquely positions INTERMEC to offer the full range of wireless data collection technology to meet our customers' varied needs in many different environments."

The spread spectrum radio frequency technology is compatible with INTERMEC'S broad line of automated data collection hardware, including controllers, printers, portable and on-line readers. Paxton said that the resulting wireless data collection network "provides the enhanced functionality of RF technology and a cost-efficient migration strategy that protects the investment of existing customers already using INTERMEC's CrossBar(R) data collection components."

INTERMEC's family of spread spectum radio frequency products includes the

Model 9180 RF Control Unit ($3,000), Model 9183 Repeater ($2,500), Model 9189 RF Gateway ($2,195), Model 9450 Vehicle Mount Terminal ($5,200), and Model 9181 Base Station Transceiver ($3,200), all prices U.S. All products will be available for shipment Dec. 27.

A pioneer in bar code technology and the world leader in automated data collection information management, INTERMEC Corp. designs, manufactures and markets the most comprehensive line of data collection hardware, software, systems, supplies and service available worldwide.

EVERETT, WASH. (OCT. 25) PR NEWSWIRE - INTERMEC Corp. (NASDAQ: INTR) today

announced a new toll-free line for customers who use INTERMEC hardware, software and applications support. The new number offers customers free and immediate assistance from experienced certified service representatives and application analysts located throughout the United States.

According to Gene Harmegnies, national service manager for INTERMEC, the new toll-free line automatically routes customer calls to the appropriate local field office. "This limits waiting time and gives the customer one number to call for all their technical support needs. Concurrently, we help the customer sustain a valuable working relationship with their local support team."

The toll-free number is a new feature of the well established MEDALLION(R) Service Program, a comprehensive set of hardware, software and applications support services. "With over 40 service locations throughout the U.S., we are stategically positioned to respond to the needs of our customers. Our professional team of service representatives and application analysts can provide site surveys, installations, training and post installation support."

INTERMEC's toll-free service number is 800-755-5505. For further information, contact INTERMEC Corp., 6001 36th Avenue West, P.O. Box 4280, Everett, WA 98203-9280, telephone 206-348-2600, Telex 3794107, or fax 206-355-9551.

EL SEGUNDO, CA (OCT. 25) PR NEWSWIRE - Infonet, the leading international value-added network services company, today announced that it will serve as the public data network for worldwide users of the TradeRef database application developed by the Legal Information Systems and Technologies (LIST) Foundation in Vancouver, Canada.

LIST's TradeRef database provides current information on international customs regulations. It is designed to help customs officers, customs brokers, exporters, importers, trade consultants, commercial law firms and freight forwarders throughout the world.

The application resides on a mainframe computer at the Westbridge Computer Corporation in Regina, Saskatchewan. Infonet's global public data network will connect interested parties in major cities worldwide to the Westbridge data processing centre, so they can gain access to LIST's TradeRef database.

Both Infonet and Westbridge will manage their respective operations round-the-clock, seven days a week and provide 24-hour telephone hotlines for international customer support.

A not-for-profit society founded in May 1989, the LIST Foundation is governed by a board of directors representing the Canadian business and academic communities, government and legal profession. Its mission is to establish a world-class applied technology center which will deliver "intelligent" legal knowledge systems and services.

LIST's TradeRef, an Artificial Intelligence Project in International Trade Regulation, is sponsored by several Canadian government departments, including External Affairs; Communications; Revenue Canada (Customs and Excise); and Industry, Science, and Technology.

TradeRef will substantially reduce import-export costs for such organizations

and make it much simpler for government customs officials to assign correct tariff classifications," stated Hildyard.

#90298p9903 10/25/1990 ~PR Newswire

DENVER (OCT. 25) PR NEWSWIRE - Rising and unstable fuel costs have caused the entire U.S. airline industry to re-evaluate business operations. "In every board room of this nation's eleven commercial carriers, there have been serious discussions of how to survive the current cost-of-fuel crisis," said John Nelson, executive vice president, marketing, for Continental Airlines.

Appearing before Denver business leaders at a Rotary Club luncheon, Nelson reported that the board of directors of Continental Airlines Holdings Inc. met Monday and "flatly rejected any bankruptcy option for dealing with mounting fuel costs."

In relation to other carriers, Nelson characterized Continental as "better off in some ways" in dealing with the current national crisis. The fact that Continental has the lowest operating costs (cost per available seat mile) among major carriers makes the carrier "leaner and more competitive."

In terms of cost-cutting measures, Nelson said, "The last thing we would do in any shape or form is damage our people - our 37,000 employees. They are young enthusiastic and becoming very proficient. We are going to absolutely protect them."

Nelson went on to comment that marginal flights which will be cut, and the seventeen fuel inefficient aircraft scheduled to be parked, will have no significant impact on Continental's service. Beyond these measures, he indicated that "non-strategic" assets will be evaluated for possible sale.

Referencing Continental's position at its Denver Hub and its new airport agreement with the City and County of Denver, Nelson said, "I assure you we will be landing planes at Denver tomorrow ... next week ... next month ... next year, and we intend to land the first plane at your new airport in 1993."

RICHARDSON, Texas (OCT. 25) PR NEWSWIRE - Rubicon Corp. (NASDAQ: RBCN) today announced it has begun installation of the latest version of Rubicon's intRlab(R) systems acquired by MDS-Hudson Valley Laboratories Inc., in

Poughkeepsie, N.Y. MDS-Hudson Valley Laboratories is a joint venture among Vassar Brothers Hospital, Northern Dutchess Hospital and MDS Health Group Inc.

"This new installation highlights the multi-site networking capabilities of intRlab(R)," said Rich Weitzel, Rubicon's vice president of Development. "The MDS-Hudson Valley installation also serves as a great example of Rubicon's abilities to customize intRlab(R) systems to meet health care providers' unique operating requirements."

The intRlab(R) Hospital and Reference systems, to be installed at four laboratories will communicate with hospital information systems at Vassar Brothers Hospital and Northern Dutchess Hospital. Result reporting to Julia Butterfield Hospital will also be supported.

"The reference system will support testing from hospitals, remote collection centers, clinics and physician offices," added Weitzel.

Rubicon is a 15-year-old Richardson, Texas based developer of computerized laboratory information management systems for independent laboratories, hospitals and health maintenance organizations. Rubicon's intRlab(R) laboratory systems products run on Digital Equipment Corp.'s PDP and VAX computers and use Digital Standard MUMPS language to provide highly stable, maintainable turnkey solutions.

PASADENA, Calif. (OCT. 25) PR NEWSWIRE - The board of directors of Avery Dennison Corp. (NYSE, PSE: AVY) today increased the quarterly cash dividend to 18 cents per share, from the previous 16 cents per share. The increase is the amount described in the proxy statement concerning the merger of Avery International Corp. with Dennison Manufacturing Co.

The dividend is payable on Dec. 19, 1990, to shareholders of record at the close of business on Dec. 5, 1990.

Charles D. Miller, chairman and chief executive officer, said the increased dividend reflects Avery Dennison's confidence in its future earnings growth opportunities.

The dividend will be increased to 20 cents after final court approval of the proposed settlement of the previously announced litigation, which was brought by a Dennison shareholder against Dennison and its directors.

Avery Dennison, headquartered in Pasadena, is a leading worldwide manufacturer

of pressure-sensitive adhesives and materials; office products; product identification and control systems; and specialty chemicals.

#90298p9922 10/25/1990 ~PR Newswire

EL PASO, Texas (OCT. 25) PR NEWSWIRE - El Paso Refinery L.P. (NYSE: ELP) announced the declaration of a 75 cents per unit distribution on its cumulative participating convertible preferred units (preferred units) payable Nov. 30, 1990 to record holders as of Nov. 15, 1990.

Net income for the quarter ended September 30, 1990 totaled $5.6 million, or 43 cents per unit, on sales of $94.8 million as compared with net income of its predecessor entities of $1.5 million on sales of $63.8 million for the quarter ended Sept. 30, 1989. The selling prices the partnership received for refined products during the quarter were generally responsive to the rapid rise in crude oil cost resulting from the crisis in the Middle East. Refined products sold during the quarter averaged 32,724 barrels per day, an increase of 13.1 percent compared with an average of 28,941 barrels per day in the third quarter of 1989. This increase was attributable to both higher average processing rates and the inclusion of TM&S Oil Co. (TM&S) sales beginning June 1, 1990.

The partnership's net income for the nine months ended Sept. 30, 1990 was $11.5 million, or 89 cents per unit, on sales of $231.8 million as compared with predecessor entities' net income for the nine months ended Sept. 30, 1989 of $9.6 million on sales of $184.4 million. Refined products sold during the three quarters of 1990 averaged 32,201 barrels per day, an increase of 16.3 percent compared with an average of 27,704 barrels per day in the three quarters of 1989.

On Nov. 1, 1989 the partnership assumed the refining operations and assets of El Paso Refining Inc. in connection with the sale to he public of a 43 percent limited partnership interest in the partnership. The partnership raised net proceeds from the offering of approximately $127 million which are being utilized primarily for the expansion of the partnership's El Paso, Texas refinery from 26,000 barrels per day to 55,000 barrels per day. Expansion of the refinery is continuing to progress on schedule with completion of the initial phase anticipated in mid-1991. On May 31, 1990, the partnership acquired TM&S in exchange for 260,000 newly issued preferred units. TM&S is a multi-brand retailer and wholesaler of fuel and lubricants in the El Paso area.

NEW YORK (OCT. 25) PR NEWSWIRE - Mary Neagoy, press manager for NBC News' "Today" show, today was named the NBA's director of business public relations, Commissioner David J. Stern announced.

"With the expanding business and entertainment activities of the NBA and its related companies, having someone with Mary Neagoy's expertise is essential and we are delighted that she will be joining us," said Stern. "Her first assignment will be the launch of 'NBA's Inside Stuff,' the Saturday magazine program on NBC, produced by NBA Entertainment, and she also will be responsible for building and developing our relationships with the business and entertainment media."

As press manager for the "Today" show, Neagoy had responsibility for promoting the program, its anchors, correspondents and producers. Prior to that she had been publicity representative for several NBC entertainment shows, including "The Cosby Show," "Saturday Night Live," "Later with Bob Costas," "Friday Night Videos" and "Saturday Night's Main Event."

In March and April 1989, she helped establish the public relations department at CNBC, NBC's Consumer News & Business Channel, in preparation for the cable network's national launch.

Prior to joining NBC in May 1987, Neagoy was publicity director for Ms. Magazine and publicity manager for Rolling Stone Magazine. A native of Rocky River, Ohio, she is a graduate of the College of Wooster.

VANCOUVER, BRITISH COLUMBIA (OCT. 25) PR NEWSWIRE - Clearly Canadian Beverage Corp. (NASDAQ: CLCDF, Vancouver: CLV) today announced record results for the first quarter ended Sept. 30, 1990.

For the first quarter, sales increased 233 percent to US$12,070,493 (Cdn. $13,989,908) compared to US$3,623,153 (Cdn. $4,199,297) reported in the first quarter of fiscal 1990. The Company reported net income for the quarter of US$1,012,692 (Cdn $1,173,728) or US$0.09 (Cdn. $0.10) per share. For the comparable quarter of fiscal 1990, the Company reported a net loss of US$765,636 (Cdn. $887,385),or US$0.10 (Cdn $0.11) per share.

Commenting on the results, Douglas L. Mason, President of Clearly Canadian Beverage Corp., stated "We are very encouraged to be on target with our fiscal 1991 business plan which calls for a four fold increase in revenues and a

substantial improvement in net income. The demand for Clearly Canadian (TM) products remains strong and we anticipate that this trend will continue throughout the current fiscal year as our US and international distribution network is expanded."

Clearly Canadian Beverage Corp. produces and markets Clearly Canadian (TM), a line of natural and flavored sparkling mineral waters. Through distribution agreements, Clearly Canadian is sold in 30 states, all of Canada, Japan and England.

CHICAGO (OCT. 25) PR NEWSWIRE - Johnson Products Co. Inc. (AMEX: JPC) today announced higher sales and improved results for the year ended Aug. 31, 1990.

Sales for the fiscal year were $33,347,000, up 14 percent from fiscal 1989 sales of $29,368,000. Fiscal 1990 net income was $2,125,000, or 53 cents per share compared to $2,009,000, or 50 cents per share for fiscal 1989.

Fiscal 1990 net income includes the previously reported gain of $369,000 on the sale of common stock of Johnson Products Nigeria, other income of $269,000 and the utilization of a tax loss carryforward credit of $677,000. Fiscal 1989 net income includes a gain of $2,200,000 from the sale of real estate and the utilization of a tax loss carryforward credit of $754,000.

Eric G. Johnson, president and chief executive officer, said, "Although net income between years appears comparable, fiscal 1990 income from operations was $2,318,000 compared to $553,000 in fiscal 1989. The increase represents our continued emphasis on cost containment coupled with the increase in sales. Sales generated from the M & M brands acquired in February, 1990 contributed to the 14 percent sales increase for the year."

Johnson Products manufactures and markets personal care products for retail and professional markets domestically and internationally, under such leading brand names as Gentle-Treatment, Ultra Sheen, Classy Curl, Sta-Sof-Fro and Sof N' Free.

Johnson Products is a publicly traded company listed on the American Stock Exchange under the trading symbol "JPC."

MOSCOW (OCT. 25) TASS - THE SOVIET PEACE COMMITTEE HAS EXPRESSED DEEP CONCERN OVER THE UNDERGROUND NUCLEAR EXPLOSION ON THE NOVAYA ZEMLYA ISLAND ON WEDNESDAY. THE PEACE COMMITTEE HAS PROTESTED AGAINST THE TEST AND POINTED OUT THAT THE RESUMPTION OF NUCLEAR TESTING IN THE SOVIET UNION AFTER A YEAR-LONG MORATORIUM IS NOT CONSISTENT WITH THE RECENT APPEAL BY THE USSR SUPREME SOVIET TO THE PARLIAMENTS AND GOVERNMENTS OF ALL COUNTRIES FOR A FULL AND UNIVERSAL BAN ON NUCLEAR TESTING.

SOVIET PEOPLE ARE EQUALLY INDIGNANT OVER THE RECENT SEVEN NUCLEAR EXPLOSIONS IN THE UNITED STATES (INCLUDING THE LATEST ONE MEASURING UP TO 100 KILOTONNES) THE FOUR CONDUCTED BY FRANCE AND TWO BY CHINA, INCLUDING THE EXPLOSION MEASURING UP TO 500 KILOTONNES

THE SOVIET COMMITTEE "PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR" HAS ALSO ISSUED A STATEMENT ON THE NOVAYA ZEMLYA EXPLOSION. THE EXPERIENCE OF THE PAST FOUR MONTHS HAS SHOWN, THE STATEMENT SAYS, THAT THE UNITED STATES IS NOT READY TO ACCEDE TO A COMPLETE BAN ON NUCLEAR TESTING. HOWEVER, THIS IS NO EXCUSE FOR THE SOVIET UNION TO CARRY ON ITS MILITARY NUCLEAR PROGRAMME AFTER THIS COUNTRY HAS GONE THROUGH THE TRAGEDIES OF CHERNOBYL AND KYSHTYM AND KNOWS THE ANGUISH AND PAIN OF SEMIPALATINSK.

THE STATEMENT RECALLS THAT THE SOVIET PARLIAMENT HAS VOTED IN SUPPORT OF THE KAZAKHSTAN POPULATION'S DEMAND FOR AN END TO NUCLEAR TESTS NEAR SEMIPALATINSK.

IT SAYS SOVIET DOCTORS NOW URGE THE RUSSIAN PARLIAMENT TO ADOPT A SIMILAR RESOLUTION TO OUTLAW NUCLEAR TESTING ON RUSSIAN TERRITORY.

#90298u0091 10/25/1990 ~United Press International

BOSTON (OCT. 25) UPI - A new test-tube baby method using eggs donated by younger women shows promise of extending the ability of women to have babies

through their 40s or beyond, researchers said.

''It was kind of phenomenal,'' Dr. Mark Sauer said of the results of a study involving seven women aged 40 to 44 with non-functioning ovaries who received embryos created from their husbands' sperm and the eggs of younger women.

Six of the recipients became pregnant, resulting in the births of five children, one miscarriage and one stillbirth. Their pregnancy rate was about three times better than that achieved in most in vitro fertilization programs, said Sauer, of Women's Hospital and the University of Southern California in Los Angeles.

The study indicates ''a woman's reproductive life does not have to end at 40 and probably goes well into the fifth decade,'' he said. For women in good health who receive good medical care this may be ''a new chapter in the biological clock phenomenon,'' Sauer said.

In an editorial accompanying the report, published Wednesday in The New England Journal of Medicine, executive editor Dr. Marcia Angell said the ''limits on the childbearing years are now anyone's guess; perhaps they will have more to do with the stamina required for labor and 2 a.m. feedings than with reproductive function.''

Although the study adds another twist to ethical and legal controversies swirling around new reproductive technologies, Angell noted that these methods help infertile couples have children who are ''badly wanted and greatly prized.'' As such, ''It is hard to object to this,'' she added.

American women increasingly have been delaying childbirth to later in life, when the risk for birth defects goes up and the ability to conceive a child decreases. Sauer said the new research promises to help women in their 40s or even 50s whose ovaries have stopped functioning because of menopause to have babies.

In addition, he said that by using eggs of younger women, which are less likely to be defective, the chances of producing a child with birth defects such as Down's syndrome may be reduced.

Because of fertility problems that often include blocked fallopian tubes, many women have turned to in vitro fertilization, which involves removing one or more eggs from a woman's ovaries, fertilizing an egg with sperm, then implanting a resulting embryo in the uterus. The technique has resulted in the birth of an estimated 20,000 children, but scientists say usually it works only 20 percent to 25 percent of the time at best.

Most in vitro fertilization uses a woman's own eggs and many programs discourage women in their 40s from undergoing the procedure because of poor success rates. ''We found very few groups interested in dealing with women

over 40, so that makes our results even more interesting,'' Sauer said.

Because the ovaries of the embryo recipients had undergone ''early failure,'' the researchers obtained eggs from three fertile women aged 31 to 34 who were given female hormones to stimulate their ovaries to produce multiple eggs.

The recipients of the embryos also were given hormones - but at lower dosage levels - to artificially prepare the lining of their uteri for the embryos. The researchers thus simulated the natural process of egg fertilization and embryo implantation.

In most cases, several embryos were transferred to each recipient, but the overall implantation rate - 36 percent - was higher than usual, Sauer said. Of the seven recipients, three had single live births, one had twins, one had a miscarriage, one had a stillbirth and one failed to become pregnant.

Sauer said the study may help settle a debate about whether fertility declines in older women largely because of changes in the uterine lining or problems with aging eggs that become more likely to be defective.

The new research strongly suggests that ''a lot of the loss of fertility is related to aging of the egg and is not so much a uterine problem,'' Sauer said. Sauer said the research also indicates that low success rates for in vitro fertilization when a woman's own eggs are used may happen because the hormone doses used to stimulate multiple egg production may have a detrimental effect the uterine lining, making embryo implantation less liking.

That is also the suggestion of a second study appearing in the medical journal, in which Israeli researchers implanted embryos in women in their early 30s, using a woman's own eggs in some cases and donated eggs in others.

Although they achieved a high pregnancy rate in both groups, the doctors at Chaim Sheba Medical Center in Tel Hashomer said they found that ''fresh embryos were implanted better in the recipients than in the donors.'' They also found the implantation rate was 24 percent when fresh embryos were used, but only 7.7 percent when they used embryos that had been frozen.

(OCT. 25) UPI - A senior Interior Ministry source in Cairo says security forces arrested a machine-gun- and pistol-toting Egyptian as he tried to enter the country from Iraqi-occupied Kuwait by way of Jordan. But the source says authorities DON'T believe the man was involved in any extremist conspiracy. Instead, it's believed the man was planning to sell the weapons. The arrest comes as the search continues for the killer of Egypt's speaker of parliament.

Researchers say a new test-tube baby method may help women have babies through their 40's or beyond. Dr. Mark Sauer of the University of Southern California in Los Angeles calls the results ''kind of phenomenal.'' The experiment involved seven women, ages 40 to 44, who received embryos using eggs from younger women. Six of the seven became pregnant... resulting in five births, one miscarriage and one stillbirth.

#90298u0099 10/25/1990 ~United Press International
CAPE CANAVERAL, Fla. (OCT. 25) UPI - The shuttle Atlantis passed a critical fueling test without any signs of dangerous hydrogen leaks, clearing the way for launch around Nov. 10 on a classified mission to put a spy satellite in orbit.

The successful fueling test Wednesday marked a major milestone for NASA after a summer of setbacks and delays blamed on elusive hydrogen fuel leaks that

grounded Atlantis in July and the shuttle Columbia in May and September.

Columbia, mounted atop launch pad 39B, remains grounded pending the results of yet another fueling test next week. But Atlantis finally appears ready for takeoff, four months behind schedule.

''We conducted a very successful test,'' said Forrest McCartney, director of the Kennedy Space Center. ''We saw exactly what we expected to see, a good, tight system both externally and internally. I think we're ready to fly.''

Relieved NASA managers plan to hold a two-day flight readiness review Monday and Tuesday to discuss the status of launch processing and to set an official launch date for the 37th shuttle mission, the fifth so far this year.

As usual with such military flights, the exact launch time will remain classified until nine minutes before liftoff. But sources who requested anonymity said takeoff is planned for 6:47 p.m. EST on Nov. 10, possibly as early as Nov. 9 if work at launch pad 39A continues to go well.

The goal of the flight, according to Aviation Week & Space Technology magazine is the launch of a photo-reconnaissance spy satellite into an orbit that will repeatedly carry it over the Persian Gulf.

The duration of the shuttle flight also is classified, but sources told United Press International the mission will last three days, 23 hours and 55 minutes, resulting in a landing at Edwards Air Force Base, Calif., at 3:42 p.m. PST on Nov. 14.

Atlantis has been grounded for more than four months because of a tiny hydrogen leak that was detected during a fueling test June 29. But with the successful test Wednesday, ''it appears we have licked the problem ... and it appears we have a very clean vehicle,'' said NASA spokesman Bruce Buckingham.

Launch originally was scheduled for mid July, but the flight was put on hold when sensors detected explosive hydrogen gas in the area where fuel lines from the external tank enter the belly of the orbiter.

That test was conducted after Columbia was grounded the night before a planned May 30 liftoff because of a similar leak.

But Columbia also showed signs of leakage inside its engine room and NASA officials now believe the spaceplane was the victim of two separate leaks, one of which has yet to be pinpointed.

Atlantis's problem was traced to damaged seals inside a 17-inch-wide ''disconnect'' fitting that allows the external tank to be jettisoned in space. The seals were replaced and NASA managers were confident Atlantis was ready for flight.

To make sure, engineers began pumping supercold liquid hydrogen rocket fuel through Atlantis's engine room plumbing shortly after 1 p.m. EDT Wednesday.

At 1:24 p.m., high-speed hydrogen loading began. It was at this point during three previous fueling tests that explosive hydrogen gas was detected near the disconnect fitting.

But this time around, no significant leaks were detected externally around the fuel line fittings and concentrations in Atlantis's engine room amounted to just 175 parts per million, well below NASA's conservative redline of 500 parts per million. The test ended about 1:50 p.m.

''We seem to have a very tight vehicle at the pad this afternoon,'' Buckingham said. ''We have just very minor indications of liquid hydrogen seeping into the aft compartment near our sensors, but it's well within limitations.''

(OCT. 25) UPI - SPORTS TRANSACTIONS

BASEBALL

Boston - Announced they will not pick up the option year on the contract of outfielder Dwight Evans.

California - Hired Bruce Hines as first base coach and Frank Reberger as bullpen coach.

Chicago (AL) - Named Doug Abel director of public relations and community affairs, Barb Kozuh manager of fundraising and publications and John Ralph coordinator of publications.

Detroit - Announced pitcher Jack Morris exercised his 1991 contract option.

Houston - Announced they will not exercise option on 1991 contract for outfielder Terry Puhl; announced they will not offer salary arbitration to catcher Rich Gedman.

Los Angeles - Named Paul Kalil director of advertising and special events.

San Francisco - Purchased the contract of pitcher Kevin Rogers; placed pitcher Jose Alvarez on waivers for the purpose of giving him his unconditional release.

Toronto - Signed Rich Hacker as third-base coach.

BASKETBALL

Cedar Rapids (CBA) - Signed forwards James Scott, Joel DeBortoli, Demone Webster and guard Chris Harris.

NBA - Fined forward Mark Bryant of the Portland Trail Blazers $5,000 and suspended him without pay for the first regular season game for fighting during an exhibition game against Sacramento.

Seattle - Traded guard Avery Johnson to Denver for a conditional 1997 second round draft choice.

COLLEGE

Arkansas-Little Rock - Accepted an invitation to join the Sun Belt Conference starting in 1991-1992.

Clarion (Pa.) - Named Ken Nellis assistant wrestling coach and Grayling Gordon assistant men's basketball coach.

St. Louis - Signed men's basketball coach Rich Grawer to a multi-year contract.

Washington - Announced retirement of athletic director Mike Lude, effective Jan. 15, named Chuck Armstrong interim athletic director.

Western New Mexico - Announced running back Jerrod Martin and defensive back J.J. Velasco left football team.

Winthrop - Named Jack Frost sports information director.

FOOTBALL

Arena Football League - Granted expansion franchises to Chicago and Columbus, Ohio.

Detroit - Waived safety John Miller and cornerback William Judson.

LA Raiders - Placed tight end Andy Parker on injured reserve; signed tight end Ken Whisenhunt; signed cornerback Garry Lewis and tight end Rich Bartlewski to their practice squad.

New England - Placed safety Brian Hutson on injured reserve; activated tight end Zeke Mowatt.

Phoenix - Placed wide receiver Don Holmes and linebacker Jeroy Robinson on injured reserve; activated running back Ron Wolfley from injured reserve; signed nose tackle Craig Patterson; placed cornerback Stanley Blair on the practice squad.

HOCKEY

Pittsburgh - Reached agreement with defenseman Paul Coffey on multi-year contract.

NHL - Suspended Chicago Blackhawks defenseman Dave Manson for four games for deliberately attempting to injure Drake Berehowsky of Toronto.

TENNIS

International Tennis Federation - Announced resignation of women's tennis director Barbara Wancke.

#90298u0151 10/25/1990 ~United Press International
(OCT. 25) UPI - A compromise offer from House Democrats Wednesday afternoon may have led to agreement on a deficit-cutting budget plan. Significant progress was reported following a late-night bargaining session attended by congressional leaders from both parties, budget director Richard Darman and Treasury Secretary Brady. Several participants say only minor details remain to be ironed out.

Congress passed another stopgap spending measure Wednesday night to keep government operations running through Saturday. The White House issued a statement, saying President Bush would likely sign the measure early Thursday if a temporary budget agreement was reached.

Humphrey the wrong-way whale returned to the open sea Wednesday evening... after teasing his would-be rescuers by spending the day swimming around San Francisco Bay. Officials were worried the 40-ton humpback would get stuck again on the mud flats where he spent nearly two days mired in the mud. In 1985, Humphrey became a world celebrity when he led rescuers on a 25-day sojourn through Northern California's inland waterways.

Two New Jersey doctors issued a warning about the dangers of microwave popcorn bags. In a letter, the physicians say the steam that builds up in the paper microwavable bags can cause painful burns... especially to the eyes. They say manufacturers should take steps to include warnings on their products.

The six Balkan states Wednesday opened their first diplomatic conference to be held in communist Albania. They made a pledge to cooperate... even as Greece UNexpectedly attacked the host nation's rigid Marxist system. The Greek foreign minister called on the Albanian government to respect political, religious and human rights. Besides Greece and Albania, the Balkan states also include Yugoslavia, Romania, Bulgaria and Turkey.

#90298u0227 10/25/1990 ~United Press International

SAN FRANCISCO (OCT. 25) UPI - After having a whale of a time sloshing around in the mud and teasing those who would shoo him out of potentially fatal shallow water, Humphrey the humpback slipped under the Golde Gate Bridge and out to sea where he belongs.

''He was headed due west,'' Lance Jones, a spokesman for the Coast Guard said Wednesday night as the fascinating but unwanted tourist ended a three-day visit in which he charmed thousands of curious spectators, but frustrated dozens of marine biologists and volunteers who tried to keep the 40-ton whale from baking in the sun or suffocating under his own weight.

After meandering through San Francisco Bay, for all the world looking like he was teasing his human entourage, Humphrey headed due west into the Pacific, much to the delight of a cheering crowd on the bridge.

It was not clear if Humphrey's group - or pod - was waiting for him in open water.

''They were there on Monday, but we don't know if they're still there,''

Jonessaid.

Although Humphrey, who became a world celebrity in 1985 when he spent nearly a month in San Francisco Bay and jogging up the Sacramento River, had apparently left, Jones admitted he could have turned around and gone back into the Bay under cover of darkness.

A flotilla of rubber boats and a Coast Guard cutter escorted Humphrey, who dove and spouted as if he was thoroughly enjoying himself.

Wetsuit-clad volunteers in rubber dinghies hung metal bars below the water and pounded them with hammers, hoping the annoying racket would drive Humphrey to sea.

Humphrey was seen Wednesday morning foraging for herring off Alcatraz Island, which is just inside the Golden Gate, giving hope that he was headed out of the Bay. But after several hours without being spotted, he was seen several miles away in the wrong direction.

Experts from the nearby Marine Mammal Center who examined Humphrey and identified him by the distinctive markings on his belly and dorsal fin, said he was healthy.

Humphrey was first seen Monday, stranded in less than 3 feet of water in the mud flats. He spent nearly two days stuck in the muck while volunteers used towels and buckets to keep him wet, and worried that his bulk would crush his lungs if he was not floated in deep water.

At Tuesday's high tide, they managed to put a sling around him and a Coast Guard cutter towed the endangered humpback into deep water. But the whale that just seems to like San Francisco played it true to form and headed the wrong way, beaching himself again on a muddy bank.

At Tuesday's second high tide, divers used air compressors to lift him high enough to slip the harness back on, gave a pull, and the whale finally slipped off into deeper water as scientists played a tape- recorded whale-feeding song - only to watch as he cavorted in the Bay and frustrated their attempts to lure him out to sea.

Humpbacks often come close to the California shoreline, especially on their to-and-fro migrations from their Arctic feeding grounds to South American mating areas, but Humphrey is the only one to come in for such a close look.

#90298u0233 10/25/1990 ~United Press International

(OCT. 25) UPI - President Bush may tell Congress about the use of force in the Persian Gulf only after the fact, but some members will be available for

consultations after adjournment, officials said, while American and British hostages celebrated their return home.

Japanese Prime Minister Toshiki Kaifu's popularity plummeted after he failed to convince the public to support his plan to send Japanese non- combat troops into the Gulf, newspaper polls said Thursday.

Secretary of State James Baker and Defense Secretary Dick Cheney, in a briefing to House members Wednesday, said the administration might tell Congress only afterward if it were to launch an attack, Rep. Les Aspin, D-Wis. said.

''The most difficult problem for them (the administration) is if they use military force in response to a provocation,'' said Aspin, chairman of the House Armed Services Committee. ''My sense is that they would do that (use force) and consult (with Congress) after.''

Congress has been jittery about the prospects the administration would launch an all-out attack against Iraq after it adjourned for the year, without a formal declaration of war.

House Speaker Thomas Foley of Washington said Wednesday that members of the House and Senate will form joint bipartisan committees ''to make themselves available as a group for regular consultation with the president'' after adjournment. Congress is expected to adjourn this week.

Kaifu has failed to convince a majority of Japanese to support his plan to send non-combat troops to the Gulf and has suffered a sharp drop in his personal popularity for his efforts, two newspaper polls said Thursday.

Both polls indicated Kaifu has lost popularity because of his support for a bill which would allow the Japanese military to be dispatched to a war zone for the first time since World War II. The debate over the plan continued in parliament.

Five of 14 Americans freed by Iraq arrived in New York Wednesday evening, the State Department. The other nine were due in at Dulles International Airport near Washington, D.C., Thursday evening.

Forty British hostages celebrated their arrival in Britain Wednesday after nearly three months of captivity in Baghdad, but Foreign Secretary Douglas Hurd said he found it ''grisly and repulsive'' that Iraq had released only sick and old people.

Accompanying them was former Prime Minister Edward Heath, who secured their release after meeting with Saddam Hussein.

''I find it grisly and repulsive that the Iraqis should set about deciding who

is so sick, who is so old, that they should be released from the position in which no human being should ever be placed,'' said Hurd, to murmurs of approval from members of Parliament.

In addition to the British and Americans, Iraq said all French hostages, numbering about 330, were free to leave the country.

France said it was taking all steps to repatriate its nationals in Iraq and Kuwait as soon as possible, again insisting the release was not the result of negotiations with Baghdad.

French Foreign Minister Roland Dumas told the weekly Council of Ministers session the release of the hostages was the result of the firm policy followed by France in applying U.N. sanctions against Iraq.

Some diplomats and observers said the move by Saddam to free the French was an attempt to divide the Western alliance formed against Iraq.

King Fahd was quoted by the British Broadcasting Corp. as saying his country's stand in the crisis was unchanged, despite remarks over the weekend by the Saudi defense minister that indicated the kingdom would consider a partial withdrawal of Iraq from Kuwait in order to maintain peace.

''The explicit and decisive stance declared by Saudi Arabia towards the Iraqi criminal aggression against fraternal Kuwait is firm, irrevocable, clear and unambiguous,'' Fahd was quoted as saying.

''The stance is not subject to any change or negotiations,'' he said.

Saudi Defense Minister Sultan Bin Abdul Aziz hinted Monday that Kuwait should give Iraq two strategic gulf islands in return for a withdrawal from the rest of the country. The following day he said his remarks had been misinterpreted.

#90298u0270 10/25/1990 ~United Press International

MANILA, Philippines (OCT. 25) UPI - The National Security Council agreed Thursday to consider maintaining current petroleum prices until the end of the

year, a day after leftist unions staged a violent strike to press demands for pay raises.

A 29 percent increase in petroleum prices last month, sparked by the Persian Gulf crisis, triggered labor demands $1.48 percent raise in the daily minimum wage of $3.46.

The council ''agreed to seriously consider maintaining the current oil prices until the end of the year and to carefully examine the proposals to reduce the foreign debt burden,'' a statement said.

Opposition leader Juan Ponce Enrile and Vice President Salvador Laurel attended the two-hour meeting at the presidential palace - only the second for the council since Aquino became president in 1986.

Aquino has accused Enrile and Laurel of attempting to oust her, but invited them under pressure to resolve worsening economic problems sparked by the Gulf Crisis.

The council members include the speaker of the House of Representatives, the Senate president, the defense secretary, the armed forces chief and Aquino's security advisers.

Economic analysts said more than the natural disasters and political problems hounding Aquino, the most volatile was the impact of the Gulf crisis and the rising petroleum prices.

The Philippines is dependent on oil imports. With a $26 billion foreign debt, an expected $3 billion trade deficit and a $2 billion budget deficit, the country is having difficulty trying to get more loans.

At least 18 vehicles were torched, three people killed and 30 people arrested in the violence that erupted Wednesday during the strike. The strike failed to paralyze the country as the organizers had vowed to do although in some areas of the capital transport owners were scared into locking up their buses.

Officials blamed guerrillas of the communist New People's Army for the violence. It was the first time the 19,000-member NPA, which has been battling the Manila government for 21 years, openly joined a general strike.

Despite vows by organizers to continue their effort, the strike appeared to have fizzled by Thursday. Police said supporters burned four buses outside Manila, firebombed another bus and a beer truck and tossed a grenade, which did not explode, at a land transport office. One busdriver was injured.

The National Democratic Front, political wing of the NPA, urged Filipinos to continue the struggle for ''just economic demands'' and ''overthrow the reactionary system.''

''To decisively fulfill this historic mission, armed struggle must be embraced as a legitimate weapon of the people against the violent ruling system,'' said the statement signed by rebel priest Frank Fernandez, who identified himself as the front's secretary general.

#90298u0356 10/25/1990 ~United Press International

PARIS (OCT. 25) UPI - President Francois Mitterrand expects war to break out in the Persian Gulf soon and has decided to allow French forces in the region to operate under U.S. command, the International Herald Tribune reported Thursday.

Quoting an unnamed source, the newspaper said Mitterrand thought war was inevitable because of the continuing intransigence on the part of Iraqi President Saddam Hussein.

On Wednesday, the satirical but reliable newspaper Le Canard Enchaine reported that Mitterrand had told a number of visitors an American attack was imminent. The newspaper said the French leader had cited a time frame between Oct. 25 and Nov. 6, but added this may have changed to allow French hostages to leave Iraq.

Asked to comment on the reports, a spokeswoman for the presidential Elysee Palace said, ''The president had not expressed himself in those terms under any circumstances, public or private.''

The spokeswoman added, ''We do not have any information that allows us to say that the United States is going to attack'' and classified as ''absurd'' the report French forces would be placed under U.S. command in case of war.

Mitterrand has said Paris would not back unilateral military action by Washington but would participate in an attack against Iraq if it were approved by the U.N. Security Council.

French media reported Thursday that the estimated 330 French citizens being held against their will in Iraq and Kuwait will return to Paris Saturday. The reports said the 67 hostages that had been placed around strategic locations as a shield against military attack had already been transferred to Baghdad.

It was still not certain, however, whether the hostages would return home on a special Airbus jet sent by the French government or aboard an Iraqi Airlines flight.

The International Herald Tribune quoted its source as saying the likelihood of war in the Gulf had removed Mitterrand's doubts about allowing the 5,500 French soldiers stationed in Saudi Arabia and the United Arab Emirates from

operating under the command of the U.S. army.

If so, the decision would represent a major break from the Gaullist tradition of never allowing French troops to operate under the command of another government. It is also certain to fuel anger from the extreme right, which has sharply criticized French involvement in the crisis.

''France's tradition of independence has been safeguarded because the president made the decision to commit French forces,'' the newspaper quoted a Mitterrand aide as saying.

''It would be criminally foolish to endanger military success and people's lives by pursuing a pretense that a 5,000-man French contingent can function independently of the 200,000-strong U.S. force,'' the aide reportedly said.

The newspaper said that during a visit to Paris last weekend, U.S. Secretary of Defense Richard Cheney invited French officers aboard its AWACS surveillance planes in the Gulf.

The report said the step was taken to keep French commanders abreast of important military information, but it did not indicate whether France had accepted the offer.

France has purchased several of the surveillance planes, known as AWACS for Airborne Warning and Control System, but the first model was delivered only last week and will not be operational for many months, according to the Herald Tribune.

The report in Le Canard Enchaine said Mitterrand had concluded that President Bush, his popularity dropping and embroiled in a budget battle with Congress, is doing everything he can to unleash a war before congressional elections Nov. 6.

The French leader also believes all the military conditions are at their optimum for a war, with the desert heat down to tolerable levels and the U.S. army contingent fully in place and ready for war.

The newspaper said Mitterrand told visitors that the reason Bush is seeking to unleash a war could come if the Iraqis refuse to resupply the American, British, and French embassies in Kuwait City with necessary food and water.

Mitterrand reportedly said Bush would first go to the United Nations Security Council over the issue, but may decide to go to war if Iraq does not cede.

#90298u0391 10/25/1990 ~United Press International

TOKYO (OCT. 25) UPI - Foreign investors may soon be allowed to invest in

Nippon Telegraph and Telegraph Corp., Japan's telecommunications giant and the country's most widely held issue, NTT President Masashi Kojima said Thursday.

''Hopefully, if all things will go well, a bill to abolish regulations (governing the NTT business) will be submitted to the Diet (parliament) for approval in November,'' Kojima said.

He said the ruling Liberal Democratic Party and the ministries of finance and posts and telecommunications, are engaged in serious discussions on measures to allow foreign investors to acquire the NTT stock.

Under existing law, foreign investors are barred from purchasing NTT shares. Statutes also mandate the government's retaining at least one third of the company's outstanding shares.

''Personally, I favor the abolishment of these regulations,'' Kojima said. ''NTT is the only telecommunications company whose stock is not traded overseas. This is undesirable.''

He said the company has been raising funds on overseas money markets, mainly in Europe, and it plans to issue about $2.4 billion worth of convertible debentures annually in the future. Such bonds can be converted into NTT shares under certain conditions.

NTT, a former state-run monopoly, was privatized in April 1985 under the government's policy of liberalizing the domestic telecommunications market.

Kojima said the existing law tends to create concern among NTT shareholders because it empowers the government to override management decisions made by the company.

The government, however, is struggling to find ways to sell NTT shares without disrupting the market. The Ministry of Finance has to date released a total of 3.45 million NTT shares to public subscription on three occasions during 1987 and 1988.

Kojima added the company will continue efforts to expand procurement from foreign suppliers.

He said the company's overseas procurement is expected to reach about $400 million this year, up from about $240 million in 1989.

The company's purchases from foreign suppliers in 1989 accounted for 8.3 percent of its total procurement, up from 6.7 percent in 1988.

Kojima said NTT will also promote joint development of equipment based on a sharing of technology with foreign manufacturers.

#90298u0423 10/25/1990 ~United Press International
TOKYO (OCT. 25) UPI - The Asian Bankers Association will hold its general meeting and seminar in Tokyo Nov. 5-6 under the main theme of ''The Direction of Regional Cooperation in Asia-Pacific Toward the Year 2000,'' the Long-Term Credit Bank reported Thursday.

The session will be the association's first general meeting in Japan.

Representatives from 107 member banks and financial institutions in the Asian-pacific region will attend the session and discuss measures for cooperation, the bank said.

The association was established in 1981 to promote closer relations among the region's financial institutions as well as cooperative projects supporting economic development in the region.

Among guest speakers at the seminars will be Bank of Japan Governor Yasushi Mieno and Prof. Robert A. Scalapino, former head of the Institute of East Asian Studies at the University of California at Berkeley.

-30- 1075
#90298u0441 10/25/1990 ~United Press International
TOKYO (OCT. 25) UPI - Bank of Japan Governor Yasushi Mieno said Thursday he is confident Japan's economy will continue to expand without experiencing a slowdown.

Mieno said the brisk Japanese economy, now in its 47th month of continous expansion, will remain healthy and its foundation appears strong.

''As a whole, corporations remain prudent in setting prices for their products '' he said, adding the favorable impact of higher interest rates in cooling off the booming economy is beginning to emerge.

The central bank raised the official discount rate 0.75 percentage points to 6.0 percent in August.

Mieno said higher interest rates have averted a further rise in land prices and brought about a more cautious lending attitude by financial institutions.

''I believe there still is room for the effect of the rate hike to bring a favorable impact,'' he said.

Referring to the recent volatile foreign exchange markets, Mieno said, ''I expect market movements to regain stability by ensuring currency values in accordance with each country's fundamental economic strength.''

#90298u0470 10/25/1990 ~United Press International
(OCT. 25) UPI - Congressional and administration negotiators say they are within striking distance of agreeing on a deficit reduction package. And the White House says President Bush will likely sign another stopgap spending measure to keep the government funded through Saturday. Budget director Richard Darman indicated late last night that negotiators had reached a tentative agreement on key parts of a five-year, 500-BILLION- dollar deficit reduction plan.

Analysts say a rise in petroleum prices due to the Persian Gulf crisis is hitting Philippine President Aquino harder than other political troubles. In Manila today, the National Security Council agreed to consider maintaining current petroleum prices until the end of the year. Aquino called opposition leaders to the meeting in an attempt to resolve worsening economic troubles.

Japanese Prime Minister Toshiki Kaifu is watching his popularity plummet due to a lack of support for his plan to send troops to the Persian Gulf. Two newspaper polls published today in Tokyo say a majority of Japanese do NOT back Kaifu's proposal to sent NON-combat soldiers to the gulf. The Japanese military has NOT been dispatched to a war zone since the second world war.

A San Bernardino, California, couple will be arraigned today on child abuse charges for allegedly keeping a 12-year-old locked in closets for much of her life. Joseph and Sandra Saucedo are being held on 50- thousand-dollars bail. Police say they found the child in a cockroach- infested closet that reeked of urine. The girl was apparently singled out from six other siblings for abuse.

-30- 1777
#90298u0471 10/25/1990 ~United Press International
(OCT. 25) UPI - President Bush takes off today on a five-day West Coast tour, stumping for G-O-P candidates in Arizona, California, Oklahoma and Hawaii. The travel plans were made as Bush spokesman Marlin Fitzwater rejected a report that Bush was shunned on a New England campaign swing earlier this week. Fitzwater says Bush- as he put it- ''had a great reception.''

Environmentalists are urging President Bush to sign clean air legislation now awaiting final passage in Congress. The National Clean Air Coalition released a study that disputes industry predictions that the bill would deal a blow to an already troubled U-S economy. The umbrella organization of environmental groups says the bill would cost the average American household an additional eight-dollars and 40 cents each month by 1995.

Three nations were rocked today by an earthquake measuring six-point- five on the Richter scale. There were NO immediate reports of casualties or damage

from the quake that centered on the Pakistan-Afghanistan border... rattling windows as far away as New Delhi, India. Officials say the quake caused many people to rush out of their homes in a panic in northern Pakistan and India.

Japan's biggest condom maker is defending its product against American complaints. The city of Philadelphia distributed the Okamoto Industries condoms to low income residents, many of whom complained they were uncomfortable and defective. But an Okamoto manager defended the condoms, pointing out that they were distributed to low income people and- quoting now- ''they probably didN'T know how to properly use the condoms.''

#90298u0472 10/25/1990 ~United Press International

SEOUL, SOUTH KOREA (OCT. 25) UPI - Youths angered by the arrest of a student leader battled police, burned an American flag along with an effigy of President Roh Tae-woo and firebombed a police station Thursday in Seoul and provincial cities. One police officer was reportedly wounded in the clashes.

About 800 students staged a rally at Korea University in Seoul demanding the release of Song Kap-sup, president of the hard-line dissident National Council of University Student Representatives, who was arrested Wednesday at a hideout in Seoul. Song, 24, had been sought by police since May 9 when he led violent anti-government demonstrations.

Leading members of Song's organization declared at a news conference they will launch a two-week campaign to force the government to free Song. During the campaign, members will stage firebomb attacks on police stations and other public offices including those used by the government party, they said.

During the protest in Seoul, students burned Roh in effigy along with an American flag in front of the gate of the university, and then marched off campus and threw firebombs and rocks at riot police who blocked their way.

Police fired tear gas in retaliation.

Some of the demonstrators charged the United States with forcing Korea to open its domestic agricultural markets to imports and accused the ruling Democratic Liberal Party of seeking to prolong its rule.

In Kwangju, 170 miles south of Seoul, about 1,700 students of Chonnam University, Song's school, and Chosun University staged separate rallies demanding Song's release and battled police in street riots, the domestic Yonhap News Agency said.

About 150 miles southeast of Seoul in Taegu, a group of students hurled a dozen firebombs and burned a police partol car, Yonhap said. A police officer suffered burns in the face and head in the attack and was hospitalized, it

said.

There were similar protests during the day involving about 1,000 students in several other provincial cities, including one in Suwon, 25 miles south of Seoul, where 10 students firebombed a police substation and police fired two warning shots and arrested six of the protesters.

#90298u0484 10/25/1990 ~United Press International

(OCT. 25) UPI - Stock prices rebounded sharply Thursday on the Tokyo Stock Exchange, recouping the previous day's losses in a resumption of a rally that started almost two weeks ago.

The key Nikkei Average of 225 selected issues, which shed 421.42 points Wednesday, jumped 475.75 points to 25,352.63.

The broader-based Tokyo Stock Exchange Price Index of all listed shares, which fell 18.08 points Wednesday, climbed 39.15 points to 1, 880.63.

An estimated 750 million shares changed hands, up from 526 million shares changing hands Wednesday.

Advances hammered declines 822 to 151, while 117 issues remained unchanged.

Elsewhere in Asia, stocks posted mild gains in active but narrow trading on the Hong Kong Stock Exchange.

The benchmark Hang Seng Index, which fell 39.15 points Wednesday, added 8.80 points to 3,050.88. The key index ended the holiday-shortened week with a gain of 58.93 points.

Banks, exchnages and most businesses will be closed Friday for the start of the Chung Yeung Festival holiday. Trading will resume Monday.

In Singapore, stocks closed mixed in moderate trading on the Singapore Stock Exchange as some bouts of profit taking overcame optimism over the spurts on Wall Street and Tokyo.

The Straits Times Industrial Index, which added 1.05 points Wednesday, slipped 1.41 points to 1,209.54 following eight successive gains, the best spurt this year.

The broader-based All Singapore Index, which added 0.59 points Wednesday, fell 0.74 points to 334.24.

Volume amounted to around an estimated 60.6 million shares, compared with 53.9 million shares changing hands Wednesday.

In Bangkok, stocks ended lower in moderate trading on the Thailand Stock Exchange.

The Securities Exchange of Thailand Index, which gained 26.02 points Wednesday fell 10.66 points to 698.69.

Volume amounted to around an estimated 3.5 billion Thai shares, compared with 4 billion shares changing hands Wednesday.

WASHINGTON (OCT. 25) UPI - Initial claims for state unemployment insurance benefits totaled a seasonally adjusted 421,000 for the week ending Oct. 13, an increase of 26,000 from a week earlier, the Labor Department said Thursday.

-30- 397

#90298u0512 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Sen. John Danforth, R-Mo., says new rules requiring automakers to strengthen cars to provide better protection against side-impact crashes will save more than 500 lives a year.

''This is probably the most significant day for motor vehicle safety since 1984, when the Department of Transportation issued the rule requiring airbags or automatic safety belts,'' Transportation Secretary Samuel Skinner said Wednesday in announcing the new regulation, which begins to take affect with the 1994 model year.

The regulation, which will be phased in over a four-year period, sets new standards for side door strength.

Manufacturers can choose to meet the standard by padding the doors, by improving the car structure or using a combination of the two methods.

''This is a regulation that is going to save about 500 lives a year, and it is going to prevent about 2,600 injuries, some of them very serious injuries, each year,'' said Danforth, the ranking Republican on the Commerce, Science and Transportation Subcommittee.

The National Highway Traffic Safety Administration has established criteria that will be used to measure the effectiveness of side protection.

The added protection will cost about $50 dollars per vehicle, officials said. That estimate includes added fuel costs that will result from added weight.

''Fifty dollars is a small price to pay to prevent the immense loss of life

and suffering as a result of these side impacts,'' Skinner said.

Both Skinner and NHTSA Administrator Jerry Curry said the regulation was developed in cooperation with car makers and the insurance industry.

''The decision to improve side-impact protection follows years of research and testing by NHTSA, other governments and auto manufacturers worldwide,'' Curry said.

He also said some cars already available meet the new standards but would not name them.

Automobile manufacturers have found that consumers are considering safety when choosing a vehicle. For example, Chrysler advertises that its smaller cars have airbags while some of its competitors do not.

Under the regulation, car makers have until Sept. 1, 1996, to fully meet the improved crash protection requirements. Starting Sept. 1, 1993, 10 percent of each manufacturer's production must meet the new standard.

The requirement increases to 25 percent in 1994, 40 percent in 1995 and 100 percent in 1996.

Carmakers also can choose to delay implementation of the improved crash protection if 100 percent of their production meets it by Sept. 1, 1994.

#90298u0521 10/25/1990 ~United Press International

BERLIN (OCT. 25) UPI - U.S. companies are delaying investment in former East Germany because of unclear property rights, a senior representative of Germany's American Chamber of Commerce said Thursday.

Although American investors show great interest in eastern Germany, they hesitate to invest there because the question of private property has not been resolved yet, said Knut Fischer, vice president of the American Chamber of Commerce in Germany.

When the hard-line East German Communist leadership was ousted last fall, private property rights were reintroduced and thousands of former proprietors - including many Jews who fled the Nazis in the 1930s - filed claims to get their land back.

Many investors fear if they purchase a factory or land, the former owners may appear and rightfully claim what used to belong to their families.

U.S. conglomerates such as fast food and service station chains and consumer goods producers will lead U.S. investment in eastern Germany, Fischer said.

But it will take three to four years for them to get established, he added.

The American Chamber of Commerce in Germany is a private organization founded in 1903. Its goal is to promote free competition and improve trade between the United States and Germany.

Following the Oct. 3 unification of both German states, the Chamber announced plans to open offices in the five new eastern federal German states.

#90298u0522 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - President Bush signed a temporary spending bill early Thursday, signalling his satisfaction with progress made during the night by House Democrats and administration negotiators toward finalizing a deficit reduction plan.

The stopgap measure, the fourth emergency spending measure since the Oct. 1 start of the new fiscal year, provides funding for the federal government through midnight Saturday, suspends the sequester required by the Gramm-Rudman-Hollings law through Saturday and extends the temporary debt limit increase for the same period. The stopgap measure Bush signed last Friday expired at midnight Wednesday.

The White House had said Bush would sign the stopgap measure provided a temporary budget agreement was reached.

Richard Darman, Bush's budget chief, indicated shortly before midnight Wednesday that tentative agreement had been reached on key parts of the long-delayed five-year, $500 billion deficit reduction plan, with only certain details remaining as a barrier to a final accord.

''I'd say we're a whole lot closer than we have been since we concluded the summit agreement,'' Darman said, referring to the agreement negotiated by congressional and administration leaders that was killed in the House.

Darman said ''it's definitely possible'' for the deal to be finalized Thursday but cautioned that ''there's still quite a decent laundry list'' of details to be finalized.

The crucial step toward breaking the bargaining logjam came Wednesday afternoon when House Democrats embraced a new plan that dropped a surtax on millionaires that Bush disliked and opted for limiting tax deductions and exemptions for the rich.

Significant progress was reported following a late-night bargaining session bringing together congressional leaders from both parties, Darman and Treasury Secretary Nicholas Brady.

''It's the process of trying to clean up a lot of the final details, which could be tough,'' said Rep. Leon Panetta, D-Calif., chairman of the House Budget Committee. ''But the parameters are there and I think we can work to a conclusion.''

The ranking GOP member of the Senate Budget Committee, Sen. Pete Domenici, R-N.M., added, ''I don't think there are any (unresolved issues) that are show-stoppers, but they have to be worked on.''

Darman said agreements still had to be reached on levels of cuts in Medicare and Medicaid, some unspecified tax provisions and one minor agriculture provision.

''If the say were organized well, I think we all felt we could conceivably get the decisions made in time and the drafting done so that you could get a vote late (Thursday) night on the House floor,'' Darman said.

The compromise deficit reduction plan won the support of a majority of House Democrats who met Wednesday, said House Speaker Thomas Foley, D-Wash.

Asked if the White House would accept the latest compromise, Foley said: ''I believe it will. I believe we can reach an agreement on this.''

''We prefer, as a method of doing that, a surcharge (on millionaires),'' Foley said. ''But we are now focused around a mechanism which will achieve the same impact in terms of the fair share of taxes being paid by high income individuals. And it will result in a very strong improvement in the progressivity of this package compared to the (budget) summit, compared to the Senate bill and we are strongly supporting that provision.''

Congress has been working for weeks to reach an agreement on a package of spending cuts and tax increases representing the major portion of a $500 billion reduction in the federal budget deficit over the next five years, with about $40 billion in savings in fiscal year 1991.

All but "essential" government services were halted Oct. 6-8 when Bush vetoed an earlier stopgap spending measure and Congress narrowly sustained the veto.

The latest plan would raise the current 9-cent-a-gallon gasoline tax by a nickel a gallon. It would raise Medicare premiums by 25 percent and raise the deductible from the current $75 to $100 - a smaller increase than in the defeated bipartisan budget summit plan or in the Senate bill.

The deal would raise income tax rates on the wealthiest Americans from the current 28 percent to 31 percent while at the same time lowering the tax rate on middle to upper income Americans from the current 33 percent to 31 percent.

That would flatten out the so-called bubble in the tax code in which the richest Americans benefitted from a lower tax rate than those less well off.

ISLAMABAD, PAKISTAN (OCT. 25) UPI - A strong earthquake rocked wide areas of Pakistan, Afghanistan and India Thursday, injuring at least 70 people and causing damage to buildings, Radio Pakistan reported.

The quake measured 6.6 on the Richter scale and the epicenter was about 250 miles north of the western Pakistan city of Peshawar on the Pakistan-Afghanistan border, the Seismology Institute in Peshawar said.

The quake struck at 9:57 a.m. Pakistan time and lasted about 15 seconds.

Radio Pakistan said at least 70 people were treated in hospitals in the Northwest Frontier Province for injuries suffered as a result of the quake. It said damage was also caused to houses in the province.

The temblor was felt as far east as New Delhi. People ran out of their homes in panic in towns and cities across northern Pakistan and northwestern India.

#90298u0632 10/25/1990 ~United Press International

UNIVERSITY PARK, PA (OCT. 25) UPI - The early years of the Central Intelligence Agency are chronicled in the first official history of the CIA, a once classified document written at the dawning of the Cold War and soon to be sold in book form.

The work by Arthur B. Darling, ''The Central Intelligence Agency: An Instrument of Government, to 1950,'' will be published by Penn State Press in December. It is the first document released through the CIA's Historical Review Program.

Officials at the university press say publication of the CIA history symbolizes a new openness and willingness by the agency to make public

information about its past.

The book also is considered an important historical document because it is based on internal memoranda and records never before available to anyone outside of government, said Sanford Thatcher, director of Penn State Press.

In a prepublication review, Publishers Weekly recommended the book become ''a basic document in studies of U.S. government organization and power struggles of the late 1940s.''

Darling was the CIA's first historian from 1952-54. He wrote the history in 1953 but the manuscript was classified until November 1989, when it was released to the public and recommended for publication.

Established by the Truman administration and Congress in the years immediately following World War II, the CIA was intended to be the United States' first permanent, peacetime intelligence agency. Its intent was to focus the process of intelligence-gathering in a way that would assist presidential decision-making.

Darling's history has an advantage over other histories of the early CIA because it was written when the threat of a large-scale Soviet invasion of Western Europe loomed large, Thatcher said. It recreates the atmosphere of the times, at the dawning of the Cold War, and the attitudes of those who created the agency.

Only about 200 lines in the 700-page manuscript were deleted during the declassification process, Thatcher said. The deletions dealt mainly with the CIA's covert operations and its relationships with foreign intelligence agencies.

#90298u0636 10/25/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (OCT. 25) UPI - A senior African National Congress official, making the movement's strongest public attack on Israel, has accused the country of conducting a campaign of terror in its occupied territories and of beginning to emulate Adolf Hitler.

Steve Tshwete, a member of the ANC's policy-making National Executive Committee, told a pro-Palestinian solidarity meeting Wednesday night that, ''Successive Israeli governments have planned and carried out an outrageous campaign of terror with impunity.''

''What is disgusting about it all is that this carnage is carried out by people who not long ago had to be rescued by the democracies of the world from the clutches of a monster that they are now, wittingly or unwittingly, beginning to emulate,'' Tshwete said, speaking to applause from the mainly

Moslem audience of some 600.

The meeting was called in part to condemn the killing of 20 Palestinians on Jerusalem's Temple Mount by Israeli police on Oct. 8.

Tshwete said Israelis ''have massacred and continued to slaughter hundreds of Palestinian women and children without any regard to international appeals that the problem can be negotiated peacefully.''

Referring directly to the Temple Mount incident and riots in its aftermath, Tshwete said, ''One cannot but conclude that the government of Israel is totally lost to the cause of peace, justice and democracy.''

ANC leader Nelson Mandela offended Jews in South Africa and elsewhere when he met and embraced Palestine Liberation Organization leader Yasser Arafat in February and later described Libya as a friend of the ANC.

Mandela and other ANC officials have voiced support for the Palestinian cause, comparing it to the blacks' struggle against apartheid in South Africa, and have criticized Israeli security force action in putting down unrest in the West Bank and Gaza strip.

But Mandela has also told South African Jews he and the ANC recognize Israel's right to exist and do not condone any form of anti-Semitism.

#90298u0638 10/25/1990 ~United Press International

MANILA, PHILIPPINES (OCT. 25) UPI - Leftist workers burned buses Thursday in a bid to continue a general strike for higher wages that appeared to have fizzled, and communist rebels urged Filipinos to continue efforts to oust President Corazon Aquino.

''To decisively fulfill this historic mission, armed struggle must be embraced as a legitimate weapon of the people against the violent ruling regime,'' said a rebel statement signed by rebel priest Frank Fernandez.

Also Thursday, Aquino convened for the second time in her four-year administration the National Security Council to discuss the impact of the Persian Gulf crisis on the ailing Philippine economy.

Analysts regard the crisis potentially more damaging than the natural disasters and coup attempts hounding her government.

Riot police attempted to break up a two-day vigil at the Senate by 1, 500 workers demanding a more than 50 percent wage hike to cope with higher petroleum costs caused by the crisis, but Senate President Jovito Salonga intervened and allowed them to stay until Friday morning.

Police said heavily armed men believed to be communist New Peoples Army guerrillas burned four passenger buses in Manila and nearby towns, injuring one driver. The 19,000-member insurgency has been battling the Manila government for 21 years.

The suspected guerrillas firebombed another bus and a beer truck, but police arrived and prevented the vehicles from burning. A grenade was lobbed at a transport office, but it did not go off.

Strikes that began Wednesday were maintained in some factories Thursday and authorities ordered the suspension of school classes for a third day on Friday.

The military said 72 people were arrested during the two-day strike for carrying Molotov cocktails and barricading main streets in the capital. Police filed sedition charges Thursday against one of those arrested, transport union leader Medardo Roda.

Officials said NPA guerrillas torched 17 vehicles Wednesday at the start of the indefinite strike.

A guerrilla and two workers were killed Wednesday but the strike that affected more than 200 of the nation's 350,000 companies failed to cripple the nation as organizers had vowed.

Strikers of the left-wing May 1st Movement were seeking a $1.48 increase in the daily minimum wage of $3.46 to help them cope with an increase in petroleum prices caused by the Persian Gulf crisis and soaring oil rates.

Aquino has allowed a 66-cent raise, but said companies cannot afford the higher rate.

The meeting on the gulf crisis, called several weeks ago, brought Aquino together for the first time with opposition leader Juan Ponce Enrile and Vice President Salvador Laurel since she accused them of plotting to overthrow her several years ago.

A palace statement released later said the Council agreed to consider maintaining current petroleum prices until the end of the year, reduce a $2 billion budget deficit and trim the $26 billion foreign debt.

The meeting was regarded by analysts as little more than a public relations effort by Aquino to remove the image of a divided nation with a leadership unable to handle the gulf crisis.

But both Enrile and Laurel responded positively, saying Aquino paid attention to their recommendations for solving the nation's problems.

''The mere fact that we were invited is an indication that the door is open (to national reconciliation),'' Enrile said.

#90298u0641 10/25/1990 ~United Press International

BEIJING (OCT. 25) UPI - China said Thursday a feud between Beijing and Tokyo over a group of islands in the East China Sea could harm Sino-Japanese relations, and demanded Japan stop activities claimed to violate Chinese sovereignty in the disputed region.

''We have all along advocated that both China and Japan should ... deal with this question with prudence so as to prevent it from affecting relations,'' Chinese Foreign Ministry spokeswoman Li Jinhua said at a news briefing.

''If the Japanese side fails to do so it will undoubtedly bring unfavorable impact on bilateral relations,'' Li warned.

Li would not indicate whether China is prepared to use force to assert its sovereignty over the eight tiny uninhabited islands located in the East China Sea between northern Taiwan and the Japanese-ruled Ryukyu Islands.

Known as the Diaoyutai islands in Chinese and the Senkaku islands in Japanese, the group is claimed by China, Taiwan and Japan and has been the subject of recurring territorial disputes since the end of World War II.

''The incident of the Diaoyutai islands was provoked by the Japanese side and Japan should be responsible,'' Li said, repeating earlier demands that Japan immediately stop ''violating Chinese sovereignty.''

''We have stated our position and will take necessary measures in view of the development of the situation,'' the spokeswoman said. She refused to elaborate.

China has not made any official protest to the Japanese government over the islands despite repeated statements in the state-run media, according to a spokesman for the Japanese Embassy in Beijing.

The recent dispute over the islands was triggered by attempts by a Japanese right-wing group to obtain official recognition of a Japanese- built lighthouse on one of the islands.

Taiwan then jumped into the fray by dispatching a group of politicians to the Diaoyutais Sunday in a staged event to reinforce Taiwan's territorial claim.

Japanese coast patrol boats and helicopters blocked the delegation and forced them to turn back following a five-hour standoff in waters west of one of the islands.

Claims over the islands are fueled by a U.N. report in the early 1970s that the group lay in the middle of a potentially rich oil zone.

Beijing renewed claims to the islands in 1971, but agreed with Japan in 1972 to shelve the issue when the two nations normalized relations. Senior leader Deng Xiaoping later was quoted as saying the dispute should be left to the next generation to settle.

#90298u0654 10/25/1990 ~United Press International

STAMFORD, CT (OCT. 25) UPI - Xerox Corp. Thursday reported third-quarter earnings of $132 million, or $1.16 a share, down from $155 million, or $1.41 a share, in the year-ago period.

Revenues for the quarter were $4.5 billion, up from with $4.4 billion in the year-ago quarter.

For the first nine months of 1990, Xerox reported earnings of $8 million, which resulted in a per-share loss after payment of preferred dividends, compared with earnings of $492 million, or $4.55 a share, in the comparable period of 1989.

The 1990 nine-month period reflected the impact of the sale of the company's real estate operations in the first quarter.

For the same 1990 nine-month period, but on a continuing operation basis, Xerox reported earnings of $383 million, or $3.38 a share.

Revenues for the nine-month period were $13.3 billion this year, up from $13 billion in the first nine months of 1989.

Xerox said its core document processing business recorded strong growth but this was ''more than offset by continued weak performance in the company's insurance and other financial services businesses, principally due to substantially lower capital gains in insurance.''

''Overall financial results continue to be constrained by weakness in the property and casualty insurance industry and generally adverse financial market forces,'' said Paul Allaire, Xerox's president and chief executive officer.

#90298u0664 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The sales pace for existing homes dropped in September to the lowest level since January 1988 as the economy weakened in the aftermath of the Iraqi invasion of Kuwait, an industry survey said Thursday.

Declines were reported in all parts of the nation except the Northeast, which posted no change. The median price for an existing home also slipped to $94,300 in September, 2.9 percent below August.

The South was especially hard hit as thousands of military personnel were shipped off to defend Saudi Arabia following the Aug. 2 attack that heightened tensions in the Middle East and sent the price of oil skyrocketing.

According to data collected by the National Association of Realtors, sales slid to a seasonally adjusted annual sales rate of 3.22 million existing single-family homes last month.

In January 1988, the rate was 3.2 million units.

The realtors said September's rate was 8 percent below the revised August rate of 3.5 million units, and 8.3 percent below the rate of sales during September 1989.

Norman Flynn, president of the 800,000-member association, blamed the slowdown on the Persian Gulf crisis as well as uncertainty over the stalmate over slashing the federal budget deficit.

''Consumers don't know what to expect. When people don't know what's coming, they tend to delay big-ticket expenditures,'' Flynn said. ''Many of them put their home buying plans on hold.''

The Federal Home Loan Mortgage Corp. reported the average rate for a 30-year fixed-rate mortgages hovered between 10.19 percent and 10.22 percent in September, generally higher than in the first half of the year.

''A key contributor to the national resale pace decline was a significant sales drop in the South, reflecting depressed activity in markets with a large military population,'' the association said.

''The deployment of vast numbers of U.S. military troops from southern bases to the Persian Gulf has directly decreased demand and upset the local economy in those areas,'' the group said.

In the South, the resale rate fell to a rate of 1.26 million homes in September, down 10 percent from August. The median home was $85,900, down 1.2 percent from August.

In the Midwest, resales dropped to a rate of 920,000 dwellings in September, off 7.1 percent from August. The median price was $74,000, down 1.7 percent from August.

In the Northeast, resales held at a rate of 520,000 homes last month, unchanged from August. The median home price in September was $137,100, down 5.6 percent from August.

The West also posted a resale rate of 520,000 dwellings in September, down 8.8 percent from August. The median price was $134,700, 3.9 percent lower than in August.

#90298u0673 10/25/1990 ~United Press International

TIRANA, ALBANIA (OCT. 25) UPI - The foreign ministers of the troubled Balkans ended the first diplomatic conference held in communist Albania Thursday by pledging to expand cooperation and meet the political and economic requirements for ''a better future'' for Europe.

Endorsement of the measures by Albania's Marxist regime appeared to reaffirm its intention to continue cautious, limited political and economic reforms and its gradual emergence from 45 years of self-imposed isolation.

''The ministers emphasized their countries' commitment to democracy and common European values,'' said a final conference declaration, ''thus making their contribution with a sense of responsibility to a better future in Europe.''

The declaration by Greece, Albania, Romania, Yugoslavia, Bulgaria and Turkey was aimed at addressing concerns that the Balkans, now regarded as the most dangerous source of tensions in Europe, is not excluded from the political and economic benefits of European integration.

''The ministers stressed that the Balkans cooperation is an integral part of positive European processes. A stable Balkans ... is a factor of peace and security for the entire Mediterranean region and Europe,'' the declaration said.

''I think there is a lot of optimism and a lot of enthusiasm,'' said Bulgarian Foreign Minister Adrian Nastase.

The ''Balkans powderkeg'' has historically been a center of European instability due to numerous disputes that have frequently been fanned by major powers for their own ends.

As the rest of the continent is moving toward greater stability following the political upheavals of last year, many experts are concerned at resurging tensions in the Balkans, pointing to rising nationalism, severe economic problems, instability in Yugoslavia and Romania and the preservation of rigid Marxism in Albania.

The ministers sought to reinforce their pledge for greater cooperation in a message to next month's Conference on Security and Cooperation in Europe in Paris, declaring they are committed to ''making a concrete contribution to the ... establishment of a new order and cooperation in the continent.''

Among other measures, the ministers agreed at their two-day conference to meet every year and consider at the 1991 session in Sofia a proposal for a summit of the region's heads of government, the final declaration said.

They decided to study a plan for creating a permanent mechanism for coordinating cooperative programs to be known as the ''Balkans Forum'' and a proposal for a ''Balkans Development Bank.''

Areas in which cooperative programs will be launched include trade, transportation, tourism, energy, environmental protection and health care, the declaration said.

The Tirana meeting, only the second convened by the foreign ministers of Albania, Greece, Turkey, Yugoslavia, Bulgaria and Romania, ended successfully following all-night negotiations to fine-tune the declaration to avoid references to outstanding disputes that have divided the region for hundreds

of years.

Participants said the major problem involved the question of the rights of national minorities, the most serious source of discord in a region comprising 130 million people of some two dozen ethnic groups and three major religions.

In the final draft of the declaration, the ministers agreed to respect the 1975 Helsinki human rights accord, which upholds the rights of national minorities, including the use of their languages and preservation of cultural and religious practices.

#90298u0680 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The government's Employment Cost Index increased 1.4 percent in the 1990 third quarter and advanced 5.2 percent for the 12-month period ending in September, the Labor Department said Thursday.

The index measures changes in wages, salaries and employee benefits. It is not seasonally adjusted.

Benefit cost increases in private industry for the 12 months ending in September ''exceeded wage and salary gains in large part because of the rising cost of health insurance,'' the department said.

''The 1.4 percent increase in compensation costs in the June- September 1990 period was below the 1.6 percent gain in the same period a year ago,'' the department's Bureau of Labor Statistics said.

''This pattern held for private workers (1 percent, down from 1.2 percent a year ago) and state and loval government workers (2.7 percent, down from 3.3 percent),'' the bureau said.

The government also noted changes in compensation costs for state and local government employees are ''heavily concentrated'' in the period from June to September and ''spread throughout the year'' for other workers.

In another report, the Labor Department reported major collective bargaining agreements reached in private industry in the first nine months of the year ''provided larger wage rate adjustments than those specified in the contracts they replaced.''

The wage rate adjustments averaged 3.9 percent in the first year of the contracts and 3.3 percent annually over the life of the agreements, the department said.

#90298u0713 10/25/1990 ~United Press International

EDEN PRAIRIE, MN (OCT. 25) UPI - U.S.Customs investigators searched the apartment home of Minnesota Vikings place kicker Donald Igwebuike Wednesday and removed bags presumed to contain possible evidence in an alleged heroin trafficking case.

Authorities refused to identify what they found or what they were looking for.

''We would not be investing time and energy in this siatuation unless we were confident that there would be a productive result,'' an unnamed source told the Star Tribune. ''More news is forthcoming - trust me. We have better things to do than chase after ... a football player without any reason.''

The source said authorities were upset that ABC-TV broke the story Tuesday before the case had gone to a grand jury. ''We needed this like a hole in the head,'' the source said.

The Nigerian-born athlete Tuesday was linked to two men accused of conspiring to smuggle herion from Nigeria to Florida. One of the defendants Wednesday pleaded innocent to the charges in U.S. District Court in Tampa, Fla.

Igwebuike has not been charged in the case. A federal law enforcement source has said ''something is going to happen soon ...'' but declined to elaborate. A Tampa television station also reported Wednesday that U.S. attorney sources say authorities are trying to persuade the two defendants to cooperate in the investigation of Igwebuike.

ABC-TV cited unidentified sources Tuesday in reporting that Igwebuike bought a plane ticket to Nigeria for one of the defendants and participated in phone conversations showing he knew of the drug deal. Igwebuike has not commented directly on the accusations but his attorney says there is nothing to tie the athlete to any illegal activities.

Igwebuike practiced with the Vikings Wednesday following the 30- minute search of his home.

A local narcotics investigator who took part in the search said Igwebuike met customs agents in the lobby of the apartment building and led them to his apartment, where he then called his attorney.

''Donald was very polite, there were no problems,'' the officer said.

#90298u0716 10/25/1990 ~United Press International

BANGKOK, THAILAND (OCT. 25) UPI - The Cambodian resistance criticized Vietnam and the government in Phnom Penh Thursday for trying to delay settlement of the 11-year-old Cambodian conflict.

''The Vietnamese and the Phnom Penh regime are not in a hurry to make peace,'' said a statement issued by the resistance group of Prince Norodom Sihanouk in Bangkok.

''They wait and expect that the Western countires and particularly the United States and Japan, will come to normalize ties with Vietnam or to recognize the Phnom Penh regime,'' the statement said.

''The enemy's strategy is to wait and win.''

Indonesian Foreign Minister Ali Alatas said in Jakarta Thursday he will leave for Paris on Sunday to pursue the resumption of internationally supervised peace talks for Cambodia.

At a news conference, he also urged the conflicting factions in Cambodia to overcome their differences and agree on the leadership of the Supreme National Council that would become Cambodia's interim government.

The four Cambodian factions - the Vietnamese-backed Phnom Penh government and the three members of the coalition resistance - have accepted a U.N.-brokered peace plan.

Meanwhile, Son Sann, leader of the U.S.-backed Khmer People's National Liberation Front (KPNLF), urged the 12 members of the Supreme National Council (SNC) to reconvene in Bangkok, a KPNLF statement said.

The SNC is supposed to represent Cambodian national sovereignty until U.N.-supervised elections can be held, but the two sides have bogged down in disagreements over the leadership of the council.

''He (Son Sann) reminded the other SNC members that the international community was intensely looking at all Cambodian parties to see whether they could work together to resolve this chairmanship issue,'' the statement said.

Thai Foreign Minister Subin Pinkayan said Thailand will facilitate an SNC meeting on condition that the four Cambodian factions reached a compromise on their differences beforehand.

''We want them to sign an agreement in Bangkok. There will be no meeting for negotiation,'' Subin said.

He said he will discuss the Cambodian issue with his Vietnamese counterpart, Nguyen Co Thach, later this month when Thach is scheduled to pay an official visit to Thailand.

Subin also said he will visit China Nov. 3-5 for discussions of the Cambodian problem.

''We will talk about Cambodia issue because we are close to the situation,'' Subin said.

Vietnam installed the current Cambodian government after its invasion of Cambodia in late 1978 and ousted the brutal Khmer Rouge. The Khmer Rouge have joined the other two non-communist resistance groups in a U.N.-recognized coalition that is fighting Vietnamese-backed government troops.

The factions agreed last month in Jakarta to set up the SNC to govern Cambodia during an interim period leading up to U.N.-supervised elections, but they have failed to agree on who would chair the council.

Alatas said he would meet in Paris with his French counterpart, Foreign Minister Roland Dumas, to discuss plans for resuming the Paris International Conference on Cambodia.

The 19-nation conference, chaired jointly by Alatas and Dumas, was expected to resume in December.

Alatas said he was hoping for an agreement to convene the coordinating committee of the Paris conference in preparation of reconvening the conference at the ministerial level.

WASHINGTON (OCT. 25) UPI - The Senate has passed a bill that would put steroids in the same category as cocaine and other illegal drugs.

The legislation, introduced by Sen. Joe Biden, D-Del., was passed Wednesday by unanimous consent.

However,its future is in doubt because it is part of an anti-crime bill that President Bush will likely oppose and it differs from a similar bill in the House.

The measure would give the Drug Enforcement Administration the authority to investigate steroid trafficking and drastically increase maximum prison terms for trafficking.

It would also force companies that make the muscle-enhancing drug for legitimate purposes to keep careful records so diversion to the black market would be more difficult.

Steroids have been used for many years by athletes to add muscle quickly. The drug is particularly popular among football players. There have been numerous reports of steroid use among high school players, as well as college and pro

athletes.

Steroid use can have serious side effects, including serious damage to various organs.

Rep. Bill Hughes, D-N.J., has written a similar measure, but his bill puts steroids in a lesser enforcement category and allows for punishment of coaches and trainers who promote steroid use.

#90298u0732 10/25/1990 ~United Press International

BEIRUT, LEBANON (OCT. 25) UPI - A ranking government official engaged in technical efforts to unify Beirut said Thursday ''progress'' was reported in high-level attempts to end the plight of 12 foreign hostages held in secret hideouts in Lebanon.

Minister of Agriculture Mohsen Daloul, who along with Defense Minister Albert Mansour is charged with working to end militia rule in the Beirut area, said ''the hostage plight has been discussed between Syria and Iran.

''We were not a primary party concerning this issue, but I was told that there has been great progress toward resolving it,'' Daloul said.

Daloul, a Shiite Moslem politician close to Syria, said a ''certain scenario'' was being worked out among the concerned powers, notably Syria and Iran, to free the captives.

''The release has been delayed because of some reasons, but the hostages would be freed very soon,'' Daloul said during an interview with United Press International at his office in Beirut.

Some or all of the 12 foreign hostages - six U.S. citizens, three Britons, two Germans and one Italian - are believed kept in southern Beirut. Recent reports suggested the Iranian-backed Hezbollah militia, believed holding the captives, has recently transferred them to secret hideouts in eastern Lebanon.

Hezbollah, which patrols southern Beirut, has expressed a readiness, along with other militia groups, to accept a government plan for eliminating militia presence in and around a unified Beirut.

The effort to demilitarize the area was boosted after a Syrian- Lebanese force launched an offensive Oct. 13 routing defiant Gen. Michel Aoun and his followers from the presidential palace. The fighting left an estimated 600 people dead and forced Aoun to take refuge at the French Embassy.

Hezbollah, the pro-Syrian Shiite Amal militia and the Druze Progressive Socialist Party have relinquished a number of positions to Syrian and Lebanese

troops along a line stretching from southern Beirut to the hills of the Druze-controlled Shouf mountains southeast of Beirut.

Syrian Vice President Abdel Halim Khaddam, during a surprise visit to Lebanon earlier this week, reiterated that his country would try to resolve the Western captives' plight, which he branded as ''an abnormal condition.''

The Cabinet Wednesday assigned Daloul and the defense minister to begin urgent contacts with Moslem and Christian militia groups to rid Beirut of outlawed armed presence.

The government has sought to implement a national reconciliation accord worked out last October in Taif, Saudi Arabia. The agreement stipulated the restoration of law and order and disbanding of militias.

BANGKOK, THAILAND (OCT. 25) UPI - Vietnam's Supreme Court has begun hearing an appeal against lenient sentences for 24 Communist Party officials convicted of swindling the state bank of about $7 million in one of Vietnam's largest ever financial scandals, the official Vietnam News agency reported.

State prosecutors appealed to the Supreme Court, saying sentences fixed by lower courts for the swindlers were ''too light and unsuitable to the severity of the case,'' the agency said in a dispatch dated Tuesday. A translation was made available Thursday.

The report did not say what sentences had been imposed by the lower courts.

It said Hoang Thi Xuan, head of the Third Mai Huong Trading Group and a party committee member, together with her accomplices, ''took advantage of the loopholes in state economic management, especially in banking, to seize a large sum of state-owned money by fraud.''

Total losses came to about $7 million during six months of the group's activities in 1989.

The report said 22 people were put on trial, but that the case involved nearly 80 people in eight provinces.

''Personnel of the banking sector and public security agents are also implicated,'' it said.

The agency said the case was one of the largest fraud cases ever brought against party officials in Vietnam.

The case was publicized as part of an anti-corruption drive in Vietnam that

was meant to stem losses of state property and increase revenues sorely needed to make up a budget deficit estimated at 7 percent of gross domestic product.

#90298u0737 10/25/1990 ~United Press International

PITTSBURGH (OCT. 25) UPI - The Pittsburgh Press reported Thursday Pittsburgh Penguins All-Star center Mario Lemieux is being treated for a rare bone infection that often leads to debilitating pain and cripples many of its victims.

The Press, in a copyrighted story, said Lemieux is suffering from a form of vertebral osteomyelitis. The newspaper said the disease damages the bony portion of the spine.

Doctor Charles Burke is overseeing Lemieux's rehabilitation. He called the disease a ''very serious condition.'' Burke said it could threaten Lemieux's hockey career, but he believes the two-time scoring champion should make a complete recovery.

Yesterday, Burke told reporters that Lemieux is on schedule to return by the beginning of 1991.

Lemieux underwent back surgery on July 11 to remove pain in his legs and buttocks. Burke says the infection in his back, revealed on Sept. 27, is not related to the surgery.

Lemieux missed 21 games last season because of the back pain, but he still finished fourth in scoring with 45 goals and 78 assists.

DETROIT (OCT. 25) UPI - Chrysler Corp. and Mitsubishi Motors Corp. said Thursday they will jointly produce and develop a new series of models at Diamond-Star Motors Corp., their 50-50 joint venture in Normal, Ill.

The two carmakers said a memorandum of understanding calls for a new line of two-door coupes, three-door sporty cars, and a four-door sedan to be built by Diamond Star, which was incorporated in 1985 but did not start selling cars until January 1989.

The plant now builds the Mitsubishi Eclipse and Mirage, Plymouth Laser, and Eagle Talon and Summit cars.

Chrysler and Mitsubishi said they ''have given special consideration'' to increasing the U.S. content of Diamond-Star's new vehicles through the use of Chrysler-built engines and transmissions in some models.

Production levels and introduction dates of the new cars were not disclosed, although analysts said they will most likely go on sale by 1992 or 1993.

Diamond-Star is now building 680 cars daily, which is only 68 percent of its 1,000 car-a-day capacity, a company spokeswoman said. Currently, Chrysler and its Jeep Eagle division get 55 percent of production, with Mitsubishi getting 45 percent.

Stewart said the new models will be distributed in equal numbers for sale by Chrysler and Mitsubishi Motor Sales of America, headquartered in Cypress, Calif.

#90298u0755 10/25/1990 ~United Press International

(OCT. 25) UPI - President Bush signed a temporary spending bill early today, a sign that progress was made during the night on finalizing a deficit reduction plan. The White House had said Bush would sign the measure that provides three days of government funding providing a temporary budget agreement was reached. Bush's budget director says it is ''definitely possible'' that a budget plan will be completed today.

Radio Pakistan says at least 70 people were injured and buildings were damaged as a strong earthquake shook wide parts of Pakistan, Afghanistan and India today. The quake... measuring six-point-five on the Richter scale... was centered about 550 miles northwest of New Delhi, India. The tremor resulted in panic in some areas, causing people to rush from their homes in many towns.

The French government is denying a Paris newspaper report that President Mitterrand expects fighting to break out in the Persian Gulf. A government spokeswoman says Mitterrand has NOT expressed the reported view ''under any circumstances, public or private.'' The spokeswoman also describes as ''absurd'' a report that French troops would be put under U-S command in case of war.

Cairo Radio says the Kuwaiti Embassy in Damascus reports that 42- hundred Kuwaitis were killed during Iraq's August 2nd invasion. The report also says that Iraqi forces took 12-thousand Kuwaiti soldiers and civilians into custody.

William Bennett is hoping to convince Alaskans to ''just say no'' to marijuana when the state holds a referendum on the issue next month. President Bush's drug chief will fly to Anchorage later today in a campaign to get possession of the drug re-criminalized. Alaskan adults are legally allowed to possess small quantities of pot under a law passed 15 years ago.

#90298u0756 10/25/1990 ~United Press International
(OCT. 25) UPI - Fighting words today from Pakistan's ousted prime minister. Benazir Bhutto is accusing her political opponents of rigging nationwide parliamentary elections yesterday in which her party lost. Bhutto says she'll meet with advisers soon to decide whether to launch a movement against the alleged vote fraud. Pakistan's president dismissed Bhutto in August, accusing her government of corruption and nepotism.

The Philippine National Security Council agreed today to consider maintaining current petroleum prices until the end of the year. The decision came during a meeting at the presidential palace in Manila- only the second for the council since 1986. The move comes one day after leftist rebels staged a violent strike to press demands for pay raises. Three people died during the strike.

Violence broke out at a New York Daily News plant today in Brooklyn. Police say about 200 workers walked off the job in a dispute over a fired worker. The angry employees then attacked a bus bringing NON-union workers to the plant and set fire to delivery trucks. A union source says the dispute involves a worker with a leg injury who was told he had to stand while working.

#90298u0771 10/25/1990 ~United Press International
WASHINGTON (OCT. 25) UPI - Yields were mixed on 13-week and 26-week T-bills Thursday at the government's delayed weekly auction.

The offering, originally scheduled for Monday, was postponed because Congress had failed to act on the debt ceiling.

The Treasury Department auctioned $8.632 billion of 13-week bills at an average discount of 7.20 percent, up from 7.18 percent last week and the highest since Sept. 24 when the auction yielded 7.32 percent.

The Treasury also sold $8.631 billion of 26-week bills at an average of 7.16 percent, down from 7.22 percent last week and the lowest since Aug. 1 when the yield stood at 7.15 percent.

The investment rate was 7.44 percent on the 13-week bills at an average price of $9,818.00 per $10,000 face value. The rate on the 26- week bill was 7.53 percent at $9,638.00.

In addition, the Treasury Department also announced it will auction $10 billion in 52-week bills Friday. That auction had also been delayed by congressional failure to act on the debt ceiling.

#90298u0777 10/25/1990 ~United Press International
KOKOMO, Ind. (OCT. 25) UPI - General Motors Corp. said its Delco Electronics division will add 550 jobs as part of an expansion in Kokomo.

Delco will spend about $41 million for the expansion, which should be completed during 1992.

Most of the new jobs will involving engineering.

Delco has about 10,300 employees.

Delco Chairman Donald J. Almquist said Wednesday the expansion is aimed at attracting more international customers.

''Our engineering requirements continue to increase as we pursue new production and additional business in the international market,'' he said.

The state of Indiana will invest $1.8 million in the project, Gov. Evan Bayh said. Part of the money will be spent on a grant to the city of Kokomo for a new road leading to the plant. Additional funds will be used as a loan to the city.

KATMANDU, NEPAL (OCT. 25) UPI - King Birendra bowed to political pressure and agreed Thursday to abide by Nepal's new democratic constitution, which formally limits his absolute power, starting next month.

''For the information of the general public the constitution will be promulgated on Nov. 9,'' the Royal Palace said in a statement.

The breakthrough in the dispute between the palace and the elected government came Wednesday in a long meeting between Prime Minister Krishna Prasad Bhattarai, Ganesh Man Singh, leader of the Nepali Congress party, and the party's general secretary, Girija Prasad Koirala.

''The confusion has ended. Now politics will take a positive direction,'' said Koirala.

He said a draft of Nepal's new constitution proposed by the palace that would still give king absolute powers was rejected and certain amendments would be made in a government draft that limits the powers of the king.

''There will be some changes in the government draft. They will only be minor '' Koirala said.

The new constitution, which was to have taken effect in September, formally limits the absolute powers of King Birendra. It was accepted in principle by the king following a popular movement in February year that toppled the 29-year-old partyless ''panchayat'' system.

With the announcement of a firm date for the promulgation of a constitution political tension is expected to wane and attention to be fixed on Nepal'sfirst multi-party general elections in 32 years. The elections are expected to be held by next April.

DETROIT (OCT. 25) UPI - The United Auto Workers has slated a meeting of its Chrysler National Bargaining Council for Nov. 1, a strong indication the union hopes to reach agreement with Chrysler Corp. on a new labor contract without setting a strike deadline.

The 100-member council must approve any tentative contract before it is ratified or rejected by Chrysler's 60,000 U.S. hourly workers.

Meanwhile, negotiations between the Canadian Auto Workers union and Chrysler Canada Ltd. continued Thursday in an effort to reach a settlement before the union's midnight strike deadline.

Chrysler spokesman Othmar Stein said the two sides met through the night to resolve local issues and that work was continuing. A main session was set for

Thursday morning and an announcement on the talks was expected to follow.

In the United States, Chrysler has openly said that it cannot afford a contract patterned after the three-year pacts signed last week by the UAW and industry leader General Motors Corp. A similar pact is to be inked with second-ranked Ford Motor Co. Friday after agreement was reached Oct. 7.

But one Chrysler official who declined to be named told the Detroit Free Press that ''significant differences'' tailored to the carmaker's own needs could still be part of a pattern pact.

Still to be resolved are job and income security issues. The GM/UAW pact has a $4-billion income security package, while the one in the Ford agreement is pegged at $1.6 billion over the next three years.

UAW leaders say a similar guarantee could cost Chrysler about $1 billion.

Chrysler is also concerned about the substantial increase in pension costs under the GM and Ford agreements, since it has the oldest average work force of the Big Three carmakers, and nearly one retiree for each active worker.

Chrysler is expected next week to post its second quarterly loss since 1982 for the third quarter of 1990. Analysts expect it will report losses ranging between $1 and $1.20 a share, with net income as much as $270 million in the red.

Part of Chrysler's latest losses are because of a $600-million program to redesign its profitable minivan models for 1991, which cost it about 60,000 units of lost production.

Chrysler's losses are aggravated by earlier then anticipated rebates on 1991 models, a $2,500 price cut in its profitable Jeep Cherokee models, and the initiation of an early retirement program as part of its massive cost-cutting efforts, analysts say.

PITTSBURGH (OCT. 25) UPI - The already-struggling Pittsburgh & Lake Erie Railroad has new troubles - forcing another round of layoffs and wage cuts.

P&LE President Gordon Neuenschwander said Wednesday he is breaking a deal with rail unions and will cut wages by 20 percent and eliminate 50 of 270 jobs. Neuenschwander says his hand was forced by a drop in shipments, higher fuel prices and higher employee costs.

A spokesman for the Railway Labor Executives Association, a group of 14 unions with workers at the P&LE, called the wage- and job-cutting move ''disappointing.'' But despite sabre-rattling about a strike by some union members, Edward Wytkind said the union will continue to try to resolve the matter ''amicably.''

There have been numerous attempts to sell the Pittgsburgh-based short-line railroad. In June, Neuenschwander announced plans to restructure the P&LE by laying off about 200 of 500 workers, cutting salaries by 20 percent and instituting more flexible work rules.

The wage cuts were delayed by a standstill agreement until new labor agreements could be negotiated. It was the latter agreement that Neuenschwander said he was terminating.

#90298u0871 10/25/1990 ~United Press International

MOSCOW (OCT. 25) UPI - Argentine President Carlos Menem said Thursday that his foreign minister would go to Germany to negotiate credits to allow the cash-strapped Soviet Union to buy food from Buenos Aires.

Menem, who met with President Mikhail Gorbachev on the second day of his visit to Moscow, also said the two countries had completed a new $1.4 billion trade agreement with a significant balance in favor of Argentina.

''Argentina would have nothing against increasing supplies of food to the Soviet Union,'' Menem told reporters. ''Our foreign minister is going to Germany to negotiate an increase of credits for the purchase of food from Argentina. I mentioned that personally to President Gorbachev.''

Menem, on his first trip to the Soviet Union since taking office in July last year, said he and Gorbachev had discussed a wide range of issues in two hours of talks, including the Persian Gulf crisis, and developments in Eastern Europe and Latin America.

Menem congratulated Gorbachev for receiving the 1990 Nobel Peace. Noting Argentina has sent a contingent of troops to the Middle East, he praised the U.S. and Soviet responses to the gulf conflict, along with the U.N. role in coordinating international resistance to Iraq's Aug. 2 invasion and subsequent annexation of Kuwait.

The Argentine president did not say when Foreign Minister Domingo Cavallo, who accompanied him to Moscow, would travel to Germany or how much credit he would seek to help the Soviet Union finance food purchases.

German Chancellor Helmet Kohl last month promised Gorbachev $1.9 billion as part of a larger package for Moscow's support of German reunification. It was not clear whether the credits sought by Argentina would be part of that aid.

The Soviet Union, mired in an economic crisis with increasing shortages of food and other basic goods, has sought increased assistance and trade from Western countries.

Argentina is the Soviet Union's largest trading partner in South America and a chief supplier of grain to Moscow, which imports more than two-thirds of all Argentine agricultural products sold abroad. Argentina buys a smaller ammount of Soviet machinery in return.

The $1.4 billion trade package announced by Menem represents a significant increase from the two countries' $765.2 million exchange level in 1989. Argentine exports made up more than 80 percent of the trade total.

Menem said the new trade deal retains a sharp tilt in favor of his country but expressed the hope a ''more equal balance'' can be reached in the future. He said the two countries ''can exchange food for technology and thus balance the trade exchange.''

Menem said he also hopes Gorbachev, who was to leave Friday for Spain and France, will visit Latin America next year.

Gorbachev and Menem signed a declaration on principles of cooperation and several other bilateral agreements.

Cavallo and Soviet Foreign Minister Eduard Shevardnadze sgined accords on cooperation in space research, fighting drug trafficking and the peaceful use of nuclear power.

In a meeting Wednesday, Soviet Parliament chairman Anatoly Lukyanov briefed Menem on the transformations sweeping the vast country.

Menem took office July 1, 1989, following his election triumph over former President Raul Alfonsin, whose defeat was partly caused by an economic crisis including hyperinflation that sparked a week of rioting and forced the government to declare a state of siege.

#90298u0885 10/25/1990 ~United Press International

PARIS (OCT. 25) UPI - Another fashion revolution may be brewing.

A few loose and long body-hiding clothes were seen among the body- clutching short and sexy fashions in the Paris spring-summer ready-to- wear shows.

During the eight days of parades for press and buyers that ended Wednesday, the mini line still reigned.

The underwear look prevailed. Dresses resembled underslips with tiny spaghetti shoulder straps and lace trim at Yves Saint Laurent, Lolita Lempicka, Guy Laroche and Angelo Tarlazzi. Strapless dresses looked like corsets, such as Saint Laurent's black lace number with a wide black lace hem. Other dresses could have passed as swimsuits worn over tights.

Bare midriffs were another trend, coupled with swirling miniskirts and brassiere tops covered with dignified tailored jackets, apparently meant for wear on city streets. Bare shoulders - usually just one - were common as well as backless dresses decorated with crossed straps.

But the tight, sexy silhouette loosened up for a kinder, gentler look on some runways in the Louvre Museum courtyard.

Emanuel Ungaro revived his body-disguising super-blousy dresses jutting down to snugness at the knees. His tent dresses repeated the fullness of years past. That same triangle A-line that hides hips, waist and sometimes the bust sneaked into the shows of Claude Montana and Saint Laurent.

The leg-showing fashion still remained in the majority with tons of shorts and bloomers and pleated, circular or straight miniskirts. Popular body tights also showed the leg. Cat-suits plastered bodies from neck to toe, some in wild prints at Jean-Louis Scherrer and Tarlazzi. Skirts practically disappeared at Karl Lagerfeld in favor of jackets or blouses plus tights.

But longer hemlines appeared for Comme des Garcons foggy gray chiffons and on pleated skirts at Tarlazzi. Below-knee skirts made it to the Karl Lagerfeld show and truly long pleated dresses appeared at Emanuel Kahn. The influential Saint Laurent confirmed the trend with miniskirts for cotton suits and some back-wrap long jersey skirts.

Long trousers were more numerous than in recent seasons, with Saint Laurent showing tailored and casual pants suits. Dior's satin jeans were among the parade of leg-hiding evening pants that included wide pajama outfits. Sheherazade harem pants reigned at Saint Laurent and Givenchy also used some.

As for coats, the trenchcoat won the day, in both long and short versions and in satin for evening. Other coats were short, straight or swinging, many with drawstring waists or hems and hoods. Coat dresses made the shows of Guy Laroche, Scherrer and Saint Laurent.

Suit jackets usually were short or long and tailored. Skirts appeared pleated or flat with ruffles and lace trim for evening.

Glitter dazzled from silver and gold lame and sequinned minidresses, shorts, tights, jackets and long gowns. Metal trimming was another trend along with fringe, gold buttons and asymetrical hems.

The shows exploded in bright colors as from a child's paint box, many of them cleverly combined - riotous red, green, purple, orange, blue and fuschia plus softer mint green, sky blue, mango-orange, daffodil yellow, khaki, olive, rust sand, hazy gray and lots of white.

Swimsuits were usually one piece and still cut high on the thigh except at Hermes. Sailor looks were popular.

As for fabrics, the most notable was the popular second-skin stretch for those plastered-on pants and dresses. Chiffon, cotton pique, lightweight wool, tough vinyl at Thierry Mugler and Ungaro, leather, lace, and brocade were used. Many fabrics were busy with African, floral, polka dot, harlequin and abstract prints and black and white checks.

Hats ranged from pillboxes of the 1960s to giant straws at Christian Lacroix and Mahatma Ghandi hats at Saint Laurent.

#90298u0892 10/25/1990 ~United Press International
BERLIN (OCT. 25) UPI - Bundesbank President Karl Otto Poehl's insistence on creation of a strong European central bank as a prelude to currency union sparked sharp opposition Thursday from his United Kingdom counterpart.

''It is hardly a secret that the U.K. has doubts about the approach of many countries to economic and monetary union,'' said Bank of England Governor Robin Leigh-Pemberton at a conference on European currency union.

Poehl, head of the powerful German central bank, reiterated his position that an independent European central bank - what some call a ''Eurofed,'' after the U.S. Federal Reserve - should be established to reconcile differences between European Community monetary and economic systems.

He told the conference that convergence of those systems is the foundation on which a strong European currency must be built.

But Leigh-Pemberton said a European bank with the kind of autonomy enjoyed by the Bundesbank wasn't necessarily adviseable. Such an institution ''cannot be impervious to the pressures of public opinion,'' he said.

It was questionable, too, whether all 12 EC nations would accept ''such a high degree of autonomy'' of a European central bank, he said, urging that it build its credibility by stabilizing prices over a long period of time.

The Bundesbank's reputation for inflation-fighting was built over many years of astute monetary management. ''It is this that gives the Bundesbank its

credibilitiy and legitimacy,'' Leigh-Pemberton said. ''A new institution would begin with no such inherent credibility or legitimacy.''

At the symposium, organized by the European Currency Unit Banking Association and Deutsche Bank, the No. 1 German commercial bank, Poehl urged the Community to sign a treaty constituting a European central bank. He said he would offer a constituting statute to his fellow central bank chiefs.

The next step towards monetary union, he said, would be creation of a stable currency. While the strong deutsche mark has played a leading role in European monetary developments, the European Currency Unit, or ECU, has never lived up to its original vocation as a true European currency.

He said when a single currency in Europe is created, the unit might be called the ECU, but will have nothing to do with the current ECU. Some currenies are pegged to the ECU, central banks balance accounts among themselves in ECU and bonds are issued in ECU values, but no ECU cash circulates.

Belgian Finance Minister Philippe Maystadt urged conference participants to support the ECU and make it a leading world currency on a level with the U.S. dollar and the Japanese yen.

Leigh-Pemberton advanced the British view that the ECU should be strengthened and gradually introduced as a common currency Community- wide. Only this month the British government agreed to bring its pound sterling into the European Monetary System's exchange rate mechanism.

#90298u0923 10/25/1990 ~United Press International
(OCT. 25) UPI - The federal government is open and running as usual this morning, at least until the latest emergency spending measure runs out at midnight Saturday. President Bush signed the necessary documents amid signs that Congress may yet come up with a deficit-reduction plan that everyone can live with. The latest plan raises alcohol and gasoline taxes, Medicare

premiums and tax rates on the wealthiest Americans.

Officials in Paris are denying reports that French President Francois Mitterand expects war to break out soon in the Persian Gulf. One report quotes an unnamed source as saying Mitterand said he thought war was inevitable. In Cairo, Egyptian President Hosni Mubarak joined other Arab leaders in standing firm against Baghdad and proposing an Arab defense pact.

Israel today expressed regret over a second U-N Security Council condemnation in two weeks. A unanimous Security Council condemned the Israeli refusal to co-operate with a U-N team appointed to investigate the October 8th violence in the walled Old City in Jerusalem. Israeli authorities killed at least 20 Arabs in the rioting. An Israeli spokesman says the nation canNOT accept such a delegation because it would infringe on Israeli sovereignty. He said Israel is disappointed that the United States did NOT veto the resolution.

South Korean youths angered by the arrest of a student leader battled police today. They burned an American flag and an effigy of President Roh Tae-woo... and firebombed police stations in Seoul and provincial cities. Leaders of a hard-line student dissident organization said they would lead a two-week campaign to force the government to release Song Kap-sup, who was arrested yesterday in the capital.

At least two people have been arrested and a third suffered a heart attack as violence broke out earlier today at a printing plant for the New York Daily News. A dispute over a fired employee led 200 workers off their jobs in Brooklyn. Then things got ugly. A bus bringing in NON- union workers was attacked, and newspaper delivery trucks were set on fire.

Fire inspectors in Lincoln, Nebraska, report that arson may be the cause of a fire that broke out early today in a pile of between 50- thousand and 100-thousand tires in the city. Dense smoke drifted over residential areas of the north and west part of Lincoln. Officials say it may take two days or more to bring the fire under control.

#90298u0932 10/25/1990 ~United Press International

ADDIS ABABA, ETHIOPIA (OCT. 25) UPI - Ethiopian officials said Thursday the government, with the help of the international donor community, has for now averted a famine in the nation's northern regions.

Relief and Rehabilitation Commission leader Yilma Kassaye said 75,000 tons of food aid has been delivered to Tigre and Southern Wollo provinces and another 15,000 tons has been airlifted from the Red Sea port of Assab to the war-torn Eritrea province.

Kassaye said international donor contributions of $14 million also made

possible a food airlift to the rebel-besieged Eritrean capital of Asmara, 400 miles northeast of Addis Ababa.

A 30-year war against Eritrean seccessionist rebels and a 15-year conflict with Tigrean insurgents, combined with repeated droughts, has threatened some 4 million people with food shortages this year.

Kassaye said the RRC nevertheless averted the potential famine, and said drought did not take a single life in Ethiopia this year.

A recently published RRC report said the Commission is supporting some 500,000 war-displaced people in northern Ethiopia.

But U.N. World Food Program sources in Addis Ababa said about 1.1 million people still need emergency food relief in the northern areas.

Moreover, an agreement reached between the Joint Relief Partnership of churches, the government and the Eritrean People's Liberation Front on food aid distribution expires in December.

Kassaye said he was confident and optimistic that Ethiopia had enough food stocks to counter a rebel attack on the 450-mile-long overland relief route from Assab in the southeast to Wollo and Tigre in the north.

#90298u0943 10/25/1990 ~United Press International

JANESVILLE, Wis. (OCT. 25) UPI - General Motors Corp. has told state officials it will lay off 3,200 workers from December to August because of previously announced plans to retool a production line at the Janesville plant.

The layoffs from Dec. 20 to late August will occur while the line is shut down to install new production equipment for a Suburban and truck line, GM told the State Department of Industry, Labor and Human Relations on Wednesday.

GM said during the shutdown, workers will return for classroom training on new production methods to build Suburbans, GMC Jimmys, Chevrolet Blazers and a four-door Crew Cab.

Workers also will receive on-the-job training when the new line begins running.

The Wisconsin Development Finance Board earlier this year made a grant of $8.25 million to GM to retrain workers at the plant, which now produces Chevrolet Cavaliers.

During the shutdown, about 1,550 workers will will be involved in retooling efforts or will produce medium-sized trucks on the plant's other line.

Idled workers will make 95 percent of their take-home pay - a combination of unemployment benefits and GM's supplemental unemployment benefit fund.

The layoffs also affected Chicago & North Western Transportation Co., which said it will lay off through the same period 45 workers who ship GM vehicles by rail out of Janesville.

#90298u0944 10/25/1990 ~United Press International

BONN, GERMANY (OCT. 25) UPI - The German Parliament passed a supplementary budget for $13 billion Thursday amid disputes over how to cover the rising costs of German unity.

A majority of deputies approved the spending document, bringing the 1990 budget up to $260 billion and this year's new public debt to a record $44 billion.

Finance minister Theo Waigel said during the debate in the Bundestag, the German Parliament, that harsh savings measures will be part of the 1991 budget and financial planning unitl 1994 to save money.

Waigel, who has not yet introduced a budget proposal for 1991, said that in the coming years specific subsidies, deficits and state funds will be cut to help pay for the recovery of the former East German economy.

Social Democratic opposition leaders sharply attacked the government's financial policy, saying that it will run up a huge debt and push up interest rates.

''We have to end this march into an unscrupulous national debt,'' said financial expert Ingrid Matthaeus-Maier.

The Social Democratic Party, strongest contender for Chancellor Helmut Kohl's Christian Democratic Union in national elections Dec. 2, has proposed to raise taxes for high-income earners and to put the planned capital gains tax reduction on hold for now.

The government has steadfastly rejected that it will eventually have to raise taxes to pay for the costs of unity.

Kohl's challenger Oskar Lafontaine said Thursday the government should stop this ''dance around the truth'' and admit that it will increase some kind of tax after the election.

For the past months, Lafontaine has trailed Kohl in public opnion polls by more than 12 points.

#90298u0952 10/25/1990 ~United Press International
KHAFJI, SAUDI ARABIA (OCT. 25) UPI - The number of refugees crossing the Kuwaiti border dropped off Thursday, the day Iraq ordered Kuwaitis to obtain Iraqi identity papers.

A senior Saudi official, who asked not to be identified, said that by midday just 16 cars had come through the border checkpoint, down from previous days.

The official estimated that 300 people per day had been coming through the border on the Persian Gulf in recent days and that about 120,000 had passed through the coastal town since the Aug. 2 invasion.

One refugee, however, said he thought many Kuwaitis would try to leave because of the demand that they switch their identity papers.

Kuwaitis have resisted taking Iraqi identity documents because it makes young men liable for military service and they do not want to lose their national identity through Iraqi papers.

Reporters taken to the border customs station, where cars were carefully searched in case Iraq sought to send infiltrators through in the guise of refugees, were forced to leave and stop filming by border patrol officers.

The governing prince, who was aware they were there because they had stopped to pick up an escort, declined to authorize their return to the border. This, he said, was because the Ministry of Information failed to tell the Ministry of Interior the reporters were coming.

He did not explain why they got an escort, after waiting 45 minutes, if there had been no warning they were coming.

The senior official said the Iraqis are taking the license plates off Kuwaiti cars, in addition to taking their Kuwaiti identity papers, and the refugee said only cars with Iraqi license plates can get gasoline.

While the refugee, who identified himself only as Fallah, an employee of the Kuwait communications ministry, said he left Kuwait because of the demand that he take Iraqi identity papers, there appeared to be no rush of people to leave.

''I think most of the people in Kuwait would like to stay there,'' said the official, explaining why he did not expect any major influx of additional refugees. ''The people who stay in Kuwait like to stay there.''

The official said no terrorists or explosives had been detected by border guards, who pull the seats and door panels out of cars and use drug and explosives-sniffing dogs to go over each vehicle.

Falah also said the Iraqis are arresting young men in Kuwait.

''They arrest them and beat them almost every day. They have many checkpoints all over the place. ... They take your identification and take you to the police station. I left because it was so bad and dangerous for me,'' said Falah, who appeared to be about 35 or 40 and drove a white Mercedes 190.

''They took the plates for my car,'' he said, adding that Iraqi border and checkpoint guards take gold and cash from refugees too.

''They are trying to change our identifications from Kuwaiti to Iraqi but we refuse,'' said Falah. ''That is a good reason to leave because I don't want to change my nationality.''

Falaha said the Iraqis kept switching signals on when Kuwaitis had to change identity papers.

''They said by the end of this month and then they said by the end of this week you have to change your plates and your passport,'' he said.

The prices of food and fuel, he said, ''have gone shooting up and you can't find things like before. ... Sometimes you find food but if you check the expired dates some of it's expired.

Falah said that gasoline was available to those with Iraqi plates and rationing coupons.

He said telephone calls outside can be made from Iraq but not from Kuwait.

Once across the border into Saudi Arabia, the Kuwaitis put cardboard license plates filled in with marking pen on their cars for the trip south down the coast road.

#90298u0969 10/25/1990 ~United Press International

HOUSTON (OCT. 25) UPI - Scientists are worried that endangered sea turtles will be killed by an anti-drug campaign.

Thousands of helium-filled balloons will be released this week by elementary school students as part of the national anti-drug campaign but they could drift into the Gulf of Mexico and be eaten by endangered sea turtles that mistake them for jellyfish or Portugese man-of-war, scientists said Wednesday.

The balloons could kill the turtles by blocking their digestive systems.

''Because of the prevailing winds, the balloons tend to come down in the gulf

around this area,'' said Ron Jones, a wildlife biologist with the U.S. Fish and Wildlife Service.

''Marine life, including endangered turtles ... eat them and they get caught in their digestive systems and they starve to death.''

Richard Baldauf, director of the Houston Museum of Natural Science's Office of Environmental Education, said it was ironic the balloons were being released in southeast Texas because Galveson, on the Texas coast, is home to the Head Start nurturing program for the endangered Kemp's ridley sea turtle.

''We have some kind of moral obligation to maintain species that are on this Earth and putting up balloons isn't going to help,'' Baldauf said. ''I keep thinking people know about these things. It's just amazing how many people don't.''

Houston Independent School District spokeswoman Ria Griffin said at least two balloon releases have occurred this week as part of the national Red Ribbon Week anti-drug campaign. At least one more is set for Friday, she said.

#90298u0973 10/25/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 25) UPI - Suppose European leaders held a summit and had little to talk about?

The weekend ''emergency summit'' of European Community leaders in Rome is so weak on agenda, and so lacking in urgency, that diplomats are wondering aloud whether it is really necessary.

''Summit without a cause,'' headlined the lead editorial on Thursday of The Times of London.

The two-day summit doesn't even begin until 6:35 p.m. on Saturday, and concludes at 11 a.m. on Sunday.

In fact, officials have gone out of their way in recent days to take items off the table in Rome, leaving slim pickings at mealtime.

The president of the EC executive agency, Jacques Delors, said it would be ''disastrous'' to discuss the EC's disarray over its bargaining position at the General Agreement on Tariffs and Trade.

He also said the EC leaders should ''not attempt a lengthy discussion of monetary union,'' another area of disagreement within the Community.

The summit was initially scheduled to approve financial aid to the Soviet Union, but officials have since concluded any money would now be wasted due to

chaos in the Soviet economy.

There will surely be some discussion of the gulf crisis and Eastern Europe, as well as next month's 34-nation European summit in Paris. But an ''emergency'' meeting?

In fact, the non-need for the summit has spawned strange bedfellows, Delors and British Prime Minister Margaret Thatcher, whose relations are diplomatically described as ''cool at best.''

Thatcher has railed for months on the danger of cheapening the twice- yearly EC summits by adding extra ones after dreaming up ''emergencies'' to justify them.

EC leaders meet in a regular summit every half-year, at the end of each country's rotating six-month presidency of the trade bloc.

The French, however, scheduled a ''special'' summit in November 1989, a month before the regular summit, so Europe's leaders could discuss the dramatic events in Eastern Europe over dinner at the Elysee Palace.

Ireland, not to be outdone during its subsequent presidency, held a ''special'' Dublin summit in April, which basically decided on what to decide at the regular June summit.

Italy took over the presidency reins on July 1, and immediately determined it too needed dual summits.

Italian politicians say this weekend's summit is necessary to lay the groundwork for two constitutional conferences beginning in Rome in December. They are clearly in the minority.

#90298u0976 10/25/1990 ~United Press International

(OCT. 25) UPI - Oil prices shot up nearly $3 a barrel in early trading Thursday after statements by government leaders refocused the markets' attention on the possibility of war in the Middle East.

''It's renewed fears of war stemming from comments by political leaders,'' said Thomas Blakeslee, a trader with Pegasus Econometrics Group in Hoboken, N.J.

On the New York Mercantile Exchange, the American benchmark West Texas Intermediate crude for December delivery by midday was up $2.88 over Wednesday to $33.96 a barrel.

Home heating oil for November delivery had jumped 6.83 cents to 91.95 cents a

gallon, while November unleaded gasoline was 7.71 cents higher at 93.10 cents a gallon.

Blakeslee said the market was being moved by reports of comments by French President Mitterrand, U.S. Defense Secretary Dick Cheney and CIA Director William Webster.

In Paris, the International Herald Tribune, quoting an unnamed source, reported Mitterrand expects war to break out in the Persian Gulf soon and has decided to allow French forces in the region to operate under U.S. command.

The newspaper said Mitterrand thought war was inevitable because of the continuing intransigence on the part of Iraqi President Saddam Hussein.

Asked to comment on the reports, a spokeswoman for the presidential Elysee Palace said, ''The president had not expressed himself in those terms under any circumstances, public or private.''

She added, ''We do not have any information that allows us to say that the United States is going to attack'' and classified as ''absurd'' the report French forces would be placed under U.S. command in case of war.

A U.S. military official told United Press International Monday that U.S. forces would have sufficient supplies of critical spare parts in Saudi Arabia by week's end to support sustained military operations.

Cheney said in morning television interviews that as many as 100,000 additional U.S. troops could be sent to Saudi Arabia, an increase believed sought by military leaders to enable them to launch an attack.

''It's conceivable that we'll end up with that big an increase,'' Cheney replied to a question.

The Pentagon said there are already more than 210,000 U.S. ground, air and naval troops in Saudi Arabia and the surrounding region, facing an Iraqi force of 430,000 in Kuwait and southern Iraq.

Gen. Colin Powell, chairman of the Joint Chiefs of Staff, was believed to have received a request for another three heavily armored or mechanized divisions during his visit to Saudi Arabia Monday and Tuesday from the commander of the U.S. Central Command, Gen. H. Norman Schwarzkopf.

Webster was reported as saying during an appearance before the National Council of World Affairs that Iraq's military might must be destroyed and that he didn't believe Saddam had ever been serious about a peacefull settlement.

Statements over the past two weeks from various sources, such as Soviet diplomats and the Palestinian Liberation Organization, having Saddam in a

conciliatory mood and offering to withdraw from all but a small part of Kuwait had dropped oil prices $12 over seven trading sessions ending Monday.

The renewed fears of war was also affecting the overseas spot markets, where crude is traded for cash.

On the European spot market, Britain's widely traded North Sea Brent was up at midday $1.80 over Wednesday to $32.65 a barrel.

The United Arab Emirates' Dubai Light, the key OPEC crude from the Middle East shipped mainly to the Far East, had climbed $2.10 to $28.40 a barrel.

#90298u0981 10/25/1990 ~United Press International

BUDAPEST, HUNGARY (OCT. 25) UPI - Hungary's Constitutional Court has outlawed capital punishment in a ruling 34 years after the start the 1956 uprising that led to executions of scores of the country's top leaders.

Although the decision was generally welcomed by most newspapers Thursday, some commentators questioned the timing of the ruling, which coincides with a sharp increase in violent crime.

''To live is a fundamental and inalienable right,'' the court said in its decision, handed down late Wednesday. It outlawed as unconstitutional the section of the state penal code that permits capital punishment.

The ruling means convicted criminals now facing the death penalty will have their sentences commuted to life imprisonment.

The court's decision comes amid ceremonies marking the 34th anniversary of the 1956 anti-communist revolt that was crushed by Soviet tanks and resulted in the execution of Prime Minister Imre Nagy and over 300 others between 1957 and 1961.

President Arapd Goncz, who had been sentenced to death after the uprising but later had his sentence commuted to a life term, has prevented individual executions by presidential decree since his election to the post in May.

The outlawing of the death penalty drew praise from Hungary's League of the Opponents of Capital Punishment, which petitioned the court last January to declare the death penalty unconstitutional.

It its petition, the League argued that capital punishment was an ''irreversible act which ruined human values.'' It noted that 34 countries have already banned executions.

But League Chairman Tibor Horvath conceded public opinion was divided over the

issue. Violent crime has risen sharply since the restoration of democratic rule, and many Hungarians feel capital punishment would act as a deterrent.

#90298u0990 10/25/1990 ~United Press International

ISLAMABAD, PAKISTAN (OCT. 25) UPI - Ousted Prime Minister Benazir Bhutto urged her party leaders Thursday not to ''hand over the country to the worshipers of dictatorship,'' who she said had rigged the general elections, but she agreed to take part in upcoming provincial polls.

Caretaker Prime Minister Ghulam Mustafa Jatoi, meanwhile, called on Bhutto to accept her party's election loss and warned if she or anyone else tried to disrupt Saturday's provincial elections they would be ''dealt with severely.''

Jatoi spoke to reporters after his Islamic Democratic Alliance won 105 seats in the new 217-member National Assembly in Wednesday's elections, giving it the ability to form a government.

Bhutto's Pakistan People's Party won 45 races, while smaller parties, most of them allied to the IDA, had 31 and independents 21. A further 10 seats are reserved for religious minorities, and polling in one constituency was postponed.

The IDA is to elect a leader, who must then seek a vote of confidence from the National Assembly within 30 days to become prime minister. The two main candidates are Jatoi and Nawaz Sharif, a former chief minister of Punjab Province and Bhutto's main foe during her term of office.

Bhutto, the 37-year-old daughter of former Prime Minister Zulfikar Ali Bhutto, accused her opponents of ''gross rigging'' to achieve their unexpected and decisive victory.

Six international teams are in Pakistan to observe the parliamentary elections and the provincial assembly polls, including a 40-member delegation from the National Democratic Institute, based in the United States. The NDI is to issue a report Friday on the general elections.

A PPP spokesman in the northeastern city of Lahore said the party had decided to take part in Saturday's provincial elections ''so as to know by what means the caretaker government has used and might use to rig the polls.''

Jatoi warned that ''anyone who tries to disrupt the provincial elections will be dealt with severely.'' He denied Wednesday's polls were rigged and called on Bhutto to accept the results.

''Who could have rigged that number of seats?'' he told the news conference. ''It's not humanly possible.''

He said Bhutto ''believes she is always right, that she has done no wrong and can do no wrong. She believes that no one can touch her. This is like 'Alice in Wonderland.'

''Now things have changed. She should accept (the results) with good grace. She should be a good loser also and accept the mandate of the people. She had a chance for two years. ... She failed to run the country. Now it's time for the courts to decide the cases on merit. Justice will be done in each individual case.''

President Ghulam Ishaq Khan dismissed Bhutto's 20-month-old government on Aug. 6, accusing it of corruption and nepotism and of failing to control law and order, and he dissolved the National Assembly. He appointed opposition leader Jatoi to head an interim government until the elections.

The president also set up Special Disqualification Courts to try Bhutto and members of her administration on corruption charges. If found guilty they could be barred from politics for seven years.

Many believe Ishaq Khan's actions were inspired by the army, which has run Pakistan for more than half of its 43-year history and which had been in conflict with Bhutto's democratic government.

Bhutto told her party leaders at a meeting in her hometown of Larkana Thursday they should ''fight against all odds for the betterment and prosperity of the country'' and not ''hand over the country to the worshipers of dictatorship and so-called democrats.''

Many analysts had predicted the PPP would emerge as the largest single party in the elections after attempts to malign Bhutto and keep her from returning to power evoked a wave of sympathy for her.

Bhutto has attracted large and emotional crowds at rallies across the country in the past few weeks in an outpouring of support many observers say exceeded that of the campaign for the November 1988 elections. The PPP won those elections, the first democratic voting in the country since 1977.

About 48 million of Pakistan's 110 million people were eligible to vote Wednesday. Pakistani reporters said turnout appeared lower than in the 1988 elections, when 43 percent of voters cast ballots.

#90298u1013 10/25/1990 ~United Press International

COPENHAGEN, DENMARK (OCT. 25) UPI - A 66-year-old German woman appeared in court Thursday charged with attempting to smuggle about 25 pounds of gold nuggets worth $160,000 into the country, court officials said.

They said the woman, who was not named, had been detained by Copenhagen Airport customs officers after a random check turned up the gold sewn into the lining of her overcoat.

A 22-year-old Soviet national appeared in court in Copenhagen Wednesday on charges of narcotics posession - the first Soviet citizen to be so charged in Denmark.

The young man, whose name also was witheld, was arrested in Copenhagen Tuesday carrying cannabis. His arrest came three weeks after he had been expelled from the country.

A police spokesman said the man told the court he had returned to Denmark by way of Poland and Sweden in order to collect the cannabis, which was for his own personal use.

The man was jailed for 13 days.

#90298u1019 10/25/1990 ~United Press International

LONDON (OCT. 25) UPI - Stock prices closed lower Thursday in stagnant trading on the London International Stock Exchange amid profit downgradings from several companies and predictions of a long downturn from bellweather Imperial Chemical Industries.

Stocks closed mixed in Frankfurt.

London's blue-chip Financial Times 100-stock index, which fell 16.5 points Wednesday, lost 21.8 points to 2,088.7. The narrower top 30 industrial average fell 21.4 points to 1,617.5.

Volume amounted to around 323 million shares compared with 468 million shares changing hands Wednesday.

Analysts said stocks fell following Imperial Chemical Industries, considered to be a bellwether of British industry, reported its pretax profit for the first nine months fell 27 percent from a year earlier.

Imperial Chemical Industries lost 30 cents to $16.58 on what market watchers termed the ''disappointing results.''

Analysts also indicated investors were still being cautious because of continued uncertainty over the Middle East, broad fluctuations in global oil prices, the pending U.S. budget deficit reduction pact and uncertainty over both Britain's and the U.S. economy.

Chancellor of the Exchequer John Major said Britain's industrial ''output is slowing,'' but ''it is not yet clear if the nation is in a recession.''

Major also reiterated an economic slowdown is a ''necessary part of the cycle'' of breaking the nation's inflationary trend.

Standard Charter Bank fell 20 cents to $4.79 in what was described as a selloff related its exposure to Polly Peck International.

Polly Peck went into Britain's high court Thursday to seek an administrator that will allow it to fend off its creditors, the U.S. equivalent of Chapter 11 bankruptcy protection.

PPI, one of the best performing stocks on the London International Stock Exchange in the last decade, owes banks $1.9 billion.

A steering committee of creditors headed by Standard Chartered Bank had demanded at least $58.5 million by the end of October, and had been pressuring the company to seek an administrator.

Wellcome, the pharmaceutical company, fell 36 cents to $9.17 after reports a rival French drugs company, Rhone-Poulenc, received approval for an anti-AIDS drug.

Among some of the day's other highlights, Barclays de Zoete Wedd fell 18 cents to $6.84, Kleinwort Benson added 4 cents to $5.32, P & O plummented 48 cents to $9.20 and Euro Disney climbed $1 to $18.52.

Stock prices on the Frankfurt Stock Exchange were mixed in sluggish trading.

The key 30 stock German Stock Index, which lost 20.52 points Wednesday, rebounded 3.76 points to 1,497.58. The narrower VWD Index lost 12.18 point to 84.40.

Traders said local investors were torn between bearish local economic news and

London's weak performance.

The Federal Statistics Office reported West German import prices surged 2.4 percent in September from August, fueled by higher oil prices.

Market forecasters were expecting the report to show a rise of about 1.8 percent.

#90298u1043 10/25/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 25) UPI - NATO formed a task force on Thursday to study ways to remove government-imposed barriers to the free trade of arms within the alliance.

The panel, which will report its findings in six months, stems from a proposal by the U.S. ambassador to NATO, William H. Taft IV, that a ''defense GATT'' be created.

GATT is the General Agreement on Tariffs and Trade, which sets rules to protect free trade in merchandise. Taft says similar principles should exist within the Atlantic alliance.

''The task force will look at what barriers now exist that prevent nations from buying things from companies in other nations,'' said a NATO diplomat.

The panel will also examine barriers to joint ventures between firms in two or more NATO nations.

The decision to create the task force was made by the Conference of National Armaments Directors, which meets twice a year. The task force report will be presented to the armament directors' next meeting, in April.

#90298u1044 10/25/1990 ~United Press International

GENEVA (OCT. 25) UPI - Earth will soon face an ''ecological disaster'' because of global warming caused by air pollution and destruction of forests, the World Wildlife Fund warned Thursday.

The environmental group issued its warning ahead of a 100-nation world climate conference in Geneva Oct. 29 to Nov. 7 on drafting guidelines for negotiations next year on a global warming draft treaty.

It is intended to present such a text to a 1992 U.N. Environment and Development Conference in Rio de Janeiro.

Studies prepared for the initial Geneva meeting predicted that temperatures will rise 2 degrees by the year 2025 and 5 degrees by the end of the century without decisive action.

Another report forecast a rise in ocean levels by the year 2100 of between 1 1/2 feet to 3 feet because of the so-called ''greenhouse effect.''

''The world is entering a crucial period,'' the WWF said in its pre-conference statement Thursday. ''There is no doubt that we are fast moving towards the brink of a global ecological disaster.

''It is clear that if massive loss of biological diversity is to be prevented, and severe social and economic disruption is to be avoided, action must be taken to substantially reduce emissions of gases which cause global warming.''

The WWF called specifically for ''a binding agreement'' to reduce carbon dioxide emissions by 20 percent by 2005, at least in the industrial countries. Those emissions, along with carbon dioxide produced by the burning of tropical forests, are believed responsible for global warming.

The WWF report also called for a comprehensive forestry agreement on conserving and sustaining tropical and other forests.

#90298u1049 10/25/1990 ~United Press International

WARSAW, POLAND (OCT. 25) UPI - Jewish and Catholic leaders this week worked to stop a rising tide of anti-Semitism in Poland through conversation and music, in what was billed as one of the first major steps toward a reconciliation between Jews and Catholics since World War II.

But they face a formidable task, as evidenced Thursday by questions posed to the election committee of Prime Minister Tadeusz Mazowiecki, who has suffered from a whisper campaign that while he is a Catholic he may have some Jewish heritage.

Adam Szostkiewicz, spokesman for Mazowiecki's election committee, was asked whether some remarks made by Solidarity leader Lech Walesa were anti-Semitic. Walesa is his main rival for president in the Nov. 25 elections.

''At this point we don't consider them anti-Semitic but some questions from the crowd were,'' said Szostkiewicz. Freedom in the East Bloc also has fostered more open expressions of hostility toward Jews, including anti-Semitic remarks from some Walesa supporters.

The United Jewish Appeal and the Polish government called the reconciliation effort a ''signal event in Polish-Jewish dialogue.''

More than 3 million Polish Jews, 90 percent of the Jewish community's population, died in Nazi concentration camps. Now just 15,000 Jews live in Poland, which is an overwhelmingly Catholic nation.

Krakow's Temple Postepowa, a 100-year-old synagogue unusued since World War II was reopened Wednesday with a ''Concert of Remembrance and Reconciliation.''

Father Stanislaw Musial, who heads a committee to improve Catholic- Jewish relations, asked forgiveness for those Poles who failed to help Jews.

''We are sorry for each Pole who did not extend a helpful hand and gave up to the Nazis or tried to profit from your fear and loneliness. For that, I apologize. Poland, full of blood of the Jews killed here during World War II must be free of any trace of anti-Semitism.''

Pope John Paul II, who is Polish, also expressed remorse in a message delivered on his behalf.

The Jewish ''nation had lived with us for generations, shoulder to shoulder, on the same soil which became like their own motherland, motherland of their diaspora. A terrible death was inflicted upon this nation,'' the pope said.

''The murderers did it on our soil, perhaps they wanted to disgrace it. But you cannot disgrace a land with the deaths of innocent victims. Through such death a land becomes sacred. The nation which had lived on this land together with us remained with us after the terrible deaths of millions of its sons and daughters. And together we are waiting for the last judgment and resurrection.''

A concert in the synagogue, featuring works by Beethoven and Dvorak, was conducted by American Gilbert Levine, whose mother-in-law is one the few who survived Auschwitz in southern Poland. He was named to head the Krakow Philharmonic in 1987, the first American named to lead an Eastern European cultural institution.

Max Bruch's ''Kol Nidre,'' which expresses the grief and suffering felt at the tremendous loss suffered by the Jewish people was performed.

Before the concert, the Star of David was raised on top of the synagogue. The six-pointed star was torn down in November 1939 by the Gestapo during the German occupation.

The United Jewish Appeal sent 250 people to Poland for the reconciliation ceremonies, the Vatican sent an emissary, and the U.S and Israeli ambassadors attended. A group of young Jews, most of Polish heritage, visited the Nazi

death camps at Auschwitz-Birkenau, guided by survivors of the same camps.

#90298u1051 10/25/1990 ~United Press International

LONDON (OCT. 25) UPI - Britain's high court Thursday appointed joint administrators to sort out the financial jumble involving Polly Peck International, the conglomerate with business interests ranging from fruits to electronics that is beset by massive debt and faces an insider trading inquiry.

The administrators will take over the reins of Polly Peck, effectively signaling an end to Chairman Asil Nadir's personal control of the company, which owes banks $1.9 billion.

As Chapter 11 federal bankruptcy proceedings do in the United States, a court-appointed administrator gives the company protection from its creditors and allows its subsidiaries to continue in business while attempting to reorganize.

''It was the best thing to do for the moment because it will give us protection from the banks while we regroup,'' Nadir said in a statement issued before the court approved the administrators.

According to a court official, three accounting executives were named to serve as Polly Peck's administrators: Christopher Morris, of Touche Ross, and Richard Stone and Michael Jordan, both of Coopers and Lybrand Deloitte.

Polly Peck went to the high court after Nadir, a Turkish Cypriot, returned from Turkey without having secured funds needed to ward off creditors.

Polly Peck, whose shares were one of the best performing equities on the London International Stock Exchange in the last decade, owns the U.S.-based PPI Del Monte Tropical Fruits Co. as well as consumer- electronics groups based in the Far East. Most of its operations in agriculture and industry are found in Turkey and northern Cyprus.

A steering committee of creditors headed by Standard Chartered Bank had demanded at least $58.5 million by the end of October and had been pressuring the company to seek an administrator.

The value of Polly Peck's outstanding shares grew in value to more than $2.9 billion earlier this year but collapsed to $893 million before trading in the shares was suspended by British authorities Sept. 20 because of an inquiry into insider trading that allegedly involved a Nadir family trust.

The investigation by the Serious Fraud Office is continuing.

#90298u1068 10/25/1990 ~United Press International
SAN SALVADOR, El Salvador (OCT. 25) UPI - The army killed five rebels and wounded 15 others after discovering a guerrilla training camp on the eastern outskirts of the capital, an armed forces spokesman said Thursday.

The army said it discovered one of the Farabundo Marti National Liberation Front's weapons training camps in the town of San Jose Guayabal, 15 miles east of San Salvador.

A military spokesman said the army killed five rebels and wounded 15. He said one soldier was also killed, but would not provide further details of the clash.

The army seized rebel equipment including one M-16 rifle, one AR-15 machine gun, artillary, uniforms and medicine. Thirteen stores that surrounded the camp were destroyed by troops.

Government and rebel representatives are scheduled to meet Nov. 4 in Mexico for their sixth round of peace in an effort to reach a negotiated end to the decade-old civil war.

#90298u1075 10/25/1990 ~United Press International
NEW DELHI, INDIA (OCT. 25) UPI - Authorities enforced curfews and ordered the army to patrol several cities as Hindu-Moslem clashes over a temple- mosque dispute Thursday left 14 people dead, raising the number of people killed to 68, police and news reports said.

Violence lingered for a second day in several Indian cities, which erupted Wednesday during a nationwide strike called by the right-wing fundamentalist Hindu Bharatiya Janata Party to protest the arrest of its president, L.K. Advani, who was leading a pro-temple procession.

The arrest prompted the BJP to withdraw its crucial parliamentary support to the five-party National Front coalition government of Prime Minister V.P. Singh, reducing the government to a minority in Parliament and putting it close to collapse.

The withdrawl of support plunged the administration into its worst crisis since it assumed power 11 months ago and prompted President Ramaswamy Venkataraman to ask Singh to prove his majority in Parliament on Nov.7.

Experts believe India may have to go to polls soon to elect a new government.

The Press Trust of India and state-run Doordarshan television said that worst incidents occurred in the northern Rajastan state capital city of Jaipur,

where security forces and violent agitators fought at three places with guns and rocks.

Five people died in the city, the agency said, adding that one other person died in police gunfire in the nearby Jodhpur town.

It said authorities early morning recovered 22 bodies from two slum colonies in Jaipur. Residents contacted on phone said attackers armed with weapons raided two residential colonies, attacking residents with knifes or clubbing them with sticks. Many of the victims were doused in fuel and set ablaze.

Police reported at least eight people killed in similar Hindu-Moslem clashes and police firings at Ahmedabad and Godara cities in western Gujarat state, Howrah and Purulia districts in eastern West Bengal state, and Hubli city in southern Karnataka state.

The Press Trust said army patrolled streets and authorities enforced curfews in these places.

In late September Advani began a 6,250 mile cross-country procession to garner support for temple construction in Ayodhya.

The BJP president was arrested in northern Bihar state after he failed to heed a government warning to call off the pro-temple procession.

Hindu radicals claim that the 460-year-old mosque that occupies the Ayodhya site was built by the Moghul emperor Babbar after he destroyed a temple marking the birthplace of Lord Rama, one of the most important gods in the vast Hindu pantheon.

Moslem leaders refute the claim and contend that no temple ever existed at the disputed place.

The Ayodhya dispute has been smouldering since February 1986, when a court agreed to allow Hindus to worship in the mosque. The building had been locked since 1949 and contains an altar bearing Hindu idols. The move led to communal riots in several cities.

#90298u1078 10/25/1990 ~United Press International
(OCT. 25) UPI - Astronomers have discovered what may be the largest galaxy in the known universe, a mammoth cluster of stars with a diameter of 6 million light years, some 60 times wider than Earth's Milky Way, it was reported Thursday.

The giant object is located in the heart of a cluster of galaxies known as Abell 2029, a team of astronomers reported in the journal Science.

The object is some 1 billion light years from Earth, that is, the distance light travels in 1 billion years at a speed of 186,000 miles per second.

Using a 36-inch telescope at the Kitt Peak National Observatory in Arizona, the astronomers were able to detect a ''halo'' of diffuse light surrounding a massive galaxy at the center of Abell 2029.

A mosaic of 16 images made with light-sensitive electronic ''chips'' called charge-coupled devices, or CCDs, showed the diffuse halo to be remarkably uniform, leading the astronomers to conclude they were looking at a single galaxy, the largest ever discovered.

Measurements indicate the galaxy has a diameter of some 6 million light years, more than 4 1/2 times the diameter of the previous record holder and some 60 times wider than Earth's Milky Way, which has a diameter of about 100,000 light years.

The discovery was made by Juan Uson of the National Radio Astronomy Observatory in Socorro, N.M.; Stephen Boughn of Haverford College in Haverford Penn.; and Jeffrey Kuhn of Michigan State University in East Lansing, Mich.

''Whether the diffuse halo in Abell 2029 is considered to be an extension of the central ... galaxy or a component of diffuse cluster light is, to some extent, a matter of semantics,'' the astronomers wrote.

But the scientists believe they are seeing a giant galaxy, primarily because the halo's light spreads very smoothly outward from the central galaxy and because the halo has the same elliptical shape as the central galaxy.

''Quite simply, the central galaxy is indistinguishable from the diffuse light that extends ... from the cluster center,'' they said. ''Thus, this 'object' is among the largest and most luminous galaxies observed.''

The galaxy shines with 2 trillion times the light produced by Earth's sun and it is elliptical in shape. About 26 percent of the light given off by the galactic cluster is contributed by this one galaxy.

''This is an organized mass of light and energy,'' Kuhn said in a news release. ''It's a very large, organized galaxy.''

Most galaxies are parts of giant clusters, many of which can contain thousands of members. By studying such giant galaxies as the record- holder described in Science, astronauts hope to learn more about how galactic clusters form.

''What we found is an object that must have existed for a long time, because it takes a long time to get all that matter and light organized into a smooth distribution,'' Kuhn said. ''That tells us that somehow, this thing in the

middle of the cluster was a very important ingredient in the formation of this cluster.''

#90298u1082 10/25/1990 ~United Press International

TALLAHASSEE, FL (OCT. 25) UPI - The steady rise in gasoline prices probably won't steer more Americans into car pooling because most prefer to put up with the inconveniences of driving alone, a Florida State University researcher said Thursday.

Jon Bailey, an FSU psychology professor who studied car pooling during the energy crisis of the late 1970s, said daily hassles such as waiting for riders and dealing with their annoying habits outweigh the long-term savings on gasoline and other costs involved in driving alone.

"There is a lot of idealism about how wonderful car pooling is and how everybody should share rides to and from work," Bailey said. "But when you get right down to the nitty gritty, very few people are actually going to do it.

"Somebody comes down with a cold and everybody's got it. An accident doesn't injure just one person, it injures three or four. People spill coffee in your new car seats. It's not hard to envision the negative consequences of car pooling," he said.

For many people the time driving to and from work is the only time they have alone all day. The rest of the time they must deal with co-workers, family members, and friends, Bailey said.

"As a society, we are very interested in preserving our personal space," he said. "We are very averse to dealing with personal conflict and the fact that we might have to deal with that conflict is something we want to avoid, and we're willing to pay a very high price."

Bailey's studies show that employers can spur car pooling by giving those who share rides rewards such as reserved parking spaces or a few minutes off early to get a jump on traffic.

In the meantime, he said, he expects budget-minded Americans to offset higher gasoline prices in other ways. "I think we'll take shorter trips, stay in a cheaper hotel and come back from vacation a day earlier," Bailey said. "I think we won't eat dessert. I think that's where the savings will come from as opposed to trying to round up a bunch of folks for a car pool."

#90298u1083 10/25/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 25) UPI - The chief of the Soviet military staff,

Gen. Mikhail Moiseyev, called for a ''Europe free of military blocs'' during a landmark visit to NATO headquarters on Thursday.

Moiseyev met with the 16 NATO chiefs of staff, who were assembled to draft the alliance's post-Cold War strategy at a meeting of the NATO Military Committee.

''It was a very lively, open and frank exchange of views,'' said the chairman of the Military Committee, Norwegian Gen. Vigleik Eide.

''My vision of Europe is a Europe free from military blocs,'' Moiseyev told reporters before leaving the NATO compound, where workers pressed against window panes to glimpse the distinctive brown and red uniforms of the Soviet military man and his entourage.

The Soviet-led Warsaw Pact has been rapidly collapsing since the Berlin Wall was first breached last November.

''We are threatening to no one,'' Moiseyev said. ''The substance of our defensive military doctrine has been clearly laid out. We are not training our armed forces to attack anyone.''

Eide said the Soviet military chief ''expressed some doubt whether the present alliance system can continue. Given the changes in the Warsaw Pact, they have some concerns about NATO continuing.''

''He's entitled to his view,'' Eide said, ''but the future of NATO will be decided by 16 sovereign nations, and if they want NATO to continue it will continue.''

Moiseyev, who arrived in Belgium on Wednesday, will meet on Friday with NATO's European commander, U.S. Gen. John Galvin, at the Supreme Headquarters of the Allied Powers of Europe (SHAPE).

Eide said the Military Committee's session with Moiseyev was ''a meeting between professionals who can discuss matters in an open and friendly way.''

''It's a risky world with a lot of instability,'' the Norwegian general said. ''We discussed the need for cooperation on security issues.''

They discussed the gulf crisis only briefly.

''He reiterated his view that the situation should be resolved by peaceful means without fighting a war,'' Eide said.

Despite the warming of relations between NATO and the Soviet Union, said Eide, ''it's no secret that the Soviets will continue to be a military superpower'' and some differences will continue.

''If we should have this greater cooperation, we will have to cross through troubled water to get there,'' he said. ''It's a step-by-step process.''

#90298u1090 10/25/1990 ~United Press International

(OCT. 25) UPI - Only a few details are said to be standing in the way of Congress finally approving a new deficit-reduction budget plan. And that news was enough to get President Bush to sign a new temporary spending bill today to keep the federal government going at least until midnight Saturday.

Administration budget chief Richard Darman says that while a ''laundry list'' of items still must be negotiated, it is possible that all of this could become a done deal by later today.

Israel today sent its regrets to the United Nations, saying it is disappointed over passage of a second condemnation measure by the Security Council in two weeks. The unanimous 15N on record as deploring Israel's refusal to co-operate with an investigation into the October 8th Temple Mount riots in which 20 Arabs died.

In the Philippines, armed men believed to be guerrillas of the communist New People's Army burned four buses in Manila and nearby towns today, injuring one driver. Leftist workers are trying to continue a general strike that for the most part has been ineffective.

Riot police moved in to break up a two-day vigil at the Philippine Senate by 500 workers demanding a 50 percent pay raise because of soaring gasoline prices. But the president of the Philippine Senate allowed the protesters to remain until tomorrow.

Parliamentary elections are over in Pakistan, and ousted prime minister Benazir Bhutto claims the opposition stole the results. The major opposition party won 105 of the 217 seats in the National Assembly. Bhutto's party won just 45. Other parties divided what's left.

Radio Pakistan says a strong earthquake centered 250 miles north of the city of Peshawar injured at least 70 people today and caused widespread damage. The six-point-six magnitude jolt was felt in Pakistan, Afghanistan and India. It lasted about 15 seconds.

19 people have died in political violence in North Ireland in the past 12 days. Two girls today found the body of a 28-year-old Protestant radical in an alley in south Belfast. The dead man was a member of a para-military group opposed to the I-R-A.

Three British soldiers injured in bombings yesterday remain in critical condition today. Three bombings killed six soldiers and one civilian and

wounded 21 other people in the worst wave of I-R-A attacks in two years.

The Senate yesterday passed a bill that would place steriods in the same catagory as other illegal drugs like cocaine. The measure would give the Drug Enforcement Administration authority to investigate trafficking of the muscle-enhancing drugs and increase maximum prison terms for their sale.

Athletes have used steriods for years to build muscle quickly and the drug has found its way into high school and college locker rooms. Side effects from steriod use include serious damage to internal organs.

#90298u1091 10/25/1990 ~United Press International

NEW YORK (OCT. 25) UPI - Avon Products Inc. expects to earn $2.60 a share on a fully diluted basis for 1990, which would represent a 25 percent increase over last year, the company's chairman and chief executive officer said Thursday.

Speaking to securities analysts, James Preston said that U.S. sales for the beauty products giant are "at least even with last year" and that softness in the northeastern and midwestern markets was offset by increases in the South, Southwest and West.

Preston also reported that two members of Chartwell Associates LP, an investment group that owns 19.9 percent of Avon's stock, had resigned from a special committee the company formed to enhance shareholder value.

The resignations followed the group's selection of a financial advisor to the committee that Preston said had a "severe conflict of interest." Chartwell is led by executives of Mary Kay Corp., a major Avon competitor, and is still represented on Avon's board.

Avon has now retained investment banker James D. Wolfensohn Inc. to advise the committee on how to add to shareholders' value. Preston said that the committee is considering a buyback of Avon stock but that the company is currently concentrating on debt reduction.

"In the current economic climate, the committee and the board believe it is important to have a strong balance sheet. It's our conviction that our debt-to-total capitalization is still too high and that this is not a good time to be highly leveraged."

He said the company's total debt at the end of the third quarter was $603 million and had been reduced by 46 percent over the last 21 months. Avon's debt-to-capitalization ratio was down to 67 percent at Sept. 30, compared with 80 percent as of the same date last year. Preston said 1991 would be "another good year" although he did not expect earnings to match profits achieved 1989

or 1990.

He said the Persian Gulf crisis does not directly affect Avon since only two percent of its raw materials are petroleum-based and its manufacturing processes are not energy-intensive. He added that each ten cent increase in gasoline prices costs Avon "only" $2 million a year worldwide. He said Avon is not recession proof but can resist recession through its diversified operations.

In international business, which accounts for 55 percent of sales, Preston said the nine-nation Pacific region is destined to be the largest and most profitable market.

The region accounts for 24 percent of Avon's worldwide sales, and has increased its sales by 60 percent and its pre-tax contributions by 69 percent over four years.

In Japan, however, Avon is negotiating to sell about half of the 60 percent interest it has in a joint venture there. Preston said sales and pre-tax earnings will be down there for the year.

At the same time, the company is currently setting up a joint venture in China where it will begin selling in the first week of November. Preston said that Avon's initial investment there is "modest" and that the company estimates net sales there of about $1.5 million by the end of 1991.

Addressing other markets, he said Europe was "improving" and Germany is receiving "special attention" because it will be "the key to winning Europe in 1992," when a single market will emerge among the countries of Western Europe.

-30- 3562

#90298u1106 10/25/1990 ~United Press International

DALLAS (OCT. 25) UPI - Indicted thrift king Don Dixon squeezed bank officers and borrowers to pay for prostitutes, politicians, and a $2 million "party and sex" beach home in California, federal prosecutors said Thursday.

"Dixon set the tone at his savings and loan," Justice Department prosecutor Robert Halberg said in opening remarks. "He defined the corporate culture, and today he cannot ignore the consequences of his actions.

Halberg compared the curly-haired, moustached Dixon to Gus, wizened hero of "Lonesome Dove." "Dixon wanted to make that big Montana drive," Halberg said, "but he knew he'd have to lie, cheat and steal to do it."

Defense attorneys said Dixon, owner of failed Vernon Savings and Loan, did what he had to do to survive, and he took his lumps. "The largest political contributor was none other than Don Dixon," said attorney Billy Ravkind. "The

largest loser when the thrift failed was again Don Dixon.

"Don sunk $14 million of his own money in the bank through the years," said Ravkind, "and today, as you see him, he's penniless," at which point Ravkind motioned toward his client, nervously hunched over the defense table and wearing a threadbare blue coat and wire-rim spectacles.

Dixon, accused in a 38-count indictment of concealing payments to politicians, prostitutes, and to support a lavish lifestyle, found politicians and lobbyists came to him with their hands "open and outstretched," said Ravkind.

In 1985, he said, Dixon entered his Solona Beach, Calif., home, owned through Vernon, to find Sen. Alan Cranston, D-Calif., sitting on a sofa. "Don had never met Mr. Cranston," Ravkind said. "But there he sat like an old friend. Cranston listened to Mr. Dixon talk about problems in the industry and he cocked his head, and said he was so sorry. But he (Cranston) could certainly use $20,000 to $30,000. "Don learned that's just how it works."

Cranston, whose office declined comment on the trial statement, is currently under investigation by the Senate ethics committee for his intervention with government regulators on behalf of Charles Keating, indicted owner of failed Lincoln Savings and Loan.

Other politicians who accepted contributions filtered through falsified Vernon expense documents include former Rep. Jack Kemp, currently secretary of Housing and Urban Development; Sen. Jake Garn, R- Utah; former congressmen Tony Coelho of California, and Jim Wright and Tom Loeffler of Texas, according to the Dixon indictment.

Ravkind said Dixon was selected as a scapegoat for the S&L crisis. Vernon's 1987 collapse cost taxpayers an estimated $1.3 billion and was one of the largest thrift losses in the nation at the time.

"There was and is an attitude in Washington to get the high-flying Texans," Ravkind told the seven-woman, five-man jury. "The attitude is anti-Texan, anti-S&L and anti-real estate. It is naive and it is wrong."

Dixon made political contributions, and encouraged his lieutenants to follow suit, because he felt Congress was out to destroy the S&L industry by removing tax shelter incentives and increasing regulation, his attorney said. "He saw the big Texas collapse coming," Ravkind said, "and he was dead right."

Ravkind discounted government claims Dixon turned trips with regulators and bank officers into sex junkets. "There were women, yes, but there was no sex," he said. Girls hired from the Million-Dollar Saloon, a Dallas topless club, served only as hostesses and waitresses. "They weren't whores, and they'd tear your head off if you said they were."

The trial is expected to last at least a month with witnesses including major California developers, a convicted madam, former Vernon pilots, borrowers, and officers.

#90298u1110 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The budget compromise making the rounds on Capitol Hill Thursday is designed to hit the wealthy, but in the process of trying to flatten out the nation's tax structure, congressional negotiators may have created a new "tax bubble."

Even though in the late stages of negotiations Democrats gave up on their idea of pursuing a special surtax on people with incomes of more than $1 million, the package still would try to soak the very rich by limiting the deductions they can take and by taking away their personal exemptions.

However, while complete details still were not available Thursday, it appeared that the plan would not fully straighten out the country's convoluted tax rate structure.

Currently, Americans pay 15 percent tax the first part of their income, 28 percent tax on the next part and then 33 percent on the next portion. After that, the tax rate drops back down to 28 percent. The 33 percent portion is called the "tax bubble."

Under proposed 1990 rates, a family of four would pay 15 percent tax on the first $32,450 of taxable income, 28 percent on the income between $32,450 and $78,400 and 33 percent on the income from that point to just over $208,000. From there on, the tax rate would go back to 28 percent.

A main Democratic goal of this year's tax fight was to flatten out that bubble with a third tax rate that did not eventually go back down. However, while the top rate was changed under the compromise plan, it appeared a bubble would remain.

The plan called for the 15 percent rate and 28 percent rate to remain, but instead of then jumping to a 33 percent rate that would eventually decline, the plan would impose a 31 percent rate that stays in place.

As a result, some people whose income now stops in the old 33 percent rate would likely see a tax cut because their marginal rate would now be 31 percent.

But it appears some new provisions would keep a tax bubble in place, only at a higher tax rate than before. Under the plan, the wealthiest Americans would begin to lose the value of some of their tax deductions and also would, as under current law, lose the value of the personal exemptions they claim.

The loss of the deductions, tax analysts said, would effectively mean an increase of nearly one percentage point in the tax rate, while the loss of the exemptions would be equivalent to an additional half-point rise in the top tax rate for each exemption lost.

Under the tentative plan - one House Democrats appeared to embrace during a caucus Wednesday - couples with two children and with taxable incomes of at least $150,000 a year would see their tax rate rise 0.5 percent for each of their four personal exemptions, for a total of two percentages points.

So, for that couple, the new 31 percent tax rate for people in their income bracket would rise to 33 percent - creating a new tax bubble. It was unclear Thursday if there was a cap on how high the tax rate could go for rich people with many children.

Those with taxable incomes of $275,000 or more a year would be prohibited from claiming any personal exemptions but they would see their tax rate stay at 31 percent under the tentative plan.

However, while the basic outlines of a compromise package were being circulated Thursday afternoon, the precise details of when various tax provisions would go into effect were still up in the air. In fact, even Rep. Leon Panetta, D-Calif., the chairman of the House Budget Committee, said Thursday he did not yet know some details of the plan.

#90298u1143 10/25/1990 ~United Press International

PALMER, Alaska (OCT. 25) UPI - A minor earthquake jolted residents in southern Alaska Thursday, but no damage or injuries were reported, the Alaska Tsunami Warning Center said.

Spokesman Bob Hammond said the quake at 9:41 a.m. Alaska Daylight Time was centered 60 miles northwest of Talkeetna and 130 miles northwest of Anchorage and recorded a preliminary magnitude of 3.9 on the open-ended Richter scale.

''There were no reports of injuries or damage,'' Hammond said. ''Residents who reported feeling it said it was a sharp jolt, but a very minor one, and didn't disturb anything.''

-30- 779

#90298u1149 10/25/1990 ~United Press International

LOS ANGELES (OCT. 25) UPI - MCA Inc.'s common stock recovered Thursday, following the denial of a report that buyout talks with Matsushita Electric Industrial Co. had been suspended.

MCA was up $6.75 to $57 a share in early afternoon trading Thursday on the New

York Stock Exchange. It had fallen as low as $48 Wednesday following a report from Nikkei News Service that talks between MCA and Matsushita over a possible $8 billion takeover bid had been suspended until mid-November.

Trading was halted twice during Wednesday's session and the stock closed off $8.625 a share at $50.25 Wednesday on heavy volume.

After the market closed, Matsushita issued a statement from its home office in Osaka, Japan, denying the talks have broken off.

The denial was the first comment from either company in several weeks. MCA has refused to comment about the negotiations since admitting that it was holding buyout talks with Matsushita.

Entertainment analyst Paul Marsh of Bateman Eichler, Hill Richards in Los Angeles said the report of the delayed talks may have been bogus. ''This may have been the first false rumor that we've seen on this deal, '' he said.

Steven Hill of Sutro & Co. in San Francisco said that the recovery of the stock price showed that investors have been reassured that a deal is likely.

''The transaction is still probably going to go through,'' Hill said. ''The deal makes sense for both companies.''

But, Hill said, it is likely that the closing will not occur for several more weeks, since there are a number of complex issues to be resolved. ''I would not be surprised to see some kind of delay,'' he said.

Kidder, Peabody entertainment analyst Christopher Dixon agreed that both sides have ''major incentives'' to go through with the deal, probably at a price above $75 a share.

Analysts have said the issues that could stall the deal include the tax liability of major MCA shareholders and the sale of MCA's WWOR television station in New Jersey since federal regulations would prohibit a foreign owner of a broadcast outlet.

Reports have emerged that Matsushita may not want to buy MCA's movie studio theme parks in California and Florida.

Besides the theme parks, MCA's key assets include Universal Studios, several record labels and book publishers, huge film and television libraries, 420 acres of real estate in Hollywood and interests in the USA Network cable channel and the Cineplex Odeon theater chain.

#90298u1171 10/25/1990 ~United Press International

OTTAWA (OCT. 25) UPI - The Canadian government, buffeted by an economic recession and higher unemployment, Thursday announced a moderate increase in immigration levels and higher funding for language training of newcomers.

Immigration Minister Barbara McDougall told Parliament that under the terms of a new five-year plan immigration would increase from 200,000 in 1990 to 220,000 in 1991 and to 250,000 annually in subsequent years.

Only 13,000 refugees will be accepted each year into Canada, most of them from southeast Asia, Latin America and the Middle East and West Asia. At the same time, the government greatly reduced the refugee quota from Eastern Europe from 3,500 in 1990 to 550 in 1991.

McDougall, referring to opinion polls that indicate most Canadians want the number of immigrants and refugees restricted because of the economic slowdown, said the government balanced ''the views, interests and motives of all Canadians, while living within budgetary and other restraints.''

To help immigrants integrate more quickly into Canadian society, the federal government will spend an extra $200 million on language training over the next four years, McDougall said.

Under a new definition of what constitutes a family, adult non- dependent children will no longer be allowed to accompany their parents into Canada, the minister said. As well, the number of skilled workers was increased in the later years of the plan to meet regional workforce needs.

The immigration numbers are the equivalent of about 1 percent of Canada's population of 25 million.

But Liberal immigration critic, Alfonso Gagliano, said the numbers are not sufficiently high to compensate for the country's declining birth rate and population.

The population is expected to increase to 28 million, then drop to 15 million over a 25 year period, Gagliano said. He said the low immigration policy would have serious social and economic consequences, including a drop in tax revenue and an inadequate labor force.

''We not only have a financial deficit, but a human deficit which is becoming more threatening every day,'' Gagliano said.

#90298u1181 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The Oversight Board of the Resolution Trust Corp. Thursday approved an operating plan for the first six months of fiscal 1991 that calls for the sale or liquidation of 192 insolvent thrifts by the end of

March.

The plan, which depends on funding by Congress, would authorize $62.2 billion in new funding to the RTC, including $23.3 billion to resolve the 192 thrifts and $38.9 billion in working capital to be borrowed through the Federal Financing Bank.

The action would bring to 479 the number of thrifts resolved by the federal government since August 1989.

Peter Monroe, the board's president, termed the plan ''ambitious'' and said it would allow the RTC to continue ''a high level of resolutions.''

''If the RTC meets its target of 192 new resolutions, it will have sold or closed approximately 90 percent of all thrifts seized by the RTC to date,'' Monroe said.

Of the $23.3 billion in loss funds anticipated for the six-month period, $11.3 billion would come from Treasury appropriations and $12 billion from the sale of Resolution Funding Corp. bonds.

BY JIM ANDERSON - UPI

WASHINGTON (OCT. 25) UPI - In what could be a long and painful episode, Israeli officials exressed resentment Thursday about the second time in a week that the United States voted to criticize Israel for its actions in East Jerusalem.

U.S. officials, in turn, were frustrated by Israel's refusal to allow a U.N. inspection team to look into the Oct. 8 killing of 21 Palestinians in East Jerusalem.

And, ironically, both Israeli and American officials used the same justification for their anger with each other: The episode draws the focus of world attention away from Saddam Hussein and his aggression against Kuwait.

Avi Pazner, spokesman for Prime Minister Yitshak Shamir, said Israel regretted the resolution, and he said a U.N. inspection team was unacceptable because ''it harms our sovereignty,'' a reference to Israel's 1967 annexation of the old city and surrounding hills. That annexation is not recognized by any other country, including the United States.

In Washington, another Israeli official used much stronger language, saying, ''We more than regret it. It is totally unproductive in restoring order on the ground and it takes the focus away from Saddam Hussein and his aggression.''

A State Department spokesman, Richard Boucher, said the United States supports the deploring of Israel's behavior ''because we agreed with the language.''

He also added that he hopes the focus could be returned to Saddam Hussein as the Security Council moved on to consider a resolution that would condemn Iraq for refusing to permit the resupply of diplomatic missions in Kuwait.

But other diplomats said the Israeli matter is not finished, and some members of the Council are considering a plan in which condemnation of Iraqi behavior would be alternated with another resolution condemning Israel for its refusal to accept the U.N. team until Israel caves in.

But there appeared to be little chance of Israel giving in because of the sovereignty issue raised by the Israeli government.

In a letter to Secretary of State James Baker on Oct. 2, Israeli Foreign Minister David Levy appeared to open that question himself when he agreed that Israel will not seek to settle Jewish civilians ''beyond the green line,'' meaning territory that Israel did not control on June 5, 1967.

The State Department says that would clearly include East Jersualem. The Israeli government - including Levy, once he got back to Israel - says it does not, raising a potentially devastating issue in U.S.- Israeli relations: That is whether the Likud government has been dealing in good faith with the United States.

Baker already felt burned by the Israelis backing away from their own election proposal for Palestinian Arabs in the occupied territories once it appeared that Baker was close to putting together a formula for direct Israeli-Palestinian talks.

There are further bruised feelings to come.

While some members of the Israeli Cabinet plead for calm and order, there are other, more inflammatory voices, including Agriculture Minister Rafael Eitan, who told Israeli radio that it would be best to deport to Lebanon the entire family of any Arab found with any kind of weapon. Another possibility, he went on, ''would be to shoot him (an Arab caught with a weapon) in the head.''

Prime Minister Shamir also added to the heat of the quarrel with Washington, putting the entire blame on the U.S. government for the condemnation of Israel and described the U.S. actions as ''unreasonable'' and using ''aggressive, even threatening language'' against Israel.

Shamir said, in a broadcast interview, ''We cannot ignore this phenomenon of Secretary of State Baker writing us letters in such a severe and ungracious tone.''

And Baker, for his part, scornfully criticized the Israeli government for leaking a confidential communication, and doing it in such a way that it distorted his words.

From both sides, it looked like a long, cold winter in the relations between the United States and Israel.

#90298u1187 10/25/1990 ~United Press International

SAO PAULO, BRAZIL (OCT. 25) UPI - Child prostitution is on the rise in Brazil with more than 500,000 young women selling themselves, mostly on street corners and discotheques in cities like Rio de Janeiro and Sao Paulo, a state report said.

The report, released this week by the Ministry of Social Action, backs up earlier reports by U.N. agencies and gives new details about the origins of the severe prostitution problem in South America's largest and most populated country.

''In the interior of the Amazon and Central-West regions, children are sold to truckdrivers by their fathers or by child-peddling agents,'' the report said. ''Some of the truckdrivers serve as accomplices in the trafficking of child prostitutes.''

Based on Brazil's 1989 population of 147.4 million people, the report said, one in every 300 persons is a child prostitute.

Child prostitutes were described as ranging between the ages of 11 and 17. It also released figures showing that more than 1 million women under the age of 19 are single mothers.

The report was prepared in part by the Brazilian Center on Infancy and Adolescence and was based largely on Federal Police records.

It said virtually all of the young women turn to prostitution as a means of survival, and that many of them turn to drugs after they hit the streets.

''Principally, the streets are a means of generating income for them, though it can also be a means of gaining social acceptance,'' the report said.

It also pointed out that a maid often makes about 55 cents a month, while a street walker can often make that in one or two good nights.

The growth of prostitution in Rio de Janeiro has contributed to the city's rising crime problem, and recently has given rise to problems of overcrowdedness and poor sanitary conditions in low-income housing areas as

prostitutes turn to small apartments in the city rather than busing in from the suburbs daily.

BONN, GERMANY (OCT. 25) UPI - German deputies reprimanded U.S. authorities for moving too slow in giving Germany control of millions of former Nazi Party files, parliamentary sources said Thursday.

In a closed meeting Wednesday, the committee on domestic affairs said that control of the Berlin Document Center, a large underground archive of former Nazi records, should be returned to the federal republic soon.

''Since Germany has regained its full sovereignty, and the occupational rights (of the United States) have expired, the files of the Berlin Document Center must be returned to the authority of the federal republic,'' committee members said.

U.S. authorities said earlier that the files will not be handed over until they have been micro-filmed, guaranteeing U.S. access in the future.

Deputies reportedly said the Americans should show more sensitivity for the German desire to have access to documents concerning this period in German history.

They said the U.S. authorities in charge of the center should not be concerned that the Germans would suppress the files once they were to gain control of them.

But Elan Steinberg, executive director of the World Jewish Congress, said recently that the files should remain in U.S. hands because ''we paid for it the hard way, with the blood of American soldiers.''

In the final days of World War II, U.S. military forces confiscated more than 30 million files. Some, like the 11 million Nazi Party membership cards, were barely saved from destruction.

Since the end of the war, the documents have been used by historians, prosecutors and researchers in documenting Adolf Hitler's Third Reich. Center

librarians receive more than 5,000 requests a month for information.

The parliamentary committee wants the center to remain in Berlin but to come under the control of the federal archives near Bonn.

#90298u1210 10/25/1990 ~United Press International

(OCT. 25) UPI - The American military build-up in the Persian Gulf is NOT complete. Defense Secretary Cheney says that as many as 100-thousand additional U-S troops could be sent to Saudi Arabia. He gave NO timetable for such a deployment. The U-S already has more than 210- thousand ground, air and naval troops in the region. Iraq is believed to have a force of 430-thousand in Kuwait and southern Iraq. Chairman of the Joint Chiefs of Staff General Colin Powell is expected to discuss troop requests with Cheney tomorrow.

According to U-S officials, the commander of the U-S Central Command, General H. Norman Schwarzkopf, has said he would need more armor and additional ground troops if he were ordered to go from a defensive to an offensive position. Asked if another 100-thousand troops could be deployed, Cheney replied- ''It's conceivable that we'll end up with that big an increase.''

Saturday midnight is the next deadline facing the federal government as Congress tries to come up with an acceptable budget plan. President Bush this morning signed his fourth temporary spending bill to keep the government in cash until then. It comes amid word of tentative agreement on key parts of a five-year, 500-BILLION-dollar deficit- reduction measure. Only a few details are said to still be under discussion.

Firefighters in Lincoln, Nebraska, are keeping all options open as they try to put out a suspected arson fire raging through a pile of between 50-thousand and 100-thousand old tires. The federal Environmental Protection Agency has been called to the scene because of concern over the thick, black smoke drifting over northwest Lincoln. Officials are watching the weather. They say they may be forced to evacuate nearby homes if winds start blowing the acrid rubber smoke toward residential areas.

Senator John Danforth says more than 500 lives will be saved each year and 26-hundred injuries pervented because of new federal regulations requiring automakers to provide better protection against side-impact crashes. The Missouri Republican says the new law... which takes effect with the 1994 model year... sets new standards for side- door strength. The added protection will add about 50 dollars to the price of a new car.

There are reports of progress in efforts to free 12 Western hostages in Lebanon. They come from top Lebanese government officials who are working to end the role that various militias have in controlling sections of Beirut. Syria and Iran reportedly are involved in whatever discussions are occurring.

There are six American captives in Lebanon, along with three Britons, two Germans and one Italian.

The statistics are shocking. A government report says more than one-half-Million children are selling themselves as prostitutes in Brazil, mostly on street corners and discos in Rio and Sao Paulo. A report by the Ministry of Social Action calls Brazil's prostitution problem the worst in South America. That half-Milliion figure means one in every 300 people in Brazil is a child prostitute between the ages of 11 and 17.

Three clay figurines at a Dallas City Hall art exhibit next to the Office of Vital Statistics apparently were too hot for Texas, and officials have ordered the nude statues almost completely covered with fake leaves. The sculptor, Lubbock, Texas, artist Future Akins, calls the action both silly and sad.

#90298u1215 10/25/1990 ~United Press International

OTTAWA (OCT. 25) UPI - Banks and other financial institutions that fail to alert authorities to large money transactions would be subject to penalties under legislation proposed Thursday by the federal government to combat money laundering.

The proposed legislation provides for fines of up to $500,000 or five years imprisonment for those who fail to keep the appropriate records. Large cash transactions were defined as $10,000 or more.

The legislation, which must be approved by Canada's Parliament before it is implemented, orders financial institutions, currency exchange dealers, investment counsellors and insurance companies to keep records of various large cash transactions for at least five years.

"The bill calls for significant penalties and this represents a clear signal to the public, financial institutions and the courts that this is a serious issue," Gilles Loiselle, junior minister of finance, said in a prepared statement.

Loiselle said the government considered money laundering legislation already enacted by other countries and recommendations by a special task force of the Group of Seven leading industrialized nations during its economic summit in Houston earlier this year.

#90298u1244 10/25/1990 ~United Press International

MOSCOW (OCT. 25) UPI - The Moldavian government sent police to its southern region and its Parliament met in emergency session Thursday amid threats of violence over efforts by a small ethnic group to establish its own republic.

The Gagauzi, a Turkic people who make up just 3.5 percent of Moldavia's population of 4.2 million, held unsanctioned elections to form a legislature in the region of southern Moldavia where most of them live.

A convoy of 150 buses left Kishinev with thousands of ethnic Moldavian vigilantes angry over the defiant step by the Gagauzi, who declared the establishment of their own republic earlier this year in a move the Moldavian Parliament branded illegal, the independent Interfax news service said.

''The situation in the republic is threatening to go out of control in view of the Moldavian population's strongly negative attitude to the actions of the Gagauzi and attempts by the Moldavian Popular Front to organize teams of volunteers to prevent elections,'' the official Tass news agency said.

Hundreds of young Moldavians demonstrated in Kishinev Wednesday night, shouting, ''Moldavians to arms,'' and other slogans, the official government newspaper Izvestia said.

In an address on republican radio, Moldavian President Mircha Snegur said he had several telephone conversations with Soviet President Mikhail Gorbachev, who he said urged a political solution to the crisis, Interfax said.

Snegur led a group of deputies who went to the embattled region after the emergency Parliament session, it said.

''The situation in southern Moldavia has sharply deteriorated following the decision by the Provisional Committee of the Gagauz Republic to hold elections to a Supreme Soviet (legislature),'' Tass said.

''This morning large militia reinforcements arrived on the borders of this new

republic, which the Moldavian Parliament has declared anti- constitutional, while dozens of buses with Moldavian volunteers are heading there from Kishinev,'' Tass said.

Stepan Topal, head of the Gagauz provisional committee, told Tass that Gagauzi in the regional capital of Komrat were terrified by the threats of violence.

Police sealed off all roads into the southern area wedged between the giant Ukraine republic and Romania, the neighboring country from which dictator Josef Stalin carved most of Moldavia in 1940.

Gagauzi, who speak their own language, number just 173,000 in the entire Soviet Union, with 138,000 in Moldavia, 27,000 in the Ukraine and the others scattered throughout the rest of the country.

Moldavians, who speak Romanian and retain strong cultural ties with their native land, make up nearly two-thirds of the Soviet republic's people. About one-quarter of the population is split between Ukrainians and Russians, with Gagauzi and other ethnic groups having much smaller numbers.

The Moldavian Parliament considered imposing a state of emergency in the Gagauzi-dominated southern area or negotiating with leaders of the ethnic group. It adjourned without making a decision and was to meet again Friday morning.

The Gagauzi activists were prepared to go to Kishinev for negotiations but feared they would be arrested upon arrival, Izvestia said.

#90298u1245 10/25/1990 ~United Press International

LAGOS, NIGERIA (OCT. 25) UPI - Liberian rebels have trained anti-aircraft fire on Nigerian fighters staging missions over the West African nation, and two have been damaged, senior military and civilian sources said Thursday.

The sources said two French-supplied Alpha jets were forced to return to base after being hit by fire from rebels loyal to guerrilla leader Charles Taylor, whose fighters have been expelled from the Liberian capital of Monrovia by West African peacekeeping troops.

They said the jets belonged to a squadron that early this week attacked a rebel convoy of armored cars, anti-aircraft guns and supply trucks as it moved north from the port of Buchanan to Gbanga town.

Officials said the Nigerian Air Force has deployed five Alphas and five British-made Jaguar jets in Freetown, Sierra Leone.

The ability of the rebels to inflict damage on the Nigerian aircraft, probably

with American weaponry captured from the toppled government of the late President Samuel Doe, has alarmed many observers who consider air control of the five-nation West African intervention force as crucial.

NEW YORK (OCT. 25) UPI - A former Drexel Burnham Lambert Inc. bond salesman said Thursday Michael Milken urged him to purchase Caesars World Inc. bonds from Drexel clients even though the securities were apparently on the firm's "restricted" list.

The bond salesman, James Dahl, said that shortly after he made the trades, Drexel became the underwriter of an offer to exchange Caesars World bonds for equity in the gaming company, sharply increasing the value of the securities.

Dahl's testimony came in the eighth day of a presentencing hearing in U.S. District Court for Milken, the former head of Drexel's junk-bond department. Milken, convicted in April of six counts of insider trading, faces a maximum jail term of 28 years.

The government contends Milken engaged in insider trading when he encouraged Dahl and other Drexel salesman to buy Caesars World bonds in July 1983 knowing that the pending exchange offer would boost the price of the securities.

Dahl said that Milken repeatedly asked him and other Drexel traders to press Drexel customers to sell their holdings of Caesars World bonds several days before the exchange offer was announced. Dahl said he was forced to cancel one such trade after the customer complained that Drexel had failed to disclose its role in the exchange offer.

But under cross-examination by Milken's lawyer, Arthur Liman, Dahl said that it was out of character for Milken to encourage trades that were contrary to the interests of Drexel's clients. "It would have been a big mistake," the bond salesman remarked.

Dahl also testified that Milken told him that Columbia Savings & Loan Association, a major Drexel client, had agreed to hold the Caesars World bonds for Drexel's benefit. The government contends that agreement constituted illegal "parking" of securities.

Dahl also said that shortly after it was announced that Ivan Boesky - the convicted Wall Street arbritageur turned government informant who implicated Milken in insider-trading activities - reached an agreement with the government in November 1986, Milken asked the Drexel salesman to follow him into the bathroom off the firm's trading floor. "Mike said, 'There haven't been any supboenas issued yet. Whatever you have to do, do it,"' Dahl testified.

The testimony appeared to support prosecutors' claims that Milken obstructed justice by attempting to destroy or conceal evidence related to the government's investigation of Drexel.

WASHINGTON (OCT. 25) UPI - Defense Secretary Dick Cheney said Thursday up to 100,000 more U.S. troops could be sent to Saudi Arabia, a major increase that is widely seen as a decision to switch from a defensive to an offensive force.

More than 210,000 U.S. ground, air and naval forces already are in Saudi Arabia and the surrounding region, facing a heavily fortified Iraqi force of 430,000 in Kuwait and southern Iraq, defense officials said.

A 50 percent increase in U.S. troop levels in the Middle East would result in a force equal to the size of the American military presence in Western Europe, and begin to mirror the massive military buildup during the Vietnam War.

Cheney appeared on all four network television morning news programs Thursday and was asked on CBS's ''This Morning'' about reports that another 100,000 U.S. troops might be sent to Saudi Arabia as part of Operation Desert Shield.

''It's conceivable that we'll end up with that big an increase,'' Cheney replied, adding that ''we've never set an upper ceiling'' on troop levels.

He noted that the fiscal 1991 defense authorization bill that just passed Congress stipulates that 50,000 U.S. troops must be withdrawn from Western Europe and said, ''It's very possible that some of those units would be rotated through Saudi Arabia before they came back home.''

The reports of plans to dramatically increase troop strength came after Gen. Colin Powell, chairman of the Joint Chiefs of Staff, visited Saudi Arabia Monday and Tuesday to discuss force levels with U.S. officers there.

The commander of the U.S. Central Command in Saudi Arabia, Gen. H. Norman Schwarzkopf, is believed to have asked Powell for three more armored or mechanized divisions to enable him to dislodge the Iraqis from Kuwait.

''General Schwarzkopf over there says that if we want to go from a defensive posture to an offensive posture, that we need another 100,000 troops there. Is that the criteria here?'' Cheney was asked by CBS co- host Harry Smith.

''I wouldn't overemphasize that,'' Cheney said. ''I think the better way to put it is, the mission is today still as it's always been. It's to deter further aggression, to defend Saudi Arabia, enforce the sanctions.''

Cheney said that while the Bush administration hasn't ruled out the option of launching an attack, ''I wouldn't want to specifically identify a specific troop level with a particular option.''

Powell is expected to meet with Cheney early next week.

The defense secretary was also asked about a comment by Sen. Richard Lugar, R-Ind., that the United States is heading toward a conflict with Iraq.

''I wouldn't make that kind of a judgment at this point,'' Cheney replied. ''I think that's a possibility. We haven't ruled out any option.''

Later, Pentagon spokesman Pete Williams told reporters there was no single decision in the past few days to send more U.S. troops despite Powell's trip, but rather a ''continuing series of decisions'' made over many weeks.

Williams said he does not know why Schwarzkopf ''wants the deployment to continue - (but) he does.''

He also tried to steer reporters away from the observation that the increased troop strength reflects a movement to an offensive force, though Cheney and other U.S. officials have said the size of U.S. forces there now can successfully defend Saudi Arabia.

VIENNA (OCT. 25) UPI - The first all-European parliamentary conference on the environment ended Thursday with calls for greater cooperation between East and West in cleaning up the continent's most ecologically blighted regions.

The unprecedented three-day conference in the Austrian capital brought together representatives of the 23-nation Council of Europe as well as Yugoslavia and the six Warsaw Pact states.

In a closing declaration, the delegates called for the creation of a pan-European environmental agency that would set uniform standards for pollution control and would monitor compliance.

The document also urged the establishment of a European fund that would help finance pollution-fighting efforts and the clean-up of the most severely affected areas.

Most of the money would be earmarked for Eastern Europe, where years of mismanagement and neglect by the former communist governments have created an ''environmental catastrophe,'' according to Ander Bjoerk, president of the Council of Europe's Parliamentary Assembly.

Legislators attending the conference also called for the creation of a nature preserve in the former ''no man's land'' along the Iron Curtain, which once separated Soviet bloc countries from Western Europe. They also proposed the establishment of international committees, modeled after the Rhein Commission, to monitor ecological problems of international waterways such as the Danube, Elbe and Oder rivers.

NEW YORK (OCT. 25) UPI - Assets of the nation's 519 money market mutual funds fell $673.1 million to $414.44 billion in the week ended Wednesday, the Investment Company Institute reported Thursday.

The Washington-based institute said broker-dealer fund assets decreased $205.3 million to $165.20 billion, assets of general purpose funds decreased $478.3 million to $146.30 billion, and institutional fund assets rose $10.5 million to $102.94 billion.

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said average seven- day simple yields were 7.45 percent, up from 7.44 the previous week, and 30-day simple yields were unchanged at 7.46 percent. The average maturity of fund portfolios rose to 46 days from 45.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money-market deposit accounts, 5.86 percent, unchanged; Super-Now accounts, 4.94 percent, unchanged; six-month certificates of deposit, 7.46 percent, down from 7.47 percent; 1-year CDs, 7.55 percent, down from 7.57 percent; 2 1/2-year CDs, 7.66 percent, up from 7.65 percent; and five-year CDs 7.79 percent, down from 7.80 percent.

The average rate for a one-year, adjustable-rate mortgage was 8.20 percent, off from 8.25 percent the previous week.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.76 percent from 9.80 percent, while the average rate for a 30- year, fixed-rate mortgage eased to 10.09 percent from 10.12 percent.

The average rate for a four-year automobile loan fell to 12.11 percent from 12.13 percent last week.

#90298u1290 10/25/1990 ~United Press International
NEW YORK (OCT. 25) UPI - More than three-quarters of American workers do not feel their jobs are secure, a survey said Thursday.

The survey of 11,128 employees by Brooks International, a management consulting firm, found 55 percent disagreed with the statement, "We're all fairly sure our jobs will be here for years to come," and another 21 percent were uncertain.

Only 24 percent expressed confidence in the future of their jobs. The survey also found only 36 percent of respondents have confidence in upper management, while 35 percent do not and 29 percent are uncertain.

The survey, conducted between January and November 1989, covered 12 major companies in heavy process manufacturing, food processing, transportation, insurance, telecommunications, and utilities.

Brooks executive vice president Richard Kristiansen said in a statement, "Employees at all levels, including middle managers, see upper management behaving with an almost exclusively short-term focus. Downsizing to meet the next quarterly earnings target erodes employee confidence that management has made long-term commitments to achieving competitive advantage."

"Add to this the fact that that less than one third of our survey respondents feel that the various departments in their organizations work together to achieve common goals, and it is little wonder that employees feel insecure about the leadership they are provided. It is clear that management action holds the key to defusing such performance-distracting uncertainty."

WASHINGTON (OCT. 25) UPI - British scientists may have found the location of the genetic abnormality that causes the bizarre brain disorder Tourette syndrome, it was reported Thursday.

Researchers at the University College and Middlesex School of Medicine in London studied the genes of 74 members of a family in which the disorder or a less severe related condition - chronic multiple tic syndrome - affected 46 of 122 members.

By tracing certain abnormalities in the genetic material, the researchers found evidence the defect that causes the syndromes may be located on the so-called short arm of chromosome 3. A follow-up study of five smaller families supported the findings, the researchers reported in the British medical journal The Lancet.

The scientists cautioned that the findings were ''provisional'' and had to be followed by more research to confirm and explore the results.

''This provides a little further support for the hypothesis that a (gene) situated in this region may confer liability to the Tourette and chronic multiple tic syndromes,'' the researchers wrote.

Between 25,000 and 30,000 Americans suffer from Tourette syndrome. The brain disorder causes victims to have uncontrolled body movements, such as blinking their eyes and shrugging their shoulders, and make involuntary noises, such as barking, grunting, coughing and inappropriate outbursts of obscenities.

Dr. Thomas Hyde of the National Institute of Mental Health in Washington said the results were ''exciting'' and ''interesting'' but agreed they needed to be confirmed by additional research.

Previous research indicating the abnormality may be located elsewhere was unable to be verified, he said.

''It sounds promising but needs independent replication by another laboratory

'' Hyde said.

The disease appears to be inherited, with victims often having children who develop the disorder. But the exact cause is unknown and scientists have been unable to locate the exact genetic defect responsible.

The symptoms can be controlled with drugs that block the brain chemical dopamine, but there is no cure.

If they can find the genetic abnormality that causes the syndrome and determine the biologic result, scientists may be able to understand more about the disorder and develop better treatments, Hyde said.

''Once you identify where the abnormal gene is, then you can identify what the gene is doing,'' he said.

Every individual is born with 23 pairs of chromosomes that carry between 50,000 and 100,000 genes, which hold instructions for everything about a person, ranging from their eye color to whether they are prone to cancer.

#90298u1358 10/25/1990 ~United Press International
WASHINGTON (OCT. 25) UPI - The White House cudgels were out Thursday for Republican congressional adviser Edward Rollins, who told GOP candidates not to hesitate to distance themselves from President Bush on touchy budget positions.

For the second day in a row, press secretary Marlin Fitzwter, responding to questions, repudiated a memo by Rollins, co-chairman of the National Republican Congressional Committee who advised GOP candidates:

''Do not hesitate to oppose either the president or proposals being advanced in Congress.''

During a picture-taking session in the Rose Garden with Republican leaders in a show of solidarity as Congress moved toward a budget agreement, Bush was asked if he wanted Rollins fired. He appeared to nod, but shied away from commenting.

Fitzwater, who described Rollins' remarks as ''injudicious'' on Wednesday, followed up Thursday by telling reporters: ''We were less than enthusiastic about his comments. That is probably the understatement of the year. It was not helpful.''

He said that Rollins' tenure was up to the committee. ''Ed Rollins works for the Republican Campaign Committee,'' said Fitzwater. ''Obviously we're not happy with his comments.''

John Roberts, a committee spokesman, said the panel had no sense that Bush wanted Rollins to leave. ''We know Fitzwater was asked the question, but as far as we know there isn't any basis to it,'' he said, referring to questions on whether Rollins would be asked to bow out.

''So it's simply business as usual here, 11 days until the election,'' he explained.

Rollins was President Ronald Reagan's political adviser at one time.

His memo was addressed to all Republican members of Congress. He said he had prepared the advisory to indicate the dramatic shift in the mood of the country to pessimism.

#90298u1368 10/25/1990 ~United Press International
ORLANDO, FL (OCT. 25) UPI - A Continental jetliner blew a tire on takeoff Thursday and was diverted to Orlando International Airport but made a safe landing, the airline reported.

''It was a perfectly uneventful landing,'' said Art Kent, a Continental spokesman in Houston, company headquarters.

Flight 358, a Boeing 737, took off from Southwest Florida Regional Airport at Fort Myers at about 12:45 p.m., carrying 79 passengers and a crew of seven bound for Newark, N.J.

''He blew one tire on takeoff,'' Kent said.

The tire was one of two on the right landing gear, said Jack Barker with the Federal Aviation Administration in Atlanta.

The plane was immediately diverted to Orlando and circled there for about 30 minutes while technicians examined the remains of the tire left in Fort Myers, Kent said.

''They checked the tire that fell after he took off, determined that there would be no damage to the axle of the landing gear, and he landed, '' Kent said.

Barker said the Federal Aviation Administration and National Transportation Safety Board would investigate.

#90298u1370 10/25/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (OCT. 25) UPI - At least five people were killed and several others wounded in the troubled black township of Khayelitsha outside Cape Town Thursday in a second day of clashes between residents and police, state-run television reported.

Opposition member of Parliament Jan van Eck of the Democratic Party put the death toll at seven since the violence erupted, with another 45 injured, including five seriously, and accused police of ''shocking behavior'' in dealing with the situation.

Van Eck said police resorted to ''totally indiscriminate shooting'' in a bid to restore order.

Violence erupted in the sprawling black settlement in the Cape Flats outside the southern city Wednesday when rioters set fire to vehicles, erected barricades in township roads and attacked the local municipal offices.

Witnesses said followers of the African National Congress, which has demanded the dismantling of the local black municipal councils, have attacked the home of councilors and also clashed with their supporters.

Police Thursday opened fire with birdshot, rubber bullets and tear gas to disperse demonstrators marching through the streets. At least one of the five people killed Thursday died in the police fire, the South African Broadcasting Corp. said.

It was not immediately known how the other four died.

#90298u1375 10/25/1990 ~United Press International

DUMFRIES, SCOTLAND (OCT. 25) UPI - A former Heathrow Airport security officer said Thursday he had been placed on special alert to clear a Pan Am flight that left seven hours before flight 103, the Boeing 747 that contained a radio cassette bomb which caused the deaths of 270 people.

The statements by Harjot Parmar, 37, at a Scottish judicial inquiry into the Dec. 21, 1988 disaster indicated that authorities had received a tip about a possible extremist action, but had directed it toward the wrong aircraft.

Parmar said he was informed there was an ''extra alert'' on Pan Am Flight 101 that departed from Heathrow for New York's John F. Kennedy Airport at 11 a.m.

This was seven hours before the departure time for Flight 103, which blew up at 7.03 p.m. over the Scottish town of Lockerbie, killing all 259 people aboard and 11 others on the ground.

Middle Eastern terrorists have been blamed for the bombing.

Parmar was employed by a private firm, Alert Security, and on the day was working at Heathrow's inter-line luggage shed, where he X-rayed baggage which was being transferred to Pan Am flights from other airlines.

Parmar remembered his supervisor, Michael Sullivan, telling him to check inter-line baggage for PA 101 very carefully for ''anything suspicious.'' He was not told why, he said.

''I looked for any suspicious thing... any explosive thing,'' he said, explaining that he had been briefed to check for guns, ammunition and explosives.

Asked if he knew why the special request had been made by his supervisor, Parmar replied: ''He just said there was an extra alert on 101.''

Parmar was asked by Colin Campbell, a lawyer representing the relatives of British victims, what would happen if a piece of baggage destined for PA 103 had arrived in the inter-luggage shed earlier than scheduled.

The security officer replied that it would have been X-rayed and a security

sticker attached. Then it would have been placed near the X-ray machine.

''Have you ever known of a bag in these circumstances being loaded on 101 rather than flight 103?'' Campbell asked.

''I don't understand... I don't know,'' Parmar said. ''It would depend on Pan Am staff.''

Parmer also denied that the security staff were specifically looking for radio cassette players on that date, but said between three and five pieces of luggage destined for PA 103 had been put in a container and taken away for closer inspection.

#90298u1408 10/25/1990 ~United Press International
PRAGUE, CZECHOSLOVAKIA (OCT. 25) UPI - Czechoslovakia will go ahead with plans to privatize 100,000 state-owned shops and small businesses under a new law approved by Parliament Thursday.

The law is designed to set Czechoslovakia on the road to a market economy by breaking the monopoly structure of state enterprises.

The full extent of businesses to be covered by the privatization has not yet been settled but it will include shops, hotels and small enterprises of all sorts, including wholesale operations.

Businesses are expected to be sold for a fraction of their value as the government tries to build a viable private sector.

The shops to be auctioned off are worth an estimated $6.7 billion in Czechoslovak currency. Bidders are expected to get them for $1 billion.

Finance Ministry officials say they have no idea how many people will be able to put in bids. Czechoslovakia's total known savings is 200 billion crowns, or about $6.7 billion.

There are about 50,000 crown millionaires in Czechoslovakia, and the supply of businesses is expected to far outstrip demand.

Economists are concerned that if too much of the money is put directly into circulation it could send inflation spiraling.

Under the law, which takes effect December 1, 1990, small shops and businesses will be sold at public auction to the highest bidder. Purchasers will have 30 days to pay up.

The measure eliminates previous proposals to let purchasers pay in installments, the official Czechoslovak news agency CTK reported.

Milos Zeman, chairman of Parliament's budget committee, said that with so many cash-poor people in Czechoslovakia, it will be hard to build a solid business class if the shops are sold cash on the barrel. Zeman had proposed requiring a 25 percent downpayment, and three years to pay up the balance with interest.

To prevent black marketeers and others from using the privatization to launder hoards of illegally earned cash, bidders will have to show their 1990 income tax returns, the newspaper Lidove Noviny reported.

Foreigners also will be able to bid for businesses but they must do so through a Czechoslovak partner. After the auctions, many businesses are expected to look for foreign partners.

But foreign firms should be wary. Czechoslovakia is presently overhauling its commercial laws, and it is not yet clear how foreigners could protect their investments.

Some restrictions will apply. Bidders must purchase a shop's current stock of supplies, and most food shops will have to continue to sell basic food items such as bread, milk and butter for at least one year.

Finance Ministry spokesman Miroslav Zamecnik explained that this was to ensure a minimum level of essential services was maintained, but he said this would not prevent shops from developing into other branches.

The bill's passage is bound to create some resentment. In recent weeks, shopworkers staged walkouts, unsuccessfully demanding the right of a first bid to buy their shops.

#90298u1413 10/25/1990 ~United Press International

NEW YORK (OCT. 25) UPI - The judge in the second Central Park jogger rape trial refused Thursday to let one of the two defendants replace his white attorney with a black activist lawyer.

Justice Thomas Galligan turned down the request of Kevin Richardson, 16, saying he would not delay the trial by replacing attorney Howard Diller with C. Vernon Mason.

''As far as the court is concerned, you are the attroney for the defendant and you will continue as attorney for the defendant,'' Galligan told Diller.

Diller told the judge that Richardson's family is refusing to cooperate with him to help in the youth's defense.

''It would be unfair to this defendant to proceed further in the trial because of the family's refusal to cooperate because they have another attorney,'' he argued.

Richardson's mother, Grace Cussee, broke down in tears outside the courtroom when she learned of the judge's refusal to replace Diller, whom she fired because she was not pleased with his defense.

Her daughter, Angela Cussee, told reporters: ''We don't have anything to say except that C. Vernon Mason is our lawyer and Howard Diller is not.''

Meanwhile the trial continued in State Supreme Court, Manhattan, with testimony from Det. Eric Reynolds, one of the arresting officers on the night of the April 1989 when a group of young men went ''wilding'' in Central Park

and raped a woman stockbroker who was jogging there.

If Mason had been allowed to step into the case to replace Diller, the defense team would have been made up of two lawyers who are under investigation by legal disciplinary committees.

The committee in the First Department of State Supreme Court in Manhattan is investigating Mason's role as an advisor to Tawana Brawley. The black teenager claimed she was raped by six white men, but a state grand jury later determined her story was a hoax.

The committee in the Second Department of State Supreme Court in Brooklyn is looking into the actions of the lawyer for Richardson's co- defendant, Kharey Wise, 18.

The attorney, Colin Moore, is being investigated for his role in the black boycott of a Korean grocery. He is accused of knowing for months that his client had identified the wrong man as her assailant but witholding the information.

The prosecution plans to oppose the change in lawyers, possibly arguing that Mason has a conflict of interest because he is handling the appeal of another youth convicted in the gang rape, Antron McCray, 16, said Colleen Roche, a spokeswoman for Manhattan District Attorney Robert Morgenthau.

In their videotaped confessions, McCray implicates Richardson in the rape and Richardson implicates McCray.

Altogether, six youths were indicted in the ''wilding'' rampage. Three of them were convicted last summer of raping and beating the woman jogger and assaulting two male joggers. The three - McCray, Yusef Salaam, 16, and Raymond Santana, 16 - were sentenced to 5 to 10 years in a juvenile jail.

The final youth, Steve Lopez, 16, is slated to be tried alone next year.

DEARBORN, MI (OCT. 25) UPI - Ford Motor Co. said Thursday it is lowering prices on nearly 200 crash repair parts, in an effort to combat the widespread use of what it claims are inferior parts backed by CAPA - the Certified Automotive Parts Association - and insurance companies.

The nation's No. 2 carmaker said that effective Dec. 1, it will drop prices an average of 14 percent on those parts, "allowing collision repairers to regain access to the high-quality genuine parts they prefer.

"As repairers know very well, insurance companies buy most crash parts and

they are specifying more CAPA parts simply because of lower list prices," said Kenneth W. Myers, manager of Ford Parts and Service Division.

Myers said the lower prices "eliminate price as a roadblock" to using Ford-approved parts to repair collision damage. "Our list prices will be equivalent and repairers will be free to use the genuine parts they prefer," he said.

The price cuts follow preliminary tests issued by Ford that show certain CAPA-certified parts still fail to meet basic quality standards, despite insurance industry assurances that the parts are of equivalent quality. Ford maintains the CAPA-certified parts tested by Ford are substandard in fit, finish, structural integrity and corrosion protection.

"There were gross deficiencies everywhere we looked," Myers said, adding that CAPA-approved parts took longer to install, had fewer welds that reduce safety and were not made of galvanized steel to provide better corrosion protection. CAPA, headqartered in Washington D.C., could not be immediately reached for comment.

Ford has also been concerned about the increased use of non-factory approved parts, which in turn has eroded its own business. "It is a trend we have been watching," said company spokeswoman Anne Doyle-Farrell. "This is also clearly an action to protect our own business. "But we are also concerned about the quality of repairs and how others could get a perception of poor quality on Ford vehicles," she said.

The right of repairers to substitute genuine parts for specified imitations has been acknowledged in recent months by major insurers, Ford said. While the lower prices may thin profit margins at Ford's dealers or repair centers, they will pay off in the long run, Myers said.

"For example, collision repairers are now forced to accept low-quality parts that take longer to install, which further eats into their profits," Myers explained.

"We have no intention of simply surrendering the competitive crash parts market because barriers have been erected to discourage the use of genuine crash parts," he said.

#90298u1421 10/25/1990 ~United Press International

(OCT. 25) UPI - The United States now has more than 210-thousand ground, air and naval forces in the Persian Gulf area, and Defense Secretary Dick Cheney says the number could go up by another 100-thosuand. That would be close to what military leaders are believed to feel is necessary to launch an attack against Iraq. General Colin Powell, head of the Joint Chiefs of Staff, is just

back from a trip to Saudi Arabia. He has a meeting with Cheney tomorrow.

All of this comes as France denies reports from unnamed sources that President Francois Mitterrand believes war is inevitable because of the unbending stand taken by Iraqi leader Saddam Hussein. The reports are carried in two publications, but the Paris government denies that Mitterrand ever made such a statement.

With a budget agreement expected, President Bush today signed a spending extension to keep the federal government working though Saturday. This is the fourth emergency spending measure since the start of the fiscal year on October 1st. Budget chief Richard Darman says White House and congressional negotiators have reached basic agreement on a budget... with only details left to resolve.

The 12 Western hostages still in Lebanon have been virtually forgotten since Iraq invaded Kuwait in August. But a Cabinet-level Lebanese official is reporting progress in talks to resolve the plight of the six Americans, three Britons, two Germans and one Italian. Lebanon's agriculture minister- a Shiite Moslem close to Syria- says the release of the hostages has been delayed but could come ''very soon.''

Bitter labor problems at the New York Daily News escalated into violence today. About 200 workers at a Brooklyn printing plant walked off the job in a dispute over a fired employee. Scores of workers screaming insults and armed with rocks and sticks then attacked a bus carrying NON-union workers into the plant, flattening its tires. Others set fire to parked delivery trucks.

The Daily News called the job action a strike and is hiring permanent replacement workers. Officials of the Newspaper and Mail Delivers Union say its workers are locked out. Police arrested two people, and one worker suffered a heart attack during the melee. The union has been without a contract since March 31st.

Rebels in the Philippines kidnapped six Filipino engineers and murdered their driver in an effort to stop construction of a hydro- electric dam. Police say the engineers were on their way to inspect a dam 500 miles south of Manila when they were forced into the mountains by Moslem independence fighters. The guerrillas and local residents say the dam will flood tribal lands and kill marine life they eat from Lake Lanao.

A resistance group led by Prince Norodom Sihanouk blames Vietnam and the current government of Cambodia for delaying settlement of what has become an 11-year-old conflict within the Southeast Asian country. There are calls for the 12-member Supreme National Council to try another meeting in Thailand. The council is supposed to represent Cambodian national sovereignty until U-N-supervised elections can be held. But it has bogged down in factional fighting over who should head the council.

#90298u1455 10/25/1990 ~United Press International

NEW YORK (OCT. 25) UPI - Pan American World Airways' plan to sell five London routes to UAL Corp. for $400 million came under heavy fire Thursday from both AMR Corp. and the Teamsters union, which predicted an impending bankruptcy filing at the ailing carrier.

"This is a fire sale," said William Genoese, airline division director with the union. "Pan Am should have gotten $750 million to $1 billion for these assets, which include the most valuable New York-London route and the facilities at Heathrow Airport." Heathrow is located outside London.

AMR, holding company of American Airlines, echoed the union's view that $400 million was a low pricetag for the valuable routes from five U.S. cities. American said it informed Pan Am Chairman Thomas Plaskett in a letter that it was ready to submit a higher bid for the assets on the auction block, including the London routes.

"We would welcome an opportunity to make an offer to acquire the United

Kingdom route authorities and believe, if given the opportunity thus far denied us, we would propose terms substantially better" than those of the UAL deal, American said in its letter to Plaskett.

American, however, declined to disclose a figure for its "better" terms. But Genoese said the airline could "outbid UAL by a couple hundred millions."

Genoese, comparing the $400 million deal to the $197 million American paid for TWA's Chicago-London route alone, said the Pan Am Corp. subsidiary rushed into the agreement because the financially troubled carrier is running out of cash and is facing impending bankruptcy. "No arrangements have been made to protect the workers in the UAL deal," he stressed.

Genoese said the Teamsters were contacting AMR Chairman Robert Crandall to try and get a commitment that Pan Am employees' jobs would be secure if American, the No. 1 U.S. carrier, succeeded in acquiring the European routes.

"And we have our bankruptcy lawyers look at the situation because, with the fuel crisis, Pan Am is just selling anything," Genoese said. "They have no other choice because they are running out of cash. They could file for bankruptcy at any time, they are not paying their bills."

Genoese, charging Pan Am with "gross mismanagement," said the Teamsters were currently exploring with the four other unions representing workers at Pan Am the possibility of an employee-led takeover of the troubled carrier.

Ray Naido, Dillon Read & Co.'s airline industry analyst, said if Pan Am manages to finalize the deal with UAL, parent of United Air Lines, and sells its German routes as well as its Northeast shuttle, it could remain in business through the winter months.

"They need the cash to go through their slow season," Naido said. "Otherwise, Chapter 11 is a possibility." Chapter 11 of the U.S. Bankruptcy Code provides protection from creditors to financially troubled companies while they attempt to restructure.

Genoese, who described American as having been "outfoxed" by its rival United, said the Teamsters were protesting Pan Am's policy to divest one asset after the other.

"They are selling anything, there will be nothing left, the stockholders will have nothing left whatsoever," Genoese said, adding the union owns stock in Pan Am.

He predicted the "deal with UAL is not going to fly," because the Teamsters would attempt to block the deal at every stage of the process needed to secure regulatory approval.

"We will protest at every level. We will put together a legal team to block the regulatory approval at the Justice, Transportation and State departments and with the British government," he said. "This is irresponsible. There will be nothing left."

But Naido said Pan Am argued it would not lose so much seat capacity on European routes under the UAL deal because operations would be switched to Frankfurt. "Selling all these assets is not good on the long term. But if you need the cash to survive, what else can you do?" he said.

Naido said Pan Am explained it was taking the $400 million UAL deal because the transaction it included several cooperation agreements that would strengthen Pan Am's domestic operations.

Naido predicted that Pan Am would report a small loss in the third quarter. "It is going to be a marginal loss, but nevertheless a loss, in what is the airlines' strongest quarter," he said.

#90298u1463 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Negotiators were still struggling to complete a deal on the deficit Thursday as President Bush began a drive to put the budget mess behind him and turn the political tables on his worst domestic crisis.

With help from Republican congressional leaders at a hastily staged show of unity at the White House, Bush sought to reframe the budget debate of the last six months in terms that minimized his own string of flip-flops and setbacks.

After seeing his popularity weakened and the federal government pushed to the brink of chaos by missed deadlines and deadlock, Bush dismissed the budget as ''just one matter'' on the agenda less than two weeks before midterm elections.

Assistant House Republican leader Newt Gingrich, R-Ga., who helped widen a rift within the GOP by abandoning Bush at his last time of need, likewise said it was ''important to move beyond the immediate story of the Washington Beltway and remind people that there's a lot more at stake than one 15-minute vote.''

That line overlooked the fact that Wall Street, U.S. allies and others nervous about the state of the American economy have been waiting for months for that single 15-minute vote to provide proof of political will to cut the deficit by $500 billion over five years.

With a budget agreement near, however, Bush, stung by defeat after staking his capital on an earlier deal with the Democrats, and the Republican leaders who have stuck with him through the roller-coaster budget process seemed eager to wash their hands of the entire divisive affair.

''We said from the beginning that there are those issues from time to time on which we can't all be together and this happens to be one of those,'' House Republican leader Robert Michel, R-Ill., said on a bit of understatement.

After posing with Bush in the White House Rose Garden for a family photo designed to mask their differences, Michel and other Republican leaders expressed eagerness to take their account of the budget debacle to the voters.

In fact, many have felt compelled to run for cover in the finger- pointing over the pace, direction and apparent outcome of the budget negotiations and to break ranks with Bush as he caved in no fewer than three times on taxes.

Though all but committed to a deficit-reduction plan that will require Democratic votes to end months of stalemate, Bush complained of undue public attention on taxes, the issue on which he once exhorted Americans to read his lips and the position from which he has most retreated.

Republican fiscal policy, he asserted to reporters, has ''been masked by the inside-the-beltway attention to a very important issue, but one where the Democrats seem to have carried the play with some of you.''

Hours before a scheduled departure for California to begin a final round of campaigning for Republican candidates in the Nov. 6 elections, he claimed to have been ''bludgeoned by a bunch of demagogic attacks from the Democrats for months'' and promised to fire back in kind once freed from bipartisan collaboration on the budget.

Bush has been doing just that in recent campaign speeches, glossing over his own role in the budget talks by accusing Congress of creating the fiscal problems that in the end found some of his seemingly strongest convictions subject to change or negotiation.

As he continues doing that until Election Day, Bush risks a paradox: hammering the Democrats for a near failure of leadership in which he and members of his own party were not outside spectators but full participants.

BRUSSELS, BELGIUM (OCT. 25) UPI - In a major strategic shift, NATO is developing a new ''flexible'' command structure to allow forces to be quickly moved from one command to another, a top NATO general said Thursday.

NATO had previously announced intentions to change from strictly national commands to multinational units, but the latest thinking represents an even further departure from past practice.

With smaller force levels at reduced states of readiness, NATO must be able ''to quickly shift forces to where they are needed, and if necessary, to reshift forces,'' said Gen. Vigleik Eide, chairman of NATO's Military Committee.

''You would need a very flexible system of shifting forces from one command to the other (in order to) defuse a crisis,'' Eide told reporters following a meeting of the 16 NATO military chiefs of staff.

He said the Military Committee had begun drafting strategy for a reduction in the readiness and availability of forces agreed to by NATO leaders at their historic London summit in July.

''One of the keys in the future is that with reduced forces we will need to enhance the flexibility of our forces,'' said the Norwegian army general.

He said such flexibility involves ''more than just transportation and mobility '' but must also encompass the command structure.

NATO's command has traditionally been based on national commands within an integrated structure, so each country's troops are directed by generals from that country.

The Western alliance announced last spring that it would move to multinational units, with troops from several countries under a common command. Such multinatonal units, officials said, would enhance public acceptance of continued U.S. troop presence in Europe, particularly Germany, in the post-Cold War era.

Plans to move forces from one command to another represents an even greater change from four decades of NATO doctrine.

Eide said NATO planners were studying the language difficulties inherent in any multinational command structure.

UNITED NATIONS (OCT. 25) UPI - Israel's new ambassador to the United Nations will take up his post Friday amid renewed tension between that country and the world organization over a U.N. request to investigate the killing of 21 Palestinians.

The new permanent representative, Yoram Aridor, will present credentials to Secretary-General Javier Perez de Cuellar Friday, a U.N. spokesman said Thursday.

Aridor, 57, will fill up the top position at the Israeli mission to the United Nations which was left vacant for the past 2 1/2 years, The mission was headed by acting Ambassador Johanan Bein, but he is returning to Jerusalem next week, Israeli diplomats said.

The diplomats said the latest row between Israel and Perez de Cuellar's office came Thursday when Bein told the U.N. leader's senior aide on the Middle East that there is no need for a U.N. investigation on the Oct. 8 Temple Mount riots in which 21 Palestinians were killed and more than 150 Israelis and Palestinians wounded.

The senior aide, Jean-Claude Aimee, met with Bein to convey Wednesday's Security Council resolution that urged Israel to reconsider its objection to the U.N. mission, the diplomats said.

They said Bein told Aimee that Perez de Cuellar need not send the mission because he will be provided with a report carried out by an independent Israeli team. The report was commissioned by the Israeli government to probe events at the Western Wall in Jerusalem.

Israeli authorities said thousands of rock-throwing Palestinians attacked Jewish worshippers celebrating the Feast of the Tabernacle, forcing an armed intervention by the Jerusalem police.

Wednesday's resolution, which condemned Israel for refusing to cooperate with the U.N. mission, was adopted unanimously because the United States did not use its veto to protect its Israeli ally. It was the second condemnation of Israel since the Oct. 8 incidents.

Perez de Cuellar has said he will not send the mission if he does not receive the cooperation from Israel. The Security Council asked the U.N. leader to provide a report on the riots before the end of October.

The new Israeli U.N. ambassador belongs to the Herut Party. He was a member of the Knesset from 1969 to 1988, served as minister of communications in 1981, minister of finance from 1981 to 1983 and worked as a private lawyer in the past six years.

CHICAGO (OCT. 25) UPI - Industry consolidation through mergers and acquisitions remains a key strategy for major U.S. companies, but leveraged buyouts could be a thing of the past, according to a survey released Thursday by Price Waterhouse.

In addition, the accounting firm's survey of senior financial executives indicated major U.S. corporations anticipate five years of slow growth and moderate profit increases to go with industry consolidation.

Nearly 90 percent of the survey respondents indicated their companies are or will be involved in merger-and-acquisition activity in the future, Price Waterhouse Vice Chairman Thomas Donahoe said.

"A fourth of the companies report they now are involved in one or more acquisitions ... and almost half anticipate they will be pursuing purchase of other companies during the next five years. Another 15 percent either are or may be involved in a merger during that same period," Donahoe said. "It is clear that the era of industry consolidation is not yet over."

But none of the responding companies reported or anticipated involvement in a leveraged buyout - indicating these debt-financed takeovers of major corporations may have ended with the 1980s. On the other hand, "strategic alliances" - cooperation agreements between companies with complimentary strengths - appeared to be gaining favor.

"During the past five years, less than 20 percent of the major companies surveyed engaged in a strategic alliance. Now, more than 65 percent either are currently involved in an alliance or anticipate they will be in the next five years," Donahoe said. "It may be that alliances have become recognized as a viable alternative to mergers and acquisitions," he said.

Most executives that participated in the survey said they regard acquisitions, strategic alliances, customer service and quality as key strategies for competing in world markets. But fewer than half said they were looking to reduced costs, innovation or advanced technology to provide them with a competitive edge.

Donahoe said he was "disturbed to find less reliance on innovation, a traditional strength of American enterprise and one which has been a keystone of U.S. businesses' ability to build and dominate markets."

Most survey participants said improving the competitive stance of U.S. corporations in the world market will be a big job. "Most U.S. companies that were preparing for a short-term siege during the 1980s now appear resigned to a long, tough battle against well-positioned competitors that will last to the year 2000 and beyond," Donahoe said.

"They recognize that U.S. business lost ground to competitors based in Europe, Japan and even the newly industrialized countries such as South Korea during the 1980s. But they also see the United States in a better competitive position by the year 2000, with a particular improvement in our ability to compete against Japan," he said.

Most of the respondents anticipate the newly industrialized countries "will offer as much competitive challenge to the United States as Western Europe by the year 2000," Donahoe said.

Emphasizing the multinational nature of today's marketplace, nearly half of the respondents regarded Western Europe and the Pacific Basin as the regions with the best growth opportunities for U.S. companies.

About a third ranked North America as an area for expansion, while only a fourth sew Eastern Europe as an area of potential growth. Only 20 percent predicted growth for Latin America.

NOGALES, AR (OCT. 25) UPI - The Border Patrol seized 4,391 pounds of cocaine, the largest haul in the agency's history, after a fiery gun battle with smugglers in a caravan of about 40 horses near the Mexico border, officials said Thursday.

The U.S. Drug Enforcement Administration estimated the value of the cocaine at

$199.7 million.

Border Patrol agents and the smugglers exchanged gunfire before the smugglers fled into Mexico, said Jacqui Parker, a spokeswoman for the Border Patrol's Tucson office. No one was injured.

The Border Patrol's previous record cocaine seizure was 3,297 pounds found in a travel trailer near the Arizona border town of Naco in the summer of 1989.

Parker said two agents on patrol near the Mariposa Gate, a crossing for commercial trucks about one-half mile west of Nogales, encountered the caravan of about 40 horses just after 10 p.m. Wednesday.

The smugglers opened fire with high-powered rifles and the agents returned fire, Parker said.

The smugglers continued firing in an attempt to overrun the agent's position but fled, leaving the packhorses, when backup agents arrived.

The cocaine was packed in burlap sacks, each containing about 100 pounds of the drug, Parker said.

She said drug smugglers on horseback are common along the Arizona border ''because of the rugged and remote hilly terrain.''

''We've been fighting horsepack trains for years, but 40 horses at one time, we've never seen the like of that,'' Parker said.

She said the DEA would check the cocaine to determine whether it carried the markings of any organization known to authorities.

The cocaine probably was headed for Tucson or Phoenix for distribution throughout the United States, Parker said.

Immigration and Naturalization Service Western Regional Commissioner Ben Davidian said the bust points up ''the incredible dangers facing Border Patrol agents on a daily basis.''

''The officers ... showed the type of raw courage that we have come to expect from the men and women on the front line, defending our nation's borders,'' he said.

NEW YORK (OCT. 25) UPI - Author Salmon Rushdie, still under sentence of death by Iran's Ayatollah Khomeini, told Mike Wallace he never meant to offend the Moslem world with his book ''The Satanic Verses,'' it was revealed Thursday.

Rushdie, 43, was interviewed by Wallace for the CBS News magazine ''60 Minutes'' in a program to air Sunday Oct. 28. He said to those who want to kill him, despite the subsequent death of Khomeini:

''I am not this kind of creature with horns and a tail that I've been painted.''

The Indian-born author lives in hiding in London under guard by Scotland Yard's Special Branch. A CBS spokesman said he was brought to a secret location at a police facility outside the city to meet Wallace and the ''60 Minutes'' crew. It his first American television interview since he went underground nearly two years ago.

On Feb. 14, 1989, Khomeini urged Moslems throughout the world to execute Rushdie and an aide said the next day that Khomeini offered a million-dollar reward for Rushdie's death.

Touching on one aspect of his book that inflamed the Moslem community, Rushdie said his book had been misinterpreted.

''If I'm accused to calling the prophets' wives whores, I didn't do it, you know,'' he said.

Rushdie remains optimistic that a reconciliation can be reached with the Moslem fundamentalists who echoed the late Khomeini's call for Rushdie's death. Rajei-Khorasani, a powerful member of Iran's parliament, told Wallace in Tehran that the death sentence can never be lifted, saying ''it is a religious fact.''

(OCT. 25) UPI - U-S military leaders plan to discuss a reported request from the American commander in the Persian Gulf for more troops. It's believed additional troops and armor are being sought in order to enable U-S forces to launch an attack. The Pentagon says that up to 100-thousand more troops could be deployed in Arabia with about 210-thousand servicemen already on Persian Gulf duty.

The number of Kuwaiti refugees crossing the border into Saudi Arabia dropped off today... the same day Iraq ordered Kuwaitis to obtain Iraqi identity papers. A senior Saudi official says that by mid-day, just 16 cars had come through the border checkpoint. Previously, an estimated 300 people per day had crossed.

Congressional and White House negotiators have more breathing room to put together a budget compromise. The president signed another temporary funding bill today to keep the government running through Saturday. Agreement reportedly was reached last night on key parts of a budget plan.

Firefighters are working to control a blaze that broke out today in a pile of up to 100-thousand tires in Lincoln, Nebraska. Officials say arson is suspected in the fire at the T-O Haas tire dealership. Officials say the blaze sent dense, contaminated smoke drifting toward residential areas.

About 200 workers at a New York Daily News printing plant left their jobs today in a dispute over a fired employee... attacking a bus carrying NON-union workers and setting fire to delivery trucks. The Daily News called the action a strike and immediately began hiring permanent replacements.

Pakistan's ousted Prime Minister Benazir Bhutto is trying to shake off a stinging loss in yesterday's elections by urging supporters NOT to give up in Saturday's provincial elections. The new caretaker prime minister denied charges of cheating by his victorious Islamic Democratic Alliance.

Salvadoran troops discovered a rebel training camp outside of San Salvador, killing five rebels and wounding 15. A military spokesman said one soldier was killed... and troops destroyed 13 stores surrounding the camp. The government and rebels are to continue peace talks next month in Mexico.

Israel today expressed disappointment that the United States did NOT veto the second Security Council condemnation of Israel in two weeks. The council voted 15operate with an investigation of the killings of at least 20 Palestinians in

Jerusalem this month.

The United States isn't the only country facing budget troubles. The German Parliament passed a supplementary budget today for 13-BILLION dollars, bringing the 1990 budget to 260-BILLION dollars and this year's public debt to 44-BILLION. A main source of difficulty is the rising cost of German unity.

Leftist workers burned buses in Manila today to try to salvage a general strike for higher wages that appears to have fizzled. At the same time... Philippine President Corazon Aquino called a rare meeting of the National Security Council to discuss the impact of the Persian Gulf crisis on the economy.

PRAGUE, Czechoslovakia (OCT. 25) UPI - The remains of Jan Palach, who immolated himself to protest the Warsaw Pact invasion of Czechoslovakia 21 years ago, were reburied Thursday in a cemetery reserved for prominent Czechoslovaks.

It was the third resting spot for the man who in death became an inspiration to his nation.

Palach's ashes, in a gilded urn, were returned to Prague from his hometown and buried among the graves of prominent Czechoslovaks on the orders of the nearly year-old democratic government.

Palach, who was 21 and a history student at Prague University, set himself on fire in the center of Prague on Jan. 16, 1969, to protest the military invasion by Warsaw Pact countries in August 1968 that crushed the Prague Spring reform movement.

Professor Jarmila Emmerova said a meeting of university staff and students held in an atmosphere of helplessness may have been ''the last straw'' for Palach, who killed himself three days later.

Palach was buried in the Prague cemetary of Olsany, but people soon made his gravesite a symbol of their struggle against communism and authorities moved his remains to his hometown of Vsetaty.

Nonetheless, people still gathered where his grave used to be.

Each anniversary of Palach's death has been observed with a wreath- laying ceremony in St. Wenceslas Square, where he died, interrupted by police intervention and arrests.

Vaclav Havel, now the president of Czechoslovakia, was among those arrested in January 1989, just months before the ''Velvet Revolution'' that ousted communists from power.

A square in front of Prague University was named after Palach in January 1989. Previously it was called Red Army Soldiers' Square.

Two weeks ago, in a gesture reflecting the nation's political reforms, the remains of a few communists were removed from another Prague cemetery traditionally reserved for prominent people.

#90298u1681 10/25/1990 ~United Press International

NEW YORK (OCT. 25) UPI - Stocks fell in light trading Thursday as a sharp rise in oil prices and program selling cut short an early advance tied to progress toward a budget accord.

The Dow Jones industrial average, which rose 10.15 Wednesday, lost 20.05 to close at 2484.16.

Among broader market gauges, the New York Stock Exchange composite index eased 1.09 to 169.51. Standard & Poor's 500-stock index lost 2.43 to 310.17. The price of an average share fell 19 cents.

Declines led advances 850-621 among the 1,957 issues crossing the Big Board tape. Volume totaled 141,460,000 shares, down from the 149,290,000 traded Wednesday.

Prices opened higher in the wake of news that budget negotiators had reached agreement on some key tax provisions of a tentative deficit-cutting plan. But program selling swept through the market after about an hour of trading to wipe out the gains and send the market down sharply.

Richard Darman, President Bush's budget chief, indicated shortly before midnight Wednesday that tentative agreement had been reached on key parts of the plan, which would raise the top tax rate to 31 percent and limit deductions for the rich.

Negotiators were still struggling to complete the deal Thursday, but Bush had signed a temporary spending bill early in the day to keep the government operating, signaling his satisfaction with the progress made.

But stocks' advance proved short-lived once oil prices began to surge, apparently on an International Herald Tribune report that French President Francois Mitterrand expects war to break out in the Persian Gulf soon and has decided to allow French forces in the region to operate under U.S. command.

But a spokeswoman for the presidential Elysee Palace denied the report, saying: "The president had not expressed himself in those terms under any circumstances, public or private." Despite this, the rally was on in the oil market. December oil futures closed up $3.17 to $34.25 a barrel.

"The talk about war, all the belligerent talk going around, that and oil got the market down," said Tom Gallagher, managing director in charge of capital commitment at Oppenheimer & Co.

As for why the early gains evaporated, Gallagher noted that many investors bought stocks in anticipation of a budget agreement being finalized. "So when reality set in, there was nobody left to buy stocks and we had oil going up at the same time," he explained.

On the trading floor, Citicorp was the most active issue, off 1/4 to 11 5/8. The dividend rate on a series of the bank's preferred stock was reset at a very high 12.5 percent in an auction Wednesday.

General Electric followed, down 5/8 to 51 1/4. Chase Manhattan was third, off 1/4 to 11 1/4.

Avon Products was also active, up 3/8 to 25 1/4. The company said it expects a 25 percent gain in net income for the year and has hired a financial adviser to work on ways to increase shareholder value.

MNC Financial was heavily traded as well, down 3/4 to 4 1/8. The Maryland bank holding company reported a third-quarter loss of $173.4 million and, in an indication of how severe its problems are, said it would not pay dividends without Federal Reserve approval, would discontinue its commercial-paper program and would try to sell its credit card unit.

Among other blue chips, AT&T rose 1/4 to 33 5/8 in active trading and USX added 5/8 to 31 1/8, while IBM lost 1/2 to 108 1/8, Eastman Kodak fell 1 1/4 to 38 5/8, and Philip Morris lost 3/4 to 47 1/2. General Motors was unchanged at 38 5/8.

Elsewhere, MCA bolted seven to 57, reversing Wednesday's plunge spurred by reports that talks on a buyout by Matsushita Electric Industrial were suspended. Matsushita denied the reports later Wednesday, fueling Thursday's rally.

And Tandem Computers plunged 1 1/4 to 10 3/4 after reporting a drop in earnings for the fiscal fourth quarter.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 174,263,040 shares, compared with 181,588,030 shares traded in the previous session.

Prices gained slightly in light trading on the American Stock Exchange. The Amex Market Value index edged up 0.09 to close at 292.78. Advances led declines, 253 to 238, among the 747 issues traded. The price of an average share was unchanged. Composite volume totaled 11,354,200 shares, vs. 11,227,400 traded Wednesday. B.A.T. Industries led the Amex issues, down 1/16 to 10 13/16.

The National Association of Securities Dealers composite index lost 1.24 to 339.74.

#90298u1693 10/25/1990 ~United Press International

NEW YORK (OCT. 25) UPI - Positive developments in the Washington budget talks gave a stabilizing dollar at least one reason to move up handily in New York trading Thursday, even if a budget pact could push interest rates down.

Currency traders said that the dollar was already in the midst of a consolidation or correction this week from the freefall it underwent in

preceding weeks but that the budget deal taking shape set a positive tone.

Congress and the administration seemed close to a deficit-reducing budget plan as President Bush signed a temporary spending bill. The new budget plan would raise more revenue by reducing tax breaks for the rich.

"Finally, it's getting clearer and clearer what's going to be happening," said Carl Amendola, an assistant vice president for currency dealings with Bayerische Hypotheken-und Wechsel Bank in New York. Amendola said trading continued to be dominated by technical factors, such as chart points which serve as price targets or limits.

Late in New York, the dollar traded at 1.5170 German marks, up from 1.5060 Wednesday, and 128.20 Japanese yen, up from 126.60.

Although the Federal Reserve is expected to ease short-term interest rates when Congress and the administration eventually seal a budget deficit-cutting deal, Amendola said the market has already written lower rates into dollar prices. "Assuming rates do come down," he added, "it will be in the open, and then we can get further direction as to where this market is going."

He said the market still awaited guidance from the U.S., German and Japanese central banks on where the dollar's "floor" - the level beyond which they would not allow it to fall - should be set. "With the U.S. administration feeling that a lower dollar is very tolerable," Amendola said, "I feel the dollar can go lower."

Other New York dollar rates: 1.2830 Swiss francs, up from 1.2693; 5.0790 French francs, up from 5.0450; and 1,136 Italian lire, up from 1,128. The pound moved down to $1.9510 from $1.9580.

In Europe, the dollar ended mixed as currency markets ignored the first signs of a U.S. budget compromise and fresh news from the Middle East.

Midland Bank currency dealer Tim Fox said the market "largely ignored the news on the U.S. budget, and the uncertainty in the (Persian) Gulf has caused the dollar to drift without a direction."

The dollar closed lower in Frankfurt, at 1.5120 marks vs. 1.5224 at Wednesday's close, but was slightly higher in Zurich, at 1.2725 Swiss francs against 1.2710. In London, the pound slipped to $1.9545 from $1.9555.

The dollar closed lower in Paris, Brussels and Milan, at, respectively: 5.0505 French francs against 5.0795, 31.05 Belgian francs against 31.13 and 1,128.30 Italian lire from 1,136.50.

Earlier, in the Tokyo session, the dollar resumed its downward trek when it came under selling pressure brought on prospects for an easing of U.S.

interest rates. The U.S. unit closed at 127.15 yen, down from 128.38 yen Wednesday.

Dealers reported moderate trading as market players nervously awaited word of the details of a U.S. budget package.

In Zurich, gold rose sharply to $376 an ounce from $372.50 and it moved up in London to $375.25 an ounce from $371.50 Wednesday.

Silver was unchanged in Zurich at $4.25 an ounce but declined in London, closing at $4.24 an ounce from $4.26 the day before.

Republic National Bank in New York closed cash gold at $376.25 an ounce, up from $373.75 Wednesday. The New York Commodity Exchange settled contract gold at $375.80 an ounce, up from $373.50.

Republic closed cash silver at $4.23 an ounce, down from $4.245. Comex silver closed at $4.204 an ounce, down from $4.223.

#90298u1698 10/25/1990 ~United Press International

LOS ANGELES (OCT. 25) UPI - California's housing slump worsened in September as worries about the economic effects of the Persian Gulf crisis pushed sales down 10.7 percent, a real estate trade group said Thursday.

The drop-off in sales - the largest this year - was attributed largely to the buyer trepidation about a recession and volatile oil prices that arose in the wake of the Aug. 2 Iraqi invasion of Kuwait, according to the head of the California Association of Realtors.

"Many potential buyers stayed out of the market in August after the Middle East conflict erupted," said Jim Antt, president of the trade group. "As a result, we saw a substantial drop in September of closed escrow sales."

On an annual basis, the sales rate of existing single-family homes during September would have led to 381,080 houses changing hands this year. That activity rate is 26.5 percent lower than the figure for September 1989.

Sales had increased 1.6 percent in August, following five straight months of declines. The trade group noted that home sales often drop two to 15 percent in most regions between August and September, partly because the start of school limits buyers' willingness to move.

Prices, meanwhile, were off 1.5 percent in September, the sixth straight month of decline, with the median price of a single-family home at $190,350. That figure is 4.2 percent lower than the year-ago median of $198,740. Antt noted that the decline has been driven by an increase in popularity of

less-expensive homes.

The overall California housing market - once the hottest in the nation - has been mired in a year-long slump, with sales off sharply in coastal urban areas like Los Angeles and San Francisco. Prices in those areas soared during a two-year boom that ended last year and left many potential buyers frozen out of those markets.

The California Association of Realtors has already predicted a 14.9 percent slowdown in sales for next year, with the only growth coming in the less expensive inland areas, such as Sacramento, Modesto and Bakersfield.

But the trade group said Thursday that the sharp one-month decline experienced in September will probably not be repeated soon. "The Persian Gulf crisis has caused a one-time jolt to the entire U.S. economy, but the ripple effect of that shock likely will dissipate during the next few months," said Leslie Appleton-Young, an economist with the trade group.

The trade group reported a drop in September sales activity in every region of the state. The smallest declines took place in outlying areas - the Northern California wine country (2.9 percent), the lower desert area around Palm Springs (12.3 percent) and Riverside-San Bernardino (16.4 percent).

The largest declines took place in the Sacramento area (34.8 percent), where sales had been booming earlier this year, and in Santa Barbara (33.2 percent).

Orange County sales fell 17.4 percent, Los Angeles was off 19.7 percent, San Diego plunged 23.3 percent and the San Francisco Bay Area decreased by 23.7 percent.

The report came a day after TRW Real Estate Information Services reported that September housing sales in Southern California plunged 23 percent from August to their lowest monthly rate in nearly three years.

The company said 19,331 homes and condominiums were sold in September in Los Angeles, Orange, Riverside, San Bernardino and San Diego counties. That total was the lowest since January 1988, when 18,913 homes changed hands. The company also said sales may go lower in October because of the economic "turbulence" caused by Iraq's invasion of Kuwait.

#90298u1742 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The Senate Ethics Committee asked the General Accounting Office Thursday to investigate leaks to the media concerning the panel's inquiry into the ''Keating Five'' savings and loan scandal.

In recent weeks there have been a series of news stories about the

investigation, mostly involving Sens. Alan Cranston of California, Donald Riegle of Michigan and Dennis DeConcini of Arizona - all Democrats.

Also, there have been widespread reports that the committee's special lawyer has found no reason for the committee to continue to investigate the other two senators involved in the affair - Sens. John McCain, R- Ariz., and John Glenn, D-Ohio.

The five senators are suspected of giving improper favors to savings and loan executive Charles Keating.

McCain has called for the findings relating to himself to be made available immediately and has complained that Democrats do not want to quickly clear the only Republican involved in the matter.

However, several Democrats have charged that Republicans are engaged in an organized effort to leak stories to the media and make only Democrats look bad.

In a brief statement, the committee - composed of three Democrats and three Republicans - said it appeared that ''some committee-sensitive documents have been disclosed to the press.''

''Some of these press articles have contained a number of inaccuracies, distortions and misstatements. Because some of these disclosures may have come from the committee itself, we concluded that an outside organization would be best able to conduct an independent and impartial inquiry into this matter,'' it said.

The General Accounting Office is the investigative arm of Congress.

-30- 1919

#90298u1748 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Budget negotiators, sensing a "drive toward conclusion," struggled Thursday over final details of a deficit-cutting plan that will raise all taxpayers' gasoline and excise taxes and put new tax burdens on the rich.

"Every American family is going to have to bear part of the sacrifice," said Rep. Leon Panetta, D-Calif., chairman of the House Budget Committee, of the still-incomplete deal.

Negotiators met back and forth across the Capitol, trying to nail down the last elements of the ellusive plan, which House Democrats embraced during a caucus Wednesday and which President Bush on Thursday appeared willing to support.

Asked about the still-unfinished budget deal while jogging on the grounds of

the vice presidential residence in Washington, Bush told reporters he was "feeling good about it."

"The president does believe this budget report is a historic bipartisan agreement," White House press secretary Marlin Fitzwater said. "Although the process has been somewhat tortuous, we can believe there has been solid achievement."

Early Thursday afternoon, Senate Republican leader Bob Dole of Kansas said "at least two dozen issues" remained unresolved, including some spending cuts, "a number of issues on the tax side" and agriculture. Added Sen. Lloyd Bentsen, D-Texas, chairman of the Senate Finance Committee: "We've got a lot of work to do."

Among the matters yet to be settled, Panetta said, were "a huge number" of tax issues, whether to extend some expiring business tax breaks and whether to agree to language in the Senate version of the bill that would grant new tax breaks to encourage oil drilling. "I have a feeling it may be more controversial than some of the other stuff," Panetta said of the oil-drilling breaks.

But, he added, "I sense that there is a drive toward conclusion" of the budget process - a ten-month partisan tug of war that began in January when Bush unveiled his fiscal year 1991 budget plan and included a bipartisan budget summit that produced a package the House roundly rejected earlier this month.

The final deficit-reduction package - cornerstone of Congress's effort to cut the deficit by $500 billion over five years - will include many tax increases with broad impact.

The current nine cents-a-gallon gasoline tax is expected to rise a nickel, the current 16 cents-a-pack cigarette tax will go up by four cents in 1991 and another four cents in 1993 and alcohol taxes will rise by 16 cents per six-pack of beer and about a quarter per bottle of table wine.

Taxes on the wealthy will increase several ways in an effort to make the tax code more progressive and ease the impact on lower- and middle-income taxpayers.

The income tax rate for the wealthiest Americans, now at 28 percent, will rise to 31 percent. At the same time, upper middle income people paying a 33 percent tax rate will see a reduction to 31 percent. In addition, the wealthy will see their tax deductions and their personal exemptions limited.

House Democrats on Wednesday backed away from their push for a surtax on millionaires, in part, some members said, because they felt Democrats had already scored key political points with the tax-the-rich issue, painting Republicans as protectors of the wealthy. Bush and most Republicans bitterly

opposed the surtax.

Assistant House Democratic leader William Gray of Pennsylvania said that under the latest plan, "working-class people, middle-class people do not bear the heaviest burden" of deficit reduction.

-30- 3777

#90298u1782 10/25/1990 ~United Press International

TORONTO (OCT. 25) UPI - A tentative settlement with Chrysler Canada Ltd. heralds a new era in labor relations with the company, the head of the Canadian Auto Workers union said Thursday.

The settlement, which models that reached in earlier talks with the Canadian operations of Ford Motor Co. and General Motors Corp., was reached well in advance of the union's midnight strike deadline.

Union President Bob White called the deal "historic" and said the CAW's bargaining committee voted unanimously to recommend its acceptance by Chrysler's 10,800 autoworkers.

White said everyone at the main table agreed the settlement signalled "a new era of labor relations" between Chrysler and the CAW. Ratification votes are scheduled to take place on Saturday and Sunday.

Ken Francese, Chrylser Canada's vice-president of human resources, said the company was "very proud of what we have accomplished." He acknowledged that the settlement was "rich" but also said it was a competitive agreement.

The three-year deal includes across the board wage increases and cost-of-living allowances that add up to 7.5 percent, 6.7 percent and 4.8 percent salary increases over the course of the contract.

The wages and COLA clauses, plus an annual $425 vacation bonus and three additional holidays a year match the pattern set at Ford after a nine-day strike in September. The pattern was met by GM earlier this month.

The settlement also has other pattern-provisions including a worker security package to deal with plant closings and layoffs due to technological changes. And Chrysler agreed to pay one cent an hour to a union-run social justice fund and a union child care program.

One new wrinkle is the establishment of a joint environmental committee. Its objective will be to develop an environmental policy and program for Chrysler workers, and outline the company's responsibilities.

White said the settlement was historic because the company recognized the differences between its Canadian and U.S. operations. "The argument that was

always made to us was that whatever happens in the United States with Chrysler always had to happen in Canada," White said.

Francese said the Canadian talks were separate and distinct from those in the U.S. and as a result, company negotiators had a lot of autonomy. He said he did not consult Chrysler's chairman Lee Iaccoca.

Chrysler tabled Monday a monetary offer to the union that indicated the company was going to meet the pattern established at Ford and General Motors.

Chrysler Canada employs the CAW members at four assembly plants in Windsor and Brampton, a trim plant in Ajax and a castings facility in Etobicoke - all located in Ontario.

The Windsor assembly plants produce Chrysler's top-selling mini-vans - the Dodge Caravan and Plymouth Voyager MagicWagons - and full-size Dodge Ram vans and wagons.

#90298u1795 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Largely due to increased pumping by Saudi Arabia, the worst of the petroleum shortfall caused by Iraq's invasion of Kuwait is ''definitely behind us,'' an Energy Department expert told Congress Thursday.

Calvin Kent, administrator of the Energy Information Administration, said the invasion by Saddam Hussein's forces on Aug. 2 caused the loss of 4.3 million barrels of oil a day from world markets. But much of that loss is being made up, he said.

''From a supply standpoint, the worst is definitely behind us,'' Kent said, unless fighting begins in the Middle East.

''By the end of the year, the vast majority of that shortfall will have been replaced by increased production here and in other countries,'' Kent said during a hearing by the Senate Governmental Affairs Committee.

''By December, the loss should be only 350 million barrels a day,'' said Kent. ''Well over half of the replacement oil is from Saudi Arabia.''

The dramatic rise in oil prices - and gasoline at the pump - is caused by ''the fear of increased hostilities (in the Middle East),'' Kent said, not by a supply problem.

The vast majority of the Saudi refineries are within 160 nautical miles of ''current (missile) emplacements,'' Kent noted. ''The market is extremely skittish.''

Although the Energy Information Administration is part of the Energy Department, it is an independent statistical agency.

Kent also said petroleum prices are much higher in Europe than in the United States and that price differential makes Europe ''a more attractive market.'' Consequently, imports to the United States are down, Kent said.

Since the invasion of Kuwait, gasoline prices have risen 31.5 percent in the United States, Kent said, compared with 37.5 percent in Japan, 52.8 percent in Germany and 61.3 percent in France.

The prices for home heating oil have followed a similar trend, Kent testified, increasing 40.1 percent in the United States, and rising as much as 74.8 percent in Italy and 79.6 percent in the United Kingdom.

To calculate the percentages, Kent used the period from July 30 - two days before the invasion - through Oct. 8.

Kent said U.S. gasoline inventories were low at the end of August, ''but have been rising and are now about the same level they were at this time last year.'' Supplies should be adequate through the fourth quarter, although there may be higher prices and ''some local supply problems,'' he said.

Sens. John Glenn, D-0hio, and Joseph Lieberman, D-Conn., questioned why gasoline prices have risen so quickly when Kuwait accounted for less than 5 percent of U.S. crude oil consumption.

Charles DiBona, president of the American Petroleum Institute, said oil companies have increased gasoline prices less rapidly than the increases in their prices for crude oil.

The oil companies have acted ''responsibly and certainly have not 'gouged' the American consumer,'' DiBona said.

#90298u1803 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Fat revenue projections from new taxes on cigarettes, alcohol and gasoline could backfire if people on fixed or limited incomes smoke and drive less and forgo the extra six-pack, observers said Thursday.

It is widely believed the pending budget package's ''sin-tax'' hikes, which are expected to generate an estimated $15.1 billion over five years, would hit low-income people the hardest because they have less disposable income.

''By raising those excise taxes, it's certainly going to cause hardship for folks on limited income, those in low-paying jobs and people making the

minimum wage,'' said Robert McAlpine of the National Urban League.

''But they simply might not be able to afford these things with their limited funds. From a health point of view, it could have a very positive effect. The increases might limit folks' ability to buy that extra pack of cigarettes or an extra six-pack (of beer),'' McAlpine said.

The cigarette tax, now at 16 cents a pack, may go up 4 cents in 1991 and another 4 cents in 1993. The tax on beer could double from 16 cents a six-pack to 32 cents.

The table wine tax could go up 25 cents a bottle, while hard liquor tax, now at $12.50 per proof gallon, could go up by about $1 to $1.20 a gallon, or about 20-25 cents a fifth. And the gax tax, now at 9 cents a gallon, could go up a nickel.

According to a study released by the U.S. Chamber of Commerce, families with annual household incomes of less than $35,000 would bear the greatest burden of excise tax increases.

Rep. Steny Hoyer, D-Md., chairman of the House Democratic caucus, speculated that the higher excise taxes could backfire to some extent.

''The theory of sin taxes is that people will continue to buy the items (generating more revenue for the government). Or it could have a salutory side effect of cutting down cigarette smoking and use of alcoholic beverages,'' Hoyer said.

Rep. Leon Panetta, D-Calif., chairman of the House Budget Committee, agreed the poor will feel the bite of the excise tax hikes.

''That's where they're going to be hit,'' he said.

But low-income families probably will get some help from the government for child care expenses, if all goes according to plan.

The Senate and White House have agreed to fold a child care measure into the budget package and the House has all but signed on to that idea.

''I think it would almost certainly be part of reconciliation,'' Rep. Thomas Downey, D-N.Y., said, noting details still need to be worked out.

''It's been a four-year battle and I'm extremely satisfied with the result,'' said Sen. Christopher Dodd, D-Conn., chief Senate drafter of the legislation. ''This is the first time ever that child care as a policy will be adopted into law. This is an unprecedented step.''

The elderly, most on a fixed income, would be hit by the budget deal through

Medicare cuts, which are expected to save approximately $42 billion over five years. These cuts would be achieved by reducing payments to hospitals and doctors and raising beneficiaries' premiums from the present $28.60 a month to an anticipated $46.50 in 1995. Also, the annual deductable for doctor services may rise from $75 to $100.

''There's no question that older Americans are willing to make a financial contribution to deficit reduction. Our polls show the elderly don't want to leave a legacy of debt to their children and grandchildren,'' said Peggy Laramie, spokeswoman for the American Association of Retired Persons.

Rep. Sherwood Boelhert, R-N.Y., said Medicare beneficiaries have no choice but to bite the bullet and accept the hikes or face the demise of the health insurance program.

''I'm getting an awful lot of calls against any proposal that affects Medicare in a negative way. But what I point out to them is that we're protecting Social Security and its cost of living increases. And the primary objective should be to preserve the integrity of the Medicare program. And this plan does that,'' he said.

''So we're looking out for the elderly,'' Boelhert said.

#90298u1838 10/25/1990 ~United Press International

NEW YORK (OCT. 25) UPI - The judge in the second Central Park jogger rape trial refused Thursday to let one of the two defendants replace his white attorney with a black activist lawyer.

Justice Thomas Galligan turned down the request of Kevin Richardson, 16, saying he would not delay the trial by replacing attorney Howard Diller with C. Vernon Mason.

''As far as the court is concerned, you are the attroney for the defendant and you will continue as attorney for the defendant,'' Galligan told Diller.

Diller told the judge that Richardson's family is refusing to cooperate with him to help in the youth's defense.

''It would be unfair to this defendant to proceed further in the trial because of the family's refusal to cooperate because they have another attorney,'' he argued.

The lawyer for Richardson said he may try to bring up the issue again when the trial resumes at 9:30 a.m. Friday.

Richardson's mother, Grace Cuffee, broke down in tears outside the courtroom when she learned of the judge's refusal to replace Diller, whom she fired because she was not pleased with his defense.

Her daughter, Angela Cuffee, told reporters: ''We don't have anything to say except that C. Vernon Mason is our lawyer and Howard Diller is not.''

Meanwhile the trial continued in State Supreme Court, Manhattan, with testimony from detective Eric Reynolds, one of the arresting officers on the night of April 19, 1989, when a group of young men went ''wilding'' in Central Park and raped a woman investment banker who was jogging there.

If Mason had been allowed to step into the case to replace Diller, the defense team would have been made up of two lawyers who are under investigation by legal disciplinary committees.

The committee in the First Department of State Supreme Court in Manhattan is investigating Mason's role as an advisor to Tawana Brawley. The black teenager claimed she was raped by six white men, but a state grand jury later determined her story was a hoax.

The committee in the Second Department of State Supreme Court in Brooklyn is looking into the actions of the lawyer for Richardson's co- defendant, Kharey Wise, 18.

The attorney, Colin Moore, is being investigated for his role in the black boycott of a Korean grocery. He is accused of knowing for months that his client had identified the wrong man as her assailant but witholding the information.

The prosecution plans to oppose the change in lawyers, possibly arguing that Mason has a conflict of interest because he is handling the appeal of another youth convicted in the gang rape, Antron McCray, 16, said Colleen Roche, a spokeswoman for Manhattan District Attorney Robert Morgenthau.

In their videotaped confessions, McCray implicates Richardson in the rape and Richardson implicates McCray.

Altogether, six youths were indicted in the ''wilding'' rampage. Three of them were convicted last summer of raping and beating the woman jogger and

assaulting two male joggers. The three - McCray, Yusef Salaam, 16, and Raymond Santana, 16 - were sentenced to 5 to 10 years in a juvenile jail.

The final youth, Steve Lopez, 16, is slated to be tried alone next year.

(OCT. 25) UPI - The first major snowfall of the season dumped up to 8 inches on the central Appalachian Mountains Thursday and cold air invaded the nation's midsection, threatening to push temperatures below freezing as far south as Alabama.

Showers and thunderstorms continued over the Carolinas, Tennessee and Virginia. Rain also was scattered over New York, Ohio and Oregon.

Afternoon thunderstorms pelted Locust, N.C. with 1-inch diameter hail and smaller hail peppered Concord and Lumberton, N.C., the National Weather Service said.

A flood warning was posted over south-central North Carolina. Heavy rain at Charlotte and much of Mecklenburg County flooded several highways, authorities said.

Snow closed the Clingman Dome Road near Newfound Gap in the Smoky Mountains of Tennessee, the NWS said. Eight inches of snow fell at Mitchell, N.C.

High temperatures reached only the 40s across much of the Midwest Thursday and the weather service warned residents to brace for an even colder night. Frost warnings were posted for Michigan, Ohio, Indiana and Kentucky. Forecasters said nightime temperatures could dip below freezing as far south as northern Alabama.

Powerful winds buffeted the northern Rockies and the northern Pacific Coast. Gusts reached 56 mph at Seaside, Ore., and 47 mph at Bellingham, Wash. Advisories for gusts to 60 mph were posted for the upper Yellowstone Valley of Montana.

OAKLAND, Calif. (OCT. 25) UPI - The Golden State Warriors announced Thursday they had signed unrestricted free agent Steve Johnson to a one-year contract.

Johnson, a 6-10 center, was the seventh player taken in the 1981 NBA draft by the then Kansas City Kings, but never lived up to his billing. His best year was with Portland in 1986-87 when he averaged 16.8 points and 7.2 rebounds a contest.

He earned All-Star honors in 1988, but has spent most of his nine years in the league as a journeyman. Last year, Johnson was released by Minnesota and played only sparingly for the Seattle SuperSonics.

WEST CALDWELL, N.J. (OCT. 25) UPI - Workers may grouse about having to put on a suit and tie to go to the office, but given a choice of casual dress, most would keep things the way they are, a survey said Thursday.

More than a third (36 percent) of office workers think it's ''very important'' to have a dress code, and another 32 percent say it's ''fairly important.'' Only 14 percent say it's ''not important at all,'' the national survey said.

The survey, conducted by the Gallup Organization for the Ricoh Corp., a manufacturer of office equipment and machines, found that managers and other executives were most concerned with dress codes while professional workers are least concerned.

By a small margin, women have stronger feelings in favor of dress codes. About 39 percent of women consider dress codes ''very imprtant'', compared with 34 percent of men.

The study, conducted among 500 office workers in May and June this year, also found that workers professing satisfaction with their jobs were more likely to

believe that a dress code is important.

And Easterners think dress is more important than Westerners (74 percent versus 55 percent).

#90298u1931 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The Hubble Space Telescope will photograph a huge storm on Saturn in early November, NASA announced Thursday.

The storm is called the ''Great White Spot'' or ''Wilber Spot'' after amateur astronomer Steuart Wilber of Las Cruces, N.M., who discovered it on Sept. 24.

By Oct. 1, the storm measured more than 10,000 miles across - larger than Earth - and had grown another 2,000 miles less than one day later, officials said.

The spot is now more than 50,000 miles in diameter, covering much of one hemisphere of Saturn and making it larger than the famous ''Great Red Spot'' on Jupiter.

Within the last few weeks, the spot has become more complex, with new spots being spotted in the main spot and two separate white, round spots having formed, NASA said.

''One side of the main spot seems darkened, as if the Wilber Spot is a raised feature casting a shadow,'' a NASA statement said.

The spot also seems ''almost fluorescent'' in appearance, according to Dan Green of the International Astronomical Union's Central Bureau for Astronomical Telegrams in Cambridge, Mass.

The $1.5 billion Hubble telescope's wide field planetary camera will record several images of the spot each day for three days, NASA said, to help scientists learn more about it.

#90298u1948 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - The U.S. attorney's Office urged a federal judge Thursday to sentence Mayor Marion Barry to the maximum one year in prison for his conviction on a misdemeanor drug possession charge.

U.S. Attorney Jay Stephens, in a scathing, 19-page motion filed a day before Barry's sentencing, said the mayor should be given the stiffest sentence possible because of his ''brazen disregard'' for the law.

Stephens said Barry's conduct hampered drug enforcement in the city and had a ''devastating effect'' on the youth of a city with a heavy drug burden and the nation's highest homicide rate, most of the slayings related to narcotics trafficking.

''The defendant is not genuinely remorseful about his criminality,'' Stephens wrote. ''He is sorry only that he got caught.''

The brief accused the three-term mayor of obstructing justice by lying to a grand jury about drug use, and it urged U.S. District Judge Thomas Penfield Jackson to render the maximum sentence of one year in prison. Barry also could be fined $100,000.

Barry's ''failure to express any true remorse for his underlying criminal conduct, his activities designed to obstruct the investigation of those criminal activities, and his abuse of public trust ... mandate that his offense level be established at a level 10. This would allow the court to impose a sentence of incarceration of up to the statutory maximum,'' the brief said.

Stephens said that only by imposing a ''substantial sentence'' on Barry could the city ''convince international officials that we are serious about eradicating the demand for drugs, so much so that when a key lieutenant in our war on drugs crosses over to the other side, a harsh penalty will be imposed.''

Barry's sentencing Friday comes 2 1/2 months after a jury convicted him on a single count of drug possession, acquitted him on another and deadlocked on 12 other counts.

The mayor's lawyer, R. Kenneth Mundy, is expected to argue that Barry should not be sent to prison because he is a first-time drug offender.

Under federal guidelines, sentences for first offenders for drug possession typically range from probation to six months in prison. Barry's chances of getting a prison term apparently are enhanced based on the government brief and a pre-sentencing report given to Jackson by the U.S. Probation Office.

The government's brief and the pre-sentencing report urged Jackson to exercise his option of giving a more severe sentence to Barry because of his failure to accept responsibility for his offense.

Barry tried to ''unnerve'' witnesses testifying against him, ''cavalierly compromised'' the integrity of his police body guards and ''besmirched the dignity'' of the office of mayor, Stephens wrote.

Paul Martin, a spokesman for the U.S. Sentencing Commission, said Thursday that if Jackson agrees Barry obstructed justice ''there will be some confinement.''

If Barry is given jail time, or ordered to spend nights or weekends at a halfway house, he would not have to resign as mayor because he was convicted of a misdemeanor. Under city law, he also could still run for the at-large City Council seat in the Nov. 6 elections.

Barry, whose 12 years as mayor comes to an end Jan. 2, would have been forced to step down only if jailed after a felony conviction.

Stephens said because Barry was the ''highest-ranking municipal official in the nation's capital, it is near impossible to overstate the gravity of his conduct.''

Stephens charged that while Barry was convicted only for a single act of cocaine possession, it was only one of ''hundreds of illegal drug transactions in which he was involved.''

''(Barry's) drug activity reduced his anti-drug message - 'Down with dope, up with hope!' - to 'Do as I say, not as I do,''' said Stephens.

#90298u1992 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Secretary of State James Baker is expected to travel to Saudi Arabia within the next 10 days to secure Saudi permission for a military strike against Iraq if that option is deemed necessary, sources said Thursday.

Diplomatic sources said the latest decision is a strong signal to Iraq that the United States is deadly serious about its stand that Saddam Hussein must unconditionally withdraw his troops from Kuwait.

Prince Bandar Bin Sultan, the Saudi ambassador to the United States, met with Undersecretary of State for Political Affairs Robert Kimmitt and the State Department's top expert on counter-terrorism, Morris Busbie.

As he left, Bandar said: ''The question of war and peace is in the hands of Saddam Hussein.''

Baker is expected to make a major Persian Gulf policy speech in Los Angeles on Monday and U.S. and other officials said the intended impression will be that hopes for a negotiated solution are shrinking and the chances for a military solution is growing.

In another move, Secretary of Defense Dick Cheney confirmed that the present U.S. force in Saudi Arabia, now standing at 210,000, may be increased soon by another 100,000 troops.

Baker's schedule is not complete, but the trip is expected to start during the first weekend of November.

The inclusion of Busbie in the Bandar meeting suggested, as Busbie said in an interview last week, that President Bush ''is deadly serious'' about any attack on the United States or its Arab allies.

The United States is concerned that terrorist attacks could be launched against Western or Arab nations allied against Iraq's invasion of its tiny oil-rich neighbor on Aug. 2.

The Speaker of the Egyptian Parliament was killed by terrorists who have been associated with Iraq, but no direct link has been made to Saddam.

NEW YORK (OCT. 25) UPI - The Federal Reserve Board said Thursday that the basic U.S. money supply, known as M1, fell $2.7 billion in the latest reporting week, while the broader monetary aggregate, M2, decreased by $1.6 billion and the broadest measure of all, M3, slipped by $2.0 billion.

M1, including cash, checking accounts and NOW accounts - money available for immediate spending - slipped to a seasonally adjusted average of $819.5 billion in the week ended Oct. 15, from a revised $822.2 billion the week before.

Over the past 13 weeks, M1 averaged $817.9 billion, up 5.1 percent from where it stood over the previous 13-week period, the central bank said.

The more broadly defined M2 averaged an estimated $3,323.6 billion in the latest week, off from a revised $3,325.2 billion. M2 includes M1 plus passbook savings, small time deposits such as money market deposit accounts, consumer money market mutual funds and other short-term assets.

M3, defined as M2 plus large time deposits, institutional money- market funds and securities repurchase agreements longer than one day at banks and thrifts, averaged $4,090.4 billion in the latest week, down from a revised $4,092.4 billion, the Fed said.

#90298u2060 10/25/1990 ~United Press International

CARACAS, Venezuela (OCT. 25) UPI - The government will increase oil production with its own resources without adding more debt or by associating

with multinational companies, the head of state oil company said Thursday.

Andres Sosa Pietri, president of the state-owned oil company, said the increased production was part of a plan formulated after the Iraq invasion of Kuwait that led to a shortfall.

But projections of lower oil prices that will result from the end of the conflict have prompted the company to plan for a production increase using its own financial resources, he said.

''Venezuela and the other members of the Organization of Petroleum Exporting Countries do not control prices in the oil market,'' he said.

''Basides, we know that there will be a severe drop in prices at the end of the Persian Gulf conflict, for which all the Venezuelan planning is based on lower prices.''

Venezuela has announced plans to increase its oil production from 2.8 million barrels a day to 4 million in the next five years at a cost of more than $10 billion.

Its present production is some 2.1 million barrels a day that is being slowly increased to 2.6 million by the end of the year.

#90298u2067 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Middle-income Americans face a relatively modest increase in their overall taxes under the budget plan coalescing in Congress, squeezed mainly by higher levies for gasoline and other consumer goods.

Tax payments by those earning between $30,000 and $100,000 a year - comprising the largest segment of the population - will generally rise 2 percent or less, according to preliminary figures compiled by the House Ways and Means Committee.

By comparison, those earning $200,000 or more annually face an overall tax hike of 6.4 percent, accounting for $8.4 billion of the $18.5 billion in increased tax revenue the deficit-reduction package is expected to generate.

''Middle income people fair pretty well under this plan and for once can take some satisfaction that the rich are taking a harder hit,'' said Bruce Fischer, research director for Citizens for Tax Justice.

''No matter how you judge it ... it is eminently progressive,'' said Rep. William Gray, D-Pa., the third-ranking Democratic leader in the House.

Compared with the budget plan endorsed by President Bush Sept. 30 following

the budget summit at Andrews Air Force Base, the plan taking shape on Capitol Hill Thursday appears far less onerous for the middle class, Fischer said.

In particular, the earlier plan relied more heavily on higher gasoline taxes - an increase of 12 cents a gallon compared to the 5 cents a gallon now contemplated by Congress.

Although the proposed gasoline tax hike is smaller, it still poses a burden for the middle class, along with increases in taxes on alcoholic beverages, cigarettes, airline tickets, and to a lesser extent, luxury items such as furs and jewelry, Fischer said.

Additionally, middle-income elderly will be pinched by cutbacks in Medicare as they are required to pay higher premiums with higher deductibles.

The proposal to set the maximum tax rate for capital gains at 28 percent - down from 33 percent - will have ''virtually no effect'' on middle income earners, Fischer said. ''Middle-income people don't have capital gains.''

At the upper end of the middle-income scale, taxpayers will be hit by new limits on itemized deductions and by the increase in the amount of income subject to the 1.45 percent payroll tax for Medicare, said Norman Ture, president of the Institutte for Research on Economics of Taxation.

Based on the House Ways and Means Committee figures, those earning $30,000 to $40,000 a year and those making $40,000 to $50,000 would see a net tax increase of 2 percent under the new plan. Those earning $50, 000 to $75,000 would pay 1.5 percent more and those earning between $75, 000 and $100,000 would pay 2.2 percent more.

At the same time, the percentage of the nation's overall tax burden that each income group shoulders would remain virtually unchanged, the figures show.

Citizens for Tax Justice, calculating the effect differently, figured overall annual tax payments by a family of four would rise $141 on yearly income of $27,400; $158 on income of $39,200; $174 on income $54, 000 and $190 on income of $81,600.

#90298u2081 10/25/1990 ~United Press International

STANFORD, CA (OCT. 25) UPI - A woman donated a portion of her lung to her terminally ill daughter in what may be the first operation of its kind Thursday.

Dr. Vaughn A. Starnes, head of Stanford University Medical Center's heart-lung transplant program, said the 46-year-old woman gave about one-third of her right lung to her dying 12-year-old daughter.

Both mother and daughter, who requested anonymity, were in good condition after the operation.

The girl was given tissue from her mother rather than from an unrelated brain-dead donor - as is more common - ''with the hope of lessening the high rate of intense life-threatening rejection children have encountered in transplants involving the lungs,'' Starnes said.

The four-hour transplant operation was conducted after the girl's right lung was removed because she suffers from a rare condition called bronchopulmonary dysplasia.

Symptoms of the disease include scarring and high blood pressure of the lungs and is common among premature infants supported for long periods by a respirator.

''The (donated) lobe is expected to function as an entire lung,'' said Starnes an assistant professor of cardiovascular surgery at the medical center.

He said kidneys and parts of livers have been transplanted from living donors, but he was unaware of any other case in which a portion of a lung had been removed from a living donor for transplant.

Both mother and daughter are expected to resume normal lives within a few months. Without the surgery, the girl would have died within 18 months, Starnes said.

He said he was unsure why children reject transplants at double the rate of adults, ''although it might have something to do with their more active immune systems.''

''The mother was a far closer tissue match than could have been expected from an unrelated donor,'' Starnes said.

The pair matched on four of six factors of compatibility. In a total of 88 heart and lung operations and 14 lung transplants at Stanford since 1981, no more than two factors have matched between donor and patient, he said.

Although both of the girl's lungs were damaged, Starnes said the single transplant would allow her to live a normal, healthy life.

#90298u2106 10/25/1990 ~United Press International

CHICAGO (OCT. 25) UPI - The former president of a suburban savings and loan pleaded guilty Thursday to charges of misappropriation of bank funds and conspiracy in a fraud scheme that led to the collapse of two federally insured

thrifts.

The guilty plea by John Franklin Rosch, former Glen Ellyn Savings and Loan president, came on the fourth day of his trial in U.S. District Court. Rosch, 52, had pleaded innocent but changed his plea on the advice of his lawyer, Rick Halprin.

''I advised him bank officers can much more easily fall prey to the judgments that put them in violation of criminal law,'' Halprin said. ''You don't have to have evil intent. You just have to break the rules (of safe lending) and have it come out badly.''

Rosch could face up to 24 years in prison. Sentencing was scheduled for Dec. 14.

Six defendants indicted with Rosch for taking part in the fraud scheme entered guilty pleas earlier and one of them - attorney Michael Pietrzak - testified as a prosecution witness Wednesday.

Assistant U.S. Attorney Steve Miller said the seven defendants concocted a complex scheme that made Glen Ellyn Savings the center of a network of illicit loans to finance risky investments.

When the investments went belly up and the borrowers defaulted, Glen Ellyn Savings collapsed and was taken over by federal regulators in 1985. The collapse, in turn, led to the failure of First Savings and Loan of South Beloit, Ill.

At the center of the sceme was James Reagin, who controlled McRea Inc., a Dallas real estate investestment firm that provided investment services and advice, primarily to Dallas area dentists.

But McRea was in debt to a long list of thrifts - and found itself borrowing money from one thrift to pay off another.

Prosecutors said Reagin decided the best way to gain access to ready cash was to own a thrift. But Miller said that, because of his track record at McRea Reagin feared he would never win the regulatory approval needed to make such a purchase.

So he paid $1 million for the right to buy Glen Ellyn Savings and to arrange for the stock to be held by associates.

The scheme did not draw regulatory attention until Glen Ellyn Savings went bust - losing $15 million - and a routine examination revealed the network of loans to Reagin and associates.

Prosecutors said that, between July 1984 and September 1985, Rosch authorized

loans totaling more than $20 million to Reagin and his associates. All were highly speculative, ranging from $1.3 million for a horse farm to $9.6 million for a Florida marina that was never completed.

Most of the loans were never repaid.

Reagin, 58, of Houston, has pleaded guilty to six criminal counts - including participating in a scheme to artificially inflate the value of some Ocala, Fla., property,

He also has pleaded guilty to conspiracy and fraud charges in an unrelated case involving a $60 million loan obtained from Western Savings Association of Dallas, which also failed and was taken over by federal regulators.

#90298u2141 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Five years ago, Congress gambled - successfully, by most accounts - that larger exports would pull agriculture out of its worst slump in 50 years. The new farm policy bill, sent Thursday to President Bush, represents a new wager.

This time, Congress is betting that giving farmers more freedom to decide which crops to grow will make up for a smaller government safety net. The farm bill is the vehicle for a projected 25 percent cut in farm subsidies, a part of the spending cuts required to control the federal deficit.

''These cuts will be painful for our farmers. But we made every effort to share the pain fairly,'' said Senate Agriculture Committee Chairman Patrick Leahy, D-Vt., who told colleagues the bill would be ''one of the most important environmental laws'' this year.

By 60-36 vote late Thursday, the Senate gave final congressional approval to the farm bill.

Bush was expected to sign the legislation, which sets the terms for farm supports, food aid, export promotion, agricultural research and public feeding programs for the next five years.

It proposes significant steps to preserve wetlands and protect water supplies from contamination by farm chemicals, along with creating the first-ever nationwide rules on what can be called organic food.

In writing the farm bill, lawmakers reluctantly embraced the so- called triple base plan. It would make 15 percent of the wheat, feed grain, cotton and rice land ineligible for subsidies but would allow farmers to grow crops on the land.

Farm-state congressmen took the precaution of making triple base and other spending cuts contingent on passage of a budget bill. If it passes, farm spending would drop to about $40.8 billion over five years. It would revert to $54 billion if there is no budget agreement.

In either case, crop target prices, a key factor in calculating subsidy payments, would be frozen at this year's level. Loan rates would rise slightly.

Proponents said the farm bill was the best that could be expected in difficult times. Critics loudly said it was not good enough. Sen. Tom Daschle, D-S.D., called it ''terribly unfair ... a slow economic death sentence for the nation's small farmers.''

Sen. Kent Conrad, D-N.D., said lower government spending would translate directly into lower farm income.

''The fact is, American farmers will determine their income,'' responded Sen. Richard Lugar, R-Ind., arguing triple base ''can be looked at as an opportunity'' to experiment with new crops.

Triple base would be accompanied by a 10 percent ''planting flexibility'' program. It has similar rules as triple base but would be voluntary.

Farmers generally have expressed pleasure with the 1985 farm law - the most expensive farm bill ever at $78 billion - but complained restrictive rules lock them into growing the same crop year after year. That has been cited as one reason why soybean acreage has dropped despite booming world demand.

The 1985 law aimed at gaining a larger share of the world market while protecting farm income. Exports have zoomed to $40 billion in fiscal 1990. Net cash farm income, $36.8 billion in 1984, is forecast for a record $60 billion this year.

Sen. Charles Grassley, R-Iowa, said the farm bill would give farmers some cropping freedom but worried ''their safety net is removed.''

One of the few crop initiatives to survive in the bill was a proposal to create a marketing loan for soybeans and other oilseeds, although the $5.02 a bushel rate for soybeans is far lower rate than first proposed.

Triple base is an untested idea but congressmen preferred it to any further cuts in target prices, which are down 10 percent since 1985. Agriculture Department studies foresee fairly modest shifts under triple base considering 20 million to 25 million acres could be covered each year.

Corn acreage is projected to drop slightly, soybean and cotton acreage to rise somewhat and wheat to be stable. Soybean acreage was most likely to increase in the Midwest and to decline in the South, where yields are lower.

Critics say triple base will have little value to farmers who live where the climate allows few crop choices - wheat in the Great Plains, for instance.

Farm organizations complained about the huge cuts assigned to agriculture but said the farm bill probably was the best choice possible.

The 1985 farm policy law was a milestone as the first to link environmental and farm program goals. It required farmers to practice soil conservation to be eligible for crop supports.

The new farm bill would strengthen the rules against converting wetlands to crop land and require farmers and other pesticide users to keep records on applications of restricted-use pesticides.

To protect water purity, there would be a wetlands reserve of up to 1 million acres, created through purchase of conservation easements, and a water quality incentive program of up to 10 million acres. It would defray the cost to farmers for changing their practices to protect sensitive land.

Environmentalists hope the water quality program will lead to changes in land management that persist long after the final payment.

Budget pressures forced lawmakers to drop the idea of a $5 billion expansion in the food stamp program.

#90298u2186 10/25/1990 ~United Press International

WASHINGTON (OCT. 25) UPI - Here are key provisions of the farm policy bill passed by Congress, which would freeze subsidy rates, reduce the number of acres eligible for subsidies, expand environmental protections and renew public food programs:

Crop flexibility

As part of spending cuts, allows ''triple base'' plan, which would reduce by 15 percent the wheat, feed grains, cotton and rice acreage eligible for support payments. Farmers could plant wheat, feed grains, cotton, rice, oilseeds such as soybeans and, except for fruits and vegetables, crops not covered by the farm program. Crops grown on triple base are eligible for government loans.

A voluntary 10 percent ''planting flexibility'' program would be offered. Rules on allowable crops are similar to triple base but limits may be applied on soybean planting.

Target prices

Frozen at this year's levels: $4 a bushel for wheat, $2.75 for corn, $2.36 for barley, $1.45 for oats, 72.9 cents a pound for cotton and $10.71 per 100 pounds of rice.

Loan rates

Calls for a slight increase in wheat and feed grain loan rates by changing the formula to calculate rates on the basis of 85 percent of the average price in the past 5 years. The Agriculture Department could reduce the rate by up to 20 percent.

Creates a marketing loan for soybeans and other oilseeds with rates for minor oilseeds, such as sunflowers, canola, flax and safflower, to be proportional to the $5.02-a-bushel rate for soybeans.

Cotton and rice marketing loans are retained with minimum rate of 50 cents a pound for cotton and $6.50 per 100 pounds of rice. A maximum reduction of 5 percent a year would be allowed.

Dairy

Sets the support price at a minimum of $10.10 per 100 pounds of milk, the current rate. The Agriculture Department will report by Aug. 1 on ways to control production if burdensome surpluses develop. If Congress does not act by Jan. 1, 1992, and surpluses are projected to exceed 7 billion pounds, the government can assess fee to cover cost of buying surpluses above the 7 billion-pound level.

As part of the budget cuts, a fee of 5 cents per 100 pounds of milk would be collected, increasing to 11 cents in 1992. The assessment can be refunded if a farmer has not increased production from the preceding year.

Sugar

The support price would be frozen at 18 cents a pound for raw sugar. The measure would guarantee imports of at least 1.25 million tons of foreign sugar with marketing quotas on domestic cane and beet sugar if necessary.

As part of the spending cuts, a 1 percent fee would be charged on loans.

Other commodities

The measure would reauthorize peanut, honey, wool and mohair support programs. As part of the spending cuts, there would be a 2 percent loan origination fee and a 1 percent service fee on peanut, honey and tobacco loans; 1 percent would be deducted from wool and mohair payments.

Payment limits

The measure would reduces to $250,000 the maximum amount farmers can receive in farm payments, either directly or through affiliated businesses. The limit now effectively is $500,000. The measure would continue the $50,000 limit on crop subsidy payments and sets a new limit of $75,000 on money from marketing loans, loan deficiency payments and the so-called Findley payments made when market prices are particularly low.

Payments under honey, wool and mohair programs would be racheted down from $200,000 in 1991 to $125,000 by 1994.

Public nutrition

The measure would reauthorizes the food stamp program but simplify rules and impose additional penalties for fraud and misuse of food stamp coupons. It would try to expand the program by $5 billion in honor of the late Rep. Mickey Leland, D-Texas, a provision that had been dropped due to lack of funding.

The Temporary Emergency Food Assistance Program and Commodity Supplemental Food Program also would be reauthorized for five years.

Conservation

The measure would expand the list of federal benefits that can be lost by farmers who violate the so-called conservation compliance rule, which requires farmers to control erosion, or who violate ''sodbuster'' rule by putting fragile lands into crop production.

It would strengthen ''swampbuster'' rules against converting wetlands to crop production by making it easier to catch violations, but it also would create graduated fines ranging from $750 to $10,000 for accidental violations. Allows farmers to eliminate ''nuisance'' spots if they restore wetland of at least the same size.

The measure would extend the Conservation Reserve Program, the largest long-term land retirement program ever, with enrollment to total at least 40 million acres and maximum of 45 million acres. Enrollment can include highly erodible land, shelterbelts, windbreaks, marginal pasture land planted to trees and environmentally sensitive land.

#90298u2196 10/25/1990 ~United Press International

(OCT. 25) UPI - The White House held a kiss-and-make-up photo session with Republican leaders today to make light of divisions caused by the budget mess. President Bush characterized the budget as ''just one matter'' on the agenda before next month's elections. Assistant House Republican leader Newt

Gingrich... who opposed the president's flip-flop on raising taxes... said there's a lot more at stake than what he called ''one 15- minute vote.''

Czechoslovakia took a major step toward a market economy today, but NOT everyone is happy with it. Under a new law approved by Parliament, thousands of state-owned shops and small businesses will be auctioned off. The businesses are expected to be sold for a fraction of their value. Shopworkers staged walkouts in an unsuccessful demand for the right of first bid to buy their shops.

Fire officials in Lincoln, Nebraska, say they will let a fire in a huge pile of tires burn itself out. Arson is suspected in the blaze first spotted this morning. Firefighters are using heavy equipment to move some of the 50-thousand to 100-thousand tires away from the fire. The county health department director says letting the fire burn consumes more toxins and reduces the health dangers of the smoke.

A Continental Airlines jetliner made a safe landing at Orlando, Florida, today... after it blew a tire on take-off from Fort Myers. A Continental spokesman says the landing was ''uneventful.'' The Boeing 737 was bound for Newark, New Jersey, when it blew a tire on take-off from the Southwest Florida Regional Airport at Fort Myers. It was immediately diverted to Orlando. Officials say the tire was one of two on the right landing gear.

Testimony today in Scotland indicates that officials received a tip prior to the December 1988 bombing of Pan Am Flight 103 but turned their attention to the wrong aircraft. A former Heathrow Airport security officer says he was put on alert to clear a Pan Am flight that left London seven hours before Flight 103.

#90298u2205 10/25/1990 ~United Press International

LOS ANGELES (OCT. 25) UPI - Diaper maker Dandees Enterprises, which has claimed that its diapers are biodegradable, announced Thursday it will remove the term from its packaging by the year's end.

The Los Angeles company, the second Southern California diaper maker to do so, said it was taking the action in response to a state law going into effect next year restricting use of the term ''biodegradable'' to products that decompose within one year through natural biological processes.

Dandees went public with a $3 million offering late last year and began selling its ''biodegradable'' diapers earlier this year.

''We strongly believe that our product is environmentally beneficial and, based on documented test data, has the capacity to break down in three to five years in an active landfill,'' said Donald A. Lazar, Dandees' president.

''But, we do not presently have available to us the necessary verification to establish that our diapers are biodegradable within the new statutory definition and will therefore modify our labeling appropriately,'' Lazar said.

The move comes a week after American Enviro of Placentia was forced to drop the claim that its ''Bunnies'' diapers were biodegradable.

American Enviro also launched a new line of diapers that are made with a cotton core, rather than wood pulp, thus saving trees from being cut.

Disposable diapers represent about 2 percent of the nation's solid waste per year, with 18 billion tossed out annually.

The major disposable diaper companies - Kimberly-Clark Corp. (Huggies) and Proctor & Gamble Co. (Pampers and Luvs) - have claimed that the diapers can't degrade because most landfills are covered.

The two companies, which have about 80 percent of the $3-billion-plus disposable diaper business, point out that they are producing less bulky diapers and looking for ways to cut the impact of diapers on the waste system.

#90298u2408 10/25/1990 ~United Press International

(OCT. 25) UPI - Budget negotiators are meeting on Capitol Hill... trying to nail down the last elements of a new compromise plan that has the support of House Democrats and, apparently, of President Bush. Senate Republican leader Robert Dole says ''at least two dozen issues'' are still UNresolved... including some spending cuts and tax items. But House Budget Committee Chairman Leon Panetta says he feels there is a ''drive toward conclusion'' of the budget process.

Congress is pushing to finish its work so it can adjourn for the year sometime during the weekend. The main roadblock to adjournment is the budget agreement... but that pact reportedly is nearly wrapped up, with a vote expected in the House tomorrow. Other major items still to be acted on are the clean air bill... the housing and farm bills... and possibly an anti-crime package and a child-care bill.

As many as 100-thousand additional troops might be sent to Saudi Arabia. Defense Secretary Cheney says ''it's conceivable'' the increase might be that large. He also says troops being withdrawn from Western Europe might be among the additional forces sent to the Persian Gulf. It's believed the increase is sought by U-S military officials so they would have the power to attack, if necessary.

NATO is making a major strategic change by allowing its forces to be quickly

moved from one command to another. Last spring, the Western military alliance said it would put troops from several countries under a common command. Today's announcement by a top NATO general in Brussels, Belgium, is meant to make up for smaller forces with increased flexibility to defuse any crisis.

A worldwide conference of scientists is debating whether the bald eagle is merely threatened rather than endangered. Eagle populations have doubled or tripled in some areas since 1980. This has led the U-S Fish and Wildlife Service to believe the bird should be taken off the endangered list. But some at the conference of the Raptor Research Foundation in Allentown, Pennsylvania say it's premature to reclassify the birds.

Researchers say a giant galaxy at the heart of a distant cluster of galaxies may be the largest such object in the known universe. Researchers measured the light surrounding the galaxy, and say the huge group of stars has a diameter of six-Million light years. That's 60 times wider than Earth's Milky Way galaxy. The distant galaxy is one-BILLION light years from Earth.

The U-S Border Patrol made its biggest cocaine seizure ever today. Border guards seized almost 44-hundred pounds of cocaine near Nogales, Arizona... but only after a fiery gun battle with smugglers in a caravan of about 40 horses. Authorities say NO one was injured and the smugglers fled into Mexico. Federal agents estimate the value of the cocaine at nearly 200-Million dollars.

Author Salman Rushdie says he never meant to offend the Moslem world with his book ''The Satanic Verses.'' In a television interview, Rushdie denied accusations his book calls the wives of Moslem prophets ''whores.'' The Indian-born author has been in hiding in London under guard by Scotland Yard since Iran's Ayatollah Khomeini put a death sentence on his head because of his book.

#90298u2542 10/25/1990 ~United Press International

(OCT. 25) UPI - New taxes on cigarettes, alcohol and gasoline are projected to produce revenues of some 15-BILLION dollars. But observers say the proposed new taxes could backfire and cause people on fixed or limited incomes to cut down on their smoking, drinking and driving. In that case, the revenues likely would be less than projected. The so-called ''sin tax'' hikes are part of the proposed federal budget package, and are expected to hit low-income people the hardest.

The worst of the petroleum shortfall caused by Iraq's invasion of Kuwait apparently is over. Energy Department expert Calvin Kent told a Senate panel today that the worst of the crisis is ''definitely behind us''... unless fighting begins in the Middle East. He says much of the oil production lost because of the Iraqi invasion is being made up by increased production in the United States and other countries. More than half the extra oil is from Saudi

Arabia.

Israel's Labor Party is urging Israel to receive a low-ranking U-N delegation ''to prevent a clash with the United States.'' The United States last night joined a U-N Security Council resolution that condemned Israel for refusing a U-N investigation into the killing of at least 20 Palestinians in Jerusalem earlier this month. The Israeli government expressed disappointment at the U-S vote.

Opening statements were presented today in Dallas in the trial of indicted savings-and-loan king Don Dixon. Federal prosecutors say Dixon squeezed bank officers and borrowers to pay for prostitutes and a two- Million-dollar ''party and sex'' beach home in California. Defense attorneys say Dixon, owner of the failed Vernon Savings and Loan, did what he had to do to survive. Dixon is accused of concealing payments to politicians and prostitutes.

A senior African National Congress official has accused Israel of beginning to emulate Adolf Hitler in a ''campaign of terror'' against the occupied territories. Steve Tshwete... a member of the A-N-C's policy-making National Executive Committee... made the group's strongest attack yet on Israel at a pro-Palestinian meeting in Johannesburg last night.

14 more people were killed today in clashes between Hindus and Moslems in India, raising the death toll in two days of violence to 68. The violence erupted yesterday during a nation-wide strike called by the right-wing Bharatiya Janata Party. The strike was a protest against the arrest of B-J-P's president. That arrest prompted B-J-P to withdraw its parliamentary support for the coalition government... throwing the government into a political crisis.

Hungary's top court has outlawed the death penalty. The Constitutional Court ruled in Budapest last night that life ''is a fundamental and inalienable right.'' More than 300 people were executed in Hungary following the failed 1956 uprising. Most Hungarian newspapers welcomed the decision... but some questioned its timing during a sharp increase in violent crime.

A news survey indicates young adults are concerned about the pressure placed on working U-S women. The Time magazine poll of 505 men and women between 18 and 24 reported that 82 percent say it is ''very difficult'' or ''somewhat difficult'' for women to have a career, marriage and children. Almost half the men say they would be interested in staying home and raising their children if they could.

#90298u2734 10/25/1990 ~United Press International

(OCT. 25) UPI - Diplomatic sources report Secretary of State Baker will travel to Saudi Arabia in the next 10 days to arrange Saudi approval for a

possible military offensive against Iraq. Says the Saudi ambassador in Washington- ''The question of war and peace is in the hands of Saddam Hussein.''

A member of the Lebanese cabinet says Syria and Iran are discussing the release of 12 foreign hostages in Beirut. The Shiite Moslem politician with ties to Syria says ''there has been great progress toward resolving'' the crisis.

House Budget Committee Chairman Leon Panetta says ''every American family is going to have to bear part of the sacrifice'' as Congress completes a new budget plan. The deficit-reduction program now under consideration calls for new gas and excise taxes and higher taxes for the rich.

The Senate this evening passed a new farm bill leading to a projected 25-percent cut in subsidies... sending the legislation on to President Bush, who's expected to sign it. Vermont Democrat Patrick Leahy called the farm cuts ''painful.''

Officials in Northern Ireland say they have linked six suspects to yesterday's Irish Republican Army bombings. The blasts left six soldiers and one civilian dead and 21 people wounded.

Residents of a black township outside Cape Town clashed with police for a second straight day. A member of the South African Parliament accused police of ''shocking behavior'' and ''indiscriminate shooting,'' leaving a total of seven people dead in two days.

The Salvadoran army claims to have killed five rebels in a raid on a guerrilla training base 15 miles east of San Salvador. 15 rebels were wounded and one government soldier was killed in the skirmish.

The Asian republic of Kazakhstan has become the 14th of 15 Soviet republics to declare at least partial independence from Moscow. In Moldavia, the government is massing security forces in an attempt to put down a secession movement by a Turkish minority.

The U-S attorney's office in Washington, D-C, is arguing for a maximum sentence of one year in jail for disgraced Mayor Marion Barry. Barry will be sentenced tomorrow for his one conviction on misdemeanor drug possession.

Scientists are fighting against an anti-drug campaign in Houston. They say helium balloons distributed in the campaign could eventually drift into the ocean and be devoured by endangered sea turtles mistaking them for jellyfish. The balloons could kill the turtles by blocking their digestive systems.

The city of Philadelphia is withdrawing Japanese-made Crown condoms from an AIDS-prevention program. The city gave out 30-thousand condoms since beginning

the program in April, but received complaints about them being defective.

An official for Japan's Okamoto Industries says the people who complained- in his words- ''probably didn't know how to properly use the condoms.''

Dallas city officials have ordered fig leaves placed on a series of three-foot-tall sculptures of female nudes on exhibit at the City Hall. The artist calls the censorship ''silly and kind of sad.''

#90299b0003 10/26/1990 ~Business Wire

BOULDER, CO (OCT. 26) BUSINESS WIRE - Paul D. Whittle, president of AMERICAN EDUCATIONAL PRODUCTS INC., (NASDAQ:AMEP), Friday announced the results of third quarter operations ended Sept. 30, 1990.

AMERICAN EDUCATIONAL PRODUCTS INC. has once again achieved record sales and profits for the third quarter ended Sept. 30, 1990. Sales for the three months ending Sept. 30, 1990, were $1,232,291 up 22 percent from the $1,006,471 reported for the third quarter of 1989. After-tax earnings for the third quarter of 1990 were $127,639, or $.061 per share, as compared to the $121,283, or $.066 per share reported for the same period in 1989.

The after-tax profits for the first nine months of 1990 were $312,296, or 15 cents per share, based on sales of $3,261,237 an increase of 35 percent from the 1989 nine month profits of $231,565, or $.127 per share on sales of $2,675,156.

On Sept. 17, 1990, the company completed a year-long effort to sign an agreement to purchase 30-year-old Hubbard Scientific Inc., a leading supplier of educational science materials. The company's planned acquisition of Hubbard Scientific Inc., is scheduled to close in the fourth quarter of 1990. The closing date is dependant on the company's investment bankers, Boettcher and Co., securing the necessary financing commitments.

This move reinforces the company's corporate commitment to continued growth and expansion through internal development and the acquisition of companies in the educational industry that afford product compatibility and potential new markets as well as strong sales and profitability. Plans for the future include a strengthening of the already existing dealer relationships, a focussed product development program, revision of existing product where necessary and increased coverage of Hubbard products in the company's Summit Learning Science catalog.

American Educational Products Inc. is a NASDAQ listed firm (AMEP) that specializes in the design, manufacture and distribution of educational mathematics and earth science/geology products to the nation's school systems.

-30- 1084
#90299b0012 10/26/1990 ~Business Wire
COLUMBUS, IND. (OCT. 26) BUSINESS WIRE -

Cummins Engine Co. Inc., Friday reported a third-quarter net loss of $33.7 million, or $2.55 per common share, on net sales of $829.8 million during the quarter which ended Sept. 30.

In the third quarter of 1989, Cummins reported a net loss of $39.7 million, or $4.12 per common share, on net sales of $807.3 million.

Cummins said third-quarter results were adversely affected by several factors, including accelerated decline in demand for North American heavy-duty truck engines, softening of related markets for components and replacement parts, and reduced sales of generator sets.

The company also made an addition of $18.2 million to the accrual for extended product coverage programs. While corrective product changes have been implemented successfully, this addition covers the anticipated costs to repair products previously sold under these programs.

These factors were partially offset by a $22.1 million extraordinary gain realized on the company's repurchase of a portion of its outstanding debt.

In response to depressed demand in its major market, heavy-duty trucks, Cummins is reducing expense items and capital spending from planned levels. Additional recent measures to cut costs have included voluntary unpaid leave by hourly employees, salary and wage decreases, and reduction of engine assembly to one shift at Cummins' headquarters facilities in Columbus.

The company also has reduced its salaried and hourly work force in all business groups by more than 300 employees worldwide, and expects to make further reductions in coming months. The company announced today that it will reduce its production work force in the Columbus area by approximately 210 employees, including layoff of approximately 175 on Nov. 4 and voluntary unpaid leave for approximately 35 others.

Cummins now has in service more than 1,000 1991 model heavy-duty truck engines which meet new federal emissions regulations effective Jan. 1, 1991. These products are being well-accepted in the marketplace. While demand for heavy-duty engines has declined, sales of the company's B and C Series engines have continued to increase and their margins have continued to improve.

Cummins, headquartered in Columbus, is a major producer of diesel engines, components and power systems for trucks and industrial equipment.

LAFAYETTE, COLO. (OCT. 26) BUSINESS WIRE - Aspen Ribbons Inc. (NASDAQ:ARIB) announced Friday earnings of $100,395, or 3 cents per share, on revenues of $4,585,806 for its fiscal quarter ended Sept. 30, 1990.

Earnings last year were $339,875, or 9 cents per share, on revenues of $4,958,957 for the same quarter.

These results are consistent with an announcement on the company made on Sept. 17, 1990, when President Peter C. Williams cited increased competition as the primary reason for lower revenue.

''Exciting opportunities are presenting themselves for our toner line for page printers which we see as our highest growth area,'' said Williams. ''We also have 15 new ribbon products scheduled for introduction before the end of the year.''

Aspen Ribbons is a leading designer, manufacturer and marketer of ribbon cartridges and laser printer cartridges for the computer printer industry.

MOUNTLAKE TERRACE, WASH. (OCT. 26) BUSINESS WIRE - Sea Galley Stores Inc. (SEAG) Friday announced results for the 12-week period ended Sept. 9, 1990, and its plans to dispose of its Ranch & Home subsidiary.

Twenty operating units produced third quarter sales of $7,964,000 and incurred a net loss of $1,968,000, or 63 cents per share. Such loss resulted primarily from a $1,050,000 provision for the write down of assets in connection with the sale of two Ranch & Home stores, a $418,000 operating loss and a $250,000 provision for severance payments.

For comparison, the third quarter 1989 net loss was $576,000, or 19 cents per share, on sales of $13,066,000 generated by 38 operating units. Same-store sales decreased 3.6 percent in the third quarter over last year's third quarter.

Pursuant to its plan, on Oct. 3, 1990, Sea Galley sold two of the three Ranch & Home retail outlets for approximately $750,000 in cash, $500,000 in a short-term note and $800,000 in debt cancellation. Kim A. Krieg, president and chief executive officer, said, ''The sale of the Ranch & Home stores was completed as part of our strategy to streamline our management functions and to refocus our efforts on Sea Galley's core restaurant business. Proceeds from the sale will be redeployed to achieve improved financial results in our restaurant operations.''

In connection with its plan to dispose of its Ranch & Home subsidiary and to reduce its corporate overhead, Sea Galley reported that Steven B. Dowen, president of the Ranch & Home subsidiary, and David A. Mahnke, executive vice president and chief operating officer of Sea Galley, have resigned from their officer and director positions with the company. The company negotiated severance arrangements with both Dowen and Mahnke in connection with their departures.

''We are satisfied with the progress on corporate, general and administrative expense reductions. Our primary focus is on increasing revenues through the development of our new menu and employee training programs. The opportunity we have to improve guest satisfaction is exciting as we begin testing our new menu,'' Krieg added.

TUSTIN, CA (OCT. 26) BUSINESS WIRE - UPSONIC Friday introduced a new family of Uninterruptible Power Supplies for protecting micro and mini computers, LANS and file servers, telecommunications equipment and other sensitive electronic equipment.

The UPS 1000 series is a cousin to UPSONIC's popular PC Might family, offering higher power with longer backup protection and wider applications.

The UL listed UPS 1000 family consists of seven sinewave models with output ratings from 200 to 1,500VA. At full load, these off-line systems provide eight to 15 minutes of battery backup operation.

This powerful UPS series features: constant transient and noise protection, Pulse Width Modulation (PWM) sinewave output, visual and audible indication of battery backup operation, automatic internal battery charger and self-contained maintenance-free batteries.

All models include: front panel indicators that signal the presence of AC input power, operation in backup mode and reversed polarity at the AC input source. The rear panels include: an input circuit breaker for overload protection, computer interface connector, voltage range switch and output receptacles.

Models 200, 300, 800 and 1500 are ideally suited for protecting micro and mini computers, LANs and file servers, and telecommunications equipment.

Models 600 and 1250 tower models are specifically designed for Novell NetWare file servers, NCR tower, DEC Micro VAX II and Prime 2350/2450 systems.

The Slim 1000 model, which fits between the computer and monitor, protects IBM PC, XT, AT and compatibles along with IBM PS/2 Models 25, 39, 50 and 60.

List prices range from $408 to $1,214 and all models are available for immediate delivery.

UPSONIC's Uninterruptible Power Supplies are currently protecting over a quarter-million computer systems. UPSONIC supplies complete uninterruptible power supply systems in a wide range of power ratings for mini and micro computers, telecommunications and sensitive electronic instrumentation.

#90299b0026 10/26/1990 ~Business Wire

SAN DIEGO (OCT. 26) BUSINESS WIRE - Hardy Instruments Friday introduced the first weight controller that continuously and accurately records and displays units of weight, regardless of how strong the vibration or motion frequency to which the machinery is subject.

The HI 2151/20WC with unique WAVERSAVER circuitry uses the latest electronic microprocessors to update 20 weight readings per second and displays the results incrementally with a resolution of 1:1,000,000. The WAVERSAVER circuitry screens out the vibration through a highly innovative system that utilizes a 20-bit A-to-D converter with selectable cutoff frequencies.

Hardy's new weight controller is ideal for the process industry because of its flexibility in virtually every segment of process control. Regardless of what it measures, elements such as food ingredients, dry chemicals and pharmaceutical mixtures, soap or ceramic mixtures, etc., need or encounter vibration in moving the materials into the production process.

Hardy's HI 2151/20WC with WAVERSAVER capability has eliminated the inaccuracies of weighing under these strong vibrational conditions.

In spite of the vibration in the process being controlled, the ease of use, repeatable accuracy and data interchangeability are the prime features in the functioning of the HI 2151/20WC. Setup and calibration are done through the front panel keys. The front panel bezel is NEMA 4.

As additional data backup, all calibration data and certain operational parameters are stored in a non-volatile Secure Memory Module, which is interchangeable with off-the-shelf units. This interchangeability allows for the temporary replacement of a unit in a system within :20 minutes, eliminating the need for immediate calibration.

Hardy Instruments, a subsidiary of Dynamic Instruments Inc., has been a leader in the industrial weighing field for more than 70 years and is known for its innovative approaches to precision instrumentation in the industrial weighing field.

BROOMFIELD, CO (OCT. 26) BUSINESS WIRE - Hathaway Corp. Friday announced earnings of $900,000, or 21 cents per share, for its first quarter ended Sept. 30, 1990, as compared to a net loss from continuing operations of $246,000, or six cents per share, and a net loss of $344,000, or eight cents per share, for the first quarter of last year. Revenues for the first quarter were $11,333,000 compared with $11,701,000 last year.

Included in this year's first quarter results are a gain from the sale of the credit and accounts receivable management software system sold to Walker Interactive Systems of San Francisco by Global Software Inc. a wholly owned subsidiary of Hathaway. The product line sold for $6,575,000 and had revenues of approximately $5,700,000 for last fiscal year.

During the first quarter, the company also restructured certain of its operations and reevaluated certain of its software product lines and asset lives resulting in a write-down during the quarter.

The combination of the sale and write-down resulted in a net pretax gain of $1,919,000. Such pretax gain offset a pretax loss from other operations for the quarter of $748,000.

E. E. Prince, chairman, president and chief executive officer, said: "The decrease in revenues for the quarter is the result of revenue decreases experienced by the Systems Segment and the Software Segment, primarily reflecting the sale of the product line, partially offset by a 25 percent increase in the Motion Control Segment."

HATHAWAY CORP. FINANCIAL SUMMARY

For Three Months Ended	9/30/90	9/30/89

SAN MATEO, CA (OCT. 26) BUSINESS WIRE - Bay View Capital Corp., (NASDAQ:BVFS) holding company for Bay View Federal Bank, announced Friday that it is commencing a stock repurchase program to acquire up to 350,000 shares, or approximately 5.1 percent, of the corporations' outstanding common stock.

The program is expected to be completed within 12 months, subject to market conditions.

In making this announcement, Robert E. Barnes, president and chief executive officer, stated: ''In view of the current market value of our common stock, combined with the corporation's strong financial condition, we consider the stock to be an attractive investment.''

According to Barnes, the repurchases generally would be effected from time to time through open market purchases, although he did not rule out the possibility of unsolicited negotiated transactions or other types of repurchases.

Bay View Federal Bank exceeds all regulatory capital requirements applicable to savings institutions and will continue to exceed those requirements after completion of the stock repurchase program.

On Oct. 25, Bay View Capital Corp. announced that earnings for the third quarter of 1990 were $5.0 million (74 cents per share) compared with $3.9 million (64 cents per share) for the third quarter of 1989. Earnings for the nine months ended Sept. 30 were $14.9 million ($2.36 per share) compared with $11.8 million ($1.93 per share) for the comparable period in 1989.

Bay View Federal Bank, headquartered in San Mateo, Calif., is the sole

subsidiary of Bay View Capital Corp. Bay View Federal Bank has 21 branch offices and 3 loan production offices serving principally the San Francisco Bay Area.

BEVERLY HILLS, CALIF (OCT. 26) BUSINESS WIRE - Lufthansa German Airlines is the fourth international air carrier to select Litton's new LTN-101 FLAGSHIP laser gyro navigation system for its future fleet of Airbus A340 jetliners.

Lufthansa is scheduled to take delivery of the first of 15 LTN-101-equipped A340s in 1992, and has options to purchase 15 more of the new, four-engine aircraft.

Earlier, Sabena World Airlines of Belgium, UTA French Airlines and Air France had selected the Litton system for the A340 aircraft they have on order. Each aircraft installation will include three LTN-101 systems provided by Litton's Aero Products division, Moorpark, Calif.

''The FLAGSHIP system is 60 percent smaller than comparable equipment, resulting in lighter weight and lower power consumption,'' said Theodore Sprink, vice president of business development at Litton's Aero Products division. ''It has been designed for more than twice the reliability of similar systems.''

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

#90299b0067 10/26/1990 ~Business Wire

SALT LAKE CITY (OCT. 26) BUSINESS WIRE - Gull Laboratories Inc. (NASDAQ:GULL) a leading manufacturer and marketer of high-quality medical diagnostics, Friday released forecasted results for the nine-months ended Sept. 30, 1990, and for the year-end.

While Gull expects record revenues of over $4 million for the nine months, the company anticipates a loss of approximately $100,000, or 2 cents per share, as a result of start-up costs associated with the internal funding of expanded business operations.

Dr. Myron Wentz, president and chairman of the board, stated, ''Gull took major steps to position itself for enhanced future growth by establishing three new operations, a health products packaging facility, a medical devices development group and a natural medicines manufacturing facility.

''These operations will position the company to expand from its presendt $50 million diagnostics market into healthcare markets of $1.2 billion. In order to take advantage of selected market opportunities, Gull increased expenditures by $1 million over the last nine months.''

These expenditures funded the development of a new product line of diagnostic test kits, the acquisition of state-of-the-art equipment for the health products packaging facility and additional manufacturing equipment at the natural medicines facility. The medical devices operation plans to begin marketing the first of its products in November of this year.

The natural medicines and medical packaging facilities are presently experiencing sales and are expected to start contributing to corporate profits by early in the first quarter of 1991.

Wentz further stated that the costs of expansion are expected to continue into the fourth quarter, resulting in a year-end loss of approximately $140,000, or 3 cents per share. ''I anticipate reaching record year-end sales of approximately $5.5 million and seeing results from our expansion efforts by the end of the year. I look forward to 1991 as being the beginning of an exciting new era for Gull Laboratories.''

Gull Laboratories Inc. develops, manufactures and markets high-quality diagnostic test kits for the detection of infectious diseases. The company markets these products to hospitals and clinical laboratories around the world.

SALT LAKE CITY (OCT. 26) BUSINESS WIRE - Broadcast International (NASDAQ:BRIN) Friday announced its results of operations for the third quarter and for the nine months ended Sept. 30, 1990.

Revenues for the three months ended Sept. 30, 1990, increased 168 percent to $4,314,000 as compared to $1,611,000 for the same period in 1989. Net earnings for the third quarter rose 135 percent to $422,000, or 10 cents per share, as compared to $182,000, or 4 cents per share, for the same period in 1989.

For the nine months ended Sept. 30, 1990, revenues were approximately $10,576,000 as compared to $4,657,000 for the same period in 1989. Net income was approximately $754,000 or 17 cents per share, as compared with earnings of $687,000, or 16 cents per share, for the same period in 1989.

The increase in revenues in 1990 includes revenues realized by the company's subsidiary, Market Information Corp., which was acquired in April 1990, and from increased customer satellite and third-party installation services.

The company also announced that because of unfavorable market conditions, it plans to delay its previously announced, underwritten securities offering of common stock until the conclusion of its proposed merger with CheckRite International Inc., which is presently expected to occur in December 1990. The company will continue to monitor market conditions in determining when or whether to proceed with the offering.

Broadcast International, headquartered in Salt Lake City, provides satellite-delivered business information and network services (including background music, point-of-purchase advertising and high-speed data transmission), satellite installation and maintenance services and video conferencing services. Its customers include leading retailers and wholesalers.

Broadcast International is a publicly held company whose stock is traded on NASDAQ under the symbol BRIN.

BOSTON (OCT. 26) BUSINESS WIRE - Campeau Massachusetts Inc. (CMI) Friday filed for bankruptcy under Chapter 11 of the U.S. Bankruptcy Code.

The filing was made in Cincinnati, home of CMI's parent corporation, Federated Stores Inc. (FSI).

''By this filing, we seek to ensure that the Lafayette Place shopping center in downtown Boston remains open for the benefit of shoppers, Lafayette Place tenants, the independent Lafayette Hotel, the surrounding neighborhood and the city of Boston. Under Chapter 11, we also seek to assure vendors and suppliers they will be paid for all services and supplies provided in the coming months. All leases and store operations will continue, and we hope to accelerate our ongoing program of opening new retailers and food service establishments,'' said Joseph Millett, vice president and general manager of Lafayette Place.

Four new stores and restaurants have opened at Lafayette Place since the summer and two more are expected to open in October and November.

HUNTSVILLE, ALA (OCT. 26) BUSINESS WIRE - TRW's Systems Engineering and Development division has been awarded a $17.9 million contract, including options, to assess the survivability of key elements in the Army's Phase 1 Strategic Defense System.

TRW is providing survivability documentation traceability and developing a methodology for survivability verification and validation.

Awarded by the U.S. Army Strategic Defense Command in Huntsville, the three-year contract has two one-year options. Much of the work will be performed at TRW's Huntsville Operations with support from TRW personnel in the Los Angeles area.

TRW has provided survivability technology for a number of government agencies, including the Defense Nuclear Agency, the Air Force Weapons Laboratory, the Army's Harry Diamond Laboratories, and the Naval Research Laboratory.

As part of the Strategic Defense Initiative (SDI), TRW has evaluated the effects and lethality of lasers, particle beams, kinetic energy weapons and microwaves and been involved in such SDI-related programs as the SDI Architecture Study and Lethality-4. For the Lethality-4 program, the company developed a methodology that has become the Defense Nuclear Agency's standard for assessing the lethality of most SDI weapons.

TRW's Systems Engineering and Development division is being supported by subcontractors SPARTA in Huntsville and S-CUBED, La Jolla, Calif.

The division, located in Carson, Calif., is part of TRW Systems Integration Group, an operating unit of TRW's California-based Space & Defense Sector. The group, headed by John P. Stenbit, vice president and general manager, has headquarters in Fairfax County, Virginia, and performs systems engineering services and systems integrations and develops and installs strategic and

tactical command and control systems, information processing systems and security systems for federal government agencies, industry contractors and international customers.

Cleveland-based TRW is an international company that provides high-technology products and services to the space and defense, automotive and information systems markets. The company's 1989 sales totaled more than $7 billion.

BEVERLY HILLS, CA (OCT. 26) BUSINESS WIRE - International Cablecasting Technologies Inc. (NASDAQ:TUNE), announced Friday that effective immediately, William E. Johnson, Dean A. Gilbert and Kent Burkhart have been elected to its board of directors.

Johnson is the chief executive officer of Scientific-Atlanta Inc. (S-A), a leading manufacturer of cable television electronics and satellite-based communication networks, and the manufacturer of the company's cable digital audio tuner. He is a graduate of Yale University and the Harvard Business School where he was a Baker Scholar.

Prior to joining S-A, Johnson had his own consulting firm, William E. Johnson Associates, which specialized in major strategic redirections and turnarounds. The firm's clients included GE, GTE, Hoffman La Roche, Allied Chemical, American Standard, the American Stock Exchange and S-A.

Gilbert is the vice president of marketing and programming for KBLCOM Inc., a multiple system cable operator representing nearly 1 million subscribers throughout the United States and a charter affiliate of the company.

Prior to joining KBLCOM, he was the vice president -- marketing and public affairs for Paragon Communications, a joint venture between Time, Inc. and Houston Industries; vice president -- corporate marketing for TKR Cable Co., a joint venture between Knight-Ridder and TCI and; he held various marketing management positions with Continental Cablevision.

Burkhart is the chairman of Burkhart/Douglas & Associates (B/D & A). B/D & A provides consulting services in administration, programming, marketing, merchandising for radio stations and is considered to be the premiere company in the development of new music formats in the U.S. radio industry.

In addition, Burkhart is the president and director of Degree Communications, which owns radio stations in Austin, Texas and Greenville-Spartanburg, S.C. B/D & A is the exclusive programmer for ICT's premium digital audio service, Digital Music Express (''DMX'')

The company also announced that the board of directors granted incentive stock options in the amount of 50,000 share options each to Johnson and Gilbert. The stock option price has been set at Thursday's closing market price of $2.125 and are exercisable for a period of two years, expiring on Oct. 25, 1992.

#90299b0173 10/26/1990 ~Business Wire
SEATTLE (OCT. 26) BUSINESS WIRE - Alaska Airlines announced Friday that it is reducing its management staffing in the face of high fuel costs and a weakening economy.

The reductions affect 85 positions, including the jobs of 46 employees and 39 unfilled posts. The Seattle-based carrier employs 6,500 people, 980 of whom are management employees. The decrease in staff, effective November 9, is expected to save the company more than $3.3 million per year.

''Unfortunately, dramatic increases in jet fuel prices triggered this action '' said Ray Vecci, president and chief executive officer of the airline. Vecci said the reductions come on the heels of a comprehensive review of all management programs, functions and activities. The reductions have been tailored to trim expenses without affecting customer service, he said. No further reductions are anticipated.

Over the past two months the airline has taken steps to increase revenues and cut costs. Examples include recent fare hikes and an array of fuel conservation measures.

The following letter was sent by Ray Vecci, president and chief executive officer earlier today to all Alaska Airlines employees:

#90299b0178 10/26/1990 ~Business Wire
SPOKANE, Wash. (OCT. 26) BUSINESS WIRE - Pegasus Gold Inc. (ASE; TSE: PGU) Friday announced third quarter earnings of $3.5 million, or 14 cents per share compared to net income of $3.3 million, or 14 cents per share, in the corresponding quarter of 1989.

For the nine months, net income was $6.3 million, or 26 cents per share, compared to $7.8 million, or 33 cents per share, in 1989. Year to date results in 1990 and 1989 included write-offs, associated costs, and interest income of $1.8 and $3.0 million, respectively, relating to the company's investment in Pioneer Metals with a charge having taken place in the third quarter of 1989 of $3.8 million.

Revenues for the latest quarter amounted to $48.3 million as opposed to $59.2 million in the third quarter of 1989. A decline in revenue of $2.5 million

was attributable to the lower gold price received of $408 per ounce as compared to $418 in the preceding year. However, most of the difference was attributable to lower gold production that was down by 22,900 ounces from last year. For the nine months, production levels were 15,700 ounces lower than in 1989 as increases in tons mined did not fully offset a reduction in ore grades and the timing of recoveries. In addition, Relief Canyon has reached the end of its mine life.

John M. Willson, president and chief executive officer of Pegasus, commented that: ''Even at current gold prices, the outlook for the company is extremely positive with future production gains coming from Black Pine, Ortiz, and the expansion of our present facilities at Zortman.''

Pegasus Gold Inc. is a major North American gold producer that currently produces 340,000 ounces of gold from six mines in the western United States. The company also produces significant quantities of silver, lead and zinc. Pegasus Gold common shares are traded on the American Stock Exchange and the Toronto Stock Exchange under the symbol PGU. Options on the company's common shares are traded on the Chicago Board Options Exchange and the Montreal Stock Exchange.

CLEVELAND (OCT. 26) BUSINESS WIRE - TRW Inc. Friday announced it is restructuring its automotive segment as part of an ongoing effort to improve basic operating capabilities, total quality and operating profits.

The changes are effective immediately, said Joseph T. Gorman, chairman and chief executive officer.

''These key changes underscore our determination to improve performance in our automotive businesses,'' said Gorman. ''They will help TRW be more competitive in the face of difficult global markets.''

Under the new structure, the TRW automotive sector as a management organization and level is discontinued. Automotive business units are reorganized into three major groups reporting directly to Gorman.

The intended results of the changes, Gorman said, include: more efficient and effective decision-making processes; less bureaucratic burden; better communication; far more focus on cost-effective value-added; fewer layers of management, both line and staff; and reduced staffs with more clearly defined roles.

The company's occupant restraint systems unit and its controls and fasteners

group are combined into TRW Occupant Restraints and Controls Group, with Adolf Mueller as its vice president and general manager. Mueller had held that position for the controls and fasteners group.

The steering systems and commercial steering businesses are combined into TRW Steering Systems Group. Chester O. Macey, formerly vice president and general manager of the steering systems group, will head the new organization. James S. Remick, formerly vice president of the commercial steering group, will be the new group's vice president and deputy general manager.

The engine components and aftermarket businesses are combined into TRW Engine and Aftermarket Group, with George L. Schneider as vice president and general manager. He previously served as vice president and general manager of the engine components group.

Jerry K. Myers, executive vice president and general manager of the automotive sector, has announced he will consider opportunities outside TRW. Charles L. Miller, executive vice president and general manager of occupant restraint systems, will pursue his previously stated plans to retire in 1991.

''I want to thank Chuck and Jerry in the strongest possible terms for their many and significant contributions to TRW,'' Gorman said. Both will continue to report to Gorman and will work with the new group heads to facilitate the transition.

TRW provides advanced technology products and services for the automotive, space and defense and information markets. The company's 1989 sales totaled $7.34 billion. TRW's automotive sales accounted for about 47 percent of total TRW sales in 1989.

SANTA ANA, CA (OCT. 26) BUSINESS WIRE - Metropolitan Circuits Inc. (ASE:MPB) announced that it has retained Kenneth Cleveland Associates Inc. (KCA) to assist the company in its continuing efforts to streamline operations and restructure financially.

Kenneth C. Cleveland will devote full time to financial and management assistance of the company. Paul G. McNamera will continue as acting president. Albert E. Puhlman, former president, resigned to begin an independent sales representative business. Pulman remains a director of the company.

Under KCA's previous agreement with the company, Cleveland and McNamera would

have been entitled to purchase 1.5 million shares of the company's stock and assume management of the company had they been able to obtain the needed financing for the company. That agreement has expired.

Metropolitan Circuits designs, manufactures and markets sophisticated circuit boards.

KANSAS CITY, MO (OCT. 29) BUSINESS WIRE - US Sprint will provide exchange students from the Soviet Union with the opportunity to see and hear their families on the other side of the globe via the Sprint Meeting Channel(sm).

The videoconference, which will be the first public teleconference between the United States and the Soviet Union, will take place in the United States at 8 a.m., Sunday, Oct. 28, in Milwaukee, at 152 W. Wisconsin Ave.

Ten Soviet exchange students hosted by the Walden School and its Russian exchange program will be linked to their families in Moscow via US Sprint's Meeting Channel. US Sprint offered to provide the videoconference to help publicize Walden School's effort to help raise funds to send American students to the Soviet Union in March 1991.

''We are pleased to play a role in helping bring the Soviet students and their families together for this historic event,'' said Ron LeMay, president and chief operating officer for US Sprint. ''We expect this to be the first of many public videoconferences between our nation and the Soviets. Sprint is proud to be associated with this exchange program and will use technology such as the Meeting Channel to help bring people together.''

US Sprint's Meeting Channel is the world's largest, most sophisticated videoconferencing network, reaching more than 725 locations in 26 countries. The videoconferencing service to Moscow is part of a Sprint initiative to improve communications to and from the Soviet Union, and is offered in conjunction with the USSR Ministry of Communications.

Sprint has also formed a joint venture company, Sprint Networks USSR, that will soon offer modern, high-speed data communications services and products to businesses and organizations in the Soviet Union.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services over the nation's only all-digital, fiber-optic network.

BATON ROUGE, LA (OCT. 26) BUSINESS WIRE - Gulf States Utilities Co. has asked that Mar. 1 be set as the implementation date for a $29.9 million revenue increase in Louisiana.

In Friday's filing with the Louisiana Public Service Commission, GSU noted that the request is for the fourth step of the court-ordered Louisiana phase-in plan for the River Bend nuclear power plant.

Company officials said the filing includes updated cost allocation and expense information and contemplates a fifth-step increase of $12.9 million in 1992. The latest request is based on a 13 percent return on common equity.

This past February, the LPSC granted GSU a third-step increase of $28 million, based on a 12.79 percent return on common equity. The commission also implemented a deregulated asset plan for disallowed River Bend costs, in accordance with an October 1989 ruling by a Louisiana district court.

Since updated cost allocation and expense information filed by GSU in the third-step case was not considered in the February decision, the commission had provided for only one more step increase of about $19.6 million in 1991, officials said.

#90299b0251 10/26/1990 ~Business Wire
GRANDVIEW, MO (OCT. 28) BUSINESS WIRE - North American Savings Bank has reached an agreement in principle to purchase the four-branch Kansas City area operations of United Postal Savings, both associations jointly announced Friday.

The agreement is subject to approval of the Office of Thrift Supervision and the State of Missouri.

The agreement calls for the transfer of approximately $83 million in deposits.

''The agreement was sought by both associations,'' said Michael R. Hoefer, president of North American Savings Bank. ''For North American it provides a means to increase our presence in our home market, the greater Kansas City area, virtually overnight.''

''The agreement is equally attractive to United Postal,'' said association President Robert Gorman, ''because it will help us increase profitability and concentrate our efforts and resources on our operations in the St. Louis area.''

United Postal, with assets of approximately $1.4 billion, serves the St. Louis market through 22 branch offices.

North American Savings Bank currently operates nine branches in the Kansas City and northwest Missouri areas and has approximately $390 million in assets.

The bank's stock is traded on the NASDAQ over-the-counter exchange under the symbol NASB.

#90299b0293 10/26/1990 ~Business Wire
LOS ANGELES, Calif. (OCT. 26) BUSINESS WIRE - Security Environmental Systems

Inc. (NASDAQ:SENV) recently reported record sales for the year ending June 30, 1990, of $4,227,645 as compared to gross revenues of $3,183,266 for fiscal 1989.

SES also reported net income of $22,427, or three-tenths of a cent per share for fiscal 1990. The weighted average number of common shares outstanding for fiscal 1990 was 8,882,677 as compared to 8,732,677 for fiscal 1989.

The company treated as fourth quarter expenses over $300,000 of non-recurring legal fees and costs associated with settling outstanding litigation with Son Waste Inc. and with seeking an order of abatement to operate its incinerator in Long Beach, Calif., and over $500,000 of non-recurring fees incurred with respect to investment banking services and costs associated with negotiating and obtaining extensions to its lease on, and option to purchase, the property upon which SES conducts its day-to-day waste hauling and bio-medical waste sterilization operations in Vernon, Calif. (''Vernon Property'').

SES, in early July 1990, reached an agreement in principal to settle its litigation with Son Waste Inc., regarding the company's quest to build the first liquid hazardous waste incinerator in the state of California.

Pursuant to the terms of the agreement, Son Waste Inc. will participate in approximately 20 percent of the net proceeds generated by a future sale of the Vernon Property, if acquired by SES, at a price greater than $5 million and in approximately 20 percent of the net proceeds generated by a sale of the hazardous waste incinerator project.

Final terms of the agreement are currently being negotiated by the company. The company is also currently seeking financing to purchase the Vernon Property.

Stephen Grossman, president of Security Environmental Systems Inc., indicated that ''1990 was a very significant year for us, both in terms of new business activity in our new waste hauling business and in our core medical waste treatment business, as well as our progress in overcoming almost all of the permitting barriers remaining in our attempts to build the first liquid hazardous waste incineration facility in California.''

He noted that a significant portion of the company's expenses, both for fiscal 1990 and 1989, resulted from litigation and land acquisition costs related to the Vernon liquid hazardous waste facility.

Security Environmental Systems Inc., is a 19-year old company that sterilizes bio-medical wastes generated throughout California and hauls hazardous waste throughout the western and southern states.

Once adequate provision has been made to secure the Vernon Property, the land upon which the liquid hazardous waste incinerator will be built by its

subsidiary, California Thermal Treatment Services, SES plans to enter the liquid hazardous waste treatment arena.

The liquid hazardous waste project, which was originally proposed in 1984, has received all necessary construction permits from state and federal regulatory agencies.

The company is currently waiting for rulings from the California court of appeals with respect to adverse party challenges to favorable rulings from the California trial courts that SES had performed proper environmental analysis of the project prior to the issuance of the Department of Health Services construction permit and that the South Coast Air Quality Management District must extend its 21 permits to SES to construct the facility without preparation of a new Environmental Impact Report and Health Risk Assessment.

LAKELAND, FLA. (OCT. 26) BUSINESS WIRE - Plant Growth Formulations Inc. of Gainesville, Ga. and Micro-Flo Co. of Lakeland, Fla., announced Friday that PGR IV Concentrate has been cleared by the Environmental Protection Agency for use on row crops and other food crops.

According to C.E. (Buddy) Formby, president of Micro-Flo Co., PGR IV Concentrate contains a nutrient solution blend of hormones in a balanced ratio which increases root growth and rate of growth, enhances fruiting, stimulates nutrient uptake and increases yields.

Formby went on to explain, ''PGR IV is not a fertilizer, but it increases the efficiency of fertilizer and is environmentally safe when used as directed.''

Micro-Flo Co. has been appointed by Plant Growth Formulations Inc. as the exclusive manufacturer and marketer of PGR IV.

The product has a proven track record of over five years of university testing and successful field results. During the past year it underwent review for registration by the E.P.A. while its use continued on lawns, sod, turf and ornamentals.

For complete details on use directions, package sizes and availability through Micro-Flo Co.'s network of national distributors, call 800/451-8461.

#90299b0610 10/26/1990 ~Business Wire

OWINGS MILLS, MD. (OCT. 26) BUSINESS WIRE - Universal Security Instruments, Inc. (NASDAQ Symbol: USEC) Friday announced results for its second quarter ended September 30, 1990.

Sales for the quarter ended September 30, 1990 were $5,817,791 compared to $5,673,873 for the same quarter last year. Net income increased to $1,238,956, or $.36 per share, versus $17,694, or $.01 per share, for the comparable quarter last year. Included in the second quarter results was a $1,002,078, or $.29 per share, extraordinary gain resulting from the settlement of certain of the Company's insurance claims from the fire of March 28, 1990.

The Company said that operating results rose to $236,878, or $.07 per share, compared to $17,694, or $.01 per share, for the comparable period. The improved results were due to new product shipments, joint venture earnings, lower interest costs and to a reimbursement for lost profits on orders that the Company was unable to deliver due to the fire.

Sales for the six months ended September 30, 1990 were $10,813,060 compared to $11,914,682 for the same period last year.

Net income, including the extraordinary gain, was $1,360,929, or $.39 per share, compared to $71,382, or $.02 per share, for the period last year.

Universal said that it is continuing to successfully implement its strategy of increased production in its China joint venture, lower interest costs and new product introductions to improve operating results.

Universal Security Instruments, Inc. designs, manufactures and markets security, video and telecommunications products.

#90299b0611 10/26/1990 ~Business Wire

SANTA ANA, CALIF. (OCT. 26) BUSINESS WIRE - Tokos Medical Corp. (Delaware) (NASDAQ:TKOS) reported record net revenues for the quarter and for the nine months ended Sept. 30, 1990.

Net revenues for the quarter amounted to $19.2 million compared with $15.5

million for the third quarter of 1989. Net revenues for the nine months ended Sept. 30, 1990, were $53.9 million compared with $46.4 million in the same period in 1989.

These results represent a 24 percent increase in net revenues for the third quarter and a 16 percent increase for the nine months ended Sept. 30, 1990, as compared with corresponding periods in 1989.

Robert F. Byrnes, chief executive officer, stated, ''Record net revenues and gains in sales momentum are a result of a continued increase in physician demand and payor acceptance of the company's pre-term labor management services.''

In addition, in September 1990, the company received final approval from the Food and Drug Administration to promote its GENESIS(R) home uterine-activity monitor for early detection of pre-term labor for a specific high-risk population. This device is the only uterine- activity monitor approved for use in the early detection of pre-term labor.

The company reported $521,000 of income from operations before expenses associated with the Physiologic Diagnostic Service Inc. (PDS) merger for the quarter ended Sept. 30, 1990.

Byrnes said that these results met operational expectations. Net losses for the quarter ended Sept. 30, 1990, amounted to $1.7 million, or 12 cents per share outstanding, compared with $352,000, or 3 cents per share outstanding, for the third quarter of the preceding year.

Net losses for the nine months ended Sept. 30, 1990, were $1.7 million, or 13 cents per share outstanding, compared with $291,000, or 3 cents per share outstanding, for the comparable preceding period.

These results include an unusual pre-tax charge in the third quarter of 1990 of $2.4 million, or $1.9 million after-tax effect, 13 cents per share outstanding, for expenses relating to the merger of Tokos and PDS (of Atlanta).

These results also include losses of PDS prior to the merger.

Tokos Medical is the leading national provider of specialized home healthcare services to the OB/Gyn market with 64 sites of service nationwide. The company's corporate headquarters are located at 1821 East Dyer Road, Santa Ana Calif. 92705.

#90299b0618 10/26/1990 ~Business Wire

HAUPPAUGE, N.Y. (OCT. 26) BUSINESS WIRE - Coherent Communications Systems Corp. has introduced the EC-6000 digital echo canceller, the most powerful, intelligent and flexible echo canceller available, when compared to the published performance specifications of other available echo cancellers.

Signals that are reflected due to impedance mismatches at four-wire to two-wire conversion points cause an audible echo when they are delayed while returning to their point of origin, ie. to the person talking.

Delay occurs when the digital voice signal must travel long distances (as may be the case in terrestrial or satellite networks) or when complex signal processing is required (such as in digital cellular telephone networks). The Coherent EC-6000 provides optimal performance in all terrestrial, satellite or digital cellular networks because the EC-6000's modular design allows it to be adapted easily to the unique operating requirements of a particular network.

The EC-6000 is a split-type echo canceller that interfaces with PCM multiplex equipment and digital telephone switches. A CEPT (E1) version for European telecommunications networks, which eliminates echo on all 30 or 31 voice frequency channel circuits, is currently being shipped.

A T1 version of the EC-6000 will be available for installation in North American networks in January 1991. In the standard EC-6000 configuration, 360

channels of cancellation may be installed into a standard, 19-inch rack. Both the CEPT and T1 versions will also be available in a two-digroup enclosure that offers 100 percent redundancy.

This smaller configuration is ideal for unmanned, remote switching stations. All versions of the EC-6000 have the same, high performance specifications and will cancel echo without inducing choppiness or barrel-effect, even when both parties speak simultaneously.

Echo Return Loss (ERL), measured in decibels, indicates the degree to which the digital voice signals must be attenuated (change) after traveling around the end path in order for the echo canceller to distinguish them from near end speech echo and perform cancellation.

Coherent is a world-renowned innovator and manufacturer of highly advanced telecommunications equipment that helps maximize the capacity and quality of private and public terrestrial, satellite or digital cellular telephone networks. Contact Coherent Communications offices for more information.

#90299b0619 10/26/1990 ~Business Wire

PLANO, TEXAS (OCT. 26) BUSINESS WIRE - PRONET INC. (NASDAQ/NMS Symbol: PNET) Friday announced revenues and earnings for the third quarter and nine months ended Sept. 30.

Revenues for the third quarter of fiscal 1990 increased 26 percent to $4,147,000 from $3,292,000 reported for the comparable quarter in fiscal 1989. Net income for the quarter was $150,000, or $0.04 per share, as compared to a net loss of $(154,000), or $(0.04) per share, for the third quarter ended Sept. 30, 1989. Operating cash flow for the third quarter of fiscal 1990 increased approximately 100 percent to $1,108,000 from $553,000 for the comparable quarter in fiscal 1989.

For the nine months ended Sept. 30, revenues increased 25 percent to $11,592,000 as compared to $9,288,000 reported for the same period last year. The Company reported net income of $241,000, or $0.06 per share, as compared to a net loss of $(456,000), or $(0.12) per share, for the first nine months of fiscal 1989.

Commenting on the results, Jackie Kimzey, President and Chief Executive Officer of PRONET INC., stated, ''The Company's solid financial performance thus far in fiscal 1990 is testimony to our dedication to increasing market share within our existing paging locations, as well as expanding into new

ProNet Tracking Systems (PTS) geographic markets.''

Kimzey continued, ''PRONET's commitment to continued growth has resulted in the addition of 6,278 new pagers in the third quarter, the most significant quarterly pager growth in the Company's history. During the quarter, we secured equipment sales orders totalling $53,000 for our ipt communications systems, which are typically leased. We are excited about the placement of over 1,000 pagers in our New York market in September which we anticipate will bring that market to profitability in the second quarter of fiscal 1991.''

PRONET INC. is the leading supplier of medical communications integrated paging systems designed exclusively for medical institutions and health care professionals. In addition, PRONET operates a state-of-the art miniature radio transmitter and receiver system which can be attached to merchandise to assist police in the apprehension of robbery suspects and the recovery of stolen merchandise.

MENLO PARK, CALIF. (OCT. 26) BUSINESS WIRE - Zycad Corp. (NASDAQ:ZCAD) Friday announced that Benjamin Huberman was elected a director and has joined the Zycad board of directors.

Huberman, through the Huberman Consulting Croup, provides consulting services on technology issues to clients specifically in the areas of electronics, aerospace and nuclear power. The board seat became available as a result of two recent board member resignations, Douglas E. Johnson and John A. Fahlberg.

''We are excited about Mr. Huberman joining Zycad's board,'' stated Phillips W. Smith, Zycad president and chief executive officer. ''He is an excellent addition to the board, and his expertise and knowledge in the technology and government arenas will provide significant value to Zycad overall, and specifically to Protocol, our new division.

''Protocol provides system engineering services and solutions to Department of Defense (DoD) and major defense contractors.''

''Zycad has an excellent reputation within the federal government and is working on some very important projects within the military and aerospace industries,'' stated Huberman.

''I like the company's strategies and think they have excellent hardware and software products, as well as consulting services. I look forward to participating in the company's future growth and providing guidance in the government arena,'' continued Huberman.

Huberman is a member of the Chief of Naval Operations' Executive Panel, the Air Force Studies Board, and NASA's Space Station Advisory Committee. From 1988 to mid-1990 he served as the first chairman of the Technical Advisory Panel to the U.S. Space Command.

Prior to leaving the government sector in 1981, Huberman served as Deputy Science Advisor to the president of the United States.

Zycad Corp. designs, manufactures and markets industry leading, high-performance logic simulation, design verification, test-generation tools and consulting services to the Computer-Aided Engineering (CAE) industry.

The company's broad range of products are used to substantially increase engineering productivity in the design, development and test of sophisticated electronic systems and integrated circuits. Zycad provides solutions to solve CAE design problems from single- and multi-ASIC designs to large, complex systems designs.

FORT WORTH, TEXAS (OCT. 26) BUSINESS WIRE - Gainsco, Inc. (AMEX:GNA), Friday reported net income for the third quarter and nine months of 1990.

Net income for the third quarter of 1990 was $1,885,000, $.30 per share, as compared to $1,497,000, $.24 per share, in 1989 representing an increase of 26%. For the nine months ended September 30, 1990, net income was $4,727,000 $.76 per share, versus $3,705,000, $.59 per share, recorded in 1989 which

represents an increase of 28%. Gross premiums written for the nine months ended September 30, 1990 were 22% above the comparable 1989 period.

Commenting on the results, Joseph D. Macchia, Chairman of the Board, President and Chief Executive Officer, stated, ''Results are on target for a 25% return on beginning shareholders' equity. The statutory loss ratio of 50.0% and combined ratio of 85.3% are both within their targeted ranges for the year and should remain so.

'' Our results are particularly significant at this time when the industry is under fire from insurance industry analysts, regulators and consumer groups. The reason for the attacks is junk - junk bonds, junk reinsurance, junk reserves and junk rates. We're junk free!''

GAINSCO, INC. is a vertically integrated property and casualty insurance company specializing in underwriting and marketing excess and surplus lines. The Company's subsidiaries include General Agents Insurance Company of America Inc., an Oklahoma corporation; General Agents Premium Finance Company, which offers premium financing programs for general agents in connection with their marketing activities; Agents Processing Systems, Inc., which markets a computer software policy management system to general agents; and Risk Retention Administrators, Inc., which assists managing general agents in forming and operating risk retention groups.

In addition, General Agents Insurance Company of America, Inc., operates a wholly-owned subsidiary, MGA Insurance Company, Inc., which is the sole owner of MGA Agency, Inc., the Company's marketing arm.

#90299b0632 10/26/1990 ~Business Wire

NASHVILLE, TENN. (OCT. 26) BUSINESS WIRE - Dr. Jerome S. Tannenbaum, president and chief executive efficer of REN Corp.-USA (NASDAQ/NMS:RENL) Friday announced increased revenue and net income for the third quarter and nine months ended Sept. 30, 1990.

Net revenue increased 118 percent to $10.4 million in the third quarter compared with net revenue of $4.8 million in the same quarter last year. Net income for the quarter advanced to $439,000, up 50 percent from $293,000 recorded in the third quarter of 1989.

Earnings per share rose 25 percent to 5 cents on a 31 percent increase in

weighted average shares outstanding to 9.1 million.

Per share earnings for the third quarter of 1989 were 4 cents on 6.9 million weighted average shares outstanding.

The increase in third quarter revenue and net income was due primarily to the addition of 10 dialysis centers since the third quarter of 1989. The company operated 24 dialysis centers at Sept. 30, 1990, compared with 14 centers in operation at the same time last year.

During the third quarter, the company opened a 15-station dialysis center in St. Louis, Mo., a 26-station center in Newport News, Va., and a 15-station center in Marshall, Texas.

The centers in Missouri and Virginia were the first opened by the company in these states.

REN Corp. - USA is engaged primarily in providing renal dialysis services to patients suffering from chronic kidney failure. Dialysis services are provided principally at the company's 24 freestanding outpatient REN Centers located in nine states.

The company also provides outpatient dialysis services to patients in their homes and inpatient dialysis services through contracts with 20 hospitals. In addition, the company performs blood, tissue and urine testing services for its REN Centers, as well as for independent physicians and industry, at its three clinical laboratories.

The company's common stock is included in the NASDAQ National Market System under the symbol ''RENL.''

NEWTOWN, PA (OCT. 26) BUSINESS WIRE - Tseng Labs, Inc. (NASDAQ/NMS:TSNG) Friday announced unaudited results for the third quarter and nine months ended September 30, 1990.

For the three months ended September 30, 1990, sales increased 18% to $7,514,373 from $6,382,980 in the comparable prior year period. Net income increased at a faster rate, up 26% to $1,116,222 or $.06 per share from $886,275 or $.05 per share in the third quarter of 1989.

Sales for the nine months ended September 30, 1990 increased to $25,516,206 from $24,832,484 in the same period last year. Net income was $3,980,262 or $.22 per share versus $4,241,708 or $.23 in the first nine months of 1989.

Jack Tseng, Chairman of Tseng commented, ''In the third quarter, we resumed the favorable quarterly comparisons for the first time since the second quarter of 1989. We made this progress despite a shortage of chips from our semiconductor manufacturers.

'' As a result, the Company was unable to satisfy all of the demand for our products in the third quarter. Had we received these components during the quarter, sales would have been considerably higher, with a commensurate increase in net income. This situation has been rectified, and in the fourth quarter, we expect to fulfill substantially all of our customers' orders.

''Demand for our VGA products based on the ET4000 remains extremely strong and we expect to begin to see the full impact of ET4000 market share gains in the fourth quarter. Given this demand, and the current record backlog of orders, and barring unforeseen circumstances, we expect the fourth quarter to be the best quarter in the Company's history, and for 1990 to be Tseng's sixth consecutive record year. The outlook for 1991 is equally bright.''

Tseng concluded, ''Importantly, we are in a strong financial position to sustain this expected growth without the need for additional capital.''

Tseng Labs, Inc. is a manufacturer of custom VLSI graphics chips and board level add-on enhancement products for personal computers.

STOCKHOLM, SWEDEN (OCT. 26) BUSINESS WIRE - Ericsson and British Telecom Friday signed a general purchasing agreement for AXE10 digital exchanges.

The agreement gives British Telecom the option of placing orders until March 31, 1992, for up to 3 million lines of AXE10. British Telecom has ordered approximately 3.75 million lines of AXE10 since 1985.

Concurrent with the purchasing agreement, a development agreement was also concluded for further evolution of the AXE10 system to provide a platform for the network of the nineties.

These agreements reinforce the continuing success of AXE10 in the UK network. AXE10 was first selected by British Telecom following intense competition between the major international suppliers, resulting in the first contract award in 1985.

Since this time Ericsson has established a comprehensive UK presence including manufacturing and total support capability, which has enabled British Telecom to sustain their very aggressive network modernization schedule through timely deliveries and excellent in-service performance.

AXE10 is now firmly established throughout the British Telecom network, allowing the provision of high quality telephony service to business and residential customers.

Anders Igel, managing director of Ericsson Limited, said of the agreements, ''The signing of these two agreements is excellent news for Ericsson, British Telecom and its customers.

Ericsson Limited is a fully owned subsidiary of Telefon- aktiebolaget L M Ericsson, the Swedish telecommunications company. AXE10 is now in service with all major UK public network operators and the UK represents the largest single

market for the Ericsson switching system.

Ericsson is an international leader in telecommunications. Ericsson is recognized for its advanced systems and products for wired and mobile communications in public and private networks. Ericsson is also a leading supplier of electronic defense systems.

Ericsson has 70,000 employees and operations in 80 countries. Turnover in 1989 was SEK 40 billion. Research and development costs for 1989 corresponded to 11 percent of turnover.

#90299b0647 10/26/1990 ~Business Wire

PHOENIX (OCT. 26) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) reported a net loss for the third quarter 1990 of $21,954,000, or $1.21 per common share.

This compared to a net profit of $5,769,000, or 28 cents per common share, for the third quarter of 1989. Included in the 1989 results is a gain of approximately $2,600,000 resulting from an agreement with a foreign entity for the use of certain foreign tax benefits in connection with the acquisition of an aircraft.

For the nine months ended Sept. 30, 1990 and 1989, the company realized a net loss of $18,391,000, or 94 cents per common share, and net income of $18,870,000, or 92 cents per common share, respectively. The results for the nine months of 1989 included income tax expenses of $6,823,000 and income tax benefits resulting from the utilization of operating loss carryforwards of $6,802,000.

Al Frei, senior vice president of finance and chief financial officer for the airline, said: ''As a result of the Middle East crisis, the average price per gallon of jet fuel increased 19 cents in the third quarter compared to the same period in 1989, or approximately $15,500,000.

America West is currently the No. 1 carrier in on-time performance and holds the national championship in this category for 1989, 1988 and since the Department of Transportation began mandatory reporting in 1987. As a result of a recent DOT authorization, the carrier will begin its first overseas international operation with new service between Honolulu, Hawaii and Nagoya, Japan in early 1991.

The following is a summary of the quarter and year-to-date financial data for the period ended Sept. 30, 1990 and 1989:

#90299b0651 10/26/1990 ~Business Wire
ST. LOUIS (OCT. 26) BUSINESS WIRE - Fujitsu Systems of America has announced the release of software version 1.02 for its Atrium9000 POS system.

Version 1.02 has over 20 new features including full system redundancy, expanded price management/price look-up functions, asynchronous host communications support and MS-DOS support. Fujitsu made the announcement at the Retail Information Systems Conference (RisCON), sponsored by the National Retail Federation, held in St. Louis.

''Our Atrium9000 has met with tremendous industry acceptance during its first year of availability,'' said Kevin O'Neill, Fujitsu's senior director of retail systems marketing and development. ''Retailers such as Barneys, Calvin Klein, Charlotte Russe, Henri Bendei, Paul Stuart and Russell Athletics have installed Atrium in their stores throughout the United States.

''The introduction of this new software release will provide retailers with additional solutions at the point-of-sale,'' he concluded.

Release 1.02 will be available in the fourth quarter of 1990. Key features in Release 1.02 include: MS-DOS for Primary Terminals

Atrium9000's family of terminals now includes MS-DOS-based primary terminals as well as OS/2-based primary terminals. This new software feature supports MS-DOS on the new Atrium Primary/88 terminal as well as Atrium's Primary/286. It gives the retailer an operating system alternative that requires less memory and is lower in cost than OS/2-based terminals.

Fujitsu Systems of America Inc. is one of the Fujitsu Ltd. family of companies. A global leader in computer and telecommunications technology, Fujitsu Ltd. has annual revenues of more than $16 billion. Fujitsu Systems of

America, a major supplier of end-user systems to the U.S. market, designs, develops and markets POS systems, hand-held computer systems and automated teller machines.

#90299b0666 10/26/1990 ~Business Wire

PUNTA GORDA, FLA. (OCT. 26) BUSINESS WIRE - The third annual stockholder's meeting of First Federal Savings Bank of Charlotte County was held Thursday, Oct. 25, in the Savings Bank's Punta Gorda, Fla. office.

At the meeting, D.R. Witter Jr., president and chairman of the board, reported to the attending stockholders the results of last year's operations. ''While (the Savings Bank had) moderate growth...it was excellent growth to manage and to provide a gradual annual increase in the major components of our balance sheet,'' explained Witter.

''Every American is looking over the shoulder of savings and loans' activity...we find that many problems were generated because rapid growth fueled careless lending, hasty investments, uncontrollable expenses, inadequate documentation, and lack of protection of corporate assets.

''Too many institutions that went by the wayside were interested solely in growth for growth's sake, spirited by their president's ego,'' Witter added.

Witter went on to explaain that ''if you always paid the highest rate for deposits, or (similarly) sold your manufactured goods at the cheapest price, that you would not be in business long.'' First Federal ''offered interest rates that were necessary to generate profits from sound investments.''

Witter reported that during the year, total assets increased 5.3 percent, or $17,535,881, from $329,906,931 at June 30, 1989, to $347,442,812 at June 30, 1990. Consolidated net earnings were $3,219,251 for the year ended June 30, 1990, compared to $3,751,943 for the year ended June 30, 1989.

The decrease in earnings for the 12 months ended June 30, 1990, as compared to June 30, 1989, was due to the fact that the Savings Bank sold a 10-acre tract of land in November 1988, which accounted for a net profit, after taxes, of $1,141,901. Excluding the profit on the sale of the land, operating income increased $609,209 for the year ended June 30.

Net loans and mortgage-backed securities aggregated $278,762,204 at June 30 and stockholders' equity totaled $42,894,138.

     #90299b0675 10/26/1990 ~Business Wire
NORTHBROOK, ILL. (OCT. 26) BUSINESS WIRE - General Binding Corporation (NASDAQ:GBND) Friday announced that third quarter earnings decreased to $4,023,000 or $.25 per share compared to $5,793,000 or $.36 per share reported for the year ago period.

The Company pointed out that in 1989 third quarter earnings had been favorably impacted by a recovery of state income taxes for prior years of $1,422,000 or $.06 per share after provision for related federal and state income taxes of $519,000.

Sales for the 1990 third quarter increased 6% to $74,399,000 compared with $70,298,000 for the 1989 third quarter.

For the nine months earnings decreased to $12,941,000 or $.81 per share

compared to $15,500,000 or $.97 per share for the 1989 period. Sales for the nine months increased 10% to $230,014,000 compared to $209,455,000 for the first nine months of 1989.

Commenting on the Company's performance President and CEO Rudolph Grua said that the small sales increase in the third quarter reflects the general softness of the worldwide economy and is significantly below the double digit growth GBC usually demonstrates. GBC's performance was particularly affected by soft demand and decreasing margins at the Company's three ring metals operations. Operating losses at GBC's Canadian subsidiary further depressed the Company's results.

GBC is an international manufacturer and marketer of business machines and related supplies. The Company's binding, laminating, and paper shredding systems are used worldwide in the business, commercial, education and government markets. GBC products are marketed under the GBC, Shredmaster and U.S. RingBinder names.

DENVER (OCT. 26) BUSINESS WIRE - Hallwood Energy Corp. (NASDAQ:HWEC) announced a 1-for-50 reverse split of its common stock, effective Friday.

The reverse stock split was approved by Hallwood Energy's shareholders at the annual meeting of shareholders on Sept. 25, 1990. The reverse stock split will not change the shareholders' equity of Hallwood Energy or alter the number of authorized shares.

As a result of the reverse split, the number of outstanding shares of common stock will decrease from 57,679,527 to approximately 1,153,590 shares.

Shareholders will receive cash in lieu of fractional shares and will be asked to exchange the certificates that they currently hold for new certificates.

The common stock will begin trading on Oct. 29, 1990, at the post reverse split price.

Also at the annual meeting, shareholders elected Anthony J. Gumbiner, William L. Guzzetti, Brian M. Troup and Hans-Peter Holinger directors until the next annual meeting.

Shareholders also approved a proposal providing that a majority vote of shareholders is sufficient for any action requiring a vote of shareholders.

#90299b0680 10/26/1990 ~Business Wire

HARTFORD, CONN. (OCT. 26) BUSINESS WIRE - Aetna Life & Casualty Friday reported third quarter net income of $89 million, or $.80 per common share, after reflecting a one-time reorganization charge of $60 million ($.54 per common share), compared with $183 million, or $1.63 per common share, a year ago.

The one-time charge relates to the severance, benefits and other costs associated with a reorganization of the company's domestic insurance operations, announced separately today. This charge affects the earnings of the Employee Benefits, Commercial Insurance and Personal Financial Security Divisions, but not American Re-Insurance or the International Insurance Division.

The 1990 third quarter results include net realized capital losses of $38 million ($.33 per common share). The 1989 third quarter results included net realized capital gains of $48 million ($.43 per common share), $27 million of which resulted from the sale of Federated Investors Inc. The total impact of the Federated sale on third quarter 1989 net income was $42 million ($.38 per common share), including $15 million of tax benefits from the utilization of net operating loss carryforwards generated by the sale.

Aetna Chairman James T. Lynn said, ''Adjusting for the one-time reorganization charge in the third quarter and for the positive impact of the Federated sale last year, our third quarter 1990 earnings were modestly improved over a year ago. Absent the one-time charge, earnings in most of our businesses were about as expected. We had better group insurance results.

''Substantially helped by fewer catastrophe losses, auto/homeowners showed slight improvement, but personal auto still suffers from high loss costs and inadequate rates. Although profitable, commercial insurance and reinsurance operations continued to reflect a soft pricing environment. Pensions and related financial services, reflecting net realized capital losses, reported a small loss.''

Third quarter 1990 net realized capital losses of $38 million were primarily attributable to additions to reserves and write-downs related to the company's mortgage loan and real estate portfolios. The company povides for actual and potential permanent decreases in value in its mortgage loan and real estate portfolios through a combination of reserving and asset write-downs, and makes adjustments as circumstances appear to warrant. Pretax net additions to reserves for mortgage loans and real estate write-downs totaled $58 million in

the quarter.

#90299b0690 10/26/1990 ~Business Wire

HARTFORD, CT (OCT. 26) BUSINESS WIRE - Aetna Life & Casualty Friday announced a major corporate reorganization that will disband its three domestic insurance divisions and emphasize the role of its major profit centers. The company also will form a new corporate unit to streamline the way in which it delivers and services its products.

"The overriding principle behind this reorganization is to improve Aetna's ability to provide the right products and services, and to help us compete in increasingly competitive and challenging markets," said James T. Lynn, Aetna chairman.

As a result of the reorganization, the company anticipates approximately 2,600 job eliminations through terminations and attrition. The new corporate structure will be put in place March 4, 1991.

In a separate announcement today, Aetna reported a one-time, after-tax charge of $60 million for the severance, benefits and other costs associated with the reorganization. Aetna estimates after-tax savings will be approximately $50 million in 1991, $90 million in 1992, and $95 million per year thereafter.

"We have been carefully reviewing Aetna's organization for some time to best position the company for success in a rapidly changing marketplace," Lynn said. "We have concluded that we need to align our resources more closely with those markets, old and new, that offer the opportunity for superior, sustained profitability.

"Our current structure must now give way to an increased focus on our major profit centers in order to anticipate change more effectively, and to be quick flexible and right in dealing with change," he added. "Our goal is to build on the many areas of excellence Aetna must retain, and to solidify our position as a leader in insurance, related financial services and managed health care."

The reorganization will enhance the role of the company's major profit centers or strategic business units (SBUs), and will eliminate the three domestic insurance divisions - Commercial Insurance, Employee Benefits and Personal Financial Security. The businesses that now comprise the three divisions will be realigned in two groups for managerial oversight.

"In order to prosper, we must engineer into our products and services the quality and responsiveness our customers have every right to demand," said Ronald E. Compton, Aetna president, who needs the reorganization effort. "The group structure will provide Aetna with greater flexibility to strenghten existing businesses, to start new businesses, and to scale down underperforming businesses.

#90299b0691 10/26/1990 ~Business Wire

VANCOUVER, BC (OCT. 26) BUSINESS WIRE - Breakwater Resources Ltd. (TSE, VSE: BWR; NASDAQ: BWRLF) announced Friday that it had temporarily suspended operations at its Caribou zinc/lead/silver mine outside of Bathurst, N.B.

Brian Pewsey, President and Chief Executive Officer of Breakwater, commented that, ''We have taken this step reluctantly, but we feel that it is the prudent thing to do. When we acquired the historic Caribou property, it was capable of producing an average of 600 tonnes per day with 32 percent zinc in the concentrate at a recovery of 45 percent.

Under Breakwater's management, the mining methodology was changed, raising production to 3,000 tonnes per day, and metallurgical problems were effectively addressed, raising zinc in the concentrate to 36 percent at recoveries of 75 percent.

Mill throughput was raised to 2,500 tonnes per day. However, the mill continues to impose a real constraint; its flotation circuit and dewatering facility must be expanded if output is to be significantly increased. Including mine development to sustain this increased output, a capital investment of approximately $15 million is required to revamp the mill.

''Earlier projections for increased zinc demand and price acceleration have

not been realized in this period of a world-wide economic slowdown which has in turn been accentuated by a sharp downturn in eastern Europe and the uncertainty generated by the Gulf crisis,'' Pewsey commented.

''The Breakwater Board and management, with the full support of its major shareholder Corona Corporation, does not feel it prudent therefore, in the present economic environment to consider such an investment in view of the non-recourse bank financing arrangements and operations which are uneconomic at current price and volume levels.

''Even though significant technical achievements have been made, we have decided to suspend mine operations temporarily,'' Pewsey said.

BATAVIA, NY (OCT. 26) BUSINESS WIRE - Graham Corp. (ASE:GHM) Friday reported results for the third quarter ended Sept. 30, 1990.

Sales for the quarter were $20,126,000 producing a net loss of $125,000, or 12 cents per share.

Sales for the comparable 1989 third quarter were $14,482,000 producing net income of $1,143,000, or $1.16 per share inclusive of a $1.27 per share, or $1,255,000 gain from the sale of real estate in the United Kingdom and the United States.

Sales for the nine months ended Sept. 30 were $57,790,000 producing net income of $589,000, or 58 cents per share. Sales for the comparable 1989 nine months were $46,135,000 producing net income of $2,358,000, or $2.42 per share inclusive of the $1.27 per share, or $1,255,000 gain from sale of real estate. New orders for the 1990 third quarter were $17,724,000 compared to $22,800,000 for the 1989 third quarter. New orders for the first nine months of 1990 were $52,591,000 compared to $62,320,000 for the first nine months of

1989. Consolidated backlog on Sept. 30, 1990 was $36,321,000 compared to $37,952,000 on June 30, 1990 and to $41,603,000 on Sept. 30, 1989.

Commenting on these results, Frederick D. Berkeley, Graham's chairman and CEO, said, ''Graham's disappointing third quarter is the result of substantial extra costs and charges incurred in the U.K. in order to take care of the production problems and delays at our Cheltenham plant which we first described in our July report on six month results.

Graham designs and manufactures vacuum and heat transfer equipment for the process industries. The principal markets for Graham's equipment are the chemical, petrochemical, petroleum refining and electric power generating industries, including co-generation and geothermal plants.

Other process industry markets served include the food and beverage industry, shipbuilding, steel mills, and paper mills.

SAN FRANCISCO (OCT. 26) BUSINESS WIRE - Robert W. Alspaugh has been named managing partner of KPMG Peat Marwick's San Francisco Bay Area practice.

Alspaugh, 43, was partner-in-charge of the San Francisco audit department. As managing partner, he replaces Jon C. Madonna, 47, who was elected earlier this month by the firm's partners to serve as chairman of KPMG Peat Marwick's U.S. practice.

Alspaugh joined Peat Marwick in 1970 and was elected partner in 1978. He became head of the San Francisco audit department in 1987.

Born in Waxachachie, Texas, he holds a bachelor of business administration

degree with highest honors from Baylor University. He, his wife and three children live in Tiburon, Calif.

In commenting on his appointment, Alspaugh said that ''Jon Madonna set and achieved very high standards for our Bay Area practice. We will continue to focus on superior quality service through our specialized industry program.''

KPMG Peat Marwick is the world's largest accounting, tax and management consulting firm. The San Francisco Bay Area practice, with over 700 professional and staff employees, has offices in San Francisco, Oakland, Palo Alto and Walnut Creek. Other major Northern California offices are in San Jose and Sacramento.

MERRIMACK, N.H. (OCT. 26) BUSINESS WIRE - Chemical Fabrics Corp. (CHEMFAB)(OTC:CMFB) Friday announced earnings for its first quarter of fiscal 1991.

CHEMFAB's worldwide sales for the thirteen weeks ended Sept. 30, 1990, the first quarter of fiscal 1991, increased by 13 percent to $12,155,000, as compared to $10,803,000 for the same quarter in fiscal 1990. Net income for the quarter was $1,205,000 or 24 cents per share, as compared to net income of $963,000 or 19 cents per share for the same quarter in the prior fiscal year.

These results represent an increase of 26 percent in earnings per share over the first quarter of last year. Gross profit margins on first quarter consolidated net sales improved to 35 percent from 33 percent for the comparable quarter in fiscal 1990.

CHEMFAB is an international advanced performace materials company that designs manufactures and markets flexible composite products intended for use in extreme environments.

Typical products consist of woven fiberglass or other high-strength reinforcements coated or laminated with thermoplastics and elastomers, and specialty flouropolymer films. Worldwide end-use applications are in aerospace, architectural, chemical processing, communications, electronics, food processing, military, protective clothing and other industrial markets.

#90299b0711 10/26/1990 ~Business Wire
LONDON (OCT. 26) BUSINESS WIRE - October 26, 1990 -- Cadbury Schweppes plc (NASDAQ: CADBY), announces the acquisition of the Griffin's confectionery business including Griffin's factory at Avondale (Auckland) from Britannia Brands NZ Limited, and the sale of its Hudson biscuit operations to Britannia.

The acquisition and the sale will be effective from December 1, 1990.

This reflects Cadbury Schweppes' continued focus on and development of its core business streams of confectionery and beverages on a worldwide basis.

Together with the exchange of the businesses, Cadbury Schweppes will pay to Britannia a net consideration of NZ $2 million.

The Cadbury Schweppes Hudson biscuit business has about a 20% share of the New Zealand biscuit market, and its leading brands include Shrewsbury, Toffee Pops and Chocolate Chippies. Sales in 1989 were NZ $31.8 million. Book assets are estimated at NZ $14.5 million, including the Hudson factory at Papakura, and the biscuit manufacturing equipment at the Dunedin factory, which will be relocated.

The Griffin's confectionery business includes a full range of sugar confectionery and liquorice. The Griffin brand is the market leader in New Zealand sugar confectionery with a 52% market share in packaged sugar confectionery. Key brands include Minties, Lumps, Pebbles, Jaybees and Jaffas. Estimated sales in 1989 were NZ $38 million.

This transaction presents an opportunity for Cadbury Schweppes to strengthen further its confectionery presence internationally, and to continue its development in the Pacific Rim markets.

Cadbury Schweppes plc is the largest British-owned confectionery and soft drinks company. Cadbury Schweppes ADS are traded on NASDAQ. The ticker symbol is CADBY. One ADS equals 10 ordinary shares.

#90299b0713 10/26/1990 ~Business Wire
PHILADELPHIA, PA. (OCT. 26) BUSINESS WIRE - Fleer Corp. (NASDAQ: FLER) Friday

reported record sales and earnings for the period ended Sept. 30.

For the third quarter, net sales increased 86 percent to $38,415,000, compared to $20,668,000 for the same period last year on a pro forma basis. Net income for the quarter increased to $5,575,000, or 59 cents per share, compared to the prior year's pro forma quarterly results of $162,000, or 2 cents per share. The 1989 pro forma third quarter results were adversely impacted by a pre-tax $1.8 million non-recurring charge which reduced pro forma earnings per share by 14 cents.

For the nine month period ending Sept. 30, Fleer also reported record sales and earnings. For the nine month period, net sales increased 83 percent to $118,966,000, compared to $65,037,000 for the same period last year on a pro forma basis. Net income for the nine months increased 298 percent to $19,047,000, or $2.32 per share, compared to pro forma net income of $4,784,000, or 65 cent per share for the same period last year.

Paul H. Mullan, chairman and CEO, said, ''Third quarter results reflected excellent growth in sports picture cards, especially Fleer's premier edition football trading cards and the recently introduced Asher Stars 'N Stripes product. Fleer's expanded distribution network and improved marketing strategy also added significantly to the dramatic growth the company has achieved so far this year, and provides a firm foundation for continued growth.''

As a result of cash generated from the company's operations, together with the net proceeds from the company's sale of common stock, virtually all of the company's debt has been repaid as of Sept. 30.

The company also announced that it will file today a registration statement with the Securities and Exchange Commission relating to a proposed public offering by certain selling shareholders of 2.1 million shares of the company's common stock. Smith Barney, Harris Upham & Co., Inc. will serve as the managing underwriter for the offering.

Fleer is a leading marketer of sports picture cards (baseball, football and basketball) and confectionery products, including Dubble Bubble gum.

#90299b0719 10/26/1990 ~Business Wire

CHARLESTON, SC (OCT. 26) BUSINESS WIRE - John M. Settle, president of Home Federal Savings Bank, (NASDAQ:HFSB) Friday reported record results for the Savings Bank's fourth quarter and fiscal year ended Sept. 30, 1990.

''Home Federal's earnings, stockholders' equity and loans rose to their highest level in our 38 years of operations,'' stated Settle.

''Additionally, deposits rose to record levels during the year. We attribute our record results to sound loan underwriting standards, our policy of originating adjustable-rate loans, our control of general and administrative expenses, and our loyal customer base.

''During the year, we also instituted a cash dividend program in recognition of our record performance.''

Net interest income rose to $4.8 million in fiscal 1990, a 51.4 percent increase from the $3.2 million recorded in the prior year.
Net earnings were a record $1,261,000, or $1.56 per share, in fiscal 1990, reflecting a 93.3 percent increase from fiscal 1989's earnings of $652,000, or 80 cents per share.

Included in 1989 results were a gain of $373,600 on the sale of Federal Home Loan Mortgage Corp. (FHLMC) preferred stock and a gain of $167,400 on the sale of a former branch site. Earnings for fiscal 1990 are particularly significant in that they reflect primarily operating activities and did not include any comparable one-time items.

Net interest income in the fourth quarter of fiscal 1990 increased 62.7 percent to $1,269,000 compared with $780,000 in the same quarter last year. Net earnings for the latest quarter advanced 85.7 percent to $348,000, or 43 cents per share, compared with $187,000, or 23 cents per share, in the fourth quarter of fiscal 1989.

Results for the fourth quarter of 1989 included the gain on the sale of a former branch site.

''Home Federal's loan quality remained excellent at fiscal year end,'' continued Settle. ''At year end, our real estate owned declined by almost 8 percent from fiscal 1989 and we had no other repossessed assets.

In conjunction with our conservative accounting practices, we have continued to increase our reserves against possible loan losses even though our level of non-performing loans declined over 55 percent since last year.

''Our net interest margin improved significantly during fiscal 1990 to 3.04 percent compared with 2.01 percent during the prior year. Our emphasis on originating adjustable-rate mortgages and our excellent gap position contributed to this improvement.

''In addition, our emphasis on controlling general and administrative expenses continues to enhance our operating results. For fiscal 1990, general and administrative expenses were held to under 2 percent of assets,'' concluded

Settle.

Home Federal is a federally chartered and insured savings bank operating three full-service offices in Charleston. The common stock of Home Federal Savings Bank is traded on the National Market System under the NASDAQ symbol HFSB.

HOUSTON (OCT. 26) BUSINESS WIRE - Offshore Pipelines, Inc. (''the Company'') (NYSE:OFP) Friday announced that on October 23, 1990, Richard I. Schwarzschild filed suit against the Company in the United States District Court, Southern District of New York.

The plaintiff filed suit, individually and purportedly on behalf of all persons who purchased the Company's common stock between July 25, 1990 and October 19, 1990 and who allegedly sustained damages as a result of such purchases because of the alleged misrepresentation of the Company's results from operations due to the failure to disclose a net loss for the fiscal year ended July 31, 1990. The plaintiff's suit was filed against the Company, the co-managing underwriters of the Company's initial public offering, each of the Company's directors and its chief financial officer, alleging violations of Sections 11 and 12(2) of the Securities Act of 1933, as amended, in connection with the Company's initial public offering, and seeks unspecified money damages, return of purchase price and various other forms of relief. The Company believes the suit is unfounded and without merit and will vigorously oppose this action.

#90299b0724 10/26/1990 ~Business Wire

SOMERVILLE, NJ (OCT. 26) BUSINESS WIRE - Beatrice D'Agostino, president and chief executive officer of Bancorp New Jersey Inc. (OTC, NASDAQ:BCNJ) announced Friday consolidated financial results for the third quarter ended Sept. 30, 1990.

Net income for the third quarter was $54,000 or 2 cents per share, compared to $838,000 or 31 cents per share, for the same period in 1989.

Net income for the nine months ended Sept. 30, 1990 was $1,519,000, vs. $2,512,000 for the first nine months of 1989. The nine months earnings per share figure was 58 cents for 1990, compared to 93 cents for 1989.

The decline in earnings was the result of a deterioration in the investment market and a special provision for loan losses in the amount of $660,000, for a total provision of $812,000 for the quarter.

This addition increases Bancorp New Jersey's allowance for loan losses to approximately $1.5 million, or .71 percent of total loans. ''This special provision was deemed prudent in recognition of the rapidly deteriorating regional economy, both in the employment and real estate sectors,'' commented D'Agostino.

Bancorp's subsidiary, New Jersey Savings Bank, experienced an increase in nonperforming assets during the quarter to $11.2 million, however, actual charge-offs for the quarter were less than $1,000. At Sept. 30, 1990, Bancorp's capital to assets ratio is 16.25 percent, well in excess of regulatory requirements.

The net interest margin for the nine months was $2.8 million, slightly higher than last year's figure. Assets rose 3 percent to $282.7 million, while deposits also increased 3.9 percent to $234.1 million. Net loans showed a small increase, totaling $215.1 million at Sept. 30, 1990. Book value was stated at $18.59 per share.

It was also reported that New Jersey Savings Bank had received all regulatory approvals for the previously announced acquisition of the Finderne Office (Bridgewater Twp, N.J.) of Hansen Savings Bank SLA. Upon conclusion the acquisition will increase deposits by approximately $10 million. It is expected to provide the Bank with the opportunity to further serve its expanding customer base in Somerset county.

Bancorp New Jersey is the parent company of the 119-year old New Jersey Savings Bank, a wholly-owned subsidiary with six banking offices in Somerset, Hunterdon and Mercer counties. New Jersey Savings Bank is a memeber of the Federal Deposit Insurance Corp. (FDIC)

#90299b0725 10/26/1990 ~Business Wire

CHICAGO (OCT. 26) BUSINESS WIRE - The CNA Insurance Companies, the nation's 8th largest insurance organization, Friday announced a series of organizational changes that will provide for orderly management succession and

ensure the hands-on involvement of Edward J. Noha, chairman of the boards and chief executive officer, for an extended period of time after he reaches age 65 in 1992.

At that time, Noha will assume the chairmanship of CNA Financial Corp. (CNAF), CNA's parent organization.

Noha, who took over the leadership of CNA in 1975, will continue to have overall responsibility and accountability for company operations. Dennis H. Chookaszian, 47, has been named president and chief operating officer, reporting to Noha, with responsibility for field operations, group benefits, specialty operations, national accounts and investments.

Philip L. Engel, 50, has been named executive vice president with responsibility for marketing, underwriting, claims, services and systems. He also will report directly to Noha.

''This action positions CNA for a natural succession of management. It assures that an organization is in place that will preserve the values and strategies of CNA and allow the company to continue to grow and prosper as we move through the transitional years of the 1990's,'' said Noha. ''It is very gratifying to be able to put in place a high-quality team from within our ranks.''

Chookaszian, with the company for 15 years, served as vice president of the corporate finance department and chief financial officer prior to this reorganization. It is anticipated that he will be named chairman of the boards and chief executive officer of the CNA Insurance Companies when Noha assumes chairmanship of CNAF.

Engel, who headed the marketing department for 11 years prior to directing the corporate services and systems functions, has been with CNA for 29 years.

CNA also named four senior vice presidents who will report to Chookaszian: Carolyn L. Murphy, field operations department; Jae L. Wittlich, group benefits department; Bernard L. Hengesbaugh, specialty Operations Department; and Donald E. Harder, national accounts department.

Three senior vice presidents were named who will report to Engel: Peter P. Conway, marketing department; Ernest A. Lausier, underwriting department; and James B. Mullins, claims department.

Peter E. Jokiel was named chief financial officer and senior vice president, corporate finance department. Donald M. Lowry was named general counsel and senior vice president, Law department. David W. Koester was named senior vice president, administration department. Jokiel, Lowry and Koester will report to Noha.

The CNA Insurance Companies is a multi-line insurer offering a full range of coverages and is headquartered in Chicago.

LONDON (OCT. 26) BUSINESS WIRE - Cadbury Schweppes plc (NASDAQ: CADBY) is pleased to announce the appointment of Ian Hay Davison to the Board of Cadbury Schweppes plc as a non-executive director. Davison brings a breadth of international experience at a senior level, with a strong financial emphasis.

Chairman Sir Graham Day commented: "We are delighted to welcome Ian Davison to the Board of Cadbury Schweppes. We greatly value the role of our non-executive directors, and the independence and wide experience they contribute. Ian Davison has a breadth of experience and will contribute significantly to Board processes."

Since Sept. 1, 1988 Ian Davison has been chairman of stockbrokers Laing & Cruickshank and other Credit Lyonnais Capital Markets companies in the United Kingdom. He was appointed non-executive chairman of Storehouse plc in May 1990. He is also a non-executive director of the Independent newspaper and the

Chloride Group plc.

Following 25 years at Arthur Andersen & Co., where he was managing partner from 1966 to 1982, he became deputy chairman and chief executive of Lloyd's, during a period when significant reforms were implemented. He returned to Arthur Andersen in 1986 as a consultant, until taking up his current appointments detailed above.

Public appointments have included heading Price Commission enquiries into banking and unit trusts and undertaking investigations on behalf of the Department of Trade. He was chairman of the Hong Kong Securities Review Committee, whose report made wide ranging recommendations for the reform of the securities markets in Hong Kong.

Cadbury Schweppes plc is the largest British-owned confectionery and soft drinks company. Cadbury Schweppes ADS are traded on NASDAQ. The ticker symbol is CADBY. One ADS equals ten ordinary shares.

#90299b0746 10/26/1990 ~Business Wire

BEAUMONT, TX (OCT. 26) BUSINESS WIRE - Gulf States Utilities Co. Friday (Oct. 26) reported earnings (unaudited) of $60.49 million (41 cents per share of common stock) on revenues of $488.19 million for the third quarter of 1990, compared to a loss of $16.62 million (30 cent per share) on revenues of $466.82 million for the third quarter of 1989.

Increased kilowatt-hour sales and reduced interest charges contributed to the improved performance, company officials said. Sales for the third quarter totaled 8.3 billion kilowatt-hours, compared to 7.8 billion kilowatt-hours sold in the third quarter of 1989.

Sales increased primarily because of hotter than normal weather in July and September and a slight increase in the number of customers. Interest expense continued to decline, as the company retired more than $235 million of debt during the 12 months ended Sept. 30, 1990.

In 1989, the third quarter results included two material accounting charges. GSU recorded a $37 million net of tax write-off related to the discontinuation of regulatory accounting principles to the company's wholesale jurisdiction. The company also recorded an $18 million net of tax write-off for lignite leases abandoned by Varibus Corp., a wholly-owned subsidiary of Gulf States.

Despite the positive results recorded during the third quarter of 1990, the company recorded a loss of $1.22 per share of common stock for the 12 months ended Sept. 30, 1990, compared to a loss of 74 cents per share of common stock for the 12 months ended Sept. 30, 1989.

The $1.22 loss reflects the estimated $135 million after-tax cost of the settlement with the Southern Co. recorded during the second quarter of 1990. It also included a significant accounting charge recorded in the fourth quarter of 1989, resulting from the discontinuation of regulatory accounting principles to the company's steam electric department.

GSU also reported that kilowatt-hour sales totaled 28.2 billion for the 12 months ended Sept. 30, 1990--two percent greater than the 27.6 billion kilowatt-hours sold during the 12 months ended Sept. 30, 1989.

GSU serves 569,000 electric customers in a 28,000-square-mile area spanning the Gulf Coast between Houston and New Orleans.

#90299b0752 10/26/1990 ~Business Wire

HOUSTON (OCT. 26) BUSINESS WIRE - Tenneco Inc. (NYSE:TGT) announced Friday that its Packaging Corp. of America subsidiary acquired Dixie Container Corp., a privately held corrugated container company.

Terms of the agreement were not disclosed.

The closing follows the signing of a definitive agreement in February 1990.

Headquartered in Richmond, Va., Dixie operates seven facilities with more than 650 employees. Three container plants are located in Richmond, Va., Honea Path, S.C., and Morganton, N.C. Three corrugated sheet plants are located in Roanoke, Va., High Point, N.C., and Knoxville, Tenn. Dixie also owns a recycled medium mill in Sylva, N.C.

According to Monte R. Haymon, PCA president and CEO, this acquisition supports PCA's strategy to expand in the Southeast, the nation's fastest growing region for corrugated box shipments. ''It will strengthen our overall presence in this area, while enhancing customer partnerships with the furniture, textile and electronics industries,'' he said.

''PCA will also add recycled medium production capability with Dixie's Jackson Mill in Sylva, N.C. This capability to produce recycled medium will address the growing market demand for recycled materials in corrugated products,'' Haymon added.

In addition, the acquisition will expand PCA's network of corrugated fabricators in the Southeast and establish PCA's East Coast presence as a manufacturer of heavy-duty corrugated products.

With Dixie and the pending acquisition of select assets of Georgia-Pacific Corporation, PCA will operate a total of 56 converting facilities and five containerboard mills nationwide. The Georgia-Pacific transaction was reported in September.

''The closing of these acquisitions will support our strategic objective to strengthen PCA's leadership position in its core businesses,'' said Haymon.

A Tenneco company, PCA is a leading manufacturer of corrugated containers, containerboard, recycled paperboard, folding cartons, molded fibre products and plastic containers.

Tenneco Inc. (NYSE:TGT) is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

MARLBORO, MA (OCT. 26) BUSINESS WIRE - Data Translation Inc. (NASDAQ:DATX) Friday announced that it has reduced the company's work force by 37 people, approximately 15 percent, effective immediately.

The reduction in force reflects action taken by the company to control expenses across all areas in response to continued depressed sales levels. No further reductions in force are planned at the present time.

Data Translation Inc. designs, manufactures and markets high-performance data acquisition and image processing board products and software that serve the laboratory, medical and industrial markets. Its products are compatible with many widely-used microcomputers, including those from Apple, DEC, IBM, Intel and Sun.

NEW YORK (OCT. 26) BUSINESS WIRE - Ehrlich Bober Financial Corp. reported financial results for its fourth fiscal quarter and year ended June 30, 1990.

As previously reported, on Oct. 9, 1990, the company announced that it would immediately terminate the ongoing operations of its broker/dealer and investment banking subsidiary, Ehrlich Bober & Co. Inc.

For the three months ended June 30, 1990, the company reported a loss from operations of $486,000 as compared to a profit of $1,107,000 in the same period last year. For the year, the company reported a loss from continuing operations of $2,841,000 as compared to a loss of $1,767,000 for the prior year.

After giving effect to the discontinuance of operations of Ehrlich Bober & Co. Inc., the company reported a net loss of $9,748,000 for the year ended June 30 1990, as compared to a loss of $1,486,000 for the year ended June 30, 1989.

With regard to the future operations of the company, the board of directors has determined to seek to enter into other operating business through the acquisition of existing companies.

At present, there are no plans to acquire any specific company or change any particular line of business.

CHATTANOOGA, TENN. (OCT. 26) BUSINESS WIRE - Provident Life and Accident Insurance Co. of America (NASDAQ:PACCB) has announced a $15.1 million improvement in net income for the third quarter of 1990, compared with the third quarter of 1989.

Net income was $50.5 million ($1.09 per share) in the third quarter of 1990, a 42 percent increase over the $35.5 million (76 cents per share) reported in the year ago quarter.

Included in the net income figures are net realized investment losses of $21.0 million on a before-tax basis in the third quarter of 1990, compared to net realized investment losses of $1.8 million last year.

Excluding these losses on an after-tax basis, net income rose 76 percent in the third quarter of 1990, compared to last year.

Net income for the first nine months of 1990 increased 34 percent to $129.1 million ($2.78 per share) from $96.6 million ($2.07 per share) in the first

nine months of 1989.

Net realized investment losses were $30.7 million on a before-tax basis for the nine months ended Sept. 30, 1990, compared to losses of $0.1 million last year. For the first nine months, net income excluding after tax net realized investment gains and losses increased 55 percent over the comparable period for 1989.

Non-current investments totaled $205.5 million at Sept. 30, 1990, or 1.7 percent of Provident's aggregate investment portfolio. This compares to $189.8 million at Dec. 31, 1989 and $237.5 million at June 30, 1990.

Premiums and premium equivalents for the first nine months of 1990 increased 3 percent to $3.21 billion from $3.13 billion last year. Book value per share was $28.05 as of Sept. 30, 1990.

The employee benefits segment recorded another quarter of strong earnings improvement with net income of $21.7 million in the third quarter of 1990. This represented a jump of $14.6 million, compared to the $7.1 million reported in the third quarter of 1989.

#90299b0785 10/26/1990 ~Business Wire

MATTITUCK, NY (OCT. 26) BUSINESS WIRE - North Fork Bancorporation, Inc. (NYSE:NFB) Friday reported that net income for the three months ended Sept. 30 was $2.1 million, or 24 cents per share. This compares with net income of $5.1 million, or 55 cents per share, for the comparable quarter of 1989.

For the nine months ended Sept. 30, net income was $8.9 million, or 99 cents per share, as compared with $15.3 million, or $1.65 per share for the comparable period of 1989.

The decline in earnings quarter over quarter is principally attributable to a $6.3 million loan loss provision charged to earnings during the 1990 third quarter. ''As we experience a further economic slowdown in the regional economy we continue to adhere to our strategic plan of bolstering our allowance for loan losses,'' said John Adam Kanas, chairman and chief executive officer.

The provision increases the allowance for loan losses to $16.6 million, or 1.37 percent of total loans compared with $8.6 million, or .68 percent of loans in the prior year.

On an annualized basis net charge-offs were .43 percent and .15 percent for

the first nine months of 1990 and 1989, respectively. The level of non-performing assets in the 1990 third quarter was $63.3 million, or 3.60 percent of total assets as compared with $47.5 million, or 2.51 percent of total assets at June 30.

Based on current appraisals and the banks' position as first lineholder on virtually all non-performing real estate loans, actual losses are expected to be within tolerable ranges as the bank liquidates its collateral.

The increase in the level of non-performing assets during the year contributed to the decline in net interest income, on a taxable equivalent basis, to $16.4 million, or 3.81 percent for the quarter as compared with $17.3 million, or 4.43 percent for the comparable period in the prior year.

North Fork Bancorporation, Inc. is the holding company for North Fork Bank and Trust Co. and Southold Savings Bank. North Fork Bank and Trust Co. is a commercial bank operating through 28 branch locations in Suffolk and Nassau County. Southold Savings Bank is an eight branch savings bank operating in Suffolk County.

SAN FRANSISCO, CA (OCT. 26) BUSINESS WIRE - Phoenix Laser Systems Ins. (NASDAQ:PXLS) Friday announced that the board of directors of the company has authorized an extension of the offer for conversion of Phoenix Preferred Stock.

The new deadline is Nov. 9, 1990, at 5 p.m. Pacific Time. Originally, the offer was scheduled to expire today (Friday, Oct. 26) at 5 p.m., Pacific Time.

The voluntary conversion offer calls for each share of Phoenix Preferred Stock to be converted into 4.25 shares of the company's Common Stock plus a warrant permitting the holder to purchase a share of Phoenix Common Stock at $1.50 per share.

According to Phoenix Laser Systems Inc., the response to the voluntary conversion offer has proved overwhelming so that additional time is required for interested stockholders to complete the necessary paperwork.

As a result of this response, after the conversion is completed, the remaining number of shares of Preferred Stock outstanding may not be sufficient to meet the minimum for continued listing on NASDAQ. The Common Stock and existing warrants will continue to be listed on NASDAQ.

Phoenix Laser Systems Inc. is a developer of integrated laser workstations primarily for use by the medical community. The company's initial efforts have focused on the design, development and testing of its first product, the Phoenix Ophthalmic Surgical Workstation.

The Ophthalmic Surgical Workstation is a self-contained proprietary workstation that combines on-line diagnostic measurement, advanced laser beam positioning, high-speed tissue tracking, and therapeutic devices for the precise control of laser surgery. The company's technology permits surgery at cellular levels, without creating significant thermal damage to surrounding cells. Phoenix recently completed initial human clinical testing of its technology.

MANCHESTER, N.H. (OCT. 26) BUSINESS WIRE - Numerica Financial Corp. (OTC:NUME) announced Friday that James F. Dickerson, president and chief executive officer of Numerica Savings Bank, has resigned from the Numerica Financial Corp. board of directors, and from his position as president and chief executive officer of Numerica Savings Bank, effective immediately.

Dickerson will be succeeded by Ralph E. Jensen, president and chief executive officer of Numerica Financial Corp. Jensen had served as president of Numerica Savings Bank for 13 years prior to Dickerson joining the company in 1988.

This transition is consistent with the company's critical objective to further lower operating expenses through functional consolidation.

Numerica Financial Corp. is a $990 million multiple savings and loan holding company headquartered in Manchester, N.H., with 17 offices located throughout

the state.

#90299b0799 10/26/1990 ~Business Wire

ATLANTA (OCT. 26) BUSINESS WIRE - Fulton Federal Savings Bank (NASDAQ:FFSB) Friday reported a net loss of $7.9 million, or $1.89 per share, for the quarter ended Sept. 30.

This compares with a net loss of $14.5 million, or $3.45 per share, for the third quarter of 1989.

For the nine months ended Sept. 30, the bank reported a net loss of $20.5 million, or $4.88 per share, compared with a net loss of $20.6 million, or $4.91 per share, for the first nine months of 1989.

Henry B. Garmon, chairman and chief executive officer of Fulton Federal, said that Fulton Federal continues to suffer from operating losses primarily resulting from the effects of a low net interest spread, combined with provisions for possible losses on certain loan and real estate assets necessitated by the continued weakness in the general economy and real estate market.

The third quarter results, when compared with the same quarter last year, reflected higher net interest income (after provision for possible losses on loans and securities), which increased from a net expense of $433,000 for the third quarter of 1989 to net interest income of $367,000 for the comparable quarter of 1990; higher non-interest income, which increased from $2.5 million to $3.4 million, respectively; and lower non-interest expense, which decreased from $16.7 million to $11.7 million, respectively.

The improvement in net interest income resulted primarily from a smaller provision for possible losses on loans and securities ($2.6 million for the third quarter of 1990 compared with $5.3 million for the third quarter of 1989).

Fulton Federal's non-interest income in the third quarter of 1990 included a $3.1 million gain on the sale of its mortgage servicing business. A significant factor in the lower non-interest expense in 1990's third quarter was a smaller provision for possible losses on real estate owned and repossessed assets ($1.4 million for the third quarter of 1990 compared with $5.9 million for the third quarter of 1989).

Total assets at Sept. 30, 1990, were $2.1 billion, down from $2.3 billion at Dec. 31, 1989. Stockholders' equity declined during the same period from $15

million to a negative $5.5 million.

As a result of, among other things, Fulton Federal's regulatory capital position, the bank continues to operate under an agreement with the Office of Thrift Supervision (OTS) that imposes severe restrictions on the bank's growth investments and operations.

The agreement with the OTS also requires the bank's board of directors to consider and, subject to their fiduciary duties, approve any agreement submitted by the OTS for the acquisition of or capital infusion into the bank.

In light of the bank's continuing losses and substantial capital deficiency, it is likely that any transaction involving the bank will require government assistance and that stockholders will not retain any significant equity ownership, if they retain any ownership interest at all, in the resultant institution.

The bank's board of directors continues to be willing to work with the OTS to effect a resolution of the institution's capital deficiency, according to Garmon.

#90299b0810 10/26/1990 ~Business Wire

PORTLAND, ME (OCT. 26) BUSINESS WIRE - Peoples Heritage Financial Group Inc. (NASDAQ:PHBK) announced Friday a substantial increase in its quarterly provision for loan losses to $76.4 million which resulted in a loss of $44.7 million, or $5.48 per share for the quarter ended Sept. 30, 1990.

This compares with a $6.0 million profit, or 71 cents per share for the same quarter in 1989. For the nine months ended Sept. 30, 1990 the company reported a net loss of $54.1 million, or $6.69 per share compared to a profit of $17.6 million, or $2.08 per share for the first nine months of 1989.

The increased provisions resulted in an $84.0 million reserve for loan losses at Sept. 30, 1990. This reserve represents 61.51 percent of all non-performing assets at Sept. 30, 1990, compared with reserves at June 30, 1990 of $36.3 million, or 33.89 percent of non-performing assets.

The company continues to be well capitalized with a primary capital ratio of 7.95 percent at Sept. 30, 1990, which is well above the required minimum of 5.5 percent. Shareholders' equity at Sept. 30, 1990 totaled $179.2 million, with 8,170,117 shares outstanding, resulting in a book value of $21.94.

William J. Ryan, president and chief executive officer of Peoples Heritage

Financial Group Inc., said, ''This significant increase in loan loss reserves was influenced by several important events:

''Our non-performing loans grew $18.5 million during the third quarter to $120.1 million at quarter end, or 5.95 percent of total loans. Total non-performing assets grew $29.4 million to $136.6 million at quarter end, or 4.57 percent of total assets. The expectation three months ago of no further weakening in the economy proved to be wrong.

''Second, declining real estate values, as evidenced by recent appraisals, required a more extensive reserve as we assessed the weakening collateral value supporting troubled loans. Reduction in real estate values accounted for a major portion of the $28.7 million of net charge offs during the quarter.

Third, our ongoing close internal review continues to identify deterioration in asset quality in the commercial portfolio.

Preliminary results of several weeks of an ongoing regular FDIC and State bank examination of Peoples Heritage Bank supports the conclusions of our independent loan review staff.''

To preserve capital, the company's board of directors voted to suspend the dividend payment for the third quarter. Payment of future dividends will be reassessed quarterly and will be dependent on the board's consideration of the company's results of operations, economic trends and other factors. Other Financial Data

At Sept. 30, 1990, total assets were $3.0 billion, a 7.92 percent increase over Sept. 30, 1989. Total loans have decreased by 2.12 percent from $2.1 billion a year ago to $2.0 billion at Sept. 30, 1990.

Ryan also noted several positive results during the third quarter:

-- The company generated $7.4 million of pre-tax operating earnings prior to the provision for loan losses.

-- Peoples Heritage Bank, the company's major subsidiary, continues to perform as the leading Maine-based residential mortgage lender in the state. In spite of the depressed real estate market, the bank originated $122.1 million of residential mortgages as of Sept. 30, 1990, 18.47 percent ahead of the same period in 1989. Additionally, the company is experiencing favorable growth in consumer lending, which is up 18.2 percent over a year ago.

-- In September, Peoples Heritage Bank purchased, at no premium, approximately $250 million of deposits in Maine from the Resolution Trust Corp. Over the next several months, these core deposits will replace higher cost funding sources. In addition, the bank continues to strengthen its fee income, thereby building a foundation for future earnings.

-- First Coastal Bank Inc., the company's New Hampshire subsidiary, generated net income during the third quarter of $855 thousand in spite of the adverse economic environment.

-- The company's cost containment measures continue to produce a favorable operating expense ratio to average assets of 2.10 percent for the nine months ended Sept. 30, 1990. Looking Ahead

The company continues to actively manage those events within its control. For example, cost containment and expense reduction objectives have been intensified. Loan policies are continually monitored in an effort to reduce future deterioration of current loan production. Additional resources are being committed to areas of the company to expedite loan workout negotiations and to manage effectively acquired real estate.

Two significant ingredients beyond the company's control remain that of real estate values and the overall health of the economy. The uncertainty of these issues and their importance to the company will in large part influence future earnings.

Peoples Heritage Financial Group Inc. is the largest Maine-based bank holding company with assets of $3.0 billion at Sept. 30, 1990. The holding company holds three direct subsidiaries: Peoples Heritage Bank, which operates over 50 banking centers located throughout Maine and its principal subsidiaries, Heritage Investment Planning Group Inc. and Northeast Leasing; Oxford Bank and Trust, which operates five offices in western Maine; and First Coastal Banks Inc., a N.H. bank holding company which is comprised of the First National Bank of Portsmouth and Merchants National Bank, which operate 11 offices in the Portsmouth/Dover area.

ST. LOUIS (OCT. 26) BUSINESS WIRE - Southwestern Bell Corp. (NYSE:SBC) Friday announced the election of Tulsa, Okla., executive James E. Barnes to its

board of directors.

''Mr. Barnes brings to the Southwestern Bell team a wealth of knowledge and experience that will be helpful to our business,'' said Edward E. Whitacre Jr. chairman and chief executive officer of Southwestern Bell Corp. ''We're pleased to have him join us.''

Barnes is replacing John W. Bates Jr. of Tulsa, chairman emeritus of Reading & Bates Corp. who has retired from the Southwestern Bell Corp. board. The new board member is not related to Zane E. Barnes, chairman emeritus of Southwestern Bell Corp. The election is effective Nov. 1.

Barnes, 56, is chairman of the board, president and chief executive officer of MAPCO Inc., a diversified energy company headquarted in Tulsa. He joined MAPCO in 1983 as senior executive vice president and chief executive officer, became president and chief executive officer in 1984 and chairman of the board in 1986. He is a member of MAPCO's board of directors.

Prior to joining MAPCO, Barnes was with Conoco, Inc. for 27 years, where he held various engineering and management positions, rising to the post of executive vice president for petroleum products in North America, responsible for all refining, marketing, transportation and natural gas and gas products activities.

A native of Ponca City, Okla., Barnes attended The University of Texas and received a degree in industrial engineering/management from Oklahoma A&M in 1957.

Barnes is a director of Vista Chemical Co., Kansas City Southern Industries Inc., BancOklahoma Corp. and the American Petroleum Institute. He is a member of the National Coal Council, the Texas Mid-Continent Oil and Gas Association and the International Institute for Strategic Studies.

He is a member and past chairman of the Oklahoma State Regents for Higher Education. He has served on the Oklahoma State University Foundation Board of Governors. He's a member of the executive committee of the Oklahoma Academy for State Goals, the Edowment Committee of the Oklahoma Foundation for Excellence and the Engineering Foundation Advisory Council at the University of Texas at Austin.

In the civic arena, he is a director of the Metropolitan Tulsa Chamber of Commerce, the Oklahoma State Chamber of Commerce and St. Francis Hospital.

He's held various leadership positions with the Boy Scouts of America, and has served on the boards of the Tulsa Opera, Tulsa Area United Way and Philbrook Museum of Art.

He's been elected to the Oklahoma State University and College of Engineering

Halls of Fame and has received the National Petroleum Hall of Fame Distinguished Service Award.

The election of Barnes to the Southwestern Bell Corp. board brings the number of its directors to 18.

Southwestern Bell Corp., based in St. Louis, is an international communications corporation with 1.1 million shareowners. It provides a variety of products and services through its principal subsidiaries including Southwestern Bell Telephone Co., Southwestern Bell Mobile Systems, Southwestern Bell Yellow Pages, Southwestern Bell Telecom and Metromedia Paging Services.

GREEN BAY, WIS. (OCT. 26) BUSINESS WIRE - Fort Howard Corp. Friday announced financial results for its third quarter ended Sept. 30.

For the third quarter, Fort Howard's tissue sales increased 10.3 percent to $299,949,000 compared to 1989 third quarter sales of $271,921,000. For the first nine months of 1990, sales were $858,888,000, an increase of 9.5 percent over 1989 sales of $784,150,000 for the like period.

Operating income of $74,274,000 for the third quarter of 1990 was 15.8 percent higher than the third quarter of 1989. Operating income for the first nine months increased 10.2 percent to $196,934,000 from $178,629,000 in the first nine months of 1989.

In connection with the company's previously announced divestiture of certain cup operations, Fort Howard changed its accounting for the cup operations to the equity method during the third quarter of 1989. Accordingly, the losses before equity earnings reported in the accompanying financial statements include only the results of Fort Howard's tissue business.

The company's other income in the third quarter and the first nine months of 1990 includes interest earnings of $8,200,000 and $23,300,000, respectively, on promissory notes and debentures received in connection with the transfer of the capital stock of its North American cup operations to Sweetheart Holdings Inc.

GREENWICH, Conn. (OCT. 26) BUSINESS WIRE - For the quarter ended Sept. 30, 1990, Dynamics Corp. of America (NYSE:DYA) had net sales of $28,792,000 and net income of $234,000, or 6 cents per share.

This compares with net sales of $31,920,000 and net income of $1,363,000, or 33 cents per share, in the third quarter of 1989.

Per share income was computed on the basis of weighted average common shares outstanding which were 3,897,939 in the current quarter and 4,005,355 in 1989.

For the nine-month period ended Sept. 30, 1990, DCA had net sales of $85,036,000 and net income of $504,000, or 13 cents per share. This compares with net sales of $92,776,000 and net income of $2,561,000, or 63 cents per share, for the same period in 1989.

Third quarter and nine-month results include $78,000 and $938,000 of income of CTS Corp. as compared to $850,000 and $2,373,000 of such income in the same periods in 1989, respectively. This represents the company's proportionate share of CTS' earnings in accordance with the equity method of accounting required for that investment.

Dynamics Corp. of America is a diversified company which manufactures electronic components, mobile vans and transportable shelters for specialized electronic and medical diagnostic equipment, portable electric housewares and commercial appliances, air distribution equipment, specialized air conditioning equipment and generator sets.

#90299b0830 10/26/1990 ~Business Wire
HUNTINGTON STATION, NY (OCT. 26) BUSINESS WIRE - Protein Databases Inc. (OTC:PDIQ) Friday reported a net loss for the third quarter ended Sept. 30, 1990 of $194,740 on revenues of $324,269, compared with net loss of $316,409 on revenues of $127,239 for the quarter ended Sept. 30, 1989.

The per share loss was $.002 in the third quarter of 1990 compared with $.003 in the same period of 1989. The net loss for the nine months ended Sept. 30, 1990 was $468,921 on revenues of $1,364,654, compared with a net loss of $1,012,607 on revenues of $496,315 for the nine months ended Sept. 30, 1989.

The per share loss was $.005 in the nine months ended Sept. 30, 1990 compared with $.01 in the same period of 1989. The revenues include Original Equipment Manufacturers (OEM) equipment costs of $129,435 and $567,503 in the third quarter and nine months ended Sept. 30, 1990, respectively, as compared with $22,708 and $169,839 of such costs in revenues for the third quarter and first nine months of 1989, respectively.

''Revenues, net of OEM equipment costs, increased approximately 86 percent from 1989 to 1990's third quarter and in the nine months ended Sept 30, 1990, such revenues increased approximately 121 percent compared to the same period of 1989 (excluding license fees from Millipor Corp. of $75,000 in the first nine months of 1990),'' according to Stephen H. Blose, president and chief executive officer.

However, the company's present financial position remains tenuous. Additional funds may be required to repay loans from a stockholder on December 31 and for working capital after Dec. 31. The company is exploring potential sources of additional financing but there can be no assurance that additional funds from external sources will be available, in which event, the company may be forced to cease operations.

Protein Databases Inc. markets protein and DNA analysis software systems for life sciences research and biotechnology applications at universities and research hospital laboratories, and at government, industrial and other research laboratories and comparable foreign institutions.

NEW YORK (OCT. 26) BUSINESS WIRE - Philip Morris Companies Inc. has announced that Steven C. Parrish is appointed vice president and general

counsel of Philip Morris U.S.A. and James J. Morgan is named corporate vice president, marketing planning of Philip Morris Management Corp.

Both appointments are effective Oct. 29, 1990.

In his new position, Parrish will be responsible for management of Philip Morris U.S.A.'s legal affairs, as well as overseeing environmental tobacco issues. He will report to Murray H. Bring, senior vice president and general counsel, Philip Morris Companies Inc.

Since June of 1990, Parrish served as vice president, corporate scientific affairs, Philip Morris Management Corp. Previously, he was with Philip Morris International in Lausanne, Switzerland. Prior to joining the company, Parrish was a partner in the law firm of Shook, Hardy and Bacon. Parrish succeeds Mr. Frederic S. Newman, previously vice president and general counsel, Philip Morris U.S.A., who is leaving the company to pursue other interests.

Morgan, who had served as senior vice president, planning, Philip Morris U.S.A., since January 1990, will report to Marc S. Goldberg, senior vice president, corporate planning, Philip Morris Companies Inc.

Previously, Morgan was senior vice president, corporate marketing for Kraft General Foods, Inc., an operating company of Philip Morris Companies Inc., from June 1989 to January 1990.

Morgan joined the company in 1965 as assistant to the advertising production manager, Philip Morris U.S.A. He served in a variety of positions within Philip Morris U.S.A., becoming executive vice president of marketing, a position he held from 1978 to 1983. Morgan was appointed staff vice president, marketing planning of Philip Morris Companies Inc., in September 1988.

Philip Morris Companies Inc. has five principal operating companies: Philip Morris Incorporated (Philip Morris U.S.A.); Philip Morris International Inc.; Kraft General Foods, Inc.; Miller Brewing Company, and Philip Morris Capital Corporation.

NEW YORK (OCT. 26) BUSINESS WIRE - Vincent J. Buccellato has been appointed senior vice president, marketing and sales, for Philip Morris International Inc., effective Oct. 29, 1990.

He will report to Dinyar S. Devitre, senior vice president and chief administrative officer.

Most recently Buccellato was senior vice president, sales, for Philip Morris U.S.A., a position he held since January 1990. Before that, he was vice president, sales, for Philip Morris U.S.A., for seven years.

Buccellato has served in a variety of sales and marketing positions with Philip Morris U.S.A. since he first joined the company in 1967 as a Marketing Analyst. His career at Philip Morris was interrupted in 1968, when he was called to serve as an Army First Lieutenant in Vietnam. He was awarded the Bronze Star with two oak leaf clusters, the Vietnamese Cross of Gallantry and the Purple Heart.

He returned to Philip Morris U.S.A. in 1970 to fill various marketing and field sales assignments, including brand manager positions with Merit and Marlboro. In 1980, Buccellato was appointed vice president, marketing of Benson & Hedges Ltd. in Canada. He was named Group Director, brand management for Philip Morris U.S.A. in April 1983.

Buccellato graduated from the University of Notre Dame in 1967 and received his master of business administration degree from Fordham University in 1976. He lives in Oakland, N.J.

Philip Morris International Inc., a subsidiary of Philip Morris Companies Inc. is the largest international private tobacco company. It manufactures and markets more than 140 cigarette brands through affiliates and licensees in 57 countries and territories. The company employs 26,000 people in more than 140 countries.

#90299b0854 10/26/1990 ~Business Wire

LITTLE ROCK, Ark. (OCT. 26) BUSINESS WIRE - Worthen Banking Corp. (ASE:WOR) has announced that the corporation's Little Rock affiliate, Worthen Bank & Trust Co., N.A. (Worthen Bank), has acquired from the Resolution Trust Corp. (RTC) certain assets and deposit liabilities of First State Savings Bank, FSB of Mountain Home, Ark. (First State).

First State operates two offices in Mountain Home and one branch each in Bull Shoals and Salem, Ark. The four offices of First State will open as branches of Worthen Bank on Monday, with the Northeast branch in Mountain Home also being open on Saturday as a branch of Worthen Bank.

Worthen Bank submitted the winning bid of approximately $1.1 million for the acquisition of First State, which includes approximately $100 million in deposits. The acquisition gives Worthen Bank total assets of approximately

$956 million and Worthen Banking Corp. total assets of approximately $2.1 billion.

''With this purchase, Worthen Bank expands its role as the first commercial bank in Arkansas to operate a statewide network of branches,'' said Curt Bradbury, chairman, president, and chief executive officer.

''While Worthen Banking Corp. has had a statewide presence through its affiliate banks prior to this, the purchase of First State by Worthen Bank enhances our existing market penetration in north central Arkansas and introduces us to several new communities,'' Bradbury said.

In addition to its 15 branches in Little Rock and Maumelle, Worthen Bank now has branches in Fayetteville, Springdale, Rogers, Bentonville, Belle Vista, Bull Shoals, Mountain Home, Salem, Callico Rock, Pocohontas, Walnut Ridge, Jonesboro, Harrisburg, Newport, Ashflat, Batesville, Heber Springs, Searcy, Des Arc, and Hot Springs, Ark.

Worthen representatives met with the former First State employees late Friday. Worthen has established a hotline telephone number (1-800-477-2264) for First State customers and is sending additional Worthen Bank staff to assist the First State branch personnel in greeting customers, answering questions and providing other information about the transition.

Customers may continue to use their existing First State checks, deposit slips and other materials during the transition period, Bradbury said.

''We are very excited about our new employees and the opportunity to serve our new customers in Mountain Home, Salem, and Bull Shoals,'' Bradbury said.

''We are also excited about the added momentum that this creates for our bank and our corporation,'' Bradbury stated. ''When you add these four new locations to those already served by our 10 banks around the state, Worthen Banking Corp. now has a banking network including 91 branch locations serving 40 different Arkansas communities,'' Bradbury said.

''This statewide presence increases the opportunity for Worthen to make a significant contribution to the economic development not only in each of these communities, but also to the state as a whole,'' Bradbury said.

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows on Oct. 24, 1990, Todd Shipyards Corp.(TICKER: TOD) announced that the Environmental Protection Agency (EPA) rejected the company's offer to perform a remedial investigation at its subsidiary, Todd Pacific Shipyards Corp. located in Seattle, Washington.

Todd Pacific was identified by the EPA as part of the Harbor Island Superfund Site.

Last spring, the EPA initiated a remedial investigation/ feasibility study for control of the release or threatened release of hazardous substances at portions of the site.

The company reports the EPA has elected to continue its own investigation and intends to conduct it approximately between January and May of 1991.

The EPA has previously informed the company that it has information that Todd is a potentially responsible party for the site and has notified Todd of its potential liability with respect to the shipyard.

Investigations of the site indicate elevated levels of contaminants in soils, groundwater, and marine sediments which, the EPA said, pose a significant risk to human health and the environment.

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows Trudy Corp., on Oct. 10, 1990, entered an asset purchase agreement with Good Stuff Corp. providing for the sale of its sports licensed inventory and accessories.

The agreement also provides for the assignment of related sports licenses held by Trudy with the National Hockey League Services Inc., National Basketball Association Properties Inc., National Football League Properties Inc., Major League Baseball Properties Inc. and the Collegiate Concepts Inc. /International Collegiate Enterprises Inc.

The purchase agreement provides for the payment to Trudy of approximately $260,000 in cash, certain royalty payments based on sales made by the company through Dec. 31, 1990, and the assumption by Good Stuff Corp. of certain liabilities.

Trudy Corp. states that due to continuing losses, it believes it will either be unable to continue as a going concern or that its size of operations will be significantly reduced.

The company's executive offices are located at 165 Water Street, Norwalk, CT 06856, and its telephone number is (203) 838-6009.

#90299c0030 10/26/1990 ~Comtex

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows on Sept. 13, 1990, Philip E. Jakeway Jr., chairman of the board and president of Wilfred American Educational Services,(TICKER: WAE) began a leave of absence from operational duties until Dec. 31, 1990, to concentrate on litigation matters.

On Oct. 10, 1990, the board elected Neal G. Winnig as a director, increasing its size from six to seven.

In other news, on Oct. 15, 1990, after a non-jury trial before the court, Wilfred American and Wilfred Academy Inc., a Massachusetts subsidiary which is no longer in operation, were convicted of nine counts of mail fraud, involving events occurring before March, 1986.

The court previously had dismissed all charges against the company's subsidiary, Massachusetts American Business Institute Inc.

The court also dismissed three of the twelve counts against Wilfred American and Wilfred Academy Inc.

As a result of the conviction, Wilfred American may be subject to a fine, the amount of which will be determined by the court on sentencing, scheduled for Dec. 17, 1990.

Additionally, the U.S. Dept. of Education could seek to institute proceedings to suspend, limit or terminate the company and/or its schools, from participation in governmental financial aid programs.

The company's address is 1657 Broadway, New York, NY 10019, and its telephone number is (212) 582-6690.

#90299c0031 10/26/1990 ~Comtex

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows POP Radio Corp.(TICKER: POPX) announced Oct. 24, 1990, that it has been served with a notice of appeal from a final order and judgement which had approved a settlement in two actions consolidated under the title The Kaufman Fund Inc. et al. v. Heritage Media Corporation (TICKER: HTG) et al.

The judgement, entered Oct. 16, 1990, had approved a class action settlement, pursuant to which all shareholders of POP common stock on Feb. 23, 1990 or their successors in interest and transferees will receive $20.50 per share in cash, plus an amount equal to interest at the rate of 10% per annum from Aug. 1, 1990.

This is pursuant to a previously disclosed merger agreement between POP and Heritage Media Corp.

Additionally, all persons who held shares of POP Radio common stock on Nov. 1, 1989, and who sold these shares at any time up to Feb. 23, 1990, would receive $0.25 per share, subject to certain limitations.

The company reports the notice of appeal was filed on behalf of Bruce T. Dugan an alleged former holder of 1,250 shares of POP Radio common stock, who was entitled to a payment of $0.25 per share under the class action settlement approved by the court.

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows Great Southern Bancorp Inc.(TICKER: GSBC) on Oct. 4, 1990, announced the declaration of its third consecutive quarterly dividend, and that approval had been granted by the Office of Thrift Supervision (OTS) for a second stock repurchase program.

This pay-out, the company reports, marks the first time shareholders will have the opportunity to reinvest their dividends via Great Southern's Dividend Reinvestment Plan, instituted in August.

To date, 25% of Great Southern shareholders have elected to participate in the program.

The dividend of $0.09 per share for the first quarter of fiscal 1991 (Sept.)

will be payable as of Oct. 23, 1990, to shareholders of record on Oct. 15, 1990.

It represents an annualized yield of 4% based on the initial offering price of Great Southern's stock.

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows Firstier Financial Inc.(TICKER: FRST) on Oct. 11, 1990, announced a decision to substantially increase its provision for loan losses following an in-depth review of its loan portfolio and other assets.

A decision was also made to reduce the carrying value of other assets owned and goodwill.

As a result, the corporation announced a net loss of $17.56 million for the third quarter and a net loss of $4.77 million for the first nine months, compared to net income of $5.26 million and $18.23 million in the same periods of 1989.

The net loss, on a per share basis, is $3.02 for the third quarter and $0.82 for the first nine months, compared to earnings of $1.05 and $3.14 for the same periods last year.

WASHINGTON (OCT. 26) COMTEX - The 8-K report filed at the SEC shows on Oct. 17, 1990, Insituform East Inc.(TICKER: INEI) announced the U.S. attorney's office in Baltimore, Maryland reported a grand jury in Baltimore indicted one former and one current officer of the company.

The indictments were in connection wiht events that occurred in 1986.

The grand jury's indictment alleges that Mr. Thomas C. Trexler, the company's former chief financial officer, and Mr. Arthur G. Lang, III, the company's president, conspired to trade the company's stock on the basis of material, non-public information between April and July 1986 and caused certain of the company's records to be falsified during such period.

The company understands that Insituform East itself is not a target of the grand jury investigation.

Insituform East reports that Mr. Lang has advised the company he will take administrative leave.

Insituform East does not believe that this development should have any material effect on its operations.

#90299c0058 10/26/1990 ~Comtex

WASHINGTON (OCT. 26) COMTEX - Graphic Scanning Corp. filed a Form 8-K with the SEC stating it believes that a story released by the Bloomberg wire service on Oct. 17, 1990 is "inaccurate in several respects."

Graphic Scanning claims the release is "purportedly" based on an interview with its president, Robert J. Cymbala.

The company states it does not expect "to announce asset sales that would cut total debt by a third and fund 1991 working capital requirements," as stated in the release, nor does it expect to announce any sales of assets "by the end of 1990."

The story also stated Graphic Scanning is involved in negotiations with New York investor Mario Gabelli, which the company denies.

Graphic Scanning also added a section of the article in which Cymbala said asset sales would pay for $19 million in capital expenditures needed in fiscal 1991 to expand the company's cellular telecommunications and radio paging businesses and that proceeds from such sales would be used to pay off about $33 million in debt from U.K and U.S. operations are incorrect.

As previously reported, Graphic Scanning notes its recurring operating losses, a working capital deficiency, and defaults under the agreements governing its bank loans raise substantial doubt about its ability to continue as a going concern in the long term absent a substantial improvement in its cash flow, a major infusion of capital, or a sale of one or more of its major assets.

A spokesman for Bloomberg L.P. said it stands by the story as accurate.

TOKYO (OCT. 26) - Trade talks between Japan and the European Economic Community broke down here Friday due to Japan's refusal to open its market to imports of European food products and clothing, an EEC source said.

"We're frustrated. Nothing has been resolved," the source said, adding that Japanese officials postponed the bilateral talks until an end-of-year meeting of the General Agreement on Tariffs and Trade.

The EEC is seeking reduced duties on imports of agricultural products and leather goods such as shoes. The community also wants a bigger fish quota.

"There was no deep discussion," said an official at Japan's Ministry of

International Trade and Industry.

The talks were led by European Commision Director General for External Affairs Horst Gunter Krenzler and Japanese Vice Foreign Minister Koji Watanabe.

#90299d0880 10/26/1990 ~French/German News Agency

KABUL (OCT. 26) - Security forces beefed up road blocks and intensified checks on vehicles in the Afghan capital Kabul after suspected mujahedeen guerrillas exploded a powerful car bomb here, officials said Friday.

The explosive device planted inside a Volkswagen Beetle car went off in a busy commercial area near President Najibullah's palace complex and the international communications centre Thursday.

A government spokesman said at least six people were seriously wounded in the blast.

Officials said they suspected mujahedeen guerrillas were responsible for the blast, which rocked the capital hours after the spokesman announced that a major mujahedeen onslaught on Kabul had been stalled.

More than usual armoured vehicles were seen outside government buildings and key intersections here while soldiers armed with automatic weapons searched cars for explosives.

Security forces were placed on maximum alert and the main entry points to the city were reinforced with more soldiers, officials and witnesses said.

The officials said the bomb was probably triggered by a timer and aimed at shoppers and office workers returning home.

Windows were shattered in two four-storey buildings near the blast site, while two other cars were wrecked in the explosion heard several kilometres (miles) away.

It was the worst bomb attack in the capital since the January 31 car bomb blast in which at least five people died and more than 100 were wounded. Nineteen people were killed in a similar attack on July 15, 1989.

Diplomats here said they expected more incidents of sabotage in Kabul because the guerrillas had failed in their attempt to launch a full-scale frontal assault on the city.

-30- 1910

#90299d0890 10/26/1990 ~French/German News Agency

PARIS (OCT. 26) - Monday's decision by the European Economic Community to lift its sanctions against China "will allow us to reopen talks on things which were blocked," French Finance Minister Pierre Beregovoy said here on Thursday.

Specialists said here that the EEC decision would make it possible for France to reach a new long-term government loan agreement, worth between 1.5 and two billion francs (300 million and 400 million dollars), within the next few months.

French public loans to China were frozen in June last year, after the bloody repression of pro-democracy protesters in Beijing's Tiananmen Square.

Analysts here estimate that the sanctions resulting from the Tiananmen Square events have resulted in a drop of around 25 percent in France's exports to China.

Over the first eight months of this year, France sold goods and services worth five billion francs (one billion dollars) and imported goods and services worth 7.8 billion francs (1.56 billion dollars).

For the whole of 1989, exports stood at 9.9 billion francs - up from five billion francs (one billion dollars) in 1988.

The value of French imports from China was 11 billion francs (2.2 billion dollars) for 1989.

TOKYO (OCT. 26) - Japan's biggest food processor Ajinomoto Co. Inc. said Friday its net profit rose 0.6 percent from a year earlier to 8.3 billion yen (60 million dollars) in the six months to September.

Sales grew 3.4 percent to 237 billion yen (1.7 billion dollars) with higher turnover in all sectors, it said. Sales of foodstuffs alone amounted to 108 billion yen (783 million dollars) while sales of monosodium glutamate and other seasonings came to 48 billion yen (348 million dollars).

Ajinomoto forecast a net profit of 16.5 billion yen (120 million dollars) for the year to March on sales of 515 billion yen (3.7 billion dollars).

TOKYO (OCT. 26) - Yamanouchi Pharmaceutical Co. Ltd. said the company was negotiating with Royal Gist-Brocabes N.V., a major Dutch chemical and food company, on a possible joint venture.

Yamanouchi officials said the leading Japanese pharmaceutical company planned the venture with the Dutch firm in a bid to expand its sales networks in Europe.

They said that the planned tie-up might include Yamanouchi's possible acquisition of Royal Gist-Brocabes' pharmaceutical division.

TOKYO (OCT. 26) - Japanese consumer electronics manufacturer Sharp Corp. said Friday its net profit rose 32.1 percent from a year earlier to 24.2 billion yen (175 million dollars) in the six months to September.

Sales grew nine percent to 565 billion yen (4.1 billion dollars) in the same period, the company said.

Sharp's sales of information equipment and electronic parts jumped 11.6 per cent to 264 billion yen (1.9 billion dolars) while sales of electronic equipment fell one percent to 146 billion yen (1.1 billion dollars).

Consumer product sales grew 8.6 percent to 99 billion yen (717 million dollars) and sales of audio equipment climbed 28.3 percent to 57 billion yen (413 million dollars), the company said in a statement. Exports rose 3.8 per cent to 259 billion yen (1.9 billion dollars).

Sharp forecast its net profit to reach 44 billion yen (319 million dollars) in the year to March with sales of 1,140 billion yen (8.3 billion dollars).

LONDON (OCT. 26) - British Chancellor of the Exchequer John Major has acknowledged for the first time that the British economy might have entered a recession.

He told the House of Commons on Thursday that "I can certainly confirm that output is slowing and has been slowing over the period of the last two or three months, as I have repeatedly said.

"As to whether it is within the normal definition of recession,...that is a matter we shall soon see".

Observers said that this formulation of words was intended to prepare the way for forecasts which the chancellor will make when he publishes next month his autumn statement of objectives for the coming year.

TOKYO (OCT. 26) - Japan's NEC Corp., the world's biggest semiconductor manufacturer, said Friday its net profit jumped 30 percent from a year earlier to 38.6 billion yen (280 million dollars) in the six months to September.

Sales climbed 9.8 percent to 1.38 trillion yen (10 billion dollars) in the same period despite a decline in exports and lower sales of electronic devices, home electronics and other items, the company said.

Computer sales advanced 10.9 percent to 616 billion yen (4.5 billion dollars) while sales of communications equipment leapt 20.1 percent to 445 billion yen (3.2 billion dollars), the company said.

But sales of electronic devices, including semiconductors, declined 2.2 per cent to 278 billion yen (two billion dollars) while sales of home electronics and other items dropped 13.2 percent to 39 billion yen (283 million dollars). Exports also fell, by 3.1 percent to 304 billion yen (2.2 billion dollars).

NEC forecast its net profit in the year to March to climb 10.8 percent to 83 billion yen (601 million dollars) with sales expanding 6.8 percent to 2.95 trillion yen (21.4 billion dollars).

#90299d1170 10/26/1990 ~French/German News Agency

TOKYO, Oct 26 (AFP) - Japan's biggest computer manufacturer Fujitsu Ltd. said Friday its net profit grew 3.2 percent from a year earlier to 29.4 billion yen (213 million dollars) in the six months to September.

Sales climbed 10.8 percent to 1.07 trillion yen (7.8 billion dollars) despite lower sales of electronic devices and declining exports.

Fujitsu's sales of data-processing equipment climbed 13.3 percent to 745 billion yen (5.4 billion dollars) while sales of communications equipment jumped 19.2 percent to 192 billion yen (1.4 billion dollars).

But sales of electronic devices such as semiconductors fell 9.6 percent to 134 billion yen (971 million dollars), it said. Exports, accounting for 20 per cent of all sales, fell 1.5 percent to 211 billion yen (1.5 billion dollars).

The company forecast net profit in the year to March to climb 19.4 percent to 79 billion yen (573 million dollars) with sales increasing by 10.6 percent to 2.35 trillion (17 billion dollars).

#90299d1190 10/26/1990 ~French/German News Agency

TOKYO (OCT. 26) - Japan has proposed to North Korea to hold preparatory talks in Beijing in early November for establishing diplomatic ties, the Japanese press reported Friday quoting governent sources.

The Japanese Foreign Ministry will be sending a delegation led by a high-ranking ministry officials to the proposed preliminary talks, the reports said.

But Foreign Ministry officials, asked to confirm the reports, said nothing has been decided yet on the preparatory talks.

According to the reports, Japan hopes to hold full-fledged talks with Pyongyang after a regular meeting of Japanese and South Korean cabinet ministers slated for November 26-27 in Seoul.

The move follows an agreement reached in September between Japanese and North Korean political parties, urging their respective governents to open inter-governmental talks toward normalizing diplomatic ties "within November 1990," the reports said.

Accra (OCT. 26) - The first major consignment of food for several months has arrived in the beleagured Liberian capital, Monrovia, according to reports reaching here Friday.

A ship carrying about 1,800 tons of rice, cooking oil and other rations arrived at the port of Monrovia from the neighbouring Ivory Coast.

Hundreds of thousands of people in Liberia are starving, following 10 months of civil war that has destroyed the West African country's agriculture, economy and infrastructure.

It was the first ship to dock since the five-nation West African peacekeeping force in Liberia declared the port safe.

The force, now said to number some 9,000 troops, said it had blunted the ability of the main rebel group, the National Patriotic Front of Liberia, to shell the port.

The peacekeepers said Liberian airports were also safe, but sources added that the runways had been badly damaged in the fighting and needed to be repaired.

HARARE (OCT. 26) - Zimbabwe has welcomed the lifting of an 18-month ban on beef exports to the European Economic Community worth more than 100 million U.S. dollars a year, the Herald newspaper reported Friday.

The EEC banned the import of Zimbabwean beef in May last year after an outbreak of foot-and-mouth disease, and lifted it this week after inspectors from Brussels gave the country's cattle a clean bill of health.

Zimbabwe's quota for exports to the EEC has also been increased by 1,000 tonnes to 9,100 tonnes a year, according to Agriculture Minister Witness Mangwende.

He said the resumption of trade with the EEC should push earnings from beef exports from around 13.5 million dollars this year to some 125 million dollars next year.

#90299d1530 10/26/1990 ~French/German News Agency

Dar es Salaam (OCT. 26) - Tanzanians go to the polls Sunday in general elections which are expected to give President Ali Hassan Mwinyi a mandate to implement political reforms aimed at rooting out corruption.

Mwinyi, unopposed in his race for a second five-year term, is prohibited under Tanzanian law from seeking a third term.

Freed from campaign pressures, he is likely to institute sweeping changes which a politician facing re-election might shy away from, analysts here say. He has hitherto pursued a cautious reform course.

Also up for election are 166 of the National Assembly's total 241 seats. The remaining seats are to be filled by regional appointees.

Voters have a choice of two candidates for each post, but all candidates are hand-picked nominees of the Revolutionary Party of Tanzania (Ccm).

Sunday's ballotting may mark the last time that Tanzania has a one-party election. Former President Julius Nyerere opened national debate in February on possible legalization of other parties.

Mwinyi succeeded Nyerere as president November 5, 1985, and as Ccm chairman this past August.

Eschborn (OCT. 26) - Germany imported 5.3 million tons of oil in September, down 7.5 percent from the same month last year, but the average price was 38.4 percent higher, the Federal Office of Industry said here Friday.

The office said that despite the lower import volume, the oil bill for September came to 1.9 billion marks (1.25 billion dollars), 406 million marks, or 27 percent, higher than the September 1989 import cost. The per-tonne average price was 38.4 percent higher.

For the first nine months, Germany's oil imports reached 53.7 million tons, up 11.4 percent on the corresponding 1989 period.

The average oil import price for the nine-month period was 3.7 percent lower so that the import bill, of 13.2 billion marks, was only some 7.3 per- cent higher than what Germany paid for its oil in the first three quarters of 1989, the office said.

Britain, with deliveries of 11.4 million tons, was Germany's biggest supplier of oil in the first nine months of 1990, followed by Libya (8.76 million), the Soviet Union (4.57 million), Saudi Arabia (4.56 million) and Nigeria (4.27 million tonnes), the report said.

#90299d1660 10/26/1990 ~French/German News Agency
CAIRO (OCT. 26) - Soviet presidential envoy Evgeni Primakov held talks here Friday with Foreign Minister Esmat Abdel Meguid on the Gulf crisis, Egyptian officials said.

Mr. Primakov arrived in Cairo from the Syrian capital, where he delivered a message to President Hafez al-Assad from his Soviet counterpart Mikhail Gorbachev.

The Soviet envoy, who was also here earlier in the week, was due to meet President Hosni Mubarak later Friday after the Egyptian leader's four-day tour of the Gulf.

Mr. Primakov will travel on to Saudi Arabia and Iraq as part of Soviet diplomatic efforts to find a solution to the Gulf crisis.

Reliable Soviet sources in Baghdad said the envoy was expected in the Iraqi capital on Sunday for his second visit in less than a month.

#90299d1740 10/26/1990 ~French/German News Agency
Manila (OCT. 26) - The Government is studying a proposal to amnesty all military rebels in a move to stgrengthen national unity, President Corazon Aquino said Friday.

The opposition, led by Vice President Salvador Laurel and Senator Juan Ponce Enrile, made the suggestion in an unprecedented meeting with Mrs. Aquino and her close advisers Thursday.

But the president immediately doused hopes the meeting would lead to a peace pact with her two most ardent critics - both former members of her cabinet - she had previously linked with past coup attempts.

''It (the meeting) does not aim at reconciliation of political differences but at participation of leaders of different political persuasions in a task that transcends political differences,'' Mrs. Aquino stressed.

In another move, the president directed officials to file charges against those found responsible for the violence that marred Wednesday's general strike by militant workers.

The strike dissipated on its third day Friday after leaders agreed to compromise with the government on their demands for higher wages.

But before the workers could lift their pickets, a policeman and two suspected communist rebels were killed in a shootout inside a bus in Pila town, Laguna province.

Military authorities said guerrillas torched 24 buses since Sunday in various parts of the country.

#90299d1770 10/26/1990 ~French/German News Agency
MIAMI, Florida (OCT. 26) - A Cuban intelligence official who defected to Germany last Sunday said four army officers executed in 1989 on drug trafficking charges had plotted against Cuban President Fidel Castro, a U.S. newspaper reported.

The defector, former Major Juan Manuel Rodriguez Camejo, was interviewed by the Spanish-language daily El Nuevo Herald. He said he was holed up in a secret hiding place in Germany.

Mr. Rodriguez said the plot was led by Major General Arnaldo Ochoa as well as several other senior military leaders and civilian interior ministers.

Maj. Gen. Ochoa and three others were executed in Havana in July 1989 after

state television had broadcast their trial, in which they were found guilty of drug trafficking.

"Inside (the Cuban armed forces), several senior officers were involved in the plot and Ochoa has carried the secret (of their identity) into the grave," Mr. Rodriguez said.

Since then all the top military intelligence officials have been replaced, he said.

"The situation inside the armed forces is very tense but we are watched round-the-clock, especially since the trial," he said.

Mr. Rodriguez said he decided to leave his country because it had been deceived by the economic policies of Mr. Castro, who had refused to adapt to the global changes that evolved in the 1980s.

#90299d2010 10/26/1990 ~French/German News Agency

TBILISI, SOVIET UNION (OCT. 26) - Communists in this southern Soviet republic were expected to have the edge in general elections Sunday because of the high number of competing independentist groups and voters' inexperience with political diversity.

Thirteen parties and groupings have filed candidates for the 250-seat regional parliament, including the nationalist Popular Front headed by Nodar Natadze, Akaki Bakhadze's liberal Rustaveli Society, the Freedom Bloc headed by Irakli Shengelaia and the Round Table-Georgia, a seven-party grouping headed by independentist leader Zviad Gamsakhurdia.

Authorities have barred a Stalin Society, which scored four per cent in pre-ballot polls. But the Society's leaders issued a protest saying the ban was imposed "on a fallacious pretext".

Stalin, the late Soviet dictator, was born in Georgia.

Elections were originally scheduled for last March but postponed after nationalist movements said they needed more time to organise within the Soviet Union's budding multi-party system.

Since March, nearly 140 parties and movements have been sprung up but they have done little to concentrate forces ahead of the election, prompting a communist government official to say that "everybody feels like becoming prime minister".

At least two independence movements, the National Independence Party headed by Irakli Tsereteli and Gia Shanturia's National Democratic Party, have said they

will not take part in what they calledc an election "masquerade" Sunday.

The two parties along with other independence movements founded a Georgian National Congress that organized separate elections earlier this month. Congress leaders claimed a 50 per cent turnout for the elections but analysts said the vote was barely representative since it was boycotted by the communists and most "opposition" parties in parliament.

The Georgian National Congress held its first meeting Friday in Tbilisi. Mr. Shanturia earlier told AFP it would set guidelines for future action and organize local elections by the end of the year.

As the congress opening, Merab Alexidze, who will head the election committee, told delegates their priority was "the liberation of Georgia".

#90299d2120 10/26/1990 ~French/German News Agency

LUXEMBOURG (OCT. 26) - European Economic Community (EEC) farm and trade ministers were meeting here Friday in a last-ditch effort to hammer out an accord on farm subsidy cuts ahead of a weekend EEC summit in Rome.

There were indications Friday that they would arrive at a compromise in order to avoid heated confrontations, notably between Germany and Britain, at this weekend's summit of EEC heads of state and government at Rome.

A failure to reach an accord would also lead to accusations that EEC infighting was endangering a major General Agreement on Tariffs and Trade (GATT) conference on free trade in December, informed sources said.

The EEC is the only major economic power within GATT which has yet to present its proposals for the GATT conference. It is already two weeks late.

Germany has emerged as the main opponent of a proposal from the European Commission, the executive arm of the EEC, that subsidies to farmers be cut by 30 percent by 1996, from 1986 levels.

While the proposed cuts are considered too radical by farmers of some EEC countries, the United States and other farm exporters outside the EEC are demanding much bigger cuts in farm subsidies.

Their opening offer at the GATT talks in December will revolve around a 75 percent cut over 10 years from 1991.

By contrast, the EEC offer, over the same period, would amount to a cut in subsidies of only about 15 percent, since its 30 percent figure is backdated to 1986 and some cuts have already been made.

A German source said Thursday that Germany might be ready to accept the commission's proposal at Friday's meeting.

He said Chancellor Helmut Kohl might be satisfied by a general commitment accompanying the proposal that ways would be found to compensate German farmers for their income loss resulting from the subsidy cuts.

#90299d2160 10/26/1990 ~French/German News Agency

BAGHDAD (OCT. 26) - France's charge d'affaires, Andre Janier, met here Friday with Foreign Minister Tareq Aziz, three days after Iraq agreed to release around 300 French nationals.

Their talks focused on the Gulf crisis, Iraqi officials reported, without giving details.

The French Embassy also declined to comment on the meeting or on preparations for the departure of French nationals stranded in Iraq. No date has been set for their repatriation.

In Paris foreign ministry spokesman Daniel Bernard said that preparations were going ahead normally.

But he said it was "premature" to name a date for the return although France expected this to be by the end of the coming weekend.

Gathering the French nationals together and transferring them to Baghdad was continuing "without any particular problems," including the estimated 70 still in Kuwait, he said.

#90299d2190 10/26/1990 ~French/German News Agency

NEW DELHI (OCT. 26) - Indian police tear-gassed and caned students outside Prime Minister Vishwanath Pratap Singh's official residence here Friday as a protest against caste-based job quotas turned violent, witnesses said.

At least 25 university students were injured in the police action and 15 were taken to hospital for treatment, a student spokesmen said.

Some 400 students wearing black headbands and shouting abusive slogans against the prime minister and his controversial job quota scheme were involved in the protest outside his residence on Race Course Road in central New Delhi.

They tried to break police lines in an attempt to storm the heavily-guarded bungalow, prompting police to fire teargas shells and baton-charge the crowd.

The students, many of them girls, retaliated by throwing rocks at the police and passing vehicles as they fled from the scene, chased by baton-swinging police for almost two kilometres (1.2 miles), the witnesses said.

Student organisers said they planned to hold a "human chain" demonstration outside parliament on November 7 -- the day Mr. V.P. Singh's legislative majority will be tested amid a political crisis.

Friday's demonstration was the latest in a series of street protests against the prime minister's August 7 announcement blocking 49.5 per cent of all government and public sector jobs for backward castes.

A wave of protest suicides leaving 53 people dead has greeted the scheme, which students charge would wipe out merit as a criterion for employment in a shrinking job market. More than 50 others have attempted suicide and survived.

Meanwhile, attorney Nani Palkhivala told the Supreme Court here Friday that the report which formed the basis for the job quota announcement was "unacceptable."

SYDNEY (OCT. 26) - The PLO's regional representative here hit back Friday after New Zealand Prime Minister Mike Moore accused him of lying about attempts to free New Zealand hostages in the Gulf crisis.

Mr. Moore was reacting to reports in Thursday's Auckland Star newspaper which quoted the Palestine Liberation Organisation as saying he had rejected an offer to arrange the release of 17 hostages.

"This is the first I have heard of it. I can tell you it is just not true. It is a cruel and tragic falsehood," Mr. Moore said.

The PLO's Canberra-based representative to Australia and the Pacific, Ali Kazak, insisted he told Mr. Moore last month that Iraq was willing to release the hostages if New Zealand agreed to send a delegation to Baghdad.

Speaking by telephone on Friday, Mr. Kazak said Mr. Moore had rejected the idea when they met in Wellington.

"The main reason he didn't want to send a delegation was he thought that New Zealand would be criticised for breaking Western solidarity," Mr. Kazak said.

#90299d2220 10/26/1990 ~French/German News Agency

TOKYO (OCT. 26) - Sansui Electric Co. said Friday the company would maintain

its policy of expansion despite the reported troubles involving its parent company, the British-based conglomerate Polly Peck International.

Sansui spokesman Masato Teraoka said Sansui welcomed reports Thursday from London that administrators were appointed to take over running the running of PPI at the request of its board.

The move reflected the Polly Peck management's efforts to survive, Mr. Teraoka said.

Mr. Teraoka quoted Sansui President Tatsuya Inamiya as saying that PPI's troubles woud "not lead directly to problems for Sansui."

"Sansui do not necessarily depend on PPI in financing and business operations, and will continue to pursue its policy of promoting sales with its own efforts " he said.

On the Tokyo Stock Exchange, stock prices of Sansui which were unquoted Thursday due to massive selling, recovered 35 yen to end Friday's session at 510 yen.

Mr. Teraoka said Friday's recovery in Sansui stock prices despite the slumping stock market apparently reflected Japanese investors' confidence and support for Sansui's management.

But he said Sansui would keep a close watch on further developments in London.

#90299d2310 10/26/1990 ~French/German News Agency

MANAMA (OCT. 26) - The current crisis in the Gulf region has increased the wave of Arab emigration to Canada and the United States, according to a manpower specialist.

Syed Ghazi, president of the Chicago-based Sun Enterprises, was quoted Friday by the Gulf Daily News, published in Manama, as saying that more than 4,000 people from the Gulf had applied in response to an advertisement by his firm last month for assistance to migrate to Canada and the United States.

''The number was around 2,000 when a similar advertisement was placed six months ago,'' he said. However, Ghazi, who is on a three-day visit to Bahrain, warned prospective migrants against rushing into investment projects offered in Canada.

He pointed out that many projects in Canada, which prompted people to invest for migration facilities, were not attractive.

''According to Canadian government officials, some investors have lost up to

75,000 (U.S.) dollars,'' Ghazi said.

He added that people from the Gulf were ideally suited to migrate to Canada or the United States ''because of their better experience, training and access to modern technology.''

#90299d2340 10/26/1990 ~French/German News Agency

TOKYO (OCT. 26) - Japanese paper manufacturers Oji Paper Co. Ltd. and Jujo Paper Co. Ltd. announced Friday sharply reduced earnings accompanied by modest increases in sales in the six months to September.

Oji, the country's biggest paper concern, said its net profit plunged 20.4 percent from a year earlier to 9.9 billion yen (72 million dollars). Sales rose 2.7 percent to 238 billion yen (1.7 billion dollars).

The modest sales increase reflected a slight rise in sales of general paper, including newsprint and printing paper, offset by lower sales of wrapping paper, tissue paper and other items, the company said.

The company, an affiliate of the Mistui group with operations in Brazil, New Zealand and Canada, said the profit decline reflected heavy capital investment, higher interest rates and lower demand for certain products.

Jujo, the country's third biggest paper manufacturer with operations in the United States and Norway, said its net profit dived 48.8 percent to 3.6 billion yen (26 million dollars). Sales grew 2.9 percent to 201 billion dollars (1.5 billion dollars).

The company said its sharp profit decline mainly reflected lower prices for high quality and coated papers. Other factors included higher import costs and increased transportation and warehouse expenses.

Oji forecast its net profit in the year to March to fall 2.1 percent to 20.6 billion yen (149 million dollars) with sales rising 3.6 percent to 486 billion yen (3.5 billion dollars).

Jujo meanwhile predicted a 32.7 percent plunge in net profit to eight billion yen (58 million dollars) with sales climbing 4.2 percent to 410 billion yen (three billion dollars).

COLOGNE, GERMANY (OCT. 26) - The German Strabag construction company has obtained the release of four of its employees being held hostage in Iraq, a company spokesman said on Friday.

The men, aged between 33 and 56, had been recruited with 34 other German managers, who were still being held in Iraq, to build Basra airport.

The four freed men were due to arrive at Frankfurt airport later on Friday from Jordan.

Strabag president Herbert Werhahn had intervened personally with the Iraqi government to obtain their release.

The construction of the airport represented a contract worth 660 million Deutsche marks (440 million dollars), and was underwritten by the German state Hermes export insurance company.

#90299d2400 10/26/1990 ~French/German News Agency

TOKYO (OCT. 26) - Japan will extend grant aid worth 38.35 billion yen (300 million dollars) to Sri Lanka to help the nation overcome economic damage caused by the Gulf crisis, a foreign ministry spokesman said Friday.

Taizo Watanabe told a news conference that the aid could be considered as part of Japan's efforts to help countries suffering from the crisis, even if they were not frontline countries.

"We are very much concerned about the adverse impact on the Sri Lankan economy of the worsening situation in the Middle East," the spokesman said.

An embargo on trade with Iraq has hit Sri Lanka with an increase in crude oil

prices, a decrease in workers' remittances from the Gulf region, the costs of transporting Sri Lankans home and a fallback in export earnings.

Japan on the same day announced it had signed an agreement with the Sri Lankan government on the aid.

Of the total, 11 billion yen (86 million dollars) will be used to improve telecommunications, while another 11 billion yen will help expand the port of Colombo.

About 3.3 billion yen (26 million dollars) will support a hydroelectric power project, and the remaining 13.1 billion yen (102 million dollars) will be extended jointly with the World Bank and the International Monetary Fund to restructure the Sri Lankan economy.

#90299d2430 10/26/1990 ~French/German News Agency

ANKARA (OCT. 26) - Turkey and Argentina have concluded a deal for the construction of small-scale nuclear reactors, Turkish daily Milliyet reported Friday.

The deal involves the construction of two 25-megawatt reactors, first in San Luiz, Argentina, starting in March 1991, and then in Akkuyu, southern Turkey, six months later, the paper said.

The agreement, signed by the atomic energy corporations of the two countries and Turkish Stfa and Argentine Invap firms, also includes the transfer of reactor-building technology to Turkey, it said.

Milliyet claimed the deal was not publicised to avoid pressures from the U.S. concerned with the prospects of Turkey possessing weapons-grade nuclear fuel in six years' time and cooperating with Pakistan to make atomic bombs.

Foreign Ministry sources confirmed the deal, but they said it was not secret as the paper claimed. They said the deal falls within the framework of an agreement signed by Turkey and Argentina three years ago.

Several years ago, West Germany's Kraftwerk Union (Kwu) and Canada's Aecl firms submitted bids to construct large nuclear power plants at the same site.

But years-long negotiations bogged down when Turkey insisted on financing the project on a ''build-operate-transfer'' scheme by which the supplier would run the power plant and recoup its investment from the electricity sold to consumers. Both Kwu and Aecl refused to accept the Bot scheme.

#90299d2680 10/26/1990 ~French/German News Agency
COLOMBO (OCT. 26) - A senior advisor to Sri Lankan President Ranasinghe Premadasa expressed delight Friday at the readiness of donor nations to maintain development aid, totalling about one billion dollars next year.

Bradman Weerakoon, International Affairs advisor to Mr. Premadasa, said he was delighted to hear that Western donor nations and Japan were prepared to maintain an unprecedented one billion dollars in aid to Sri Lanka.

"It has exceeded Sri Lanka's expectations," Mr. Weerakoon said, referring to the overall amount of development aid suggested by the 16 donor countries Thursday at the Sri Lanka Aid Group meeting in Paris chaired by the World Bank.

"It is a further indication of the donor's confidence in the correct policies being followed by the government of Sri Lanka," Mr. Weerakoon said, adding that Colombo had gone to Paris to seek about 870 million dollars.

The one billion dollar figure indicated for 1991 - but not formally pledged at this stage - was a substantial increase over the 784 million dollars aid pledged by the group at last year's meeting.

In backing the decision, the donor countries noted Colombo's efforts to maintain economic stability and pursue structual adjustment "in an exceptionally difficult environment."

The Aid Consortium also took into consideration the "significantly adverse" impact of the Gulf crisis on Sri Lanka's economy and at the "constraints" faced by Colombo due to the escalating violence in the island's northeast.

The donors also expressed concern about "reported human rights violations and also at the resurgence of hostilities initiated by the LTTE (Liberation Tigers of Tamil Eelam guerrillas)."

BONN (OCT. 26) - German Chancellor Helmut Kohl hopes that the EEC summit in Rome this week end will launch a new initiative to maintain the strength of international moves against Iraqi President Saddam Hussein, government spokesman Hans Klein said on Friday.

Mr. Kohl, during a meeting earlier on Friday with British Foreign Secretary Douglas Hurd, repeated that his aim was to obtain the release of all the foreign hostages held by Iraq.

In recent days the German government has repeated that it would not negotiate with "hostage takers".

U.S. authorities have said that Mr. Kohl refused to reply to a request from Baghdad that German Foreign Minister Hans-Dietrich Genscher visit Iraq to obtain the release of German hostages.

Mr. Kohl and Mr. Hurd also discussed proposals for economic and monetary union (EMU) within the European Economic Community (EEC), which will be one of the main subjects discussed in Rome.

Mr. Kohl repeated his proposal for the second stage of EMU to begin on January 1, 1994.

Mr. Hurd assured him that Britain, which is opposed to the setting of a timetable, would participate in a constructive way in talks about EMU, Mr. Klein said.

BRUSSELS (OCT. 26) - Details of a new, more direct commercial air link between Brussels and Tokyo, which starts operating on Sunday, were presented by Japanese airline executives at a press conference here Friday.

The senior vice-president for All Nippon Airways (ANA), Taiji Kameyama, said the new flight, three times weekly, would cut six hours and 20 minutes off the Brussels-to-Tokyo route.

It will save an hour and 55 minutes from Tokyo to Brussels, because this direction includes a stop at Moscow.

Under a joint venture accord between ANA and the Belgian airline Sabena, the new link will be flown by a new 395-seat Boeing 747-300 operated by Sabena.

But some cabin staff will be seconded from ANA in Japan, and passengers will be able to choose between Japanese and Belgian cuisine.

Mr. Kameyama said ANA had opened an office in the Belgian capital. ANA has only recently expanded from a busy domestic network into the international market, with several flights to Europe and the United States.

The new flight will leave TokyoNarita airport on Mondays, Wednesdays and Saturdays. It leaves Brussels on Sundays, Tuesdays and Thursdays.

BERLIN (OCT. 26) - Fed by bitterness and decades of deprivation, the neo-Nazi movement is taking hold in eastern Germany.

Night raids by roving bands of skinheads and weekly ritual clashes with police in Berlin have become expressions of what at first appeared a passing phenomenon but looks increasingly like a dangerous resurgence after years of communist rule.

New-found freedoms, combined with the collapse of state authority over the past year, have given birth to a German extremism in East Germany just as neo-Nazism seemed on the wane in West Germany.

Earlier this week, about 500 youths marched through the city of Dresden shouting racist slogans, arms raised in the Nazi salute.

The mayor of Dresden, Herbert Wagner, came under heavy fire for allowing the march to take place.

In the past few days, in the same eastern German region close to the Polish border, skinheads descended on a discotheque in Cottbus, attacking all foreigners.

And in Bautzen, groups of youths painted swastikas and antisemitic slogans on shop windows.

Jewish leaders reacted strongly. Heinz Galinski, president of the Jewish Central Council, condemned the Dresden rally, saying "the excesses that accompanied from the start the unification process have reached a limit."

There are few statistics on the rise of neo-Nazism and information about the groups remains hazy.

According to Konrad Weiss, a leftist film director who conducted one of the earliest studies of the phenomenon, there are at least 1,500 organized neo-Nazis in eastern Germany, most from the ages of 16 to 25.

The first publicized clashes involving neo-Nazi groups occured shortly after the opening of the Berlin Wall last November 9.

But an East German sociologist, Gunhild Korfes, said the problem of dissaffected and violence-prone youth appeared well before that date.

"Skinheads first appeared on the scene in the early 1980s," she told Agence France-Presse. "They were signs of the identity crisis and loss of faith in the future that had taken hold of our youth."

But any extreme-right incidents were hushed up by the previous communist regime, since the "worker and peasant state" was supposed to have eradicated all nazism.

In regional elections earlier this month, neo-Nazi parties mustered less than one per cent of the vote.

But as unemployment grows, Ms. Korfes said, east German voters may turn away from the Christian Democrats and towards the extreme-right. Because of East Germany's communist heritage, the left has been thoroughly discredited and cannot represent a credible alternative to the discontented, she said.

German authorities are keeping a close watch on the activities of neo-Nazi groups.

They fear in particular that skinheads may begin attacking Soviet soldiers.

Some groups have ransacked former East German army depots or have bought arms from Red Army soldiers on the black market, according to police here.

#90299d2800 10/26/1990 ~French/German News Agency

TAIPEI (OCT. 26) - Taiwan would consider granting amnesty to two gangsters jailed for the 1984 murder of a controversial Chinese-American author in the United States, Presidential Office spokesman Cheyne Chiu said here Friday.

He said this had become possible now that litigation was over, a reference to a suit the author's widow filed against the Taiwan government in a U.S. court.

"Granting amnesty before the litigation was over would be interfering with the judicial process of a foreign country," he told reporters.

Vice Foreign Minister Chen Chien-jen confirmed Friday that Taiwan had reached an out-of-court settlement with the widow of Henry Liu, who was slain at his home in Daly City, California, on October 25, 1984 by Taiwan gangsters purportedly hired by the island's disgraced intelligence chief.

Mr. Chien refused to reveal the size of the settlement reached in August this year, but the mass-circulation United Evening News said Taiwan had agreed to

compensate the widow 1.5 million U.S. dollars.

The settlement was reached on humanitarian grounds and was not an indemnification, he said.

The writer's widow, Helen Liu, had approached lawyers for the Taiwan government and offered to settle the case out of court, he added.

Both sides had initially agreed not to publicize the matter, but news of the settlement was leaked, he said.

The widow filed a 300 million dollar lawsuit against the Taiwan authorities before U.S. courts in April 1985, alleging that they were behind her husband's murder.

Mr. Liu's killers -- Chen Chi-li, former leader of the notorious Bamboo Union gang, and his lieutenant, Wu tun -- were sentenced to life imprisonment by a civilian court here in 1985 for slaying the author.

The writer was an alleged triple agent for Taipei, Beijing and Washington and had written a critical biography of the late president Chiang Ching-kuo.

The gangsters implicated Vice Admiral Wong Hsi-ling, former director of the now-defunct Intelligence Bureau, who was subsequently sacked and sentenced by a military court to life imprisonment.

Two of the disgraced intelligence chief's aides were also convicted of involvement in the murder. Both men have been released and reinstated after serving 30-month prison terms.

The sentences of the two gangsters and the former intelligence chief were reduced to 15 years in a clemency in memory of Mr. Chiang in April 1988.

#90299d2810 10/26/1990 ~French/German News Agency

KARACHI, PAKISTAN (OCT. 26) - Deposed prime minister Benazir Bhutto directed her Pakistan People's Party (PPP) candidates to participate fully in provincial assembly elections Saturday, party sources said.

After an unexpected heavy defeat Wednesday at the national polls, which she claimed were "massively rigged", " Ms. Bhutto told a news conference here Thursday that she was receiving calls from her party supporters urging her to boycott the provincial elections. But she said she firmly decided against such a course.

"We must take full part in Saturday's elections because our party's struggle for acheiving its political objectives and ideological goals must go on," she

told reporters on return from her home town Larkana.

Analysts said that after losing the national elections, Ms. Bhutto's main interest now lay in retaining the majority and forming the provincial government in her home province of Sindh, which has been the traditional political base of her party.

Interim Sindh chief minister Jam Sadiq Ali, who was formerly one of her political advisors and is now a bitter political opponent, predicted Thursday that the former ruling PPP would also lose in the provincial elections in Sindh.

He said that Ms. Bhutto's opponents in league with the Mohajir Qaumi Movement (MQM) of settlers from India, who dominate the urban centres of Sindh, would be able to win a majority and form the next provincial government here.

Mr. Ali firmly denied the allegation about rigging in the national polls and said it was the PPP men who actually tried to scare away the voters from several polling stations where their opponents were contesting.

#90299d2820 10/26/1990 ~French/German News Agency

WELLINGTON (OCT. 26) - New Zealanders will have made National Party leader Jim Bolger their third prime minister in 15 months when the results of Saturday's election are counted, opinion pollsters unanimously predicted.

But the real interest was whether Prime Minister Mike Moore, in the job for only eight weeks, has done enough to prevent a massacre of the Labour Party.

He can find no comfort in the horoscopes published in the Wellington newspaper The Dominion. Mr. Moore, an Aquarius (January 28, 1949), will be going "through a period of transition," the stars said Friday.

The message for Mr. Bolger, a Gemini (May 31, 1935): "Be philosophical.... Take a chance on a blind date."

More scientific public opinion polls and newspaper editorials say Mr. Bolger will win.

New Zealanders, described by one book as "Passionless People," have shown little emotion over the election. Meetings have been quiet, with little heckling and only occasional disturbances.

The Electoral Roll Centre reported a last minute rush by voters to register Friday. About 2.2 million people, or 91 per cent of the voting population, had enrolled by Friday morning. On the basis of the turnout over the last 10 general elections, 86 per cent of registered voters will vote.

At stake are 97 three-year seats in the single chamber Parliament. Labour goes into the election with 56 seats, National 40 and New Labour 1.

The Herald in a poll published Thursday said National would sweep back into power on a huge swing of 11.5 percent, reducing Labour to just 25 seats, the lowest number since 1931.

When Labour first came to power in 1935 they crushed the then United-Reform Coalition which eventually reemerged as the new National Party, a farmer-based conservative party.

Founded in 1916, Labour was the party of the unions, socialist to the core. Its first prime minister, Michael Joseph Savage, was for many the closest the country came to a political saint for pulling New Zealand out of the Great Depression.

Anxious to pick up a little of that political mana, Mr. Moore last week lay roses at the Savage tomb in Auckland.

In the last 55 years National has ruled New Zealand for 29 years and Labour for 26.

#90299d2870 10/26/1990 ~French/German News Agency

TOKYO (OCT. 26) - Japan is preparing to roll out the red carpet for black nationalist leader Nelson Mandela when he arrives Saturday for a five-day visit in line with the welcome he has received in Western countries.

Mr. Mandela will be the guest of the Japanese government and was to meet Monday with Prime Minister Toshiki Kaifu, Foreign Minister Taro Nakayama and the minister of international trade and industry, Kabun Muto.

On Tuesday, Mr. Mandela will address the Diet, an unprecedented event in a country that usually invites only heads of state and government to address the parliament.

In the case of Mr. Mandela, who was invited to Japan after his release from prison in February, the authorities apparently wanted to make a special gesture.

The move would be in line with a policy in recent months of holding dialogue with both the African National Congress (ANC) and South African authorities.

Japan is the only major Western country not to have diplomatic relations with Pretoria and its official reason for inviting Mr. Mandela here is "to encourage efforts for a peaceful solution to the apartheid problem," a

Japanese official said.

However, Tokyo also wants to ease its policy towards Pretoria in recognition of the South African authorities' efforts at political reform.

But Tokyo will not yet lift restrictions on tourism, direct investment and cultural exchange which it imposed to protest Pretoria's policy of apartheid.

It is expected to reiterate that position to Mr. Mandela, a foreign ministry official said.

The official added that Tokyo was ready to help blacks improve their lot so they can play "a leading role" in South Africa's politics and economy after apartheid is abolished.

Mr. Mandela is expected to ask for Japanese financial help to improve education and to improve technological and economic development.

He is also expected to request humanitarian aid to facilitate the return of exiled ANC militants and the integration into South African society of freed political prisoners.

#90299d2920 10/26/1990 ~French/German News Agency

LONDON, (OCT. 26) - Glaxo Holdings, Britain's leading pharmaceutical company, was given a licence Friday to sell its new Salmeterol asthma drug in Britain.

The company said it hopes to capture a share of the British market for asthma drugs, which analysts estimate is worth 200 million pounds (400 million dollars).

The world market is estimated to be worth 2.3 billion pounds.

Salmeterol has the advantage of requiring only two doses per day, fewer than rival products, Glaxo said. The drug operates by combatting the inflammation which leads to asthma symptoms.

News of the licence granted by Britain's Medical Control Agency boosted Glaxo shares initially, but they later fell back in a generally depressed market.

Salmeterol is the third new drug Glaxo have had licenced in Great Britain this year, following the hay fever drug Flixonase and cancer therapy drug Zofran.

TOKYO (OCT. 26) - Consumer electronics giant Victor Co. of Japan Ltd. (JVC)

said Friday its net profit rose 13 percent from a year earlier to 7.8 billion yen (57 million dollars) in the six months to September.

The company, Japan's biggest manufacterer of video recorders, said sales climbed four percent to 314 billion yen (2.3 billion dollars) despite lower turnover for both video and audio equipment.

JVC said the 13 percent jump in earnings reflected "structural reform," including better sales of non-consumer products and software which helped to offset the sluggish performance in the audio-visual sector.

Sales of video equipment fell one percent to 148 billion yen (1.1 billion dollars) while sales of audio equipment dropped five percent to 61 billion yen (442 million dollars), the company said.

But television sales leapt 19 percent to 52 billion yen (377 million dollars) while sales of information equipment soared 32 percent to 35 billion yen (254 million dollars). Software sales also advanced by 11 percent to 18 billion yen (130 million dollars), the company said.

The company's exports rose 18 percent to 178 billion yen (1.3 billion dollars) accounting for 57 percent of its total sales.

JVC forecast a net profit of 15 billion yen (109 million dollars) on sales of 640 billion yen (4.6 billion dollars).

#90299d2980 10/26/1990 ~French/German News Agency

TOKYO (OCT. 26) - Japan's Mitsubishi Motors Corp. said Friday that Chrysler Corp. of the United States would provide parts for new models to be produced by their joint U.S. venture, Diamond-Star Motors Corp.

The move is aimed at raising the local content ratio of cars made by Diamond-Star Motors from the current 60 per cent to about 75 per cent, a Mitsubishi official said.

Transmissions and engines produced by Chrysler will be employed in some models of the projected three- and four-door sports cars and four-door sedans.

This is the first time that Diamond-Star Motors, a 50-50 joint venture set up in 1985, has decided to use Chrysler parts in its vehicles.

#90299d2990 10/26/1990 ~French/German News Agency

WELLINGTON (OCT. 26) - New Zealand's biggest publishing chain, Independent Newspapers Ltd. (INL), expects turnover to top one billion New Zealand dollars

(600 million dollars U.S) this financial year, chairman Alan Burnet said here Friday.

The company is half-owned by Rupert Murdoch's News Ltd.

Speaking at the company annual meeting, Mr. Burnet said INL's recent acquisitions, which include Australian and New Zealand magazine distributor Gordon and Gotch and newspapers in Victoria and the United States, were ahead of budget on a combined basis.

"Directors are confident they will contribute profits adequately in line with the investment," he said.

#90299d3030 10/26/1990 ~French/German News Agency

NEW DELHI (OCT. 26) - Over 200,000 Hindu pilgrims wanting to build a temple next to a mosque in central India had been arrested by Friday, as dissident pressure demanding the resignation of Prime Minister Vishwanath Pratap Singh mounted in the ruling party.

Meanwhile, Indian Army troops continued to patrol the curfew-bound streets of Jaipur and Jodhpur cities in the northwestern desert state of Rajasthan that had been enveloped in a Hindu-Moslem communal clash in which at least 68 people were killed according to unofficial reports. Officials put the toll at 48.

The security forces assumed charge on Wednesday when police could not control rampaging mobs that indulged in arson and looting.

Communal rioting erupted in some parts of India on Wednesday during a general strike called by the Hindu right-wing Bharatiya Janata Party to protest against the arrest of its president, Lal Krishna Advani, during a nationwide tour that has upset Indian Moslems.

R.S. Agnihotri of the Vishwa Hindu Parishad, which is spearheading the move to build a temple at Ayodhya in Uttar Pradesh state at the birthplace of Rama, a god-king whom Hindus regard as one of the incarnations of Lord Vishnu, the creator, said here that more than 200,000 kar sevaks (volunteers) had been arrested so far by the authorities while on their way to Ayodhya.

''Most of the jails in the area are overflowing with arrested volunteers. Now they are dumping them in hostels and warehouses and other temporary jails'', he said.

Over three million Hindus were originally scheduled to start constructing the temple through kar sewa (self-help) from October 30. State authorities acknowledged that over 51,000 volunteers had already been arrested in a bid to

thwart building of the temple and also to maintain law and order situation.

#90299d3160 10/26/1990 ~French/German News Agency
PARIS (OCT. 26) - The United States has hardened its tone towards Iraq in this 12th week of the Gulf crisis and reserved the right to boost its forces in Saudi Arabia, giving the impression that war is near.

President George Bush, reacting to a perceived softening of Saudi Arabia's position in the direction of a compromise, for the first time charged Iraqi leader Saddam Hussein with committing "war crimes" and said he was more determined than ever that the "dictator and invader" should quit Kuwait without any compromise of any sort.

Defence Secretary Dick Cheney, dealing with some of the practical aspects, told CBS television Thursday that as many as 100,000 more American troops might be moved to the Gulf.

"We're not at the point yet where we want to stop adding forces," he said.

Asked if 100,000 more might be added to the 220,000 already in place, Mr. Cheney responded: "It's conceivable that we'll end up with that big an increase. We want to make certain we've got the forces over there to deal with any contingency."

The U.S. force, plus contingents from Britain, France and other Western countries and some Arab nations headed by Egypt, have been deployed to defend Saudi Arabia following Iraq's invasion and annexation of Kuwait on August 2. There has been increasing debate in Washington over a possible offensive if a U.N.-mandated embargo drags on without an Iraqi withdrawal.

Central Intelligence Agency (CIA) director William Webster in turn said the Bush administration believed the Middle East would never be secure with Mr. Hussein in power unless his weapons of mass destruction were destroyed or a countervailing regional force was established.

"Can you put him back in his box?" the CIA chief asked rhetorically at a breakfast meeting of the National Council of World Affairs Organizations.

In London, the defence ministry said Friday it had asked state-run hospitals to say what facilities they could provide for wounded soldiers from the Gulf in the event of war with Iraq.

Civilian hospitals in Britain were used to treat wounded troops during the Falklands war with Argentina in 1982.

The ministry said 6,000 combat troops and about 3,000 support staff would become operational in Saudi Arabia on November 15, and 200 doctors and military nurses would run a field hospital there of 400 beds.

Foreign Office junior minister William Waldegrave told BBC television that the defence ministry was "quite rightly taking all the proper precautions in case it ever did come to a fight".

He said London and Washington were continuing to seek a peaceful settlement, but Mr. Hussein had to realise that Western forces were ready to fight if necessary.

"The only real chance of getting a peaceful solution is if Saddam Hussein comes to believe we will fight if necessary and we are prepared to fight if necessary," the minister of state said.

In Paris, there were well-publicised reports that President Francois Mitterrand expected war because Mr. Hussein's intransigence left no alternative. The likely timing of hostilities was dated between October 25 and November 5, though the imminent release of all French hostages due may have altered that timetable.

In Bonn, West German Chancellor Helmut Kohl told British Foreign Secretary Douglas Hurd that he hoped the coming weekend summit of the European Economic Community in Rome would produce a fresh initiative to maintain the solidity of the international mobilisation against Iraq.

Government spokesman Hans Klein said Mr. Kohl had reaffirmed that his aim was to obtain the release of all foreign hostages held by Iraq.

Growing worries about the likelihood of an outbreak of hostilities were reflected in European markets Friday. The prices of oil and gold rose as did

the dollar and sterling, while stock markets fell.

Iraq's Foreign Minister Tareq Aziz meanwhile charged that the United States and Britain were determined to block all dialogue between Arab states to settle the crisis.

"The U.S.-British occupation of the Arab peninsula is not so much aimed at defending international law as at ensuring direct military control of the oil wells," he said in a report by the Iraqi News Agency.

#90299d3420 10/26/1990 ~French/German News Agency

BOGOTA (OCT. 26) - A squad of elite police agents stormed a kidnappers' hideout near here Friday killing nine men and freeing three businessmen who were abducted for ransom 23 days earlier, authorities said.

General Nacin Yanine Diaz, chief of the elite F-2 police force, said the raid was the first operation in a nationwide crackdown on kidnapping rings which have abducted 950 people so far this year.

In Friday's raid, Gen. Yanine said his agents tracked the kidnappers to a house in San Pedro, 60 kilometers (40 miles) southeast of here, where three local businessmen were being held captive -- one of them for a three million dollar ransom.

Numerous U.S.-made handguns and grenades were seized during the raid, he said.

Meanwhile police reported two new kidnappings Friday: a young woman in Cali, 500 kilometers (280 miles) southwest of here, and a young businessman in Medellin, 500 kilomters to the northwest.

Amd a 24-year-old medical student was killed here Friday as he fought off a group of would be kidnappers, police added.

On Thursday suspected gunmen of the Medellin drug cartel kidnapped a dozen alleged members of the rival Cali drug ring, killing two of them, police said.

The incident was the latest episode in the war between Colombia's two most powerful drug trafficking organizations which are competing to dominate the U.S. drug market, police said.

PARIS (OCT. 26) - French unemployment increased slightly in September, by 0.4 percent to 2,500,400 seasonally corrected, the highest level since June (2,512,000), the Labor Ministry announced here on Friday.

Despite the September increase of 11,100, the unemployment rate remained at 8.9 percent for the third straight month.

In uncorrected figures, the number of unemployed workers rose by 2.7 per- cent from 2,486,200 in August to K2,554,000 in september.

Labor Minister Jean-Pierre Soisson said the bulk of the September increase was due to a larger than usual number of young people looking for their first job.

#90299d3460 10/26/1990 ~French/German News Agency

LONDON (OCT. 26) - Demand for tankers loading in the Gulf continued at a steady pace over the past week, but good availability of tonnage precluded any significant rise in rates, London brokers E.A. Gibson said Friday in their weekly report.

Very large crude carriers (VLCCs) were fixed mostly to Eastern destinations, at rates similar to those prevailing the previous week.

Smaller crude carriers (around 80,000 tons) were less in demand. In the clean trades, large sizes showed further gains while smaller units maintained previous levels.

Strong demand out of West Africa resulted in depletion of tonnage and in higher rates. The Caribbean market was also active, and steady demand was seen throughout the week in the North Sea.

But demand remained slow in the Mediterranean market, with rates consequently easier.

#90299d3470 10/26/1990 ~French/German News Agency

COLOMBO (OCT. 26) - Tamil guerrillas killed four Sinhalese civilians in renewed violence in Sri Lanka's eastern province, officials said Friday, as fleeing Moslems streamed out of the island's strife-torn areas.

Tamil sources meanwhile said gunmen suspected to be members of a Tamil group opposed to the Liberation Tigers of Tamil Eelam (LTTE) killed five Tigers and dumped their bodies near the eastern town of Batticaloa.

A military spokesman here said that the rebels Thursday raided a majority Sinhalese village in Pulmoddai in the coastal district of Trincomalee and shot dead four civilians and escaped before troops could arrive.

Heavily armed LTTE fighters said to be roaming jungle areas in the island's

east have killed scores of Sinhalese since renewing their secessionist war in the northeast, home to Sri Lanka's Tamil minority.

The hardline Tigers have vowed to drive away the Sinhalese and government troops from the northeast in their bid to carve out an independent homeland called Eelam.

On Tuesday, the rebels massacred 10 Sinhalese villagers outside the northern province borders while on Thursday they ambushed and killed seven army soldiers in Trincomalee district.

Heavy fighting broke out in Trincomalee and neighbouring districts after the LTTE on June 11 rejected peace talks it had been holding with the government for 14 months and renewed its separatist campaign.

Hundreds of LTTE cadres, most of them in their teens, retreated into thick forests in the east in the face of a major army drive to retake the towns that had come under LTTE control.

But the guerrillas have continued their battle against government forces from well-fortified camps in the jungles, frequently ambushing troops and escaping with the weapons of the dead soldiers.

Minister of State for Defence Ranjan Wijeratne said he would direct the army to shoot on sight anyone who tried to evict Moslems.

One third of Sri Lanka's one million Moslems live in the northeast. But thousands of them have joined Sinhalese and Tamils affected by the violence in refugee camps set up by the government.

According to unofficial and official sources, the violence in the northeast since June 11 has left 4,500 people dead.

BEIJING (OCT. 26) - Chinese Vice Premier Wu Xueqian said Friday he hoped Britain would take the lead in the European Economic Community (EEC) in restoring normal ties with China, the New China News Agency (NCNA) reported.

Mr. Wu was meeting with Sir Peter Blaker, a British Conservative and leader of a delegation of four parliamentarians here on a six-day visit.

The vice premier said he hoped for more high-level exchanges between China and Britain, one of the EEC members most favorable to restoring normal relations with Beijing.

The EEC said Monday it was lifting sanctions imposed after the crushing of the pro-democracy movement here 17 months ago, except for an embargo on arms sales and a suspension of military cooperation.

Mr. Wu and Sir Peter also discussed international issues and Hong Kong, the British colony off southern China due to revert to Chinese rule in July 1997.

The other members of the delegation, which arrived on Wednesday, were Roger Sims (Conservative), Sir David Steel (Liberal Democrat) and Frank Haynes (Labour).

#90299d3610 10/26/1990 ~French/German News Agency

HALLE, GERMANY (OCT. 26) - German Foreign Minister Hans-Dietrich Genscher on Friday rejected an offer by Iraq to release Germans who are being held hostage by Baghdad as part of its human shield tactic.

Mr. Genscher told a press conference after meeting here with British Foreign Secretary Douglas Hurd that Iraq had set "a whole range of conditions" for releasing German hostages.

Asked if the conditions included a visit by him to Baghdad, he confirmed: "That was one of them."

Mr. Genscher said the release of western hostages must be "unconditional."

"We stand, as before, by the resolutions of the United Nations," he said, adding it was important to maintain international pressure on President Saddam Hussein.

The German building contractor Strabag meanwhile said Friday that Baghdad had released four company employees held hostage in Iraq following a personal plea by Strabag chief Herbert Werhahn.

The hostages, aged 33 to 56, were employed in the construction of the airport in the southern city of Basra, along with 34 other German nationals.

They were to leave Jordan for Frankfurt on Friday, a company spokesman said in Cologne.

Iraq earmarked 440 million dollars for the construction of the Basra airport.

Mr. Hurd, who accompanied Mr. Genscher's home town of Halle, in former East Germany, said he "entirely and strongly" agreed with the German government's viewpoint.

Although the anti-Hussein alliance sought a peaceful resolution of the crisis, "we are not excluding, of course, we cannot exclude the possibility of the military option," he said.

Mr. Hurd met earlier in Bonn for about an hour with Chancellor Helmut Kohl, on the eve of the European Economic Community (EEC) special summit in Rome.

NEW YORK, UNITED NATIONS (OCT. 26) - The Military Staff Committee of the U.N. Security Council will hold an unusual high-level meeting Monday to discuss the Gulf crisis, diplomatic sources said here Friday.

The committee, which consists of the chiefs of staff of the five permanent council members, has twice-monthly, low-level meetings which have in the past been largely symbolic.

The sources said Monday's informal meeting, at the request of the Soviet Union would involve senior generals from the permanent members: Britain, China, France, the Soviet Union and the United States. Other sources said it was uncertain if China would send a top level or lower-ranking officer to the meeting.

The Soviet Union has been seeking for years to revive the moribund committee, whose duties under the U.N. charter are to advise the Security Council on military matters and provide "strategic direction" for troops sent by the Council to enforce its orders.

Monday's meeting, which the diplomatic sources said would discuss the military situation in the Gulf, comes amid new signs of a further military escalation in the region and lessening international patience with Iraq's seizure of Kuwait.

U.S. Defense Secretary Dick Cheney said Thursday that Washington was considering sending up to an additional 100,000 troops to join the 220,000 U.S. soldiers already in the Gulf confronting Iraqi forces in Kuwait.

And British officials acknowledged Friday that they had instructed hospitals in that country to outline their plans for treating war casualties from a conflict in the Gulf. Britain has 6,000 combat troops and about 3,000 support staff in or headed to Saudi Arabia.

In Paris, there were well-publicised reports this week that President Francois

Mitterrand expected war to break out between October 25 and November 5 due to the intransigence of Iraqi President Saddam Hussein.

NEW DELHI (OCT 26) - Rajiv Gandhi's estranged sister-in-law quit the Indian cabinet Friday and demanded that Prime Minister Vishwanath Pratap Singh resign amid a political crisis facing his embattled coalition government.

Maneka Gandhi, 33, became the first minister to leave since the V.P. Singh administration on Tuesday lost the parliamentary support required to stay in office.

Mrs. Gandhi, minister of state for environment and forests, said she was resigning in protest against the government's "failures."

Among the administration's alleged failures, she listed the premier's plan to allot almost half of all government and public sector jobs for lower castes, calling its implementation "hasty."

The plan, which critics allege would wipe out merit as a criterion for employment in a shrinking job market, has unleashed widespread protests by upper caste students, leaving 53 people dead in protest suicides.

In her resignation letter, copies of which were released to the press, Mrs. Gandhi also cited Mr. V.P. Singh's failure to hold elections in Punjab state and his lack of a "coherent policy" on Moslem militancy in Kashmir.

Sikh separatists are fighting for a separate homeland in Punjab and Moslem separatism has increased since the 59-year-old prime minister assumed office in December 1989.

Mrs. Gandhi, known for her dedicated crusade on environmental issues, is the widow of Sanjay Gandhi, the brother of Mr. V.P. Singh's predecessor Rajiv Gandhi. Her husband died in June 1980 at the controls of a stunt aircraft.

She plunged into politics after a well-publicised row with her mother-in-law, slain prime minister Indira Gandhi, and opposed Rajiv Gandhi in his 1984 election to parliament from the Amethi constituency which her husband nurtured.

She lost heavily then, but won a handsome victory from the Pilbhit constituency to enter parliament in the November 1989 general elections.

BANGKOK (OCT. 26) - Burmese troops on Friday raided two more monasteries in

the central city of Mandalay, state-run Rangoon Radio reported in a broadcast monitored here,

Soldiers stormed the "Minn-Gon" and "Aung Thadedi" monasteries in downtown Mandalay and seized a store of petrol and 48 jade stones, the radio said. There were no casualties, it said, adding that two civilians, suspected of being the owners of the precious stones, were arrested.

Burmese troops earlier this week raided nine monasteries in Mandalay and detained an unspecified number of clergymen.

The ancient royal capital is home to about 80,000 monks.

The soldiers are to search other monasteries in Mandalay suspected of involvement in a boycott and of having connections with the outlawed Burmese Communist Party (BCP), the radio said.

The boycott is in effect an excommunication of the military as monks have refused to receive alms or attend any religious ceremonies organized by military officers and their families.

The clergy imposed the boycott after soldiers were accused of killing two young monks and two students during a demonstration in Mandalay in August.

The State Law and Order Restoration Council (SLORC), the official name of the ruling junta, has maintained that no one was killed during that incident.

The military also suspects the BCP of having masterminded the boycott.

SLORC chairman General Saw Maung, whose Saturday deadline for the rebellious monks to end their boycott was ignored, issued orders for the crackdown which began Sunday.

#90299d3820 10/26/1990 ~French/German News Agency

LONDON (OCT 26) - North Sea Brent crude oil for December delivery fell to 33.60 dollars a barrel here Friday mid-afternoon, after having been above the 35-dollar level in the morning.

Brent had closed at 32.25 dollars a barrel on Thursday.

In explaining the downturn, Jim Henderson of Barclays de Zoete Wedd brokerage mentioned rumors of messages sent by Iraqi President Saddam Hussein to French President Francois Mitterrand and Soviet leader Mikhail Gorbachev saying he was ready to discuss the Kuwait question.

Other analysts said the drop was due to a feeling that morning fears of a war in the Middle East had been exaggerated.

One operator said the market Friday was "extremely jittery", reacting to any rumor about the Gulf.

The announcement that the United States would beef up its Gulf presence by sending up to 100,000 more men had breathed new life into war fears Thursday evening.

#90299d3870 10/26/1990 ~French/German News Agency

CAIRO, (OCT 26) - Italian Foreign Minister Gianni de Michelis arrived here Friday for talks with President Hosni Mubarak on the Gulf crisis and voiced concern for Italian nationals trapped in Iraq.

Mr. De Michelis, who was expected to stay in Egypt less than 24 hours, also called for a peaceful soluton to the Gulf crisis triggered by Iraq's August 2 invasion of Kuwait.

Some 500 Italians have been trapped in Iraq and Kuwait since the invasion and subsequent annexation of the emirate.

At least five of them have been on a hunger strike at the Italian embassy in Baghdad to press for their release.

Iraq this week has agreed to release nationals from Bulgaria, France, Britain and the United States being held against their will.

Mr. De Michelis, whose country holds the rotating presidency of the European Economic Council, said the EEC "rejects any partial solution to the Gulf crisis."

STORNOWAY, Scotland (OCT 26) - A PanAm airliner flying from Vienna to New York was forced to make an emergency landing on Friday at Stornoway airport in the Western Isles of Scotland, airport officials said.

The PanAm Airbus, carrying 183 passengers, was forced to put down when it was

discovered that one of its engines was leaking oil, 80 kilometres (50 miles) south of Stornoway, the officials said.

The passengers were all evacuated safely and were later transferred on another flight to London.

Stornoway, is the main town in the Western Isles which are in the Atlantic Ocean off the north-west of Scotland.

NAIROBI (OCT 26) - Kenya put some 500 people detained as illegal aliens aboard a train for the Ugandan border Friday, refugees told the United Nations High Commissioner for Refugees (UNHCR).

Sylvester Awuye, the UNHCR representative here, said four or five people aboard the train, bound for the border town of Malaba, "might be refugees". He said UNHCR was checking whether they were registered as refugees, and "will ask Kenyan authorities to bring them back if it is confirmed that they are refugees".

Those aboard the train are believed to include Ugandans, Rwandans and Tanzanians.

Mr. Awuye said the authorities had started releasing refugees who were among 1,058 foreigners rounded up since President Daniel arap Moi last weekend ordered the expulsion of illegal immigrants in a move that targeted Ugandans and Rwandans.

"As of Thursday, 144 of those arrested were refugees, according to our records " Mr. Awuye said.

The releases came after Mr. Awuye met Home Minister Davidson Kuguru, who agreed to coordinate with UNHCR "efforts to secure the release of refugees and asylum seekers who have been inadvertently rounded up in the government's crackdown on illegal aliens."

Mr. Awuye said about 10,000 refugees were legally resident in Kenya.

CAIRO (OCT 26) - Soviet presidential envoy Yevgeni Primakov discussed the Gulf crisis here Friday with President Hosni Mubarak and later said he was cautiously optimistic over a peaceful end to the conflict.

"If all goes well, we will meet again soon in Egypt and we will outline all the details of the problem," he said without elaborating after a 75-minute meeting with Mr. Mubarak.

Mr. Primakov, on a second visit to Cairo this week as part of a regional Middle East tour that will also take him to Iraq, said it was "possible to positively modify the situation without the use of force."

He added that the Soviet Union was in favour of a return to the situation that prevailed before Iraq's August 2 invasion of Kuwait "without rewarding the aggressor."

Mr. Primakov arrived earlier from Damascus where he delivered a message to Syrian President Hafez al-Assad from his Soviet counterpart Mikhail Gorbachev.

He met with Foreign Minister Esmat Abdel Meguid to discuss the Gulf crisis before his talks with Mr. Mubarak.

Mr. Primakov will also travel on to Saudi Arabia and Iraq as part of Soviet diplomatic efforts to find a solution to the crisis.

Reliable Soviet sources in have Baghdad that Mr. Primakov was expected in the Iraqi capital on Sunday for his second visit in less than a month.

Moscow is coordinating its peace efforts with Paris, the Soviet sources in Baghdad said, referring to a call by French President Francois Mitterrand for an Iraqi commitment to withdraw from Kuwait and release hostages.

In Paris late Friday, French presidential spokesman Hubert Vedrine denied speculation that Mr. Hussein had sent a letter separately to Mr. Gorbachev and Mr. Mitterrand expressing readiness to discuss Kuwait.

Mr. Vedrine said he had "absolutely no knowledge" of such a letter. Rumours about the letter were said earlier Friday to have pushed down the Brent oil reference crude price, according to Jim Henderson of the brokers Barclays de Zoete Wedd.

Mr. Primakov, in talks with Iraqi President Saddam Hussein on his last visit, secured Baghdad's agreement to allow the repatriation of 1,500 of the 5,000 Soviet nationals stranded in Iraq.

WASHINGTON (OCT. 26) - Iraq has planted enough plastic explosives throughout Kuwait's four oil refineries to destroy the emirate's refining capacity, U.S. Government sources said Friday.

The sources, speaking on condition of anonymity, said Iraqi troops had also placed explosives at pumping oil stations, processing centers and oil wells in apparent preparation for a implementing a "scorched earth" policy to destroy the Kuwaiti economy if Baghdad is forced to withdraw from the country.

"They're basically all wired up for destruction -- even the refineries," said one source.

Other sources said Iraq was also stripping Kuwait of large quantities of chemicals and equipment used in oil processsing for apparent use in Iraq.

The sources said details of the Iraqi actions came from satellite photos and information from Kuwaiti exiles and released foreign hostages.

If detonated, the explosives at Kuwait's four refineries would knock out the

country's refining capacity for at least six months and keep the installations from returning to full capacity for at least two years, a government source said.

#90299d4380 10/26/1990 ~French/German News Agency

STOCKHOLM (OCT 26) - Sweden Friday indicated officially for the first time that it may be interested in becoming a member of the European Community.

The new interest, which was made evident in remarks to the Swedish parliament by Prime Minister Ingvar Carlsson, caused surprise among E.C. officials in Brussels, observers said. However, spokesmen for ''the twelve'' in the Belgian capital refused to comment.

To date, Sweden's neutrality has always been the main barrier to an application by the Scandinavian country for membership in the Community.

In a statement on economic policies, Carlsson said that as of now, when formulating its position towards the E.C., his government would base its approach on the possibility that the country might one day become an E.C. member.

Since Spain and Portugal joined the Community in 1986, the E.C. has blocked all further membership applications, arguing that the twelve current members must first introduce the single economic market, slated to come into force on January 1, 1993, before considering further expansion.

MOSCOW (OCT. 26) - Soviet President Mikhail Gorbachev Friday signed a decree providing for the first time for the creation of enterprises fully owned by foreign investors and guaranteeing the unrestricted transfer of profits, Tass said.

The measure, which aims at bringing foreign investors to the Soviet Union, comes to the backdrop of Gorbachev's reform plans to transform the state-run into a Western market-style economy.

Foreign investments can be in the form of participation in enterprises, the purchase of property, shares and securities, the purchase - independently or with Soviet firms or citizens - of the right to long-term leasing, the Soviet news agency added.

''Foreign investments on Soviet territory enjoy legal protection,'' Tass quoted the decree as saying.

''Profits of foreign investors, obtained in the Ussr in Soviet currency, can be freely reinvested,'' Tass said.

The profits can be ''used on Soviet territory in accordance with Soviet legislation and that of Union republics, and can be transfered abroad in line with the procedure established by Soviet legislation'', the decree added.

The decree also envisages the creation of special business zones, where firms would enjoy favourable terms, in an attempt to boost joint ventures. The decree said it was up to the respective republics to decide on the details of such incentives.

NEW YORK, United Nations (OCT 26) - The Military Staff Committee of the U.N. Security Council will hold an unusual high-level meeting Monday to discuss the Gulf crisis, diplomatic sources said here Friday.

Plans for the Military Staff Committee meeting came amid a delay in a Security Council vote on a new resolution on the Gulf crisis, diplomats said.

The Military Staff Committee, which consists of the chiefs of staff of the five permanent council members, has twice-monthly, low-level meetings which have in the past been largely symbolic.

The sources said Monday's informal meeting, at the request of the Soviet Union would involve senior generals from the permanent members: Britain,

China, France, the Soviet Union and the United States. Other sources said it

was uncertain if China would send a top level or lower-ranking officer to the meeting.

The Soviet Union has been seeking for years to revive the moribund committee, whose duties under the U.N. charter are to advise the Security Council on military matters and provide "strategic direction" for troops sent by the Council to enforce its orders.

Monday's meeting, which the diplomatic sources said would discuss the military situation in the Gulf, comes amid new signs of a further military escalation in the region and lessening international patience with Iraq's seizure of Kuwait.

U.S. Defense Secretary Dick Cheney said Thursday that Washington was considering sending up to an additional 100,000 troops to join the 220,000 U.S. soldiers already in the Gulf confronting Iraqi forces in Kuwait.

And British officials acknowledged Friday that they had instructed hospitals in that country to outline their plans for treating war casualties from a conflict in the Gulf. Britain has 6,000 combat troops and about 3,000 support staff in or headed to Saudi Arabia.

In Paris, there were well-publicized reports this week that President Francois Mitterrand expected war to break out between October 25 and November 5 due to the intransigence of Iraqi President Saddam Hussein.

LAHORE, PAKISTAN (OCT 26) - Former prime minister Benazir Bhutto reiterating that Wednesday's elections were "massively rigged," said Friday that her party might demand new elections.

Addressing a press conference, she said that top officials of her People's Democratic Alliance was weighing various options, including fresh polls and a protest movement, and that a decision would be made at a scheduled meeting here Saturday of the party leaderhsip.

Ms. Bhutto was making her her first post-election visit to the Punjab capital, where the PDA suffered a shock defeat at the hands of the pro-government Islamic Democratic Alliance (IJI).

Questioned about a report by an international team of observers from the Washington-based National Democratic Institute (NDI) that serious problems had affected the polls but the problems did not significantly alter the outcome of the elections, she said that "our reaction will be given later."

However, she asserted that the NDI team did not visit a large number of

polling stations, and alleged that rigging took place after the observers had left certain areas.

Ms. Buhutto claimed that presiding officers did not issue certificates on vote counts in some 40 to 50 constituencies.

#90299d5400 10/26/1990 ~French/German News Agency

KINSHASA, (OCT 26) - The leaders of Rwanda, Burundi, Uganda and Zaire were meeting in the far north of Zaire on Friday to discuss the crisis caused by a rebel incursion into Rwanda, officials said here.

The meeting, hosted by Zairean President Mobutu Sese Seko at his home village of Gbadolite, was being attended by Presidents Juvenal Habyarimana of Rwanda, Pierre Buyoya of Burundi and Yoweri Museveni of Uganda.

The talks came as fierce fighting broke out again in the tiny east African state, just 36 hours after a cease-fire had gone into effect.

The official Zairean news agency AZAP said the four leaders were discussing the cease-fire, and plans for talks between the rebels and the Rwandan government.

They were also to discuss the composition of a proposed multinational force, which is due to take up positions between the two sides.

TOKYO, (OCT 27) - Faced with the Gulf crisis and despite mounting pressure from ecologists, Japan's government plans to forge ahead with its nuclear energy development plans, according to a report approved Friday.

The report, drafted each year by the atomic energy commission, said the demand for nuclear energy would continue to increase rapidly and that Japan would be able to produce 50 billion kilowatts of nuclear power by the year 2,000, with a capacity of 72 billion KW by 2,010.

Despite an active anti-nuclear movement in Japan, nuclear energy generates nearly 30 per cent of the electricity consumed here, and the percentage is set to increase to 43 in 2,010.

To attain what commission official Hideaki Tsuzuku acknowledged were "ambitious" goals, Japan will continue building traditional nuclear plants while developing new types of reactors.

At present, Japan possesses 39 plants in operation. Another 13 are under

construction and three are in the planning stages, while about 30 others are expected to be built by the year 2,010.

Among technologies expected to be put into operation, Japan is planning on a prototype of a rapid neutron reactor dubbed Monju due to be completed in 1992, as well as a thermal reactor using plutonium which should be developed by 1995 and put into commercial use the following year, the report said.

But the report stressed the necessity for Japan to reinforce its "technological foundation for the reprocessing-recycling of spent fuel" and the need to establish a complete cycle for nuclear fuel here.

Construction of a large nuclear reprocessing plant is due to begin in Rokkasho-Mura, a small village in northern Japan where radioactive waste will be buried in the future.

The plans for the village have spawned an active anti-nuclear movement from local residents who fear it will create high levels of radioactivity in the ecosystem.

WELLINGTON (OCT 27) - New Zealand voters were casting their ballots in general elections Saturday in what appeared to be a heavy turnout, local reports said.

Labour Prime Minister Mike Moore voted Saturday morning while opposition leader Jim Bolger cast his ballot in his own electorate, the remote King Country, 400 kilometres (250 miles) north of here.

In some parts of the country queues were reported outside booths.

Traditionally, a heavy turnout is said to favour the Labour Party.

A record 2.2 million voters are enrolled in 97 electorates where 677 candidates from parties including Labour, National, Democrat, Social Credit,

Green, New Labour, Christian Heritage, McGillicuddy Serious and Mana Motuhake are running.

Polling booths close at 7:00 p.m. (0600 GMT) and the first indications of the result are likely within an hour of the end of voting.

#90299d5720 10/26/1990 ~French/German News Agency

STOCKHOLM, (OCT 27) - The Swedish government, which is drawing up austerity

plans to deal with a huge outflow of capital, is seeking a statement from parliament affirming its desire to join the European Economic Community, Finance Minister Allan Larsson said Friday.

"With its program, the government seeks a decision from parliament that will make clear Sweden's ambition to become an EEC member," Mr. Larsson said at a press conference on the austerity measures, which the minority Social Democrat government of Prime Minister Ingvar Carlsson is expected to announce this week.

The minister gave no date for a possible parliamentary debate, nor for the country's application to join the EEC.

The increasing flight of capital from Sweden earlier this month forced the government to put up interest rates to over 17 per cent to defend the krona.

The country is also suffering from an annual inflation rate of 11.5 per cent, one of the highest in western Europe, and an increasing balance of payments deficit.

Mr. Carlsson's austerity plan is expected to include a cut of some 15 billion krona (2.7 billion dollars) in public spending.

The government has also said it plans to cut trade tariffs, in particular for farm products.

#90299e0017 10/26/1990 ~Latin America New Agency

MADRID (OCT 26) EFE - Basques were expected to reject separatist violence once more and vote for economic recovery at polls Sunday in this autonomous region of northern Spain.

The ruling coalition of the conservative Basque Nationalist Party (PNV) and the Basque Socialist Party (PSE) were tipped to win the elections called to pick a regional president and parliament.

The once healthy economies of the three Spanish Basque provinces of Vizcaya, Guipuzcoa and Alava have suffered the ravages of a 22-year guerrilla war waged by the armed separatist ETA (Basque Homeland and Liberty) movement.

More than 600 people, mostly members of the Spanish security forces, have died.

The campaign is aimed at forcing the central government in Madrid to grant the Basques the right to independence.

But most Basques, traditionally hard-working Roman Catholics, oppose Marxism and, although deeply nationalistic, have generally accepted the degree of autonomy allowed by Madrid.

Separatist interests are upheld by the Herri Batasuna Party, considered to be the political wing of ETA, but at present it only enjoys the support of 16 per cent of the two million Spanish Basques.

In the last regional elections in 1986, the PNV-PSE coalition won a majority of votes, gaining 17 and 18 seats respectively in the 75-member parliament.

Herri Batusuna came third, winning 13 seats and the rest were shared by a number of smaller parties.

The PNV and the PSE, the Basque branch of Spain's ruling Socialist Party, were expected to improve their performance on Sunday.

In 1989 the Basque economy showed signs of recovery when regional growth of 5.7 per cent overtook overall national growth of five per cent. It was the first time in 12 years that the industrialzsed Basque region had notched such a record.

Campaigning for the elections have been the most peaceful since Spain gave autonomy to the Basque region in 1979, the most extensive granted to any region in the peninsula.

"For the first time we are talking of Basque problems and not about the Basque problem," said regional President Jose Antonio Ardananza who is standing for re-election as the PNV candidate on Sunday.

MADRID (OCT. 26) EFE - Five Britons, believed to be part of an international ring smuggling hashish to Britain and the Netherlands, have been arrested and 230kg of the drug seized, Spanish authorities said Friday.

The five Britons were identified as John Charles Short, Charles Smith, Kevin Thorm, John Robert Cooper, and Ann Ellen Ratwell. They were arrested Tuesday in the capital.

Most of the drugs, which were worth a total of dlrs 1.5 million, was found hidden in the wheels of a truck at a warehouse near Madrid. Another 30 kg was discovered inside a British-registered transit van.

The hashish was smuggled into Spain from North Africa. A Spaniard was also arrested in the operation.

Police said the investigation had now switched to the Mediterranean holiday resort of Fuengirola, after the group had given enough evidence to identify others members of the network, including the leader.

British police cooperated with Spanish authorities in the sweep.

Police believe the gang may have been responsible for another 1,000 kg of hashish which had previously been seized.

#90299e0038 10/26/1990 ~Latin America New Agency

BUENOS AIRES (OCT. 26) EFE - The Argentine government reached an agreement Friday on tariff rates with the foreign buyers of the state-owned telephone company ENTel after a week of tense negotiations, Argentine government officials said.

Argentine Vice President Eduardo Duhalde said Spain's government-owned telecommunications company Telefonica and a consortium led by its Italian counterpart, STET, had agreed to accept the government's initial tariff of 207 australs (3.6 cents) per unit.

Telefonica and the STET-led consortium had been holding out for a base price per unit of 289 australs (five cents).

The government set a rate of 193 australs per unit last September but since then the Argentine economy has been hit by a resurgence of hyperinflation.

The Spanish company is now set to take over ENTel's southern network, Telco Sur, with STET and its French partner France Cable and Radio acquiring the northern network, Telco Norte.

Earlier in the week, the government had threatened to call a halt to ENTel's privatization if the two groups of buyers refused to accept its base price for a phone call.

The deal was sealed after a flurry of diplomatic intervention, with the French Spanish and Italian ambassadors visiting Duarte in support of their respective telecommunications companies, Argentine press reported.

Unions and opposition parties had opposed the privatization which forms part of the government's plan to reduce the country's massive fiscal deficit. ENTel has some 40,000 employees.

Under the agreement, Telefonica and the STET-led consortium acquire 60 per cent of Telco Sur and Telco Norte respectively for a total dlrs 214 million in cash and dlrs five million in Argentine foreign-debt paper.

Another 30 per cent of ENTel's shares are to be sold on the open market while the remaining ten per cent are to be acquired by cooperatives and company employees.

Duarte is acting head of state during President Carlos Menem's current tour of several Western European countries.

#90299f1869 10/26/1990 ~United Press International

CHICAGO (OCT. 26) UPI - Widespread selling and forecasts for continued favorable harvest weather continued to pressure the grain market Friday.

Closing prices were lower on the Chicago Board of Trade in light to moderate trading.

Soybeans were at their lowest levels in three months. November beans fell to $5.94 per bushel and closed just above the low. Commercials dominated the selling in the soy complex on reports of an increase in farmer selling and expectations of heavy deliveries of soybeans on Wednesday.

Corn was moderately lower across the board, although losses were limited by light commercial buying.

Active harvesting weighed on corn and soybean prices, and the forecast called for little or no rain during the weekend in the major production areas.

Wheat was lower in quiet trading.

Basis levels were steady to firm. While receipts at elevators were moderate to heavy, most of the grain was going into storage.

At the close, corn was off 2 to 2 3/4, soybeans down 4 to 10 3/4, wheat off 1 3/4 to up 3/4 and oats down 3 1/2 to 4.

BEIJING (OCT. 26) XINHUA - CHINESE ARCHEOLOGISTS HAVE DISCOVERED LARGE AND WELL-PRESERVED MURALS IN AN ANCIENT TOMB DATING BACK TO THE NORTHERN DYNASTIES (386-581) PERIOD, ACCORDING TO THE "GUANGMING DAILY" TODAY.

LOCATED ON THE NORTH BANK OF THE ZHANGHE RIVER IN CIXIAN COUNTY, HEBEI PROVINCE, THE TOMB'S COFFIN CHAMBER IS 12 M IN HEIGHT AND COVERS AN AREA OF 50 SQ M.

ON BOTH THE EASTERN AND WESTERN WALLS OF CORRIDOR LEADING TO THE CHAMBER ARE HUGE MURALS DEPICTING THE BURIAL RITES. MORE THAN 100 LIFE-SIZED FIGURES ARE TAKING PART IN THE FUNERAL PROCESSION, WHICH IS LEAD BY A BLACK DRAGON AND A WHITE TIGER.

IN THE SKY ABOVE THE PROCESSION ARE VARIOUS MYTHICAL ANIMALS, LOTUSES AND FLOATING CLOUDS.

IT IS ESPECIALLY NOTICEABLE THAT THERE ARE MORE THAN 100 SQ M OF PAINTINGS OF LOTUSES AND OTHER DECORATIVE FLOWERS AND PLANTS ON THE FLOOR OF THE CORRIDOR.

LARGE NUMBERS OF RELICS, INCLUDING JADEWARE, PORCELAIN PRODUCTS AND OVER 2,000 PIECES OF POTTERY WITH LIFE-SIZED WARRIOR, MUSICIAN AND SERVANT FIGURES WERE ALSO UNEARTHED FROM THE TOMB.

SINCE NO WRITTEN MATERIALS WERE FOUND IN THE TOMB, THE EXACT DATE AND THE NAME OF THE OWNER OF THE TOMB STILL REMAIN UNCERTAIN, SAID XU GUANGJI, DEPUTY DIRECTOR OF THE INSTITUTE OF ARCHEOLOGY UNDER THE CHINESE ACADEMY OF SCIENCES.

#90299h0092 10/26/1990 ~Chinese News Agency

HONG KONG (OCT. 26) XINHUA - THE VALUE OF HONG KONG'S RE-EXPORTS ROSE BY 15.3 PERCENT TO 35,100 MILLION H.K. DOLLARS (4,500 MILLION U.S. DOLLARS) IN SEPTEMBER COMPARED WITH A YEAR EARLIER.

LATEST OFFICIAL STATISTICS SHOW THAT THE VALUE OF HONG KONG'S DOMESTIC EXPORTS AMOUNTED TO 19,525 MILLION H.K. DOLLARS (2,503 MILLION U.S. DOLLARS), SHOWING VIRTUALLY NO CHANGE OVER SEPTEMBER LAST YEAR.

TAKING DOMESTIC EXPORTS AND RE-EXPORTS TOGETHER, THE VALUE OF HONG KONG'S TOTAL EXPORTS ROSE BY 9.3 PERCENT TO 54,625 MILLION H.K. DOLLARS (7,003 MILLION U.S. DOLLARS) IN SEPTEMBER THIS YEAR.

THE IMPORTS IN VALUE TERMS GREW BY 14.8 PERCENT OVER A YEAR EARLIER TO 53,852 MILLION H.K. DOLLARS (6,904 MILLION U.S. DOLLARS).

A VISIBLE TRADE SURPLUS OF 773 MILLION H.K. DOLLARS (99 MILLION U.S. DOLLARS) WAS RECORDED IN SEPTEMBER THIS YEAR.

COMMENTING ON THE SEPTEMBER FIGURES, A GOVERNMENT SPOKESMAN SAID THE PERFORMANCE OF RE-EXPORTS CONTINUED TO BE ROBUST WHILE THE DECLINES IN THE VALUE OF DOMESTIC EXPORTS SEEMED TO HAVE MODERATED OR STABILIZED IN RECENT MONTHS.

HE SAID THAT THE STRONG GROWTH IN RE-EXPORTS WAS LARGELY ATTRIBUTABLE TO A RAPID INCREASE IN RE-EXPORTS OF CHINA ORIGIN.

AS REGARDS RETAINED IMPORTS, A FURTHER SIGNIFICANT INCREASE WAS RECORDED IN SEPTEMBER. THEY HAD ALREADY SHOWN POSITIVE GROWTH FOR THREE CONSECUTIVE MONTHS. THIS MIGHT SUGGEST SOME IMPROVEMENT IN DOMESTIC DEMAND.

THE SPOKESMAN, HOWEVER, SAID THAT DEVELOPMENTS STEMMING FROM THE GULF CRISIS

WERE EXPECTED TO HAVE SOME DAMPENING EFFECT ON THE DEMAND FOR HONG KONG'S EXPORTS, DEPENDING ON THE IMPACT OF THE CRISIS ON HONG KONG'S MAJOR OVERSEAS MARKETS, PARTICULARLY THE UNITED STATES.

#90299h0100 10/26/1990 ~Chinese News Agency

TOKYO (OCT. 26) XINHUA - THE EUROPEAN COMMUNITY (EC) TODAY EXPRESSED DISSATISFACTION AT THE TRADE NEGOTIATIONS ON THE LIBERALIZATION OF JAPAN'S FOOD, FISH AND LEATHER MARKETS.

SPEAKING AT THE CONCLUSION OF THE ANNUAL BILATERAL TRADE TALKS, HORST BUNTER KRENZIER, CHIEF NEGOTIATOR FOR EC, SAID THE PROGRESS ACHIEVED IN THE TWO-DAY MEETING WAS "FAR FROM BEING SATISFACTORY."

EC CALLED IN PARTICULAR FOR FREER MARKETS FOR PROCESSED FOOD, MARINE PRODUCTS AND LEATHER FOOTWEAR AT THE NEGOTIATIONS.

BUT THESE AREAS ARE STRONGLY PROTECTED BY THE JAPANESE GOVERNMENT AND ARE DIFFICULT TO PENETRATE, THE CHIEF NEGOTIATOR SAID.

KRENZLER CAREFULLY AVOIDED LINKING THE FAILURE OF THE TALKS WITH THE ISSUE OF JAPANESE CAR SALES IN EC MARKETS, BUT HINTED THAT IT WOULD AFFECT GENERAL BILATERAL RELATIONS, WHICH "CERTAINLY INCLUDE" THE AUTO ISSUE.

THE TWO SIDES AGREED TO MAKE FURTHER EFFORTS AND TO BRING THE PROBLEMS TO THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT), HE SAID.

#90299k0069 10/26/1990 ~Japanese News Agency

TOKYO (OCT. 26) KYODO - PUBLIC PROSECUTORS ON FRIDAY INDICTED TWO FORMER BRANCH MANAGERS OF SUMITOMO BANK AND A BUSINESS CONSULTANT FOR ALLEGEDLY ARRANGING ILLEGAL LOANS TOTALING 43.9 BILLION YEN FOR STOCK SPECULATORS.

THE TOKYO DISTRICT PUBLIC PROSECUTORS OFFICE INDICTED AKINORI YAMASHITA, 45, OF TOKYO, FORMER MANAGER OF SUMITOMO'S AOBADAI BRANCH, IN YOKOHAMA, AND FUMIO NISHIMARU, 41, YAMASHITA'S SUCCESSOR AT THE BRANCH.

THE PAIR WERE INDICTED UNDER THE INVESTMENT DEPOSIT AND INTEREST RATE CONTROL LAW. KIYOSHI AKIYAMA, 40, OF TOKYO, PRESIDENT OF A TOKYO-BASED BUSINESS CONSULTANCY COMPANY, WAS ALSO INDICTED UNDER THE LAW.

THE INDICTMENT ALLEGES THAT YAMASHITA USED HIS POSITION AS BRANCH MANAGER TO ARRANGE PRIVATE LOANS TOTALING 11.4 BILLION YEN FROM THREE BIG SUMITOMO BANK CUSTOMERS BETWEEN MARCH AND SEPTEMBER 1988 FOR STOCKS SPECULATOR MITSUHIRO KOTANI.

KOTANI, 53, WHO OPERATES A STOCK SPECULATION GROUP, KOSHIN, IS CURRENTLY ON TRIAL ON AN ILLEGAL STOCKS TRADING CHARGE.

YAMASHITA'S INVOLVEMENT IN THE LOAN SCANDAL, WHICH SURFACED WITH HIS ARREST ON OCTOBER 5, PROMPTED THE RESIGNATION OF TWO SENIOR SUMITO BANK EXECUTIVES, INCLUDING BOARD CHAIRMAN ICHIRO ISODA, 77.

PROSECUTION SOURCES SAID YAMASHITA RECEIVED CASH FROM KOTANI AS A REWARD, AS WELL AS INSIDER INFORMATION ON STOCKS DEALS THAT PRODUCED HUGE SPECULATIVE TRADING PROFITS.

YAMASHITA, WHO WAS TRANSFERRED TO A DIFFERENT BRANCH IN TOKYO EARLY THIS YEAR, WAS ALSO CHARGED WITH MEDIATING PRIVATE LOANS OF 11.5 BILLION YEN BETWEEN MARCH AND JULY, ACTING IN CONSPIRACY WITH AKIYAMA, TO A COMPANY ASSOCIATED WITH AKIRA KATO, 49, THE OWNER OF THE DEFUNCT SEIBI STOCK SPECULATORS' GROUP.

NISHIMARU, WHO SUCCEEDED YAMASHITA IN JANUARY, WAS INDICTED FOR ILLEGALLY ARRANGING 20 BILLION YEN IN LOANS FROM FOUR BIG SUMITOMO CUSTOMERS TO THE SAME SEIBI GROUP COMPANY IN CONSPIRACY WITH HIS PREDECESSOR AND AKIYAMA AND ONE LOAN OF 1 BILLION YEN TO AKIYAMA HIMSELF.

PROSECUTORS INDICTED NISHIMARU, WHO WAS TRANSFERRED TO THE BANK HEADQUARTERS SHORTLY BEFORE YAMASHITA'S ARREST, WITHOUT DETAINING HIM. PROSECUTION SOURCES INDICATED THAT WAS BECAUSE HE APPARENTLY DID NOT RECEIVE REWARDS FOR FIXING OF THE LOANS.

LATER ON FRIDAY, SUMITOMO BANK ANNOUNCED THAT IT HAD SACKED THE TWO OFFICIALS, ADDING THAT THE BANK WAS DEMANDING THE RETURN OF RETIREMENT MONEY ALREADY PAID TO YAMASHITA.

MEANWHILE, THE SOURCES SAID PART OF THE LOANS THE TWO EXECUTIVES ARRANGED HAD COME FROM SUMITOMO BANK ITSELF.

THE INDICTMENT OF THE TWO SUMITOMO MANAGERS CAME TWO DAYS AFTER PUBLIC PROSECUTORS IN TOKYO ARRESTED TWO FORMER EXECUTIVES OF MITSUI TRUST AND BANKING FOR ALLEGED TAX EVASION FOR EARNINGS THROUGH STOCK DEALINGS.

#90299k0075 10/26/1990 ~Japanese News Agency

SEOUL (OCT. 26) KYODO - THE STOCK MARKET CRASHED FRIDAY IN A RECORD SINGLE-DAY DROP IN THE INDEX BECAUSE OF INVESTORS' WORRIES ABOUT RENEWED TENSION IN THE GULF REGION, POSSIBLE OIL PRICE HIKES AND POLITICAL JITTERS, REPORTS YONHAP.

THE COMPOSITE STOCK PRICE INDEX PLUMMETED 32.04 POINTS, OR 4.17 PERCENT, TO CLOSE THE DAY AT 735.02, SHEDDING 7.53 PERCENT IN TWO DAYS.

THE WORST MARKET CRASH WAS ATTRIBUTED TO THE REPORTED GOVERNMENT INTENTION TO RAISE OIL PRICES WITHIN THIS YEAR, POLITICAL TENSION REKINDLED BY CONTROVERSY OVER PROPOSED SHIFT TO THE PARLIAMENTARY CABINET SYSTEM AND INTRODUCTION OF LOCAL AUTONOMY.

A U.S. DECISION TO SEND 100,000 ADDITIONAL SOLDIERS TO THE TENSION-RISING PERSIAN GULF ALSO CONTRIBUTED TO THE AVALANCHE OF SELLING ORDERS.

THE FRIDAY COLLAPSE BROKE THE RECORD OF 31.71 POINT-FALL ON APRIL 30 THIS YEAR.

TRADING VOLUME AMOUNTED TO 18.3 MILLION SHARES FOR A TURNOVER OF 268.162 BILLION WON. TRADED ITEMS ACCOUNTED FOR ONLY 62 PERCENT OF THE TOTAL ENLISTED ISSUES, BELOW THE PREVIOUS LOW OF 64 PERCENT ON APRIL 30.

THE NUMBER OF LOSERS TOTALED 906, INCLUDING 872 STOCKS LOSING TO THE INTRADAY LIMIT, WHILE THAT OF GAINERS POSTED 38, INCLUDING 20 STOCKS RISING TO THE LIMIT. EIGHT STOCKS REMAINED UNCHANGED.

SHORT-TERM FINANCE COMPANY ISSUES WERE THE ONLY GAINERS AMID THE ACROSS-THE-BOARD RETREAT.

#90299k0076 10/26/1990 ~Japanese News Agency

TOKYO (OCT. 26) KYODO - JAPAN'S ECONOMY WILL SLOW DOWN SLIGHTLY IN THE NEXT FISCAL YEAR STARTING IN APRIL 1991, WITH FALLING GROWTH IN HOUSING AND CORPORATE CAPITAL SPENDING, THE BANK OF JAPAN SAID IN A QUARTERLY REPORT FRIDAY.

BUT A CENTRAL BANK OFFICIAL SAID THE SLOWDOWN WILL NOT BE SIGNIFICANT ENOUGH TO TURN THE ECONOMY INTO A RECESSION IN FISCAL 1991, NOTING THAT THE NATION'S ECONOMY WILL REMAIN ON AN EXPANSIONARY TRACK.

''ASSUMING THE CURRENT STABLE MOVEMENTS IN THE MIDDLE EAST AND OIL PRICES WILL CONTINUE, THE PACE OF GROWTH WILL NOT BE FAR APART FROM FORECASTS OF AROUND 4 PERCENT BY PRIVATE INSTITUTIONS,'' SAID MASAAKI NAKAO, HEAD OF THE BANK'S RESEARCH AND STATISTICS DEPARTMENT.

THE CENTRAL BANK REPORT SAID THE TEMPO OF ECONOMIC GROWTH WILL REMAIN HIGH IN THE CURRENT FISCAL 1990, BUT HIGHER INTEREST RATES WILL LIKELY PUT A LID ON HOUSING AND CORPORATE CAPITAL INVESTMENT IN FISCAL 1991.

A RISE IN JAPANESE INTEREST RATES HAS ALREADY SLOWED HOUSING INVESTMENT AND CORPORATE SPENDING ON PLANT AND EQUIPMENT, BOOSTING THE COST OF FUND-RAISING FOR SUCH INVESTMENTS, IT SAID.

THE NATION'S ECONOMY HAS BEEN EXPANDING FOR THE 47TH CONSECUTIVE MONTH THROUGH

OCTOBER, ITS SECOND-LARGEST PERIOD OF POSTWAR GROWTH, ON THE STRENGTH OF PERSONAL CONSUMPTION AND CORPORATE SPENDING ON PLANT AND EQUIPMENT.

BUT THE REPORT CAUTIONED PRICES SHOULD BE MONITORED CAREFULLY TO PREVENT ''HOMEMADE'' INFLATION AS THE SUPPLY-DEMAND SITUATION OF THE LABOR MARKET AND MANUFACTURED GOODS IS TIGHTENING.

PRICE GOUGING HAS NOT BEEN DETECTED YET DESPITE THE SURGE IN OIL PRICES SINCE IRAQ'S INVASION OF KUWAIT ON AUGUST 2, BUT CAUTION MUST BE EXERCISED IN LIGHT OF CORPORATE MOVES TO PASS THE INCREASED COST OF LABOR AND DISTRIBUTION ON TO PRODUCT PRICES, IT SAID.

SUCH MOVES, COMBINED WITH A HIKE IN KEROSENE AND GASOLINE PRICES, WILL LIKELY ADD INFLATIONARY PRESSURES ON CONSUMER PRICES IN THE SECOND HALF OF THE CURRENT FISCAL YEAR, IT ADDED.

#90299k0088 10/26/1990 ~Japanese News Agency

TOKYO (OCT. 26) KYODO - THE FINANCE MINISTRY WILL SEEK THE DIET PASSAGE OF A FISCAL 1990 SUPPLEMENTARY BUDGET BY THE END OF THIS YEAR INSTEAD OF EARLY NEXT YEAR, MINISTRY OFFICIALS SAID FRIDAY.

THE MOVE IS DESIGNED TO SPEED UP DISBURSEMENT OF 1 BILLION DOLLARS IN NONMILITARY AID FOR THE MULTINATIONAL FORCES IN THE PERSIAN GULF, WHICH IS TO BE PROVIDED IN THE SUPPLEMENTARY BUDGET, THEY SAID.

THE SUPPLEMENTARY BUDGET FOR FISCAL 1990 WILL BE SLASHED TO SOME 2 TRILLION YEN FROM ROUGHLY 5.9 TRILLION YEN IN FISCAL 1989 IN LIGHT OF SIGNS OF A SLOWDOWN IN CORPORATE TAX REVENUE GROWTH, THEY SAID.

THE AID MONEY REPRESENTS HALF THE 2 BILLION DOLLARS JAPAN HAS PLEDGED TO THE GULF FORCES CONFRONTING IRAQ. THE GOVERNMENT HAS ALREADY SPENT ANOTHER 1 BILLION YEN IN SUCH AID.

TOKYO HAS ALSO PROMISED ANOTHER 2 BILLION DOLLARS IN AID TO THE MIDDLE EAST COUNTRIES AFFECTED BY THE UNITED NATIONS-IMPOSED SANCTIONS AGAINST IRAQ FOR ITS INVASION OF KUWAIT ON AUGUST 2.

THE FINANCE MINISTRY WILL DISBURSE MOST OF THE MONEY IN THE FISCAL 1990 BUDGET AND THE REMAINDER WILL BE SET ASIDE IN A FISCAL 1991 BUDGET.

JAPAN HAS BEEN UNDER PRESSURE FROM THE UNITED STATES TO PROVIDE THE MONEY AS SOON AS POSSIBLE.

THE MINISTRY HAD PLANNED TO DRAFT A FISCAL 1990 SUPPLEMENTARY BUDGET AS PART OF A PACKAGE WITH A FISCAL 1991 BUDGET FOR SUBMISSION TO THE DIET EARLY NEXT YEAR.

THE SUPPLEMENTARY BUDGET WILL ALSO INCLUDE SOME 600 BILLION YEN FOR DISASTER RELIEF TO THE AREAS HIT HARD BY A SERIES OF BIG TYPHOONS THIS YEAR, THE OFFICIALS SAID.

UNDER THE SPREADING IMPACT OF CRUMBLING STOCK PRICES SINCE EARLY THIS YEAR, BANKS, INSURANCE FIRMS, AND BROKERAGE HOUSES ARE EXPECTED TO REPORT POOR EARNINGS FOR FISCAL 1990. THESE GROUPS PAY ROUGHLY ONE-THIRD OF ALL CORPORATE TAXES.

-30- 1988

#90299k0090 10/26/1990 ~Japanese News Agency

TOKYO (OCT. 26) KYODO - JAPAN'S EXPORTS OF STEEL IN THE APRIL-SEPTEMBER PERIOD DROPPED 18.6 PERCENT FROM A YEAR EARLIER TO 8,321,000 TONS, THE LOWEST LEVEL IN 20 YEARS, AN INDUSTRY ASSOCIATION REPORTED FRIDAY.

IT WAS THE FIRST TIME THAT THE CUMULATIVE EXPORT VOLUME FOR THE FIRST HALF OF A FISCAL YEAR FELL BELOW 10 MILLION TONS SINCE THE EXPORT CAME TO 9,090,000 TONS IN FISCAL 1970'S FIRST HALF, ACCORDING TO THE JAPAN IRON AND STEEL FEDERATION.

FEDERATION OFFICIALS ATTRIBUTED THE MARKED DECLINE CHIEFLY TO SLUGGISH EXPORTS TO CASH-STRAPPED CHINA AND THE SOVIET UNION AND PRODUCERS' INCREASED SALES IN THE DOMESTIC MARKET.

AGAINST THE BACKDROP OF BRISK DOMESTIC DEMAND, STEEL SALES IN THE HOME MARKET HAVE BEEN SHOWING STEADY GROWTH, THE ASSOCIATION SAID.

IN SEPTEMBER, JAPAN'S STEEL EXPORTS ALSO FELL 17.5 PERCENT FROM A YEAR EARLIER TO 1,347,000 TONS.

EXPORTS TO THE SOVIET UNION PLUNGED 72.1 PERCENT IN SEPTEMBER FROM A YEAR BEFORE TO 13,000 TONS, WHILE SHIPMENTS TO CHINA WERE ALSO DOWN A HEFTY 43.0 PERCENT TO 160,000 TONS.

STEEL EXPORTS TO THE UNITED STATES FELL 22.8 PERCENT TO 269,000 TONS, THE REPORT SAID.

#90299m0001 10/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

World stock markets are lower this morning. ... The Nikkei is down 347 points and the FTSE is off 23 points at midday. ... U.S. stocks trading overseas also are down, with the EXMI losing 1.25. ... The dollar is weaker and the long bond is yielding 8.76% in overnight trading. ... Brent North Sea crude is up one dollar to $35.25 for December delivery.

DEFENSE SECRETARY DICK CHENEY says the U.S. may send as many as 100,000 more troops to the Middle East. ... The LABOR DEPARTMENT says wages, salaries and benefits paid to U.S. workers rose 5.2% in the 12 months ended in September, compared to a 5.1% increase the previous 12 months. ... The NATIONAL ASSOCIATION OF REALTORS says existing home sales dropped 8% in September. ... UNISYS reports a third-quarter loss of $357 million and says it will lay off 5,000 more workers. ... USAIR reports a third-quarter loss of $120 million and DELTA AIR LINES says it lost $51.6 million. ... UAL reports earnings of $106.1 million, but that is down from $110.9 million from third-quarter 1989. ... BANK OF BOSTON reports a third-quarter loss of $254.9 million vs. a $125.1 million a year earlier. ... "The New York Daily News" is on strike and "The Wall Street Journal" is raising its newsstand price from 50 cents to 75 cents. ... AVON PRODUCTS has hired the investment firm of JAMES WOLFENSOHN INC. to explore options for raising the price of the cosmetics company's shares.

WHAT'S AHEAD:

MNC FINANCIAL CORP., the fourth-largest credit card business in the country, is up for sale as its parent bank tries to raise cash to cover heavy losses on commercial real estate loans. ... Federal regulators approved a plan to sell or close about 192 failed savings and loans over the next six months. ... The former owner of the WESTERN SAVINGS ASSOCIATION in Texas faces trial on 37 charges of bank fraud, misuse of funds and conspiracy following his indictment yesterday. ... AMERICAN AIRLINES is offering to top a $300 million UNITED AIRLINES bid for PAN AM's London routes.

FROM THE BULLS:

"When the market is down 20% to 30%, it isn't the time to be bearish," says

SHELBY DAVIS of the NEW YORK VENTURE FUND. (WSJ, 10/26)

"Despite the market's decline, it gave me the impression that it wants to move higher," says HARRY LAUBSCHER of TUCKER ANTHONY R.L. DAY INC. He points out that "volume didn't expand on the weakness Thursday," and there was progress on the budget deal. Laubscher says that with a budget agreement, "the Federal Reserve may do something

to lower the federal funds rate." ("Investor's Daily", 10/26)

"Everybody's worries - Iraq, the budget dilemma and the financial crisis - should largely be resolved in the next six to 12 months," says WILLIAM HAY, head of DUNDEE PARTNERS. He sees the Dow at 3000 by June. "If you buy quality and growth - and you've got patience - the injured will get health again." ("USA Today", 10/26)

MARK LEIBOVIT, editor of the "Volume Reversal Survey," is looking for an upside "explosion" that could propel the Dow to 2833 and mark the beginning of a new bull market. "The Middle East crisis may blow over," says Leibovit. "I am also encouraged that volume ... declined on the recent lows." ("Investor's Daily", 10/26)

FROM THE BEARS:

"It now appears this bear market is going to be a lot worse than originally expected," says DAN SULLIVAN at "The Chartist." Sullivan says the market has trapped thousands of investors who bought in at higher levels and are now looking to get out. He fears a re-run of the 1973-74 bear market. (CNBC "World Business", 10/26)

"I think we will trend lower to the 2400 level [on the Dow]," says DALE TILLS, head of institutional trading for CHARLES SCHWAB in San Francisco. (WSJ, 10/26)

STOCK MARKET:

"On a very near-term basis, we've seen resistance coming at the 2530 area, so that's a level the market will have to get above to really have any kind of a breakout," says EUGENE PERONI of JANNEY MONTGOMERY SCOTT." (CNBC "Market Wrap-Up", 10/25)

"The only thing a trader can do is sell [into] rallies," says THOMAS GALLAGHER of OPPENHEIMER & CO. "If you do that you make money every time." (WSJ, 10/26)

"It's not just oil prices" that is driving the stock market, says DOUGLAS LOUDON of SCUDDER, STEVENS & CLARK. "It's the whole political situation - what's going on in Iraq and Kuwait and the possibility of war." He says with so much negative sentiment, the smallest bit of good news can cause the market

to rally by as much as 150 points. (FNN "Marketwrap", 10/25)

"It looks like the buying's dried up," says KEN DUCEY of S.G. WARBURG. "The sellers have no place to go. That's why the market's down 20 points. It was affected mostly by program trading." (NYT, 10/26)

"The early optimism faded on the growling from the Middle East," says JAMES CRIST of PARKER/HUNTER. "Until something's settled over there, the market won't be on firm footing." ("USA Today", 10/26)

"Conviction levels are low," says ERIC MILLER at DONALDSON LUFKIN & JENRETTE. "The primary question [in investors' minds] is whether there is a serious recession ahead of us or not." (WSJ, 10/26)

STOCK TIPS:

"If you can't eat it, drink it, smoke it, use it in the bathroom or earn a yield on it, you don't want to own it," says STEVEN KROLL, president of SHEARSON LEHMAN ADVISERS. (WSJ, 10/26)

Since the Kuwait invasion, the number of IPO's have slowed to a trickle. New issues which are making it to market have tended to be in the oil and health-care area, says LINDSAY VAN VOORHIS of SECURITIES DATA. He likes ALTA HEALTH CARE STRATEGIES which provides management services to companies trying to reduce health care costs. Their services could be in demand during the economic slowdown, says Van Voorhis. The stock will come to market around $10-$12 with a low P/E. (CNN "Business Day", 10/26)

"The market is as oversold as it ever gets," says BERNARD SCHAEFER at the "Options Advisor." He has been encouraged by a "major positive divergence" in the Dow Utilities and says the market is looking at a "potentially historic buying opportunity right here." His advice: buy the AT&T Jan. 30 call because "the entire telephone group is oversold and due for a rally." (CNBC "World Business", 10/26)

"If you look at the valuation of PFIZER compared to the other 13 blue-chip drug firms, Pfizer even at this new- high ground is still selling at a discount," says WEDBUSH MORGAN's DAVID SAKS. The stock closed yesterday at 77 3/8, down slightly from its all-time high of 79 1/4 set earlier this week. ("Investor's Daily", 10/26)

"Whenever we get something like last week, we are sellers of the weaker issues " says JOSEPH BATTIPAGLIA of GRUNTAL & CO. "We were sellers of technology stocks last week. We were sellers in some of the retailing last week. .... Now in this week, as the prices recede, in certain areas we would be buyers, like the pharmaceuticals, for example. So you buy on weakness in the good groups to accumulate over time for a rally in 1991 and you sell into strength the weaker holdings you have." He says some of the paper stocks look

attractive to Gruntal, along with FORD, GENERAL MOTORS, DuPONT and WESTINGHOUSE. (CNBC "Market Wrap-Up", 10/25)

GENERAL MOTORS' new Saturn cars went on sale yesterday. The buyer response? "We've been busy as a one-legged man in a butt-kicking contest," says MIKE CRISWELL, sales director at SATURN OF CLEARWATER [Fla.]. He says the dealer sold 13 cars, whereas the average is about five. ("USA Today", 10/26)

WILLIAM HAY, head of DUNDEE PARTNERS, who sees the Dow climbing to 3000 by June lists a dozen stocks for DAN DORFMAN in "USA Today" that he thinks will soar in the next nine to 12 months. They are: PEPSICO, HUMANA, COLGATE-PALMOLIVE, H.J. HEINZ, ABBOTT LABS, WAL-MART, J&J, MERCK & CO., DAYTON HUDSON, SCHLUMBERGER, BRISTOL- MYERS SQUIBB and GILLETTE. ("USA Today", 10/26)

#90299p0001 10/26/1990 ~PR Newswire

OXNARD, CA (OCT. 26) PR NEWSWIRE - Ventura County National Bancorp (NASDAQ: VCNB) today reported that its net income for the third quarter and nine months ended Sept. 30, 1990, increased nearly 71 percent and 37 percent over the respective periods of 1989.

Ventura's earnings for the 1990 third quarter were $1,369,000 or $0.28 per share, compared with $801,000 or $0.21 per share for the same three months of last year. For the first nine months of 1990, the company recorded earnings of $2,914,000 or $0.60 per share, up from $2,133,000 or $0.57 per share. The company attributed the increases to higher interest income and noninterest income related both to internal growth and the acquisition of Frontier Bank, N.A. and Westco Savings Bank.

William E. McAleer, president and chief executive officer, noted "Our positive year-to-year comparisons particularly reflect the contributions made by Frontier Bank, which we acquired in October 1989, and Westco Savings Bank, whose deposits were acquired in the second quarter of this year."

The 1990 third quarter results represented an annualized return on average assets of 1.04 percent and return on average equity of 15.58 percent.

Net interest income was $5,224,000 for the quarter ended Sept. 30, 1990, compared with $3,470,000 for the third quarter of 1989. For the recent nine months, net interest income rose to $14,350,000, from $10,044,000 in the same 1989 period. A higher level of interest-earning assets and wider net interest margins were primarily responsible for the increases. Noninterest income advanced to $3,630,000 from $651,000 comparing the quarters ended Sept. 30, 1990 and 1989, respectively, and totaled $5,079,000 for the recent nine months versus $1,628,000 for the same period of last year. The advance in noninterest income was largely due to profits from secondary market activities involving the real estate portfolio.

Noninterest expense was $6,261,000 and $14,108,000 for the third quarter and nine months of 1990, compared with $2,614,000 and $7,617,000 in the respective 1989 periods. The expense increases reflected the company's expanded operations, particularly as a result of the acquisitions.

McAleer noted that Ventura continued to maintain high asset quality. Nonperforming assets represented only 0.80 percent of loans at Sept. 30, 1990, and net charge-offs were equivalent to 0.04 percent of average loans for the nine months to-date.

Ventura had shareholders' equity of $26,731,000 at the end of the recent quarter, equivalent to book value of $5.57 per share, and the primary capital ratio was 6.72 percent.

Total assets were $400.9 million at Sept. 30, 1990, compared with $243.1 million one year ago. Net loans amounted to $281.6 million, up from $178.7 million at Sept. 30, 1989; while deposits totaled $344.9 million at the end of the 1990 third quarter, rising from $209.8 million for the same period last year.

Ventura County National Bancorp is the holding company for Ventura County National Bank, founded in 1982, and the La Palma-based Frontier Bank, N.A., acquired in October 1989. These two commercial banks offer services to middle market businesses, their owners and select professionals in southern California.

WALTHAM, MASS (OCT. 26) PR NEWSWIRE - Thermo Process Systems, Inc. (AMEX: TPI) has received a contract exceeding $1 million to provide soil-treatment services for the U.S. Air Force at Fort MacDill in Tampa, Fla. The work will be conducted by the company's TPS Technologies Inc. subsidiary using one of its mobile soil-remediation units.

TPS will thermally treat approximately 21,000 tons of soil saturated with gasoline and diesel fuel at the site of an old fire training pit at the base. The cleanup effort is expected to begin in November. Fort MacDill is the primary installation for the Air Force's Tactical Air Command, now stationed in the Mideast.

According to Jeffery Powell, vice president of sales and marketing for TPS Technologies, "This contract represents our first major cleanup of a site owned by the federal government. With numerous underground tanks and other possible sources of soil contamination at military installations across the country, cleanup of these sites could become a significant market for our services."

Thermo Process Systems designs, manufactures, and sells advanced custom-engineered thermal-processing systems for the incineration of hazardous wastes and the automated heat treating of metal parts. The company also provides services for the on-site remediation of hazardous wastes and petroleum-laden soils, in addition to a comprehensive range of metallurgical processes. Thermo Process Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

#90299p0006 10/26/1990 ~PR Newswire

HARRISBURG, PA (OCT. 26) PR NEWSWIRE - Bell of Pennsylvania asked the Public Utility Commission to dismiss a complaint requesting that the company be fined $1.1 million.

The complaint was initiated recently by the commission's Bureau of Consumer Services, which cited the company for allegedly violating the commission's Chapter 64 regulations that govern billing, collection, and service ordering procedures.

"Bell has acted at all times fairly, honestly and in good faith in its dealings with its residential customers, and has at all times sought to implement the purpose and policy of Chapter 64," the company said in its response to the complaint.

The complaint claims the company violated the commission's regulations 367

times between 1987 and 1989. During this same time period, the company had more than 30 million individual customer contacts.

The BCS asked that the company be fined three times for each alleged violation or $3,000 for each violation. The company said it considers this request to be "unreasonable, excessive, improperly cumulative, and unfairly discriminatory."

Bill Harral, vice president of regulatory and financial matters, said, "We have worked diligently to comply with a very complex set of regulations. After months of tedious negotiations with the BCS, we feel that this issue can only be resolved by this course of action."

RIVIERA BEACH, FL (OCT. 26) PR NEWSWIRE - Consulier Engineering, Inc. (NASDAQ: CSLR) (the "company") (formerly Consulier Industries, Inc.) of Riviera Beach, Fla., announced today that it has extended the exercise period of certain of its outstanding warrants to Dec. 31, 1991. The exercise period of the warrants, issued in connection with an initial public offering of company common stock in May, 1989, was due to expire on Nov. 15, 1990. Each warrant entitles the holder to purchase one share of common stock at a price of $.60 per share. Apart from the extension of the exercise period, all other provisions of the warrants will remain in full force and effect.

Consulier Engineering, Inc.'s common stock and warrants trade on the over-the-counter market under the NASDAQ symbols CSLR and CSLRW, respectively.

FORT WORTH, TX (OCT. 26) PR NEWSWIRE - Edwin L. Cox Company and URCARCO, Inc. (NASDAQ: CARS), announced today the formation of a corporate joint venture for the purpose of operating "we finance" used car lots under the URCARCO name in the state of California.

The corporate joint venture, named Pacific Automart, Inc., will be owned 50 percent by URCARCO and 50 percent by the Cox Group. The initial equity

capitalization of the corporate joint venture will be $30 million and will be provided by the Cox Group participants and URCARCO, subject to certain regulatory filings and approvals. The Cox Group is composed of Edwin L. Cox Sr.; Berry R. Cox; a Mashek Family Trust; Cazenove & Co., a prominent London-based investment banking firm; and John C. Whitehead, former senior partner of Goldman, Sachs & Co. and former Deputy Secretary of State.

J. Oliver McGonigle, president of the Cox Company, will be chairman of the board and chief executive officer of Pacific Automart, Inc.

Edwin L. Cox Company is an affiliate of Edwin L. Cox Sr., a prominent Dallas businessman who built Cox Oil and Gas, Inc., into one of the nation's largest independent companies in that industry. As a prominent investor in emerging companies, he was an early investor in such companies as ChemLawn and Federal Express. Cox has served on the boards of 13 U.S. corporations and currently serves on the board of directors of Halliburton Corp. Formerly chairman of the boards of Keebler Company and SEDCO, Inc., Cox has also served as chairman of the board of trustees of Southern Methodist University, and is currently on the advisory board of the SMU Edwin L. Cox School of Business.

URCARCO, Inc., operates a chain of 20 used car retail lots in Fort Worth, Dallas, Houston, San Antonio, and Austin, Texas, selling quality used passenger cars and light trucks and typically financing customer purchases. During its 1990 fiscal year ended June 30, 1990, URCARCO sold 18,692 vehicles. The California corporate joint venture will be URCARCO's first business expansion outside the state of Texas.

#90299p0026 10/26/1990 ~PR Newswire

COLUMBIA, S.C. (OCT. 26) PR NEWSWIRE - SCANA Corporation (NYSE: SCG) announced today that its acquisition of Peoples Natural Gas Company of South Carolina (Peoples) under a merger agreement dated May 15, 1990 was completed on October 25, 1990. SCANA will issue approximately 585,900 shares of its common stock in exchange for the outstanding shares of Peoples' common and Class A stock. The total value of the transaction is approximately $19 million.

The merger agreement was approved by Peoples' common stockholders at a special meeting held September 12, 1990. The Public Service Commission of South Carolina has authorized the transfer of Peoples operating authority to SCANA and approved an operating agreement between SCANA and South Carolina Electric & Gas Company (SCE&G), SCANA's principal subsidiary, under which SCE&G will operate the Peoples system as a part of its gas operations group.

Peoples is a regulated public utility headquartered in Florence, S.C. Its service area is contiguous to SCE&G's and includes approximately 9,600 natural gas customers in the cities of Florence, Darlington, Hartsville and Sumter, S.C. and surrounding areas. Peoples has a wholly-owned subsidary, Supertane Gas Company, which is engaged in the sale and distribution of liquefied petroleum gas to approximately 4,200 customers in a seven-county area of the state. The addition of Peoples represents a strategic extension of SCANA's utility operations in South Carolina.

SCANA Corporation, headquartered in Columbia, S.C., is a diversified holding company with approximately 4,400 employees and annual revenues of approximately $1.1 billion. SCE&G is a regulated utility that serves approximately $443,000 electric and 214,000 retail natural gas customers in portions of South Carolina.

#90299p0033 10/26/1990 ~PR Newswire

MURRAY HILL, NJ (OCT. 26) PR NEWSWIRE - The BOC Group, the parent company of Airco Gases, has initiated a new program called BOC Spectra 100 to underscore its commitment to serving the worldwide electronics industry.

For BOC - a global supplier of gases with annual sales of more than $5 billion - BOC Spectra 100 provides a focused approach to helping semiconductor producers meet increasingly demanding production requirements.

"With our BOC Spectra 100 program, The BOC Group plans to become the leading supplier to the world semiconductor industry," says Pat Dyer, managing director and chief executive, gases, for The BOC Group.

One indication of BOC's international presence and broad range of capabilities in the electronics area is today's announcement that Fujitsu Microelectronics has selected BOC to supply high-purity gases to its new semiconductor plant at Newton Aycliffe, in the U.K. BOC, which already serves Fujitsu's Gresham, Oregon semiconductor facility, will also install and operate an advanced gas storage and pipeline distribution system at the new British facility.

Electronics is the fastest growing sector of The BOC Group's business. It currently accounts for ten percent of the company's total revenue; spending for electronics R&D and facilities represents approximately 15 percent of total expenditures in the gases business.

BOC Spectra 100 is an integrated effort that draws together the entire spectrum of BOC's activities relating to the electronics sector. John Walsh, vice president, Group Electronic Gases, explains, "The name BOC Spectra 100 was chosen to designate the drive towards 100 percent purity of the gases supplied and BOC's 100 percent effort devoted to supplying semiconductor customers - 100 percent of the time."

The BOC Spectra 100 program reflects the increasingly important role gases - and state-of-the-art gas technology - are playing in the production of semiconductors. Semiconductor makers use gases both as production atmospheres and as process dopants.

Ultra-high levels of gas purity and consistency of composition are critical to attaining high yields, as semiconductor producers continue their drive to manufacture higher density semiconductor chips - progressing from four megabits, to 16 Mbit, to 64 Mbit.

BOC Spectra 100 encompasses the full range of capabilities in the electronics area. The breadth of electronic gases activities under the BOC Spectra 100 banner meshes with semiconductor makers' interest in total systems capabilities. BOC will provide products, equipment and services in any combination - as individual components, or as fully integrated packages that meet all gas requirements at semiconductor facilities.

NEW YORK (OCT. 26) PR NEWSWIRE - Medicis Pharmaceutical Corp. (NASDAQ: MDRXA, MDRXU), a company specializing in dermatological products and critical medicine, "has successfully launched and has begun shipping its prescription product line with sales for the first quarter ended Sept. 30, 1990 expected to exceed $1 million," Jonah Shacknai, chairman and chief executive officer told shareholders at the company's annual meeting here today.

"Medicis is meeting the internal goals it has set, having completed the hiring of its national sales and marketing force and launching its prescription product line," Shacknai said. "The Medicis sales team is now actively marketing to dermatologists and has made significant penetration among drug wholesalers and retail pharmacists. With $1 million in sales recorded in just the last two weeks of the first fiscal quarter, we have exceeded our expectations," he added.

Medicis Pharmaceutical Corp. went public on March 28, 1990 with the intention of using a substantial portion of the proceeds of the offering to build a sales and marketing organization.

Medicis' principal focus is the $2 billion dermatology market where its has developed high quality, innovative products. The company's prescription products include a unique acne care line which includes Theramycin(TM) Z, a topical antibiotic that combines erythromycin and zinc, and BenzaShave(TM), a prescription shaving product used in the treatment of pseudofolliculitis barbae (razor bumps); Paplex(TM) Ultra, a family of products to treat common and plantar warts; and Onyplex, a nail hardener and bite deterrent. Next month Medicis will launch its Theraplex(TM) family of therapeutic moisturizers and shampoos.

Recently, Medicis announced that it has been granted an exclusive worldwide license to market, when approved, a generic prescription form of Tretinoin, a topical vitamin A derivative used in the treatment of acne. Tretinoin is currently being marketed by Johnson & Johnson's Ortho Pharmaceutical Corp. under the trade name Retin-A(R).

In addition, Medicis is in stage III clinical with its photo chemoprotective sun care product, Bergasol(R). Bergasol which to date has sold over 42 million units in Europe, stimulates the production of Melanin thereby promoting deep tanning, while reducing sun burning and DNA damage which contributes to the formation of skin cancer.

CONTACT: Jonah Shacknai, chairman and CEO, or Peter S. Knight, general counsel, both of Medicis, 212-599-2000 or, at the Grand Hyatt Hotel, 212-883-1234, ext. 1351

#90299p0037 10/26/1990 ~PR Newswire

ANDOVER, MA (OCT. 26) PR NEWSWIRE - Andover Bancorp, Inc. (NASDAQ: ANDB) today announced its operating results for the third quarter of 1990. The Bancorp's assets at Sept. 30, 1990, were $672 million. As of the same date, the Bancorp's capital was $91.3 million, with a capital to assets ratio of 13.6 percent.

For the third quarter, Andover Bancorp had a net loss of $3.2 million or 77 cents per share compared to net income of $1,660,000 or 38 cents per share for the corresponding period in 1989. The quarter's results included a net loss, before the effect of taxes, on the sale and write down of securities and the sale of loans, amounting to $710,000, compared to a net gain of $709,000 in the third quarter of 1989. The net loss also included a quarterly loan loss provision of $2 million, a loss on real estate operations of $2.1 million and the write off of merger related expenses of $1.3 million.

For the nine months ended Sept. 30, 1990, the net loss amounted to $2.3 million or 56 cents per share, compared to net income of $4.6 million or $1.02 per share for the corresponding period of 1989. The 1990 year-to-date loss included a net loss on the sale and write down of securities and the sale of loans, amounting to $423,000, compared to a net gain of $1.1 million during the first nine months of 1989. Included in the 1990 year-to-date results was a loan loss provision of $5.1 million and a loss on real estate operations of $2.2 million.

At Sept. 30, 1990, the bank's non-performing assets totalled $39.6 million, compared to $39.1 million at June 30, 1990 and $27.6 million at Dec. 31, 1989. Net charge-offs for the current quarter were $1.4 million compared to $827,000 in the third quarter of 1989. For the nine months ended Sept. 30, 1990, net charge-offs amounted to $4.4. million, compared to $1.1 million for the corresponding period of 1989.

Robert M. Henderson, chairman and chief executive officer, stated that "The loss for the third quarter was a result of a variety of factors including a loss on the sale of property acquired through foreclosure and the write down of certain investments to their estimated current market value. Also included in the third quarter was the write off of costs relating to the proposed merger with First Essex Bancorp, which was terminated by both parties on Oct. 10, 1990. In light of the continuing deterioration in the real estate market and the New England economy, additional loan loss provisions were deemed necessary. Despite the results for the current quarter, Andover Bancorp continues to have a capital to assets ratio that is well in excess of all current and proposed regulatory requirements."

Andover Bancorp, Inc. is the parent bank holding company of Andover Bank. Andover Bank is a FDIC/DIFM insured Massachusetts chartered savings bank organized in 1834 and headquartered in Andover, Mass., approximately 25 miles

north of downtown Boston. The bank operates branch banking offices in West Andover, Lawrence, Methuen, North Andover and Tewksbury, Mass. Andover Bancorp's annual shareholder meeting has been scheduled for Wednesday, Dec. 19, at 10 a.m. at the Andover Marriott, 123 Old River Rd., Andover, Mass.

TULSA, OK (OCT. 26) PR NEWSWIRE - Because of charges incurred by one of its natural gas pipeline systems, The Williams Companies, Inc. (NYSE: WMB) today reported an unaudited net loss of $15.3 million, or 44 cents per share, in the third quarter that ended Sept. 30.

The loss compares with a net income of $5 million, or 6 cents per share, in the same quarter of 1989. This quarter's results included a $10 million favorable credit for income taxes because Williams and the Internal Revenue Service settled audits through 1987.

Joseph H. Williams, chairman and chief executive officer of the $4.1-billion digital telecommunications and energy transportation corporation, said third-quarter revenues were $349 million, compared with $326 million for the same quarter of 1989.

For the first nine months of 1990, net income was $24.8 million, or 39 cents per share, compared with net income of $29.1 million, or 64 cents per share, during the same period in 1989.

Revenues for the first nine months of 1990 were $1.3 billion, compared with $1.2 billion for the same period in 1989.

Williams Telecommunications Group, Inc. reported a third-quarter operating profit of $20.5 million, compared with $16.8 million in the same quarter last year. Revenues were $96.2 million vs. $82.1 million for the quarter in 1989.

The 22-percent improvement in operating profit was due to increased revenues.

Annualized net interexchange revenues were $245 million at the end of the third quarter, compared with $255 million at the end of the second quarter of this year, reflecting price declines and the effects of a new contract with MCI Communications Corp.

WilTel achieved an operating profit of $57.8 million for the first nine months vs. $42.7 million for the same period in 1989. Revenues for the first nine months of this year were $274 million, compared with $216 million for the same period in 1989.

WilTel signed a major capacity exchange agreement with MCI in August following

the merger of MCI and Telecom-USA, Inc., at the time WilTel's two largest customers.

NEW YORK (OCT. 26) PR NEWSWIRE - Franklin R. Saul, president of Emigrant Savings Bank in New York City, was elected to the board of directors of USLIFE Corporation (NYSE: USH). The announcement was made today by Gordon E. Crosby, Jr., chairman of the board, president and chief executive officer of USLIFE.

Saul has been president of Emigrant Savings Bank since 1978. Previously, he served in several senior executive positions and was elected to the board of trustees of Emigrant in 1976. Prior to Emigrant, he was senior vice president and director of F. S. Smithers & Co. From 1968 to 1969, he was manager at Lehman Brothers. He also served as assistant to the Secretary of the U.S. Treasury Department from 1965 to 1966. From 1953 to 1965, he was a vice president with Citibank.

Franklin R. Saul previously served on the board of directors of The United States Life Insurance Company, a wholly owned subsidiary of USLIFE Corporation since May 1988. In addition, he also served since October 1984 on the board of USLIFE Income Fund, Inc. (NYSE: UIF), a closed-end investment company whose portfolio is managed by USLIFE Advisers, Inc., another subsidiary of USLIFE Corporation.

Born in Belleville, N.J., Saul received his B.S. degree in economics in 1951 from the Wharton School of the University of Pennsylvania. In 1962, Saul graduated from the Stonier Graduate School of Banking at Rutgers University.

From 1951 to 1953, he was a first lieutenant with the United States Army Reserve Transportation Corps.

Saul is married to the former Elayne Robinson and they currently reside in Essex Fells, N.J. They have two children, F. Robert, Jr. and Marilyn Elayne.

CHICAGO (OCT. 26) PR NEWSWIRE - United Airlines today announced that Rono Dutta has been elected vice president - financial planning and analysis effective immediately.

In his new position, Dutta will be responsible for four key functions within United's Finance Division: financial analysis, financial planning, methods and standards and operations research. He will continue to be based at United's corporate headquarters in suburban Chicago.

Dutta, 39, will succeed Louis J. Valerio who was promoted earlier this week to senior vice president - finance. Dutta will report to Valerio, who in turn reports to J.C. Pope, executive vice president - marketing and finance.

A five-year United employee, Dutta has served as director of flight crew resources in its Flight Operations division for the past three years. In that position, Dutta was responsible for planning manpower and training needs for United's 7,000-pilot work force and for managing the overall Flight Operations division budget.

Prior to joining United, Dutta served as the manager of planning for Bell & Howell in Chicago in 1984 and 1985 and as a management consultant with the firm of Booz, Allen and Hamilton in Chicago from 1980 to 1984.

A native of Calcutta, India, Dutta earned a bachelor's degree in mechanical engineering from the Indian Institute of Technology in Kharagpur, India. He earned a master's degree in business administration from the Harvard Business School in 1980. He and his wife, Sree, have two children.

PHILADELPHIA (OCT. 26) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today that Unit No. 3 at the Peach Bottom Atomic Power Station will be taken off line early Saturday for a scheduled mid-cycle outage for testing and maintenance.

PE said the primary purpose of the outage is to complete surveillance testing necessary to permit the unit to continue operation until its next refueling outage, scheduled for Aug. 31, 1991. PE said Unit 3, which was restarted in December 1989 after a 2 1/2-year shutdown, achieved several superior operating marks to date during 1990:

- It's availability factor (time on line) was 94.4 percent, which is, according to the General Electric Co., the fifth best mark this year among the world's 49 boiling water reactors.
- It's capacity factor (percent of total possible generation) was 90 percent.

During the year, PE said, the unit has produced 6.6 billion kilowatt-hours (kwh) of electricity for its owners. The fuel cost to generate this amount of

electricity by nuclear power was approximately $170 million less than the cost would have been to produce the same amount of electricity with oil-fired generation. In addition to achieving superior operating marks, the company's 900 workers at the plant also achieved an all-time safety record.

On Sept. 29, according to Donald B. Miller Jr., PE vice president for Peach Bottom, workers surpassed three million man-hours without a lost-time accident dating back to December 1988, eclipsing by far any previous safety record at the plant.

"I'm proud of our plant and the people who operate it," Miller said. "Their outstanding achievements during 1990 clearly indicate they are dedicated to doing their jobs correctly and doing them safely."

He pointed out that both prior to the plant's restart in 1989 after being shut down for more than two years, and since, "many hundreds of extremely difficult maintenance and testing tasks have been performed in accordance with our exacting NRC licensing requirements and our own radiological safety demands.

"However," he added, "despite our fine performance thus far, we fully recognize the need to continue to seek improvement in all aspects of our operation. Our goal is to demonstrate, over the long haul, that we truly are a world class nuclear power plant."

Miller said the mid-cycle outage on Unit 3 will entail more than 700 tasks, including surveillance testing, maintenance and plant modifications. The unit is scheduled to return to service during the week of Nov. 19. The plant's other reactor, Unit 2, will continue to operate during the Unit 3 outage.

SUGAR LAND, TX (OCT. 26) PR NEWSWIRE - Imperial Holly Corporation (AMEX: IHK) today reported net income of $3,499,000, or $0.35 per share, on revenues of $193,059,000 for its second fiscal quarter ending Sept. 30, 1990. Results for the corresponding quarter last year were net income of $3,097,000, or $0.33 per share, on revenues of $186,346,000. Six months year-to-date results are revenues of $372,032,000, net income of $8,924,000, and earnings per share of $0.88. Comparable fiscal 1990 results were revenues of $363,334,000, net income of $7,226,000, and earnings per share of $0.77.

Although earnings for the quarter exceed last year's reported results, when adjustment is made for the ESOP expense experienced last year, this year's second quarter earnings of $0.35 per share trailed last year's adjusted earnings of $0.47 per share. These results are due principally to a less than expected quality of beet processed during the fall campaign in California.

Extraordinarily high summer temperatures, exceeding 110 degrees for several days in some important growing areas, caused a high incidence of rot in the beets and promoted various beet infections resulting in increased processing costs. Also contributing to the quarter's increased costs, albeit to a lesser extent, was the completion of development of Sales Trac(TM), Imperial Holly's automated order entry system, the cost of which has been expensed as incurred, and the relocation of Holly personnel transferred to the company's corporate offices in Sugar Land.

#90299p0051 10/26/1990 ~PR Newswire

SOUTHINGTON, CONN. (OCT. 26) PR NEWSWIRE - Ralph G. Mann, president and chief executive officer of Southington Savings Bank (NASDAQ: SSBB), reports an unaudited net loss for the third quarter ended Sept. 30, 1990 of $128,000 as compared to net income of $661,000 for the same quarter of 1989. Net loss per share for the quarter totaled 7 cents as compared to net income of 36 cents in 1989.

Unaudited net loss for the nine months ended Sept. 30, 1990 totaled $274,000 as compared to net income of $2,090,000 for the same nine months of 1989. Loss per share for the nine months was 15 cents as compared to net income of $1.14 for the same period of 1989.

President Mann noted that during the first nine months of the year, $2,335,000

has been added to the banks's loan loss reserve as compared to $310,000 for the same period in 1989; the main cause for the decrease in earnings for the year. Non-performing loans have increased to $12,790,000 or 4.9 percent of total assets, as compared to $2,092,000 or .8 percent of total assets on Dec. 31, 1989.

The reserve, which is created to absorb potential loan losses, now totals $2,905,000. Actual loan charge-offs for the quarter were $45,000.

Should the Connecticut's economy remain weak, the bank's capital of 11.8 percent is sufficient to sustain the further increase.

Shareholders equity totaled $30,927,000 and represents a book value of $16.92 per share. Total outstanding shares as of Sept. 30, 1990, were 1,827,992.

The bank's assets totaled $261,958,000 on Sept. 30, 1990 as compared to $251,975,000 on Dec. 31, 1989.

#90299p0055 10/26/1990 ~PR Newswire

PHILADELPHIA (OCT. 26) PR NEWSWIRE - Republic Bank, with offices here at 1515 Market St., today announced profits of $60,132 for the third quarter ending Sept. 30, 1990.

This compares to a loss of $38,665 for the same period in 1989. For the nine months ended Sept. 30, 1990, the bank earned a profit of $135,681 vs. a loss of $193,527 for the period last year.

In addition, total assets increased in the third quarter to $48,458,000, up from $45,134,000 as of June 30, 1990, and $34,738,000 as of Sept. 30, 1989.

Also, Republic reported that loans increased to $32,412,000 from $30,787,000 as of June 30, 1990, and $18,326,000 as of Sept. 30, 1989.

"As the numbers reflect, we continue to grow in all areas of the bank in a very positive manner," stated Rolf A. Stensrud, president and chief executive officer of Republic Bank. "We look to the balance of 1990 with conservative optimism continuing to grow in a manner to create long-term value for the shareholders."

Republic bank specializes in commercial and consumer banking services for small businessmen and individual depositors. In addition to checking and savings accounts, Republic offers consumer and commercial lending services. State chartered under the laws of the Commonwealth of Pennsylvania, a member

of the Federal Reserve, it also is a member of the MAC Network.

#90299p0056 10/26/1990 ~PR Newswire

NEW YORK (OCT. 26) PR NEWSWIRE - John K. Ziegler, chairman of Willcox & Gibbs Inc. (NYSE: WG), today announced that sales for the quarter ended Sept. 30, 1990, rose to $145,168,000 and earnings declined to $3,395,000 compared with sales of $135,975,000 and earnings of $4,123,000 for the same quarter in the prior year. Net earnings per share were $.25 compared with $.30 for the comparable 1989 period.

Ziegler stated that the sales of Consolidated Electric, the company's electrical supply division, continued to show increases compared with the prior year and for the first nine months sales have increased about 8 percent over the prior year. Ziegler attributes this exceptional performance in the face of a soft construction industry to the fact that many of the company's electrical supply houses are located in areas of continuing growth.

Net income for the nine months, before unusual charges after-tax of $2,040,000 declined to $10,256,000 compared with $13,070,000 in the same period in 1989. Net earnings per share for the nine months ended Sept. 30, 1990, after the $2,040,000 charge, were $.60 compared with $.95 for the same period in 1989. Sales for the nine months ended Sept. 30 were $423,335,000 in 1990 compared with $408,208,000 in the year earlier period.

Ziegler stated that the unusual charges recorded in the first quarter of 1990 consisted of a provision for estimated expenses resulting from a planned restructuring in several divisions of the company.

The 1990 quarter includes the results for Filix Lastex, SA, a French manufacturer of covered yarn acquired in August 1990. The one-month sales included in the quarter for this acquisition were $6,093,000.

Ziegler further stated that the covered yarn division, excluding Filix Lastex, SA, and the company's apparel parts and supplies division continued to record decreases in both sales and earnings. These declines are due to general economic conditions and to the tightening of inventories by manufacturers, retailers and wholesalers.

Willcox & Gibbs is a distributor of industrial parts and supplies and a specialty manufacturer of covered yarn.

#90299p0059 10/26/1990 ~PR Newswire

RIVERDALE, IL (OCT. 26) PR NEWSWIRE - Acme Steel Co. (NASDAQ-NMS: ACME) has signed a letter of intent to acquire, for cash, equipment, inventory, and certain related technology for the manufacture of metallic strapping tools and parts from the Interlake Packaging Corp., Oak Forest, Ill.

Acme, one of the nation's leading producers of steel strapping and tools, will relocate the equipment and inventory from Interlake's Sumter, S.C., plant to its New Britain, Conn., plant. It will be consolidated with Acme's existing tool and part-making operations there.

"This acquisition will not only give Acme ownership of a tool line that Acme has sold since 1986, but it will open important new markets for us," explained Brian W.H. Marsden, Acme's president and chief executive officer.

"We view this as an important step in our strategy to grow in the packaging industry. This investment will insure our ability to supply tools and parts to our steel strapping customers and at the same time provide increased productivity as a result of consolidation," Marsden added.

In 1989, steel strapping and tools represented 34 percent of total Acme sales, up from 32 percent the previous year.

The acquisition includes the existing tool line and also encompasses exclusive long-term agreements to manufacture and supply strapping tools and parts to certain Interlake operations.

"The additional sales generated by these agreements will be a substantial increase to our packaging tool sales," Marsden pointed out.

Production is scheduled to begin in New Britain by the end of January 1991. The purchased inventory of tools and parts will meet customer sales and service demands during the equipment relocation and installation process.

Employment at Acme's New Britain plant will increase from approximately 100 employees today to nearly 150 when the new equipment is in operation.

In addition to the New Britain facility, Acme has steel strapping operations in Riverdale; Pittsburg, Calif.; and Leeds, Ala.

Acme Steel Co. is a fully integrated producer of steel, steel strapping and tools, steel tubing and pipe, and automobile and light truck jacks.

#90299p0061 10/26/1990 ~PR Newswire

ANN ARBOR, MI (OCT. 26) PR NEWSWIRE - Interface Systems, Inc. (NASDAQ-NMS: INTF) will report record revenue and reduced earnings for fiscal 1990, Carl L. Bixby, the company's president and board chairman, announced today.

According to Bixby, revenue for the year, which ended on Sept. 30 for the company, will be approximately $37 million, an increase of about 15 percent from $32 million last year. Net income will be approximately $1.9 million, or $0.44 per share, down from $2.9 million, or $0.67 per share, for fiscal 1989.

Interface Systems is a diversified manufacturer of high-technology products. The company and its subsidiaries manufacture industrial-grade computers and computer terminals, called industrial workstations; plug- compatible printers for IBM mainframe and midrange computer systems; PC-to-mainframe data communications systems; and custom printed circuit boards.

Bixby attributed much of the company's fiscal 1990 earnings decline to disappointing revenue performance. He said that the company's estimated fourth-quarter revenue of $8.5 million was lower than anticipated, especially in the industrial workstation area. This helped restrict fourth-quarter net income to approximately $200,000, or $0.04 per share, compared to $458,725, or $0.11 per share, for the same period last year.

Bixby noted, "Our earnings have been impacted largely because we have continued to invest heavily in new product development and market penetration for future growth and profitability, even with lower-than- expected revenue due to a sluggish market."

On the positive side, said Bixby, large tax refunds from prior years were used to offset obsolete or slow-moving inventories, preparing the company for higher profitability in the future.

Bixby added that, in spite of widespread economic concerns, he expects the company to achieve substantial revenue and earnings gains in fiscal 1991. "We especially look for a revival of our industrial workstation business because of our new product introductions and new market penetration," he said.

MINNEAPOLIS (OCT. 26) PR NEWSWIRE - Jostens, Inc. (NYSE: JOS) announced today the promotion of Fred D. Bjork to executive vice president of the company. He previously served as senior vice president, and will continue to serve as

president of Jostens' recently created School Products Group.

The School Products Group was created by combining Jostens' Scholastic, Printing and Publishing, and School Pictures business units. The School Products Group is the largest business unit of Jostens.

H. William Lurton, chairman and chief executive officer of Jostens, said, "Fred has been a dedicated, long-time employee of Jostens. With his experience knowledge and leadership capabilities, he continues to add depth to the strong Jostens management team for the present and for the future."

Fred Bjork has more than 30 years of experience with the company. He began with Jostens as a sale representative for the Scholastic Division in 1960. He was appointed vice president in 1975 and promoted to senior vice president of Jostens in August of 1988. He was promoted to president of Jostens School Products Group in February of this year.

Jostens, Inc. is a leading provider of products and services for the youth, education, sports award, and recognition markets. The Fortune 500 company is listed on the New York Stock Exchange under the symbol "JOS" and last year reported sales of $788 million.

ROGERS, CONN. (OCT. 26) PR NEWSWIRE - PaineWebber R&D Partners II, L.P. and Rogers Corporation (AMEX: ROG) have agreed to terminate the remaining portion of the financing arrangement, begun in July of 1989, under which PaineWebber was funding up to a total of $7.8 million of Rogers' development and commercialization of multichip modules (MCMs).

The decision, taken approximately one-third through the financing program, is primarily a result of the overall MCM market developing more slowly than was originally projected. Rogers will negotiate with the management of PaineWebber R&D Partners II, L.P. for the possible purchase by Rogers of the exclusive rights to the technology which has been developed.

Multichip modules package high performance integrated circuits into a configuration having a very high number of interconnections per unit area.

MCMs are one of the product lines growing out of ROHSI(R) (Rogers High-Speed Interconnections) development efforts. The commercialized ROHSI product lines are Multimetal layer TAB (Tape Automated Bonding), INVISICON(R) Interconnections, RO2800(tm) High Speed Laminates, R02500(tm) Flexible Circuit Laminates, the Isocon(R) Interconnections.

Headquartered in Rogers, Conn., Rogers Corporation manufactures a broad range of engineered materials and components for the electronics and other selected industrial markets.

PaineWebber R&D Partners II, L.P. is a limited partnership of which the general partner is PaineWebber Technologies II, L.P.

#90299p0079 10/26/1990 ~PR Newswire

BUFFALO, NY (OCT. 26) PR NEWSWIRE - National Fuel Gas Company (NYSE: NFG) announced today that a draft order has been approved by a vote of the Federal Energy Regulatory Commission (FERC) which approves a settlement filed by its pipeline subsidiary, National Fuel Gas Supply Corporation, involving three rate cases and a provision that it become an open access transporter.

The order is subject to modifications, conditions and clarifications primarily on the mechanics of the company becoming an open access transporter.

Under the terms of the draft order, National Fuel Gas Supply Corporation will be able to reverse the 29 cent per share charge to earnings that had been recorded in the second quarter of the fiscal year. In the second quarter, the company's reserve for refund was increased which reduced earnings by $8,274,000, or 29 cents per share.

The draft order also grants National Fuel Gas Supply Corporation a blanket certificate under FERC Order 500 which permits the company to become an "open access" transporter of natural gas.

While National Fuel has, for some time, been transporting gas on its pipeline for others, it was necessary to receive, and periodically renew, FERC approval to continue the service.

The blanket authorization to be an open access pipeline will allow the company to provide transportation service on its pipeline system for any customer.

According to company officials, this will substantially improve marketing flexibility and will enable the company to respond to changing market conditions without regulatory delay.

The order applies only to transportation of gas on the company's pipelines. Other issues such as access to capacity of upstream pipelines and the need for a gas inventory charge (GIC) have been deferred to another proceeding which is expected to be resolved during 1991.

Richard Hare, president, National Fuel Gas Supply Corporation, said, "We are pleased to have this matter behind us and are especially gratified that we can now provide uninterrupted transportation service for our customers."

CONTACT: Arthur Coon, (716) 857-7925, or Donna DeCarolis (financial), (716) 857-7872, both of National Fuel Gas.

#90299p0081 10/26/1990 ~PR Newswire

STATE COLLEGE, PA (OCT. 26) PR NEWSWIRE - Uni-Marts, Inc. (NASDAQ: UNMA A) today announced results for the fourth quarter and the 1990 fiscal year.

Revenues for the fourth quarter ended Sept. 30, 1990, were $66.1 million, a 10.0 percent increase over revenues of $60.0 million for the fourth quarter ended Sept. 30, 1989. Fourth quarter net earnings were $1,065,133 compared to net earnings of $1,122,102 in the previous year. Earnings per share were $0.15 versus $0.16 in the fourth quarter of 1989.

Revenues for the fiscal year ended Sept. 30, 1990, were $242.8 million, a 12.4 percent increase over revenues of $216.0 million for the fiscal year ended Sept. 30, 1989. Fiscal year net earnings were $2,854,235 compared to 1989 fiscal year net earnings of $2,851,225. Earnings per share were $0.40, or the same earnings per share as the previous year.

Commenting on the fiscal 1990 increased revenues, Henry D. Sahakian, president and chief executive officer of Uni-Marts, stated "Most of the sales increase is attributable to the additional stores in operation for the entire 1990 fiscal year, higher petroleum pump prices and increased comparable merchandise sales. Petroleum gallons sold at comparable stores were lower in fiscal 1990 due to the situation in the Middle East and the resulting rapid fluctuations in petroleum prices during the fourth quarter. Merchandise sales at comparable stores increased 3.47 percent over fiscal 1989."

Mr. Sahakian also said, "Fiscal 1990 net earnings were essentially the same as fiscal 1989 net earnings primarily as the result of gross margins. Petroleum gross margins per gallon were lower than fiscal 1989 due to the volatility in the petroleum markets in the fourth quarter. Merchandise gross margin percentages were slightly lower than fiscal 1989. The previously announced cost containment programs implemented in the second quarter of 1990 and continued in the third and fourth quarters are beginning to show results. In addition, sales at the stores acquired and constructed during fiscal 1989 continue to improve. Although petroleum gross margins were low, we still nearly achieved the same record net earnings in the fourth quarter of 1990 as we achieved in the fourth quarter of last year."

Mr. Sahakian added, "During the fiscal year, eight new convenience stores were opened and 11 stores that did not fit into Uni-Marts' long-term strategy were closed. At the end of the fiscal year, 339 convenience stores were in operation."

Uni-Marts, Inc. is a leading operator of convenience stores that are located in Pennsylvania, New York, New Jersey, Delaware and Maryland. At Sept. 30, 1990, 204 of its 339 stores offered self-service gasoline. The company also processes and distributes milk and ice cream products through its dairy division and distributes home heating oil and gasoline through its petroleum

division.

MINNEAPOLIS, OCT (26.) PR NEWSWIRE - Jostens, Inc. (NYSE: JOS) announced today the promotion of Gary Buckmiller, senior vice president of the company, to executive vice president. Buckmiller will continue to have the responsibility for the Education Group, the second largest and fastest growing business unit of Jostens.

Buckmiller started his career with Jostens in 1971 as assistant corporate controller. In 1975, he was named corporate controller of operations and an officer of Jostens. He was appointed vice president of planning and analysis in 1977 and vice president for planning and development in 1978. He became senior vice president of corporate services in 1979 and assumed responsibility for Jostens' newly created Education Division in 1985.

Buckmiller and his wife, Gretchen, have two children and reside in Mound, Minn.

H. William Lurton, chairman and chief executive officer of Jostens, said, "Gary Buckmiller has provided this company leadership skills that have added great depth to our senior management staff. I am certain that his planning and development skills will provide for the continued growth of our Education

Group and of our company as a whole."

Jostens, Inc. is a leading provider of products and services for the youth, education, sports award and recognition markets. The Fortune 500 company is listed on the New York Stock Exchange under the symbol "JOS" and last year reported sales of $788 million.

OAKBROOK TERRACE, IL (OCT. 26) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full-service long-distance telephone company and leading provider of interactive 900 network services, today introduced a new 900 service catalog request line designed to streamline the handling and processing of catalog requests from consumers.

Called the Telesphere Catalog Request Line, it is the first nationwide service that allows potential catalog customers to call a central 900 number and request catalogs by telephone. The cost of the catalog is billed through the caller's monthly local telephone invoice. The catalog marketer receives the caller's name and address as well as a portion of the revenue from each call.

Jim Hertel, Telesphere's vice president of marketing, Information Services/900 said, "The catalogers we've talked to feel that this service will help them generate more qualified leads in the face of rising mailing costs. What's more their prospects will appreciate the convenience of requesting catalogs by phone, without having to write a check for such a small amount."

Until now, catalogers that relied on outside companies for generating catalog requests had to wait anywhere from one to two weeks to receive the leads. With the Telesphere Catalog Request Line, the leads are delivered on labels and

diskette in three to four days, greatly improving the rate of conversion to new buyers.

"For a one-time setup fee of only $125, our customers will be able to automate the process of handling catalog requests, which in turn will free up operators who might otherwise be taking orders or providing customer service," added Hertel.

Telesphere Communications Inc. operates a nationwide, state-of-the-art digital fiber optic network over which it provides long-distance, operator, interactive 900 and other enhanced telecommunications services.

#90299p0090 10/26/1990 ~PR Newswire

BERKELEY HEIGHTS, N.J. (OCT. 26) PR NEWSWIRE - Customedix Corporation (AMEX: CUS), a medical and dental products company, today announced profitable results for its first quarter.

In the three-month period ended Sept. 30, 1990, the company showed net income of $431,500, or 1 cent per share, an improvement of $36,500 over last year's first-quarter earnings of $395,000. The improvement in earnings was primarily due to higher gross profits in the dental segment and the decline in interest expense resulting from debt reduction.

Net sales for the quarter were $10,284,800, down $2,138,500 from $12,423,300 during the same period last year. The decrease in sales was due primarily to the sale of the operations of the company's subsidiary, Sales and Marketing Services, Inc. (SMS), effective March 31, 1990, as well as certain price decreases in the dental segment. SMS had sales of approximately $1,500,400 which are included in net sales for the quarter ended Sept. 30, 1989.

Customedix has strengthened its balance sheet as seen in the improvement of its current ratio to 3.5 to 1.0 on Sept. 30, 1990, from 3.3 to 1.0 at June 30, 1990. Working capital increased approximately $314,000 to $8,974,300 from June 30, 1990. These improvements resulted primarily from the company's profitability during the quarter.

The company's policy of debt reduction continued to be pursued in the first quarter of 1991. Debt was reduced by approximately $495,600, of which $398,100 was bank debt and the balance capitalized lease obligations. In addition, the company purchased and retired 525,000 shares of its stock for $50,000, a cost to the company of under 10 cents per share.

"As anticipated, first-quarter results showed Customedix off to a promising start in fiscal 1991," said company Chairman and Chief Executive Officer

Gorden S. Cohen, M.D. "While we anticipate further decreases in revenues and earnings in our medical segment, due to lower order volume of injected molded plastic parts, as well as price decreases in enteral feeding bags, our dental segment is poised to release several new and important products over the balance of the year. We expect the company will continue to operate profitably in fiscal 1991."

Customedix Corporation, through its subsidiaries, supplies materials, devices and disposables for dental and medical health care.

SAN FRANCISCO (OCT. 26) PR NEWSWIRE - Chevron U.S.A. Inc. announces an increase in the posted prices it will pay for all grades of crude oil in its Eastern Region (U.S. areas outside of California and Alaska).

The increase of $4.75/bbl was effective yesterday, Thursday, Oct. 25, at 7:00 a.m. Chevron will now pay:

$33.00 for West Texas Intermediate
$31.00 for West Texas Sour
$33.50 for South Louisiana Sweet (Onshore)

New prices for all grades other than those from California and Alaska are reflected in Chevron's Eastern Region Crude Oil Price Bulletin 90-E62. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

SAN FRANCISCO (OCT. 26) PR NEWSWIRE - Chevron U.S.A. Inc. today announced a change in the posted prices it will pay for crude oil from California and Alaska fields. Postings were increased by $2.00/bbl.

The change was effective Thursday, Oct. 25, at 7 a.m. Chevron will now pay:

for 35 API -- Cook Inlet -- $27.65
26 API -- Buena Vista -- $26.65
19 API -- Huntington Beach -- $25.05
13 API -- Kern River -- $23.00
27 API -- Long Beach -- $27.15
13 API -- Midway Sunset -- $23.00
17 API -- Wilmington -- $24.50

The gravity adjustment scale is as follows:

Above 40.0 deg. -- $0.000 per tenth degree API
34.0 to 40.0 -- $0.010 per tenth degree API
Below 34.0 -- $0.025 per tenth degree API

New prices for all fields are reflected in Chevron's California and Alaska Crude Oil Price Bulletin 90-CA38. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

ARLINGTON, MA (OCT. 26) PR NEWSWIRE - Eclectic Associates, Inc. announces the release of Authenticator, a password security system for the Apple Macintosh computer. Authenticator prompts for a username and password and denies further access to the user until a valid combination has been entered.

"Authenticator prevents unauthorized attempts to access the computer without actually modifying any part of the system, thereby avoiding risk of damage to the hardware or data on the machine," said Eclectic Associates President David Kovar.

Authenticator is designed to be customized easily to individual user needs. The software allows for both single and multiple users on an individual computer or network. It will handle authentication failures either by shutting down the Macintosh or by remaining on but denying access to the user. Authenticator can be run at startup time as well as activated at the user's request, and the welcome prompt is easily modified.

"Authenticator provides a first level of security for computers accessible to many users and is, therefore, ideal for academic and business settings," said Kovar. Authenticator was designed for Harvard's Graduate School of Design and is licensed by Eclectic Associates from Harvard University.

Eclectic Associates is a personalized software development company, incorporated in 1990. The company plans to develop distributed environmental simulations, affordable network management software, and simple applications to make computing suit the needs of the customer/user.

Eclectic Associates also provides consulting services in several areas, including networking, custom Macintosh and Unix development, and systems planning.

OCALA, FLA. (OCT. 26) PR NEWSWIRE - A state appellate court has reversed trial court judgments against Mid-State Federal Savings Bank (NASDAQ-NMS: MSSB). The trial court judgments, originally entered in 1989, awarded damages of $617,380 and attorneys fees of $320,000 to Marketing and Management Associates, Inc. (MMA) of Miami, Florida. The suit involved an alleged breach of contract by Mid-State Federal resulting from negotiations over the proposed sale by Mid-State Federal to MMA of a partially completed Ocala subdivision that had been acquired through foreclosure proceedings.

In its order, the appellate court returned the case to the trial court for entry of judgment in favor of Mid-State Federal. MMA may file a motion for rehearing of the appellate court decision or ask that the case be reviewed by the Florida Supreme Court.

Mid-State Federal previously established a reserve against any loss in the MMA litigation. At Sept. 30, 1990, the reserve for damages, attorneys' fees, and interest totaled $1,114,687. Mid-State Federal will be evaluating whether to reverse all or part of this reserve.

Mid-State Federal is a publicly held, federally insured and federally chartered stock savings bank with its common stock traded over-the-counter and quoted on the NASDAQ National Market System under the symbol "MSSB". With its home office in Ocala, Fla., the thrift has assets of just under $1 billion and operates 26 branch offices within a five county area in west Central Florida.

CUT BANK, MO. (OCT. 26) PR NEWSWIRE - MSR Exploration Ltd. (AMEX, Toronto: MSR), an Alberta Public Energy Company operating out of Cut Bank, Montana, today announced record revenues, operating income and net income for the third quarter ended Sept. 30, 1990. The ''Gulf Crisis'', which has caused unnecessary explosive world oil prices, has had an extraordinary effect on the company's production revenues.

Additional impact has been realized by the acquisition of the 46 well Winters (Capps) Field in Runnels County, Texas. The company purchased a 100 percent working interest in the field, including injection and disposal wells and a gas gathering system. MSR's Independent Petroleum Engineers estimate this acquisition has added some 1.6 million barrels of proven producing oil and some 2.5 billion cubic feet of proven producing gas reserves and has doubled MSR's daily production to over 1,200 barrels of oil equivalent (BOE) per day. As a result of the above, third quarter Sept. 30, 1990, revenues increased by some 256 percent, as compared to third quarter 1989, as follows:

MSR EXPLORATION LTD.
Quarterly Financial Highlights
(U.S. dollars - unaudited)

	1990		1989

BUTTE, MONT. (OCT. 26) PR NEWSWIRE - The Montana Power Co. (MPC) (NYSE: MTP) today announced third-quarter net income available for common stock of $6,628,000, or 13 cents per share, compared to $6,778,000, or 14 cents per share, for the same period in 1989.

For the nine months ended Sept. 30, MPC net income increased to $52,173,000 from $47,336,000, or $1.05 per share, compared to 97 cents per share last year.

For the 12 months ended, the company's net income was $75,459,000, compared to $75,508,000. Due to an increase in the average number of shares outstanding, earnings per share declined to $1.52 per share from $1.55 last year.

Consolidated net income for the nine months ended and the third quarter reflects increased earnings by the Independent Power Group because of establishment, in October 1989, of a one-time provision for future losses on long-term power sales in the amount of 41 cents per share.

Income from utility operations decreased during the first nine months of 1990 due to weather 18 percent warmer than experienced in the same period a year earlier, and to lower electric rates. Entech earnings decreased during the third quarter due to reduced coal deliveries in Montana and Texas.

MONTANA POWER CO.
(In thousands, except per-share data)

	Quarter		Nine Months	
Ended Sept. 30:	1990	1989	1990	1989

MINNEAPOLIS (OCT. 26) PR NEWSWIRE - Arkla, Inc. (NYSE: ALG) and Diversified Energies, Inc. (NYSE: DEI) said today that the companies' sharehlders will vote on the merger of DEI with and into Arkla, Inc. at special meetings of shareholders to be held Nov. 28 in Shreveport, La., and Minneapolis, respectively. The companies will begin mailing proxy materials to their respective shareholders today.

In July, the boards of directors of the two companies approved the merger agreement under which Arkla would become the surviving company. The agreement calls for DEI shareholders to receive between 1.575 and 1.752 shares of Arkla common stock for each share of DEI common stock they hold -- depending on the average price of Arkla stock for the 15 trading days prior to the date the transaction is closed. Arkla and DEI officials said they expect that closing of the merger will occur a few days following shareholder approval.

Arkla and DEI are traded on the New York Stock Exchange under the symbols ALG and DEI, respectively.

#90299p0115 10/26/1990 ~PR Newswire

ARLINGTON, VA (OCT. 26) PR NEWSWIRE - USLICO Corporation (NYSE: USC) reported strong earnings for the first nine months, with operating results, excluding realized gains, up 13 percent to $19.8 million, or $1.82 per share, on an after-tax basis for 1990, compared to $17.5 million, or $1.61 per share, for 1989.

Realized investment gains after taxes decreased to $449,000 for 1990, compared to $5 million in 1989. As a result of the lower realized gains, net income fell to $20.2 million, or $1.86 per share, in the first nine months of 1990, compared to $22.5 million, or $2.07 per share, in the 1989 period.

Growth in operating results was led by USLICO's life companies, which produced a $5.7 million increase in operating income (before taxes) to $29.8 million for 1990. Premiums and investment income increased $27.6 million, while policy benefits rose only $16.7 million.

USLICO reported that its property and casualty companies produced lower results, because of continuing storm losses in the Midwest. The combined ratio was 104 percent for 1990 compared to 102.8 percent for 1989. Earnings before taxes decreased to $4.9 million in the first nine months of 1990 compared to $6.4 million for the 1989 period.

Realized gains of $5.6 million pre-tax in 1989 resulted from the sale of non-insurance properties. No similar sales occurred in the first nine months of 1990.

Sales of life and annuity products increased 14 percent to $160 million of new annual premium in 1990 compared to $140 million for the first nine months of 1989. Direct premiums written by the property and casualty companies increased 10 percent over 1989 to $107.1 million for the first nine months of 1990.

The total investment in high-yield bonds on Sept. 30 represented only 2 percent of USLICO Corporation's consolidated invested assets or just 2.9 percent of USLICO's fixed-income portfolios, substantially below industry averages.

As of Sept. 30, the consolidated 60-day mortgage delinquency rate was 0.2 percent on a dollar percentage basis compared to the most recently published

ACLI industry average of 3.03 percent.

An insurance holding company, USLICO Corporation is headquartered in Arlington. Its four life subsidiaries represent 90 percent of its $2.6 billion in assets. The three property and casualty subsidiaries operate in the Midwestern United States.

#90299p0118 10/26/1990 ~PR Newswire

GUILDERLAND, N.Y. (OCT.26) PR NEWSWIRE - Intermagnetics General Corporation (NASDAQ: INMA) announced today that Philips Medical Systems (PMS) has provided the company with its delivery schedule requirements which are in excess of $25 million for Magnetic Resonance Imaging (MRI) superconductive magnets to be manufactured by IGC in calendar 1991. The order notification covers the initial year's quantity requirements by Philips under a previously announced, five-year PMS/IGC magnet purchase agreement to supply the TM-5 internally shielded magnet developed by Intermagnetics General.

In making the announcement, Carl H. Rosner, chairman and president of Intermagnetics General, told shareholders at the annual meeting in Albany, N.Y., that the TM-5 magnet "may turn out to be the most important and most successful commercial superconductor product we have ever developed." The TM-5 is being used exclusively by Philips in its Gyroscan T-5 imaging system, and is apparently helping Philips in gaining "an increasing share of the worldwide MRI market, estimated to be well over $1 billion annually," Rosner added.

Rosner also told shareholders that shipments of its MRI magnets were up "significantly" in fiscal 1990, and based upon record high levels of order backlog and increasing revenues, he believes that operating income will "most likely" be higher in the current year.

Intermagnetics General is also a leading manufacturer of superconducting wire, and produces cryogenic equipment, permanent magnet systems and material separation equipment.

#90299p0119 10/26/1990 ~PR Newswire

NEW YORK (OCT. 26) PR NEWSWIRE - Forstmann & Company, Inc. today announced that it has reached an agreement in principle with representatives of a committee consisting of the holders of a majority of its 14-3/4% senior

subordinated notes and the holders of all of its senior exchangeable adjustable rate preferred stock with respect to a restructuring of the company.

It is the company's understanding that the agreement in principle will be acceptable to its lenders. The agreement is the result of negotiations with the committee and its financial advisor Rothschild, Inc. The company's financial advisor in the negotiations is Donaldson, Lufkin & Jenrette.

The proposed restructuring would include, among other things, (i) the payment of the $7.375 million of interest on the senior subordinated notes due on Oct. 15, 1990 upon consummation of the restructuring in the form of $5 million in cash and $3 million aggregate principal amount of new senior subordinated notes which would be redeemable not later than 91 days after expiration of the company's new or extended credit facility; (ii) reducing the interest rate on the 14-3/4 percent senior subordinated notes for the period from Oct. 16, 1990 to Oct. 15, 1992 to 6 percent per annum; (iii) the issuance of 15 percent of the common stock of Forstmann to the current holders of senior subordinated notes; (iv) the exchange of approximately 85 percent of the senior preferred stock for 30 percent of the common stock, with the remaining senior preferred stock being exchanged for a new 5 percent senior (Pay-in-kind) preferred stock; and (v) the issuance of the remaining 55 percent of the common stock of Forstmann to Odyssey Partners in exchange for cash consideration of $4 million. The company expects that consummation of the restructuring would be conditioned upon, among other things, the consent of holders of at least 95 percent of the outstanding senior subordinated notes.

The revised offer will be commenced as soon as practicable.

#90299p0121 10/26/1990 ~PR Newswire

BEAUMONT, TX (OCT. 26) PR NEWSWIRE - Gulf States Utilities Co. (NYSE: GSU) today reported earnings (unaudited) of 41 cents per share of common stock for the third quarter of 1990, compared to a 30-cent-per- share loss for the third quarter of 1989.

Increased kilowatt-hour sales and reduced interest charges contributed to the improved performance, company officials said. Sales for the third quarter totaled 8.3 billion kilowatt-hours, compared to 7.8 billion kilowatt-hours sold in the third quarter of 1989. Sales increased primarily because of hotter than normal weather in July and September and a slight increase in the number of customers. Interest expense continued to decline, as the company retired more than $235 million of debt during the 12 months ended Sept. 30, 1990.

In 1989, the third quarter results included two material accounting charges.

GSU recorded a $37 million net of tax write-off related to the discontinuation of regulatory accounting principles to the company's wholesale jurisdiction. The company also recorded an $18 million net of tax write-off for lignite leases abandoned by Varibus Corp., a wholly- owned subsidiary of Gulf States.

Despite the positive results recorded during the third quarter of 1990, the company recorded a loss of $1.22 per share of common stock for the 12 months ended Sept. 30, 1990, compared to a loss of 74 cents per share of common stock for the 12 months ended Sept. 30, 1989. The $1.22 loss reflects the estimated $135 million after-tax cost of the settlement with the Southern Co. recorded during the second quarter of 1990. It also included a significant accounting charge recorded in the fourth quarter of 1989, resulting from the discontinuation of regulatory accounting principles to the company's steam electric department.

GSU also reported that kilowatt-hour sales totaled 28.2 billion for the 12 months ended Sept. 30, 1990 -- two percent greater than the 27.6 billion kilowatt-hours sold during the 12 months ended Sept. 30, 1989.

GSU serves 569,000 electric customers in a 28,000-square-mile area spanning the Gulf Coast between Houston and New Orleans.

#90299p0130 10/26/1990 ~PR Newswire

NEW YORK (OCT. 26) PR NEWSWIRE - Candace M. Robbins will join McCann-Erickson/SAS as general manager, effective Nov. 1. She has been

manager of truck advertising at General Motors Corp.'s Chevrolet Motor Division.

McCann-Erickson/SAS (Special Advertising Services) is a new Troy, Mich-based agency formed by McCann-Erickson to serve the total communications needs of the GMC Truck Division of General Motors Corp. In her new role, Robbins will report to John Dooner, president of McCann-Erickson North America.

The agency, believed to be unique in the industry because of the total communications service being delivered to a single client, is appropriately being launched with a new management concept in advertiser-agency "partnership." Robbins and her staff will sit in on the staff meetings and sessions at GMC Truck while top executives from the client, in turn, will attend executive committee meetings at McCann- Erickson/SAS.

Robbins, 40, started working for General Motors in 1971 as a market analyst for the former GMC Truck and Coach Division. She has worked in a full range of positions at GMC Truck, including as associate sales engineer, district manager, and dealer leasing manager. She became advertising manager of GMC Truck in 1983 and joined Chevrolet in her current position in April 1988. She was named the advertising member of Automotive News' All-Star Team in 1989.

Robbins' appointment completed the naming of the top management team at the new agency. As previously announced, Marianne Fey, who has been president of The Competitive Edge, will join the new agency as director of client services. McCann-Erickson has agreed to acquire the Detroit and Boston offices of The Competitive Edge.

Also, Jan Leon Woznick, who has been senior vice president and director of marketing at McCann-Erickson Detroit, will join as director of marketing services. Keith Stentz, who had been senior vice president and associate creative director at Lintas: Campbell-Ewald, Warren, Mich., has joined as director of creative services.

The new agency will handle GMC Truck's national-image ad account, its regional and market support ad business as well as a number of individual GMC Truck dealer groups throughout the country.

Additionally, GMC Truck has named McCann-Erickson/SAS to oversee coordination of its integrated communications strategy, working cooperatively with the other marketing services companies it employs to ensure seamless multi-media communications.

MIAMI (OCT. 26) PR NEWSWIRE - Given free reign to design a conceptual "sports car" for the 90s without any manufacturing restraints, the product development teams at Rover Cars, Sterling Motor Cars parent, produced the aerodynamic mid-engine MG EX-E.

The two-seat automotive projectile will make its North American debut Nov. 2 at the South Florida Auto Show in the Miami Beach Convention Center.

According to Roy Axe, Rover's chief designer, the MG EX-E -- EX for experimental -- project was very special.

"It was a 'no-holds barred' program," said Axe, who was responsible for design of the Sterling luxury-car range. "We were given the freedom to express our abilities and desires, but were directed to work within the Rover family framework."

Utilizing extensive computer-aided design and computer-aided engineering resources in the United Kingdom, the design group fashioned this aluminum-bodied bullet around a mid-placed, rally-proven 250- horsepower engine powering all four wheels.

Suspension is also race-car inspired with a double-wishbone configuration front and rear. Braking is by anti-lock system equipped four-wheel discs.

Competition design also inspired the use of an integrated monocoque body-chassis. An aluminum sub-structure was designed to be adhesive bonded, providing excellent torsional rigidity.

The bonded aluminum space frame is clad with colored, unstressed plastic skin panels.

A major advantage of this alloy frame assembly is the ability to build the vehicle on a modular basis. Three main modules are used, carrying all the main vehicle systems: an engine/transmission/rear suspension module, a passenger cell module and a front end structure.

High-tech interior fittings to enhance creature comfort and convenience begin with a credit-card like "key" that not only unlocks the doors, but also activates the ignition and recalls the driver's seat, mirror and climate-control settings from the EX-E's computer.

Hands-free cellular telephone, video-monitored traffic and navigational aids and windshield wipers that react to rain striking the windscreen are also part of the futuristic package.

"The MG EX-E's compliment of high-tech features might not be produced in next year's models, but the thinking behind them will be the driving force in the future of Rover and Sterling products," said Graham Morris, president of

Sterling Motor Cars.

#90299p0136 10/26/1990 ~PR Newswire

EAST MILLSTONE, NJ (OCT. 26) PR NEWSWIRE - Applied Bioscience International Inc. (NASDAQ: APBI) today announced results of operations for the third quarter and the nine months ended Sept. 30, 1990. APBI reported combined results on a pooling-of-interests basis for the first time since its merger with ENVIRON International Corporation on Sept. 7, 1990. Results for prior periods have been restated to reflect the merger.

Net revenues for the third quarter were $25,324,000, up 30.3 percent compared with $19,438,000 for the third quarter of 1989. After deduction of one-time merger costs, there was a net loss for the period of $455,000 (9 cents per share), compared with net income of $1,041,000 (21 cents per share) in 1989. Operating income for the period before non-recurring items increased 30.3 percent.

Net income for the third quarter of 1990 reflects a one-time provision of $3,212,000 for expenses associated with the ENVIRON transaction. In addition, net income for the third quarter of 1989 reflects, in connection with ENVIRON's operations for such period, a one-time provision of $1,500,000 in respect of future rental payments and other expenses associated with ENVIRON's former headquarters facility in Washington, D.C., which amount is not expected to be recoverable through subleasing such space. Without such one-time charges to 1990 and 1989 results of operations, the adjusted income from operations grew 30.3 percent from $3,037,000 in the third quarter of 1989 to $3,957,000 for the quarter ended Sept. 30, 1990.

Net income for the nine months ended Sept. 30, 1990, was $5,676,000, up 34.1 percent compared with $4,234,000 for 1989. Nine month results for 1990 were reduced by the merger costs and nine month results for 1989 were reduced by the charge for future rental payments, but nine month results for 1990 were also increased by $1,593,000 as a result of the adoption of Financial Accounting Standard No. 96 (FAS 96) "Accounting for Income Taxes." Since the adoption of FAS 96 is effective as of Jan. 1, 1990, the benefit is an adjustment to the nine months ended Sept. 30, 1990 but not the three months ended Sept. 30, 1990.

Earnings per share for the nine months ended Sept. 30, 1990, increased 28.6 percent, from 84 cents in 1989 to $1.08 in 1990. Before the impact of the merger costs and the adoption of FAS 96, earnings per share for the nine months ended Sept. 30, 1990 were $1.33.

APBI is a broadly based scientific research and development company, providing services under contract to pharmaceutical, agrochemical, general chemical and food industries.

HOUSTON (OCT. 26) PR NEWSWIRE - TEPPCO Partners, L. P. (NYSE: TPP) today reported third quarter 1990 net income of $6.3 million, or $0.43 per unit, compared with a pro forma net loss of $0.5 million, or $0.03 per unit, for the third quarter of 1989. The significant improvement in the 1990 results reflects an increase of $2.9 million in operating revenues and a decrease of $3.1 million in costs and expenses. The revenue improvement is due to an increase in liquefied petroleum gases (LPGs) transportation volumes resulting from higher secondary propane storage in anticipation of increased demand during winter months, an increase in average tariff rates for both LPGs and refined products and an increase in the gain on the sale of product inventory. The decrease in costs and expenses is due to lower electric power and fuel costs as a result of decreased refined product throughput and a decrease in product inventory losses resulting from improved product measurement.

Operating income was $14.3 million on revenues of $40.5 million for the third quarter of 1990, compared with pro forma operating income of $8.3 million on revenues of $37.6 million for the same period last year.

The partnership reported net income of $9.9 million or $0.68 per unit for the period March 7, the date of the completion of the initial public offering, through Sept. 30, 1990. Revenues for the period were $90.1 million and operating income was $28.3 million.

Pro forma net income for the nine months ended Sept. 30, 1990, was $10.8 million, or $0.74 per unit, compared with pro forma net income of $11.9 million, or $0.81 per unit, for the comparable nine months of the previous year.

TEPPCO Partners, L.P. is a publicly owned master limited partnership. TE Products Pipeline Company, Limited Partnership, the operating partnership, is one of the largest pipeline common carriers of refined petroleum products and LPGs in the United States.

#90299p0158 10/26/1990 ~PR Newswire

NASHVILLE, TN (OCT. 26) PR NEWSWIRE - Metroplitan Federal Savings and Loan Association (NASDAQ-NMS: MFTN) today released final first quarter results. As previously announced, the Association expected to report a substantial loss for the period and accordingly, reported a loss of $13.0 million, or $3.49 per share, for the first quarter ended September 30, 1990. This loss compares with net earnings of $101,000, or $.03 per share, for the corresponding period a year ago.

As of September 30, 1990, Metropolitan Federal had nonperforming loans of $117.1 million compared with $66.7 million at fiscal year end June 30, 1990. Real estate acquired through foreclosure was $92.4 million at the end of the first quarter compared with $81.7 million at fiscal year end. Reserves against loan losses were increased by $6.4 million to $34.3 million. For the quarter, Metropolitan Federal had net charge-offs of $3.2 million.

In announcing the results, Metropolitan Federal attributed the loss to continuing deterioration in the real estate markets, resulting in both the need for an additional $9.6 million in reserves for possible loan losses and in the large increase in nonperforming assets. Edwin W. Moats, Jr., chairman and chief executive officer, said, "On an ongoing basis, the very high level of nonperforming assets continues to reduce our net interest income. The combination of a substantial loan loss provision and reduced net interest

income resulted in the significant loss for the quarter."

Moats added that the Association has seen further deterioration in the real estate economy in the last 90 days, citing both recent property appraisals that reflect declining land values compared with similar appraisals of one year ago, and the delay in the closing of sales contracts on commercial property. Moats also added that the substantial increase in nonperforming assets was primarily related to one large multi-use commercial development in Middle Tennessee.

At September 30, Metropolitan Federal's tangible capital ratio was 2.6 percent against a current minimum regulatory requirement of 1.5 percent, the Association's core capital ratio was 3.9 percent with the current minimum regulatory requirement being 3.0 percent and the risk-based capital ratio was 5.5 percent which is below the current minimum regulatory requirement of 6.4 percent.

Because the Association now does not comply with the regulatory risk-based capital requirement, Metropolitan Federal will be required to file a capital plan with the Office of Thrift Supervision (OTS) in Cincinnati and will likely incur new restrictions on lending activities other than residential and consumer lending.

"While the operating losses have put tremendous pressure on our stock price," added Moats, "our customers for the most part remain unaffected. Any new lending restrictions likely would apply only in the commercial area and should not affect consumer lending, residential mortgages or home equity loans. And, of course, deposits continue to be insured up to $100,000 by the Federal Deposit Insurance Corporation (FDIC).

Deposits as of September 30, 1990, were $918.6 million up $2.7 million over deposits of $915.9 million a year ago. Assets at the end of the first quarter were $1.10 billion compared with assets of $1.15 billion one year ago.

Metropolitan Federal, Tennessee's largest publicly-traded savings and loan with 19 offices, operates throughout the state. Metropolitan Federal's common stock is traded on the over-the-counter market in the National Market System under the NASDAQ symbol MFTN.

#90299p0159 10/26/1990 ~PR Newswire

GREENVILLE, DEL. (OCT. 26) PR NEWSWIRE - Sears Roebuck Acceptance Corp. (SRAC), a wholly owned subsidiary of Sears, Roebuck and Co. (Sears) (NYSE: S), reported today that net income for the third quarter of 1990 was $45.1 million compared with $45.4 million for the same period in 1989. For the first nine months of 1990, SRAC's net income was $132.8 million compared with $134.5 million recorded for the first nine months of 1989. SRAC continued to maintain a ratio of earnings to fixed charges of 1.25 for the third quarter and first nine months of both 1990 and 1989.

During the third quarter of 1990, SRAC's combined earnings on its investment in Sears notes and retail customer receivable balances were $327.8 million, a decrease from the $340.5 million in earnings for the 1989 third quarter. Combined earnings for the first nine months of 1990 decreased to $986.9 million from $1,011.4 million for the same period of 1989.

Interest and related expenses decreased in the third quarter to $269.3 million from $271.7 million for the third quarter of 1989. The total for the first nine months of 1990 was $796.4 million, down from the comparable prior year period total of $806.9 million.

Earnings and net income for the quarter and nine month periods decreased as a result of lower yields on combined investments which more than offset a higher level of investment and lower borrowing costs. The yields in 1990 were reduced in response to SRAC's lower cost of short-term borrowings.

#90299p0162 10/26/1990 ~PR Newswire

SAN FRANCISCO (OCT. 26) PR NEWSWIRE - Chevron Corporation (NYSE: CHV) today reported third quarter earnings of $403 million, a decrease of 3 percent from the $417 million earned in the third quarter of 1989. Earnings per share decreased to $1.14 from $1.22. The third quarter benefited $80 million from

special items, compared with a benefit of $7 million from such items in last year's quarter.

After adjusting for special items, operational results were down 21 percent from last year's third quarter and 45 percent from this year's second quarter.

Net income for the nine months was $1.524 billion, up 34 percent from the $1.134 billion earned the first nine months of 1989. Earnings per share of $4.30 increased 30 percent from $3.31 per share for the same period last year. The higher year-to-date earnings reflect the strong first half performance of the U.S. petroleum operations prior to the Middle East turmoil. While crude oil and refined product prices have both been volatile in 1990, average crude prices and product sales margins for the nine months are higher than in the prior year. Additionally, special items increased earnings $144 million in the 1990 year-to-date period, but reduced 1989 nine-month income by $4 million. Special items in 1990 consisted of net gains from property dispositions and favorable tax adjustments, partially offset by $117 million of charges for environmental, restructuring and other costs.

Total revenues were $10.6 billion for the quarter, compared with $8.0 billion in last year's third quarter and total revenues for the nine months were $28.8 billion, up from $23.9 billion last year. The increase for both periods reflects higher prices and sales volumes for refined products and crude oil.

U.S. exploration and production operations reported earnings of $201 million for the 1990 third quarter, up significantly from the $58 million earned in the corresponding period last year. Earnings in 1990 included a net benefit of $20 million from special items, primarily gains from sales of marginal producing properties. The 1989 quarter included a $30 million loss on property dispositions. Operating earnings reflected higher crude oil prices, which were up about $5.85 per barrel. Liquids production was down 4 percent but natural gas production increased 7 percent. Natural gas realizations declined 13 percent from the 1989 quarter, which included favorable gas contract settlements. Depreciation rates and exploration expenses were higher.

U.S. refining and marketing operations reported losses of $53 million for the quarter, compared with earnings of $130 million last year. The 1990 results included $53 million of charges, primarily for environmental programs. Although average prices for refined products were up from last year, substantial losses were incurred in the last two months of the quarter because of the sharp increase in crude oil acquisition costs. Sales volumes were up 5 percent, reflecting strong gasoline demand early in the third quarter and higher sales volumes of residual fuel oil and gas oils due to customers stockpiling as a hedge against future price increases.

Petroleum operations outside the United States earned $285 million for the quarter, compared with $180 million last year. The 1990 quarter included a $43 million favorable adjustment to deferred income taxes resulting from a

change in United Kingdom tax laws and a $70 million gain on the sale of the company's Bahamas facilities. Operationally, exploration and production earnings were up on higher crude oil prices. New production from Australia was more than offset by declines in Canada, Nigeria and the United Kingdom. Natural gas production was up 19 percent due primarily to the company's Canadian operations and the North West Shelf project in Australia. Refining and marketing earnings, despite a 9 percent increase in sales volumes, declined due to lower sales margins, particularly in Canada and in certain of the Caltex the company's equity affiliate areas of operation.

Chemicals operations reported profits of $33 million, down 58 percent from the $78 million earned in the 1989 quarter. Sales margins were adversely impacted by higher feedstock costs and lower prices in the commodity chemicals markets, particularly olefins.

Minerals operations earned $7 million for the quarter, down from $42 million reported in last year's period, when a $37 million gain was recorded from an asset disposition.

Foreign exchange gains included in net income for the quarter were $20 million compared with $14 million in last year's third quarter. Nine-month foreign exchange gains were $16 million in 1990 and $37 million in 1989.

Worldwide capital and exploratory expenditures, including the company's share of affiliates' expenditures, were $1.0 billion in the quarter and $2.8 billion for the nine months, compared with $1.1 billion and $2.7 billion in the comparable prior year periods. As previously announced, the company is spending an additional $100 million in development drilling in the U.S. to quickly increase production. Total capital and exploratory expenditures for the year are estimated to be $4.3 billion.

#90299p0179 10/26/1990 ~PR Newswire
CHICAGO, (OCT. 26) PR NEWSWIRE - Chicago-based Allied Products Corp. (NYSE: ADP) reported a $3,441,000 net loss for the third quarter of 1990 on net sales of $115,295,000. This compares to a net loss of $2,259,000 for the third quarter of 1989 on net sales of $135,570,000.

For the first nine months of 1990, Allied Products recorded net sales of $406,072,000 and net income of $1,269,000. In comparison, net sales and net income were $452,654,000 and $3,472,000 respectively for the same nine-month period of 1989.

Commenting on the third quarter results, Richard A. Drexler, president and chief executive officer of Allied Products, stated:

"Sales were restrained by a continuing policy of restricting production of certain high-cost products. This policy reflects our emphasis on strengthening cash flow and preparing to refinance substantially all of the outstanding indebtedness of Allied Products. Sales of our Agricultural Equipment Group also softened somewhat during the quarter, in line with a general industry trend.

"Nonetheless, over the first nine months of 1990 both income from operations and cash flow considerably exceeded initial projections and it is expected that the results for the full year 1990 will also exceed initial projections. This favorable result can be attributed, in large part, to the success of our vigorous cost-containment and continuous- improvement programs.

"The resurgence of the oil and gas service industry has had a positive impact on our Smith Energy Services division, which until recently had sustained a series of losses. We now expect Smith Energy to deliver increasingly positive results.

"High interest costs and high legal and other professional costs associated with the restructuring of our existing bank debt continue to depress net income, but we are optimistic that the financing situation can be resolved favorably in the near future.

"Management is closely tracking the weakening national economy and the company is reacting quickly to changes in the marketplace."

Allied Products Corp. manufactures agricultural equipment, transportation and industrial products and chemical specialties.

Income before income taxes for the nine months ended Sept. 30, 1990 includes gains of $480,000 ($277,000 in the third quarter) arising from the sales of operating and non-operating assets. Income before income taxes for the nine months ended Sept. 30, 1989 includes gains of $1,371,000 ($888,000 in the third quarter) arising from the sales of operating and non-operating assets.

BRANCHBURG, NJ (OCT. 26) PR NEWSWIRE - Air & Water Technologies Corporation (AMEX: AWT), a leading environmental treatment and services company, today announced that its air pollution control subsidiary, Research-Cottrell Companies, has entered into an agreement to acquire Regenerative Environmental Equipment Co., Inc. (REECO). The agreement is subject to approval by the AWT board of directors. REECO is based in Morris Plains, N.J.

Established in 1972, REECO provides a broad range of volatile organic compound and air toxics control systems. The patented RE-THERM(R) and RE-THERM VF regenerative incineration systems designed by REECO use a regenerative thermal oxidation process to destroy volatile organic compounds (VOCs). RE-THERM is highly energy efficient, using a continuous cycling of heat energy stored in beds of ceramic stoneware. VOCs contained in process exhaust are incinerated and destroyed while the heat energy is used and reused for the incineration process itself. The REECO technology is considered by environmental regulatory agencies as the "best available control technology" for air toxics.

As part of the purchase agreement, AWT is also purchasing REECO's shares in their joint ventures. Those ventures include a 50 percent share in REECO-Stroem of Denmark, and a 51 percent share in REECO-Italy in Milan,

Italy. Additionally, AWT is purchasing 100 percent of Thermal Transfer Corporation (TTC) of Pittsburgh, Pa. Thermal Transfer Corporation (TTC) is a manufacturer of heat exchanger and process vessel equipment.

The terms of the transaction, which is expected to be additive to AWT's earnings, include a total purchase price of approximately $10 million. Of the purchase price, $7 million will be payable in cash at closing and the remaining $3 million will be payable over a two-year period. The company may also make additional payments based on the future cumulative operating income of the acquired businesses. For its most recent fiscal year, ended Dec. 31, 1989, the combined revenues of REECO and TTC were approximately $25 million.

Research-Cottrell, one of the nation's oldest and most recognized air pollution control firms, is a member of the Air & Water Technologies family of environmental companies. Through its subsidiaries, Air Pollution Control Division, Custodis Ecodyne, Flex-Kleen, KVB, R-C Environmental Services & Technologies, and R-C Europe, Research-Cottrell provides the expertise, technology and services to comprehensively solve any air and thermal pollution problem. In addition to its Research-Cottrell air pollution subsidiary, Air & Water Technologies provides a broad range of environmental services in the areas of water resource management and waste by-product disposal and reuse through its other operating units, Metcalf & Eddy Companies Inc. (NASDAQ: METC) and Residuals Management Group.

#90299p0196 10/26/1990 ~PR Newswire

HOUSTON, (OCT. 26) PR NEWSWIRE - Tenneco Inc. (NYSE: TGT) announced today that its Packaging Corporation of America subsidiary acquired Dixie Container Corp., a privately held corrugated container company. Terms of the agreement

were not disclosed.

The closing follows the signing of a definitive agreement in February 1990.

Headquartered in Richmond, Va., Dixie operates seven facilities with more than 650 employees. Three container plants are located in Richmond, Va., Honea Path, S.C., and Morganton, N.C. Three corrugated sheet plants are located in Roanoke, Va., High Point, N.C., and Knoxville, Tenn. Dixie also owns a recycled medium mill in Sylva, N.C.

According to Monte R. Haymon, PCA president and CEO, this acquisition supports PCA's strategy to expand in the Southeast, the nation's fastest growing region for corrugated box shipments. "It will strengthen our overall presence in this area, while enhancing customer partnerships with the furniture, textile and electronics industries," he said.

"PCA will also add recycled medium production capability with Dixie's Jackson Mill in Sylva, N.C. This capability to produce recycled medium will address the growing market demand for recycled materials in corrugated products," Haymon added.

In addition, the acquisition will expand PCA's network of corrugated fabricators in the Southeast and establish PCA's East Coast presence as a manufacturer of heavy-duty corrugated products.

With Dixie and the pending acquisition of select assets of Georgia-Pacific Corp., PCA will operate a total of 56 converting facilities and five containerboard mills nationwide. The Georgia-Pacific transaction was reported in September.

"The closing of these acquisitions will support our strategic objective to strengthen PCA's leadership position in its core businesses," said Haymon.

A Tenneco company, PCA is a leading manufacturer of corrugated containers, containerboard, recycled paperboard, folding cartons, molded fibre products and plastic containers.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

#90299p0199 10/26/1990 ~PR Newswire

NEW YORK (OCT. 26) PR NEWSWIRE - The Dime Savings Bank of New York, FSB (NYSE: DME) today reported a loss of $153.6 million, or $6.72 per share, for

the third quarter of 1990, compared with net income of $2.1 million, or $0.09 per share, for the third quarter of 1989.

The bank said that the loss was due to the addition of $167.9 million to the bank's reserve for loan losses. In a related action, The Dime announced that its board of directors had suspended the bank's quarterly cash dividend of $0.15 per share.

For the nine months ended Sept. 30, 1990, the bank reported a net loss of $123.2 million, or $5.39 per share, compared with net income of $17.6 million, or $0.77 per share, for the nine months ended Sept. 30, 1989.

Richard D. Parsons, president and chief executive officer of The Dime, said, "There has been a substantial deterioration in Northeastern real estate markets over the past few months, including in our core market of metropolitan New York. This has been accompanied by an increasingly recessionary trend in the general economy. These factors have contributed significantly to rising levels of non-performing loans -- in both our residential and commercial real estate portfolios -- and have led us to estimate lower cure rates on delinquent loans and higher losses on foreclosed properties than anticipated earlier this year. Moreover, it does not appear that the regional real estate markets are likely to rebound in the near term.

"Accordingly, in view of the rising level of non-performing loans, recent loss experience, and the deteriorating economic conditions -- and in anticipation of some further declines in real estate markets -- we deemed it prudent to increase substantially the reserve for loan losses and to suspend our dividend.

"Despite the large loss for the third quarter, The Dime remains operationally sound. Our capital ratios remain above current regulatory requirements, and even with the drag of our non-performing assets, operating income before the loan loss provision exceeded operating expenses. We expect to return to profitability in the fourth quarter of 1990.

"Nevertheless, strengthening capital is a priority. We are considering strategic asset sales in order to downsize the bank and improve our regulatory capital ratios. Reducing overhead expense in order to improve profitability is also critical and we are taking a number of steps to reduce our general and administrative expenses."

Non-Performing Assets The Dime reported that non-performing assets at Sept. 30 1990, were $857.2 million, or 7.52 percent of assets, compared with $550.6 million, or 4.72 percent of assets, at year-end 1989.

The third quarter 1990 loan loss provision of $167.9 million included $45.2 million for commercial and multifamily real estate and $121.4 million for one-to-four family and cooperative apartment loans. Charge-offs for the period totaled $36.7 million, including $11.7 million for commercial and multifamily

real estate and $24.7 million for one-to-four family and cooperative apartment loans. The total reserve for losses at Sept. 30, 1990, was $235.5 million, including $51.7 million for commercial and multifamily loans and $180.4 million for one- to-four family and cooperative apartment loans.

The loan loss reserve of $235.5 million represents 2.37 percent of total loans and 33 percent of non-performing loans. The $51.7 million set aside for commercial and multifamily loans represents 4.01 percent of these loans and 66 percent of these types of non-performing loans.

Capital The bank reported that, at Sept. 30, 1990, it had stockholders' equity of $497.5 million, or $21.80 per share, which was 4.36 percent of total assets. The Dime was in compliance with current regulatory capital requirements and had at the end of the 1990 third quarter:

PALO ALTO, CA (OCT. 26) PR NEWSWIRE - Bio-Electro Systems Inc. (BES) today announced a net loss for the quarter ended Sept. 30, 1990 of $2.9 million. Net loss for the nine month period ended Sept. 30, 1990 was $9.4 million compared to a net loss of $6.1 million for the like period in 1989. Revenue for the current quarter consists of interest income of $.3 million. Revenue for the nine month period ended Sept. 30, 1990 was $.9 million.

The loss in the current period consists primarily of research and development expenses, less interest income, incurred under development contracts with Alza Corp. (AMEX: AZA) and Medtronic Inc. (NYSE: MDT), a Minnesota-based corporation.

BES and Alza have entered into a collaborative arrangement with Medtronic whereby both Alza and Medtronic's electrotransport drug delivery activities are being managed by Alza pursuant to agreements with BES.

BES is developing drug delivery systems utilizing bioerodible polymers and electrotransport drug delivery technologies, and intends to commercialize, most likely through licensing, pharmaceutical products based on these technologies.

HOUSTON (OCT. 26) PR NEWSWIRE - William C. Liedtke Jr. chairman and chief executive officer of Pogo Producing Co. (NYSE: PPP) announced that Paul G. Van Wagenen was appointed president and chief operating officer at the company's fall board of directors meeting.

Van Wagenen, age 44, has been with Pogo since 1979 when he began as the company's first in-house legal counsel. In April 1982, he was promoted to vice president and general counsel and then in Jan. 1986, he was promoted to senior vice president. He has been a director of the company since 1988 and also serves on the executive committee of the Pogo board.

Van Wagenen received his B.A. Magna Cum Laude from Brigham Young University in 1970, and his J.D. from the University of Washington in 1973. Prior to joining Pogo he worked for Exxon in a variety of capacities in its Anchorage, Houston, Midland, New Orleans, and New York City offices. He was also associated with the major Dallas, law firm of Johnson & Gibbs.

He is a member of the Texas and Washington State Bar Associations, as well as the U.S. District Court for the Southern District of Texas, the U.S. Fifth

Circuit Court of Appeals, and the American Bar Association. Van Wagenen has taught as an adjunct professor of law at the University of Texas, Permian Basin and has appeared in various state and federal courts as well as before regulatory bodies in Texas, New Mexico, Mississippi and Florida. He has lectured on energy and business matters before the National Association of Manufacturers and the Arizona Association of Industries.

The Pogo chairman stated, "I am plesed to say the Van Wagenen was selected unanimously by our 13 member board of directors, a group which represents a cross-section of American business and industry. He has served Pogo well for 11 years and has been a key advisor and guardian of our business interests through some difficult times in the oil and gas industry. Through Paul's effort and direction we have achieved significant successes, one in particular being his enabling us to enforce many long-term gas sales contracts so vital to the company. Van Wagenen has the business experience and qualifications that will allow Pogo to gain an even greater momentum in its growth as the company enters its third decade of oil and gas exploration and production."

#90299p0208 10/26/1990 ~PR Newswire

TORRANCE, Calif. (OCT. 26) PR NEWSWIRE - P. Leiner Nutritional Products Corp. (AMEX: PLI) achieved higher second quarter profits despite lower sales for the period.

For the three months ended Sept. 30, 1990, net income was $1,283,000, equal to 24 cents per share, up 27 percent from $1,012,000, or 19 cents per share, a year ago. Second quarter net sales were $34,408,000, 6 percent below those in the prior year period.

First half net income was $1,783,000, equal to 34 cents per share, 8 percent lower than $1,941,000, or 37 cents per share, in the year-earlier period. Net sales for the first half were $61,961,000, 10 percent less than in the first six months of last fiscal year.

Michael Leiner, chairman and chief executive officer, said: "Our sales showed substantial improvement from the first quarter, with the benefit of some successful new product introductions. However, the overall vitamin market remained soft. On the other hand, sales of our expanding range of over-the-counter, non-prescription, drug products continued to show very solid gains.

"As anticipated, results continue to benefit from our careful management of expenses and improvements to operating efficiencies. Operating expenses in the second quarter were 12 percent less than in the same period a year ago.

"We were successful in realizing a further partial recovery of the costs of last year's recall of L-tryptophan products. This recovery, together with other factors, produced a non-recurring credit of $300,000, pre-tax, and added 3 cents per share to the second quarter bottom line. It is important to note that even without this recovery we registered improved profits for the quarter.

"Looking ahead, we are encouraged by the opportunities that we see to expand our business by building on our strong national distribution base. However, we are concerned about the potential impact of the current national economic climate on the purchasing patterns of our retailer customers. In this uncertain environment, we will continue to keep expenses under tight control and maintain the company's strong balance sheet."

P. Leiner Nutritional Products Corp.'s customers include 22 of the nation's 25 largest drugstore chains, 21 of the 25 largest supermarket chains and 16 of the 25 largest discount chains.

MONTVALE, NJ (OCT. 26) PR NEWSWIRE - Datascope Corp. (NASDAQ: DSCP) today reported net income of $521,000 or $0.10 per share in the first quarter of fiscal 1991. This compares with $931,000 or $0.18 per share in the year-ago period. Consolidated sales rose 10 percent to $27.6 million, compared with an increase of 2 percent last year and an increase of 6 percent for all of fiscal 1990.

The company stated that while start-up costs of its new coronary angioplasty catheter, PTCA (Percutaneous Transluminal Coronary Angioplasty), business continued to impact net earnings in the first quarter, the company's operating results were on track with its plan to produce higher sales and profits for fiscal 1991.

Gross profit margin increased to 62 percent in the first quarter from 59 percent in the fourth quarter of fiscal 1990, reflecting an anticipated improvement in monitoring production efficiency. Sales of monitoring products and vascular grafts continued strong, offsetting flat intra-aortic balloon pump (IABP) sales.

As announced during the past week, the company noted that its Pre- Market Approval (PMA) application for its INTEGRA(TM) PTCA catheter is due to be considered at an FDA panel meeting on Oct. 29, 1990. The company also announced filing of a PMA Supplement with the FDA for its MICROSS-SL(TM), a new state-of-the art, over-the-wire catheter. Assuming no extraordinary delay in the approval process for either catheter, the company believes marketing of both catheters could begin in early calendar 1991. The combination of the

MICROSS-SL and INTEGRA will give Datascope access to the entire PTCA catheter market, estimated at $400 million annually.

The company also announced that, pursuant to notification from the FDA, it has resumed marketing the following IAB catheters included in recent 510(k) submissions:

PERCOR STAT-DLR 10.5 Fr. 40cc PERCOR STAT-DL 9.5 Fr. 34cc PERCOR STAT-SL 9.5 Fr. 40cc Datascope Corp. is a manufacturer of proprietary products for clinical health care markets in interventional cardiology, anesthesiology, and cardiovascular and vascular surgery.

#90299p0212 10/26/1990 ~PR Newswire

JACKSONVILLE, FLA. (OCT. 26) PR NEWSWIRE - American Federal Savings Bank of Duvall County (NASDAQ-NMS: AMJX), today reported that it reduced the carrying value of certain nonperforming assets, collateralized primarily by commercial real estate located in the panhandle area of Florida, by $745,000 and made a special addition of $500,000 to increase its general allowance for losses to approximately 10 percent of its nonperforming assets. These actions resulted in a net loss of $686,000, or $.73 per share, for the quarter ended Sept. 30, 1990 and a net loss of $435,000, or $.47 per share, for the nine months then ended. This compares with reported net income in 1989 of $94,000, or $.10 per share, for the quarter ended Sept. 30, 1989 and $302,000, or $.32 per share, for the nine months ended Sept. 30, 1989.

American Federal's Chief Executive Officer J. Malcolm Jones Jr. reported, "The amount of our nonperforming assets decreased from $9.9 million as of June 30 to $8.9 million at the end of the third quarter, demonstrating the concerted efforts we are making in our loan administration and asset disposition areas. However, we reevaluated our large nonperformig assets during the quarter in

light of the economic outlook and determined that certain assets needed to be written down. Furthermore, we revised our policy regarding the establishment of general allowance for losses to target an allowance that approximates 10 percent of nonperforming assets, which has resulted in the $500,000 special addition that was required for us to meet our stated objective.

Jones added, "Despite the loss of earnings on the nonperforming assets, our core earnings continue to increase. We believe the actions we have taken should protect the value of our assets as we work through the current slowdown in the economy."

American Federal's total assets as of Sept. 30, 1990 were $262,200,000 and stockholders' equity as of Sept. 30, 1990 was $10,900,000, which represents a $11.61 book value per share. American Federal had core and tangible capital ratios of 4.12 percent and a risk-based capital ratio of 7.92 percent as of Sept. 30, 1990, thus exceeding all minimum capital requirements.

American Federal Savings Bank of Duval County is a federal stock savings bank and is traded on the NASDAQ National Market System under the symbol "AMJX."

#90299p0215 10/26/1990 ~PR Newswire

LOS ANGELES (OCT. 26) PR NEWSWIRE - "The air we breathe is indifferent to its pollution source, and the health of everyone in the Los Angeles Basin would benefit most from the fastest cleanup," Roger C. Beach, Unocal (NYSE: UCL) senior vice president and president of Unocal Refining & Marketing Division, told South Coast Air Quality Management District (SCAQMD) officials today.

Industry and government need to forge a partnership that allows individuals and companies to apply creativity and technology to provide the best solutions to air quality problems, Beach said, adding that Unocal would welcome the opportunity to become involved in the process.

Beach urged that regulators allow the private sector to implement "innovative offsets" in their efforts to clean the air in the Los Angeles Basin. He added, "As long as the emissions are real, quantifiable and enforceable," a company or an individual should receive credit.

He explained that this regulatory approach would allow a company to earn credit for cleaning up air pollution--no matter what its source--and to apply a major part of that credit toward its own business needs.

Beach cited the results of Unocal's SCRAP (South Coast Recycled Auto Project) effort as a model for future innovative programs. In that project, Unocal purchased and scrapped 8,376 pre-1971 vehicles, the worst polluters on the road.

The vehicles in the SCRAP project emitted more than 65 times the hydrocarbons, 50 times the carbon monoxide and 10 times the nitrogen oxides of a typical 1990 automobile.

He noted that a 200,000-vehicle SCRAP project, as a supplement to the Air Quality Management Plan, would cut five years from the schedule for reducing hydrocarbon emissions from mobile sources in the basin. Likewise, such a broad effort would cut two years from the AQMP's carbon monoxide mobile source reduction efforts.

Beach suggested other innovative ideas which could contribute significantly to reducing air pollution. He listed supplementing the state's smog check program with privately funded tuneups; industry subsidized replacement of old water heaters to reduce nitrogen oxides; business-sponsored street sweepers on the freeways to reduce particulates; and credits to businesses for converting fleets to ultra-clean fuels such as natural gas.

PORTLAND, ORE. (OCT. 26) PR NEWSWIRE - NERCO Inc. (NYSE: NER) today reported that its coal subsidiary, NERCO Coal Corp. of St. Louis, has acquired an 80,000-acre property that contains various coal and timber rights. The property is adjacent to some of the company's existing West Virginia coal reserves.

The property, located in Nicholas, Clay and Braxton counties, W.V., was acquired from Pegasus Resource Co., a wholly owned subsidiary of The Pittston Co. The purchase price was not disclosed.

The known coal reserves total about 70 million tons, approximately 30 million tons of which are leased to other parties. Of the coal reserves to be mined initially, approximately one-third of the reserves are compliance coal, with the balance being primarily low-sulfur.

In December 1989, the company acquired certain assets from Bright Coal Corp., including surface and underground coal operations and owned and leased reserves totaling 50 million tons.

According to NERCO Coal Corp. President Charles C. Adams, "Current plans call for us to initially mine coal near our existing Bright reserves, continue to lease coal to other producers, and to sell the extensive timber rights." Included in the timber rights are 350 million board feet of Appalachian hardwoods.

NERCO Coal Corp. is a wholly owned subsidiary of NERCO Inc., one of the leading North American producers of coal, gas, oil, gold and silver. Approximately 82 percent of NERCO's common stock is owned by PacifiCorp (NYSE: PPW), a diversified electric utility.

PARSIPPANY, N.J. (OCT. 26) PR NEWSWIRE - The board of directors of Armco Inc. (NYSE: AS) announced today it has honored the request of chairman Robert E. Boni to retire from active employment with the company effective Nov. 30, 1990. The board has elected Robert L. Purdum, Armco president and chief executive officer, to the additional position of chairman effective Dec. 1, 1990.

Dr. Boni, Armco chairman since February, 1986, will continue as a member of the Board.

In a formal statement, the board said: "It is not possible to overstate the contributions Bob Boni has made to this company throughout his long career, especially during his years as chairman and chief executive officer. With personal dedication and leadership, he successfully guided Armco through its most difficult time in history. While we accept with regret his wish to step down as chairman, we are pleased he will remain an active member of the board. Importantly, we have great confidence that his successor, Bob Purdum, can provide the farsighted vision necessary to move this company forward."

Dr. Boni commented, "I have worked closely with Bob Purdum for the past six years and I am confident of his leadership ability. It is my feeling he is precisely the person this company needs at the helm at this particular time. I appreciate the board granting my request to be relieved of the responsibilities of chairman. I look forward to serving Armco as a board member as long as I can be of value to the company."

Purdum, who is 55, was elected chief executive officer of Armco Inc. in April, 1990, and has been a member of Armco's board of directors since 1986. He is a Purdue University graduate with a degree in civil engineering. After service as a naval officer, he joined Armco's former metal products division as a sales engineer in 1962. He advanced through a variety of assignments and became president of Armco's midwestern steel division in 1978. Two years later was named area vice president with responsibility for four Armco Divisions.

Purdum became chief executive officer of Armco's steel group in 1982 and was named chief operating officer of Armco Inc. in 1985. He was elected president of Armco in 1986.

Dr. Boni, 62, became chairman of Armco in February, 1986. He is a metallurgical engineer with a bachelor's degree from the University of Cincinnati and a master's and doctorate degree from Carnegie-Mellon University. He joined Armco's research organization in 1956 after service with the U.S. Army. He advanced through a variety of assignments in research and was elected vice president for research and technology in 1976.

CADILLAC, MICH (OCT. 26) PR NEWSWIRE - George R. Kempton, chairman of the board and chief executive officer of Kysor Industrial Corporation (NYSE: KZ), announced the following action taken at the board of directors meeting held on Friday, Oct. 26, 1990:

DIVIDEND ANNOUNCEMENT -- The board of directors approved the payment of the regular quarterly dividend of $.15 per share, payable Jan. 31, 1991, on stock of record Jan. 16, 1991.

FINANCIAL INFORMATION -- Quarter and Nine Months Ended Sept. 30, 1990 -- Sales and revenues for the quarter ended Sept. 30, 1990, were $60.8 million compared to $55.0 million last year, an increase of 10.4 percent. Earnings applicable to common stock were $1.5 million or $.28 per share, up from $0.2 million or $.03 per share in 1989. Commercial Products sales of $40.7 million were 17 percent above last year, while Transportation Products sales for the third quarter were $19.7 million, down 2 percent from 1989.

For the nine months ended Sept. 30, 1990, sales and revenues were $180.1 million compared to $178.3 million last year. Earnings applicable to common stock and primary earnings per share reported for the nine-month period were $4.5 million, up 94 percent from 1989 and equated to $.80 per share compared to $2.3 million and $.36 earned in the first nine months of 1989.

Prospects for the remainder of 1990 are uncertain. Increased sales volume for Commercial Products will be offset by lowered Transportation Products sales in the marine and heavy truck markets along with the effects of a rapidly declining national economy. Kysor is expending efforts to reduce costs and improve productivity and end the year on a continuing positive trend.

SAN DIEGO (OCT. 26) PR NEWSWIRE - Bank of Southern California (OTC "Pink Sheets") today reported year-to-date earnings through Sept. 30, 1990 of $785,000, or $.49 per share. This compares with nine-month earnings of $783,000, or $.62 per share for the prior year. Pre-tax income for the year increased 10 percent, however, tax expense increased more than 28 percent in the current year because of the utilization of prior tax carryforwards in 1989. For the quarter ending Sept. 30, 1990, net income was $237,000, equal to $.14 per share, compared with $244,000, or $.19 for the third quarter of 1989.

Ronald P. Bird, president and chief executive officer, stated, "We are pleased with the growth in pre-tax earnings after the addition of several outstanding officers from the former La Jolla Bank and Trust management team."

Total assets advanced to $162.2 million at Sept. 30, 1990, compared to $120.2 million at Sept. 30, 1989. Deposits increased to $150.8 million from $111.7 million while net loans rose to $110.3 million from $77.2 million.

Bank of Southern California offers three conveniently located offices: the Midway office at 3026 Midway Drive; the Point Loma office at 1004 Rosecrans St.; and the San Diego office at 1620 Fifth Ave.

DETROIT (OCT. 26) PR NEWSWIRE - NBD Bank is sponsoring a conference on alternative approaches to affordable housing for individuals, churches, community-based organizations, realtors and developers. The conference will be held Saturday, Nov. 3, at University of Detroit Mercy Conference Center in Detroit.

Beverly Smith, director of NBD's Civic and Urban Affairs Department, explained that the conference aims to provide the public with critical information about affordable housing.

"We are all aware that there is a lack of affordable housing in the Detroit metropolitan area," she said. "Often a person's credit history is a barrier to obtaining affordable housing. At this conference, we will provide individuals and groups with information about the many ways to finance a home or housing project and combat this problem."

The conference will begin a 8:30 a.m. with a continental breakfast and remarks from keynote speaker Nelson W. Saunders, state representative from the 7th Legislative District. Saunders will speak about the Neighborhood Revitalization Act, pending legislation that would reduce property taxes for people who build or rehabilitat a home in certain Michigan cities, including Detroit.

At 9:30 a.m., participants will attend any of four workshops. One workshop is designed to provide creative financing information for individuals who want to buy a home or improve their present home.

Another workshop will educate church leaders on how they can help with

affordable housing in their neighborhoods. A third workshop is specifically designed to educate community groups about organizing development projects. The last of the four workshops will provide realtors and developers with information on how to use financial support programs and invest in affordable housing projects. The workshops will be led by experts in each of these specialty areas.

After the workshops, attendees can participate in a panel discussion with Dr. Larry Ledebur, director of the Center for Urban Studies at Wayne State University, and representatives from other cities including Cleveland and Pittsburgh, which have similar housing problems.

The panel discussion will center around studies commissioned by NBD Bank on barriers to mortgage financing and the need for a strategic housing plan in Detroit. Panel members also will discuss how plans were developed for their cities.

The cost of the conference is $15 for individuals and the first person from an organization and $10 for each additional person attending from the same organization. All participants must preregister by calling 313-225-3492.

#90299p0236 10/26/1990 ~PR Newswire

RALEIGH, N.C. (OCT. 26) PR NEWSWIRE - Engineers from the North Carolina Electric Membership Corporation (NCEMC) are working today to startup the new Ocracoke Power Station and restore electric power to Ocracoke Island on the Outer Banks.

The newly-constructed three-megawatt generating station in Ocracoke village has been undergoing test operations.

"We're going to put it to a real-life test," said Wayne D. Keller, executive vice president of the statewide rural cooperative power system based in Raleigh.

"Our Ocracoke plant has not yet been placed in commercial operation but we believe it's ready to do emergency service."

Keller said an initial problem was getting NCEMC engineers to the Ocracoke plant with Bonner Bridge, the only bridge, out. Ferries are not running and winds are too high to fly to Ocracoke Airport.

He said NCEMC will attempt to restore power to Ocracoke Island, one of the two islands affected, by late Friday.

NCEMC engineers from Raleigh will join NCEMC staff at Ocracoke to bring the generation station safely into operation.

The generating station was built this summer by NCEMC to meet peak power demands and to improve reliability of service.

Power was interrupted to both Hatteras and Ocracoke Islands this morning when a dredge was swept by high winds into the Herbert C. Bonner bridge across Oregon Inlet. A section of the bridge has collapsed, isolating both islands from the mainland.

NCEMC is a statewide power system serving 27 electric power cooperatives in North Carolina. The $1.6 billion power system owns generation facilities at the Catawba Nuclear Station south of Charlotte in addition to the Ocracoke Island facility and the Buxton facility under construction.

ST. PETERSBURG, Fla. (OCT. 26) PR NEWSWIRE - Milton Roy Company (NYSE: MRC) today reported its third quarter revenues were up 19 percent over the levels of a year ago while earnings per share were unchanged. The company stated that the favorable impact of higher sales was offset by increased marketing and administrative costs and a higher effective income tax rate. Sales for the third quarter were $35,868,000 compared with $30,040,000 reported for the similar period of 1989. Net income for the three month period was $1,536,000 or 28 cents per share compared with $1,619,000 or 28 cents per share reported last year.

Sales for the first nine months of 1990 were $107,230,000 compared with $94,283,000 reported for the similar period in 1989. Net income for the nine month period was $5,405,000 or 99 cents per share compared with $6,649,000 or $1.18 per share. Included in 1989's net income is $2,500,000 or 44 cents per share resulting from the sale of the company's liquid chromatography product line.

Commenting on the quarterly results, Milton Roy president, Richard E. Schmidt, stated: "Our sales benefited from increased demand for our fluid control products and from the incremental revenues generated by the analytical instrument companies acquired in 1990. Both revenues and operating expenses reflect increases as a result of higher foreign exchange rates. We also incurred higher administrative expenses due to the company's activities associated with its pending merger with Sundstrand Corporation."

Schmidt further stated: "In comparison to 1989 results, both 1990's third

quarter and nine months earnings were affected by a higher effective tax rate. This is due to a larger portion of income being earned by our foreign operations which are subject to higher tax rates."

Milton Roy is a multinational manufacturing company which produces process control equipment and analytical instruments. Major product lines includes metering and centrifugal pumps, spectrophotometers, mass spectrometers and environmental and automotive emissions testing equipment. These products are used in a wide variety of industrial, research and educational applications where they control and monitor the flow of liquids and analyze the components of a complex mixture of fluids or gases.

#90299p0244 10/26/1990 ~PR Newswire

VANCOUVER, WA (OCT. 26) PR NEWSWIRE - Pacific Telecom Inc. (PTI) (NASDAQ: PTCM) reported increased revenues and net income for the nine-month period ended Sept. 30 compared to the same period last year. While revenues increased in the third quarter 1990, net income decreased from the comparable period last year.

Net income for the third quarter 1990 was $18.5 million, or 48 cents per common share, a decrease of 19 percent from the previous year. Operating revenues and operating expenses both increased due to the acquisition of North-West Telecommunications Inc. and the sale of capacity on the North Pacific Cable, a fiber optic cable being constructed between the United States and Japan, which is expected to be in service in early 1991. The increased operating income resulting from the North-West acquisition and the sales of cable capacity was offset by decreased operating income for PTI's long lines subsidiary resulting from intrastate rate reductions and the effect of favorable out-of-period revenue adjustments recorded in the third quarter 1989. Other expenses increased primarily due to additional interest expense related to debt incurred to acquire North-West and the effect of interest income recorded in 1989 related to a toll revenue dispute.

Net income for the nine months ended Sept. 30 was $64.6 million, or $1.68 per common share, a 21 percent increase over 1989. Operating income was slightly higher as improvements in PTI's local exchange, international and trans-Pacific cable operations were offset by lower long lines operating income. Other income increased due to the $18.5 million pre-tax gain that resulted from the February 1990 sale of a subsidiary providing satellite-based cellular telephone and private line communication services in the Gulf of Mexico.

By action of the board of directors on Oct. 26, a dividend of 29 cents per

common share was declared. The dividend will be payable Dec. 3 to shareholders of record as of Nov. 16.

PLEASANTVILLE, NJ (OCT. 26) PR NEWSWIRE - J.G. Salomone, chief financial officer of Atlantic Energy Inc. (NYSE: ATE) today announced consolidated financial results for the 12 months and third quarter ended Sept. 30, 1990.

Atlantic Energy is the parent company of Atlantic City Electric Co. (ACE), its primary subsidiary, and Atlantic Generation Inc., Atlantic Southern Properties Inc. and ATE Investment Inc.

Total consolidated operating revenues for the 12 months ended Sept. 30, 1990, increased to $724.8 million from $693.4 million for the prior 12-month period. Net income for the 12 months ended Sept. 30, 1990, totaled $78.7 million compared with $77.7 million for the prior period. Earnings per share for the 12 months ended Sept. 30, 1990, amounted to $3.47, compared with $3.70 per share for the same period last year. Salomone stated, "The decline in earnings was expected. Even though we experienced an increase in revenues and net income, those gains were offset by the fact there are now 8 percent more average shares outstanding than a year ago."

The higher level of revenues resulted from increased kilowatt-hour sales and the partial effects of a provisional base rate increase granted in late June 1990. At that time, ACE began recovering through base rates a portion of the costs associated with ACE's four-year power purchase arrangement with Philadelphia Electric Co. In addition to increased revenues, other factors affecting net income for the 12-month period were operations and maintenance expenses which decreased $15.1 million to $177.3 million. This decrease was due in part to lower maintenance expenses incurred during the 12-month period at ACE's wholly owned and jointly owned generating stations and the return to service of the Peach Bottom Atomic Power Station. Net income was also affected by purchased power expenses that increased $15.7 million to $49 million, primarily as a result of the PE arrangement. Federal income tax expense increased $13.9 million to $31.5 million, largely due to favorable tax determinations recorded in 1989 as well as increased tax expense from higher reported net income. Depreciation expense increased $3.4 million to $61.2 million and reflects the effects of increased amounts of electric plant in service.

Energy sales recorded by ACE for the three months ended Sept. 30, 1990, increased 3.6 percent to 2.2 billion kilowatt-hours. Energy sales to residential, commercial, industrial and other customers increased 2.9 percent, 4.8 percent and 2.4 percent, respectively, reflecting increased numbers of customers in the residential and commercial classes and higher average energy consumption by all customers.

CAMBRIDGE, MASS. (OCT. 26) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD) announced today that it has filed a motion in the U.S. District Court for the District of Massachusetts asking the court to amend the recent judgment in Polaroid's patent suit against Eastman Kodak (NYSE: EK).

On Oct. 12, 1990, the U.S. District Court entered judgment for Polaroid in the amount of $909 million. Today's motion asks the court to reconsider and amend the judgment entered on Oct. 12. If the amendments Polaroid is requesting of the court are adopted, the amount awarded will be increased from $909 million by approximately $173 million.

Today's motion is not an appeal from the decision rendered by the court on Oct. 12. Polaroid's right to make such an appeal continues to be available.

PHOENIX, ARIZ. (OCT. 26) PR NEWSWIRE - Swift Transportation Co. Inc. (NASDAQ: SWFT) announced today revenues and earnings for the third quarter ended Sept. 30, 1990.

Revenues for the third quarter increased 29 percent to $41.2 million, compared with $31.8 million for the corresponding period in 1989. Net earnings increased 42 percent to $1.9 million or 27 cents per share, compared to $1.3 million or 25 cents per share for the corresponding quarter a year ago.

Revenues increased because of the company's continued fleet expansion resulting primarily from the acquisition of Kaibab Transportation on June 1, 1990 and the company's revenue surcharge to cover higher fuel costs.

For the nine months ended Sept. 30, 1990, revenues increased 25 percent to $113.7 million from $91.1 million in the first nine months of 1989. Net earnings increased to $5.3 million or 90 cents per share, compared to $2.3 million or 43 cents per share.

ALLISON PARK, PA (OCT. 26) PR NEWSWIRE - Laurel Savings Association (NASDAQ: LARL) today reported results for the first fiscal quarter ended Sept. 30, 1990.

Net income for the period was $142,000 or $0.28 per share. These results compare with net income of $179,000 or $0.37 per share for the same quarter a year ago. Net interest income before provision for loan losses rose 7.5 percent to $1,106,000 vs. $1,029,000 in the first quarter of fiscal 1990. At Sept. 30, 1990, Laurel Savings had total assets of $157,907,000 and stockholders' equity of $10,183,000 or $20.81 per share.

Results for the current quarter reflect continued strength in the association's core earnings as well as stable net interest income. In addition book value per share increased 3.9 percent vs. the first quarter of fiscal 1990. The reduction in net income when compared to the prior year is attributable to a significantly greater addition to Laurel Savings' reserve for possible loan losses. The loan loss provision in the current quarter was $177,000 vs. $74,000 in the first fiscal quarter last year. As stated previously, the increased loan loss provision is in keeping with management policy to prudently reserve for possible problem loans.

Laurel Savings Association is a 103-year-old, Pennsylvania-chartered, SAIF-insured savings association conducting business through six offices in Allegheny and Butler counties.

GREENWICH, CT (OCT. 26) PR NEWSWIRE - The Pittston Company (NYSE: PCO) reported today that a subsidiary has completed the sale of its Widen property located in West Virginia for $18.6 million in cash. The Widen property consists of about 80,000 acres containing timber, oil and gas and coal values. The oil and gas rights were excluded from the sale.

The company in its second quarter shareholders' report said that proposals were being received and evaluated for the possible sale of the Widen property in line with Pittston's policy of being willing to consider the sale of assets that might have greater value to others.

The Pittston Company is a diversified firm engaged in mining and marketing of bituminous coal through the Pittston Coal Group, Inc. and Pyxis Resources Company, air freight services through Burlington Air Express Inc., security transportation through Brink's, Incorporated, and home security services through Brink's Home Security, Inc.

SEATTLE, (OCT. 26) PR NEWSWIRE - The U S WEST Foundation will again honor a teacher from Washington state through the U S WEST Outstanding Teacher Program the company said today.

Now entering its fourth year, the program recognizes unusual teacher talent at the elementary and secondary school levels in the 14 states served by the U S West Communications subsidiary.

The teacher selected as Washington State's 1991 Outstanding Teacher will receive a $5,000 cash award. In addition, three of U S WEST's 14 outstanding teachers will receive a year's salary and expenses to pursue professional development. Selection is based on how the teacher intends to apply the year-long sabbatical experience to future teaching activities in their community. No similar sabbatical program exists in the region for teachers in the kindergarten through high school grade level.

"The program looks for those teachers whose commitment to students and betterment of the educational environment can be recognized for truly reaching beyond the classroom walls," said George Walker, vice president and chief executive officer for U S WEST, in announcing that nominations are being sought for the 1991 teacher program.

Last year, Connie Iverson, a teacher from Eugene P. Tone School Project in Tacoma, was selected as Washington's Outstanding Teacher. Barbara Haueisen, Lincoln High School in Tacoma, and Richard Howell, Kelso High School, were also recognized for their work in the classroom and received $1,000 cash awards.

Information about the program and nomination materials can be obtained by writing the U S WEST Foundation, 7800 East Orchard Road, Suite 300, Englewood, CO 80111.

HOUSTON, (OCT. 26) PR NEWSWIRE - LL&E Royalty Trust (NYSE: LRT) announced today that its monthly distribution to unit holders will be made on Nov. 15, 1990 to unit holders of record on Nov. 5, 1990. This distribution represents amounts payable to the trust with respect to production for the month of August 1990.

The total amount of the November distribution will be $989,067 or approximately $.05208 per unit. Excess expenses of $17,000 associated with the Jay Field were recouped in the current month, with a resulting distribution of approximately $214,000. Due to the nature and timing of other operating and capital projects along with fluctuation in monthly production as well as the price of crude oil, this distribution is not necessarily indicative of future monthly distributions.

As previously announced, the working interest owner has begun to escrow amounts for the Fort Worth Basin property in connection with the issue of recapture of intangible drilling and development costs under Section 1254 of the Internal Revenue Code. The trust's interest in the amount escrowed from the current month's distribution and the cumulative balance of such are $3,378.42 and $524,897.68 respectively. As stated last month, pending the possible appeal by the IRS of the previously announced favorable ruling rendered by the United States Tax Court on the Section 1254 issue, the working interest owner has made no decision on whether and when these amounts will be released from escrow.

The working interest owner has determined under the terms of the trust documents that it is eligible to escrow funds from all trust properties for

the 1254 recapture issue. However, it has advised the trustee that it does not intend to exercise its rights to escrow funds, other than for the Fort Worth Basin, for this issue for the November 1990 distribution. However, the working interest owner intends to continue to monitor its estimates of relevant factors in order to evaluate the necessity of escrowing funds for this issue on an ongoing basis. The working interest owner is under no obligation to give any advance notice to the trustee or the unit holders in the event it determines that funds should be escrowed. If the working interest owner does begin to escrow such funds with respect to the productive properties, other than Fort Worth Basin, the effect on royalties paid to the trust would be significant, and in certain circumstances could eliminate distributions for a period of time.

ROCHESTER, NY (OCT. 26) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) announced today that it has filed a motion in U.S. District Court in Boston, asking the court to amend its Oct. 12 judgment in the Kodak/Polaroid patent litigation.

The company's motion asks the court to consider reducing the $909.5 million judgment by $48 million to $861.5 million. The motion is based on what the company believes are clerical errors in the calculation of damages, royalty and interest.

Today's motion is not an appeal and Kodak's right to appeal the Oct. 12 decision continues to be available.

WICHITA, KAN. (OCT. 26) PR NEWSWIRE -- Jack Braly has been named president of Beech Aircraft Corporation, replacing Max E. Bleck, who will assume the presidency of the Raytheon Company (NYSE: RTN).

Both moves will be effective March 1, 1991. Between now and that date Bleck will work with Braly on the transition into the new assignment. Beech, the leading business and general aviation aircraft manufacturer, is a subsidiary of Raytheon Company.

Braly, a veteran Beech executive, brings extensive management and manufacturing experience to the position. His most recent assignment was as vice president - Operations, responsible for manufacturing the company's full line of aircraft.

"Mr. Braly has continually demonstrated excellent judgment and management creativity," Bleck said. "He is an extremely capable executive. I look forward to Mr. Braly's leadership at Beech," he added. As Beech president, Braly will continue to report to Bleck and will be responsible for the total operation of the company.

Braly joined Beech in 1978 as assistant to the group vice president. The next year he was promoted to manager of Plant II Manufacturing.

Since then he has served in increasingly responsible management positions. In 1983 he was named vice president -- Manufacturing, and in 1987 to vice president - Operations.

Before joining Beech, Braly was with Martin Marietta Aerospace as a nuclear physicist on NASA's Skylab Project.

He has been active in the Wichita Area Chamber of Commerce and the East Wichita Rotary Club. Braly is a graduate of the University of Northern Colorado and earned a master of science degree from the School of Physics at Colorado State University. He is a fully instrument rated pilot and qualified in most Beech business aircraft.

Beech Aircraft Corporation is a subsidiary of Raytheon Company, an international technology-based company active in electronics, aviation, appliances, industry services, construction and publishing.

VANCOUVER, BRITISH COLUMBIA (OCT. 26) PR NEWSWIRE - VAALCO Energy, Inc., (Vancouver: VEI) a Houston-based oil producer and explorer, announces the spudding of its West Linapacan-1 well, offshore Palawan Island, the Republic of the Philippines. The well is being drilled by the Reading and Bates semi-submersible "Jim Cunningham" in 1142 ft. of water.

The West Linapacan-1 structure is a faulted anticline with a mapped areal closure of 3200 acres and a vertical thickness of 922 ft. The well is programmed to be drilled to a depth of approximately 6,000 ft. The primary zones of interest lie between -4865 ft. and -5423 ft. in the Galoc Clastic and Galoc Limestone units. Drilling to the first interval of interest should require approximately 21 days.

Additionally, VAALCO wishes to advise that the most recent sale of crude oil from the Philippine fields achieved an average price of approximately US$39.18 per barrel.

#90299p0283 10/26/1990 ~PR Newswire

ROWAYTON, CONN. (OCT. 26) PR NEWSWIRE - Baldwin Technology Company, Inc. (AMEX: BLD), announced today that net sales for the three months ended Sept. 30, 1990, were up 21 percent to $47.9 million compared to $39.7 million for the three months ended Sept. 30, 1989. For the same period, net income was $1,449,000, a decrease of 39 percent from $2,377,000 for the prior year period. Net income per common and common equivalent share was 8 cents per share for the current period compared to 15 cents per share for the prior year period. Weighted average equivalent shares outstanding during the period were 17,924,589 versus 16,062,820 for the prior year period. Orders and backlog were up 23 percent and 34 percent, respectively, driven by new acquisitions.

The company indicated that while the first quarter had always been its weakest due to normal four-to-five week plant shutdowns in Europe and in some U.S. units during July and August, the principal reason for the lower results is further weakness and recessionary trends in the printing and printing equipment industry, particularly in the United States and the United Kingdom. The move by the company's German subsidiary to expanded facilities also dampened results temporarily. In addition, economic uncertainty caused by events in the Middle East and the resultant oil price shock has slowed overall business activities. The recently completed Misomex acquisition had only two months of activity, while carrying the full burden of acquisition costs.

The company noted that while it was taking cost-reduction and certain other measures at specific business units, its operations are not necessarily quarterly driven and it continues to be well placed and balanced in world markets.

Baldwin Technology Company Inc. is a leading multinational manufacturer of material handling, accessory, control and pre-press equipment for the printing industry. For the year ended June 30, 1990, Baldwin had net sales of approximately $183 million and net income of approximately $12.1 million.

#90299p0287 10/26/1990 ~PR Newswire

BRIDGEPORT, CT (OCT. 26) PR NEWSWIRE - Citytrust Bancorp, Inc. (NYSE: CYT) reported today a net loss of $29,472,000, or $7.01 per share, for the quarter ended Sept. 30, 1990, compared to net income of $2,057,000, or 49 cents per share, for the third quarter of 1989.

For the nine months of 1990, the company had a net loss of $58,128,000, or $13.91 per share, compared to a net loss of $26,228,000, or $6.31 per share, in the similar period last year.

It was also announced that the company's bank subsidiary, Citytrust, has signed a memorandum of understanding with the State Banking Commissioner and the regional director of the Federal Deposit Insurance Corporation. The memorandum, which is not a formal agreement, covers goals and corrective actions that the regulators expect Citytrust to implement to return the Bank to a satisfactory condition.

George F. Taylor, chairman of the board and chief executive officer of Citytrust Bancorp, Inc. and Citytrust, said that, "The memorandum recognizes that management has already taken and continues to take steps to address the problems which affect the Bank."

The memorandum includes a number of items, among which are provisions relating to capital requirements, loan loss reserve and charge-off requirements, reduction of adversely classified assets, internal loan review, loan administration and underwriting, liquidity and funding, and management information reporting. The memorandum is one of the least severe forms of action available to the regulators. In addition, the parent company, Citytrust Bancorp, Inc., has entered into a written agreement with the Federal Reserve Board and the State Banking Commissioner that covers items similar to those in the bank's memorandum of understanding.

"The bleakest economy and most depressed real estate market that have

afflicted Connecticut and New England in the past 15 years" were cited by Taylor as factors in the company's financial losses.

"This economic downturn, which is affecting all banks in the state and region, is a cyclical adjustment that is working off the excessive construction-led growth of the 1980s," he commented. "A majority of the adjustments should be completed in the next several years, with the anticipation of a fairly strong recovery in the mid-1990s."

During the quarter, non-performing loans decreased $1 million to $269 million, while other real estate owned (OREO) stood at $44 million, an increase of $17 million. The increase in OREO represents progress in loan workout, with the Bank taking direct control of a greater percentage of problem properties. The company also stated that during the quarter it added approximately $18 million to the non-performing loan category for a major real estate developer.

The allowance for possible credit losses was $86 million at the end of the quarter, compared to $85 million as of June 30.

As of Sept. 30, the company's primary capital ratio was 4.36 percent and its total capital ratio was 5.82 percent. The bank's primary capital ratio was 5.08 percent and its total capital ratio was 5.46 percent. The minimum regulatory requirements for these ratios are 5.50 percent and 6.00 percent, respectively.

"To address our capital needs, we took the initiative in preparing a capital plan and reviewing it with the regulators several months ago," Taylor noted. "As part of the memorandum of understanding, we continue to keep the regulators informed of the actions being taken to increase our capital ratios."

The company's liquidity was aided by an improvement in the funding relationship between loans and deposits during the quarter. Third quarter loans (including ADC arrangements) declined by $110 million while total deposits declined by $4 million.

Assets as of Sept. 30 were $2.2 billion, a decline of $20 million from June 30. "This is part of an ongoing program of asset reduction to strengthen the company's capital position, improve credit quality and eliminate any dependence on short-term volatile liabilities," Taylor stated.

Citytrust Bancorp, Inc. is an independent Connecticut bank holding company. Its subsidiary, Citytrust, serves major markets throughout Connecticut and high-potential growth areas in New York through 46 retail branches and ten commercial lending offices.

ALLENTOWN, PA. (OCT. 26) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD), which is teamed with General Dynamics Corp. (NYSE: GD) of St. Louis, on the U.S. Department of Energy's (DOE's) Superconducting Super Collider (SSC) dipole magnet program, has been selected to enter into negotiations for a contract with that firm to provide cryogenic refrigeration services for the design and initial high-volume manufacture of superconducting magnets.

General Dynamics' space system division currently is negotiating for a contract as "leader" manufacturer on the SSC dipole magnet program, with Westinghouse Electric Corp. (NYSE: WX) of Pittsburgh, negotiating for a contract as the "follower" manufacturing organization. Contracts for these latter two firms would be valued in total at approximately $200 million.

Air Products' contract with General Dynamics will call for Air Products to supply the helium cryogenic refrigeration system, operating services, and liquid helium and liquid nitrogen necessary to support magnet cold testing requirements. The helium refrigeration will super cool the magnets to near absolute zero (4.35 Kelvin), at which temperature the electric current that powers the magnets will flow without resistance. Air Products is the world leader in supplying both liquid and gaseous helium, and cryogenic refrigeration services to commercial superconducting magnet applications such as magnetic resonance imaging facilities. In addition, Air Products designs and manufactures cryogenic equipment for the production, storage and transportation of helium.

Air Products and Chemicals Inc. is an international supplier of industrial gases and related equipment, chemical intermediates, and energy and environmental systems. The company has annual sales approaching $3 billion, operations in 24 countries and 14,000 employees. corporate headquarters are near Allentown.

#90299p0293 10/26/1990 ~PR Newswire
BROOKLYN, NY (OCT. 26) PR NEWSWIRE - Supreme Equipment & Systems Corp. (NASDAQ: SEQP), a manufacturer of filing cabinets and storage systems, today reported reduced deficits and lower sales for the fourth quarter and full fiscal year ended July 31, 1990. Martin Frederick, president, noted, "Management salary cuts and staff reductions continued through the fourth quarter, all part of a severe austerity program aimed at achieving a breakeven at sales levels lower than those currently being reported. Central to out return to profitability, however, is the sale of our 53rd Street manufacturing facility in Brooklyn, N.Y., for $3.2 million, the consummation of which is

contingent in part on the buyer receiving financing."

Frederick pointed out that "despite widely acknowledged problems that exist in the office supply manufacturing industry, Supreme sales seem to now be stabilizing, pointing to a return to profitability. Selling and manufacturing overhead during the year was reduced by approximately $3 million. In recent quarters labor and overhead reduction exceeded raw material cost increases, and going forward savings of almost $1.7 million per year will be achieved through last year's staff reduction along with the elimination of related fringe benefits."

For the fourth quarter ended July 31, 1990, net sales of Supreme Equipment amounted to $6,558,000 against $6,807,000 in the comparable period the year before. Net loss for the quarter was $1,053,000, or $.98 per share, compared with a loss in the fourth quarter of fiscal 1989 amounting to $1,418,000, or $1.32 per share.

For the full year ended July 31, 1990, net sales amounted to $29,151,000, against $31,867,000 in fiscal 1989. Net loss for the fiscal 1990 year amounted to $2,240,000 or $2.09 per share, vs. a fiscal 1989 deficit of $2,951,000, equal to $2.75 per share. All per-share earnings have been computed on an average of 1,072,632 shares outstanding.

UNIVERSAL CITY, CA (OCT. 26) PR NEWSWIRE - Universal Pictures has entered into a multi-year production agreement with Jim Sheridan and Noel Pearson, it was announced today (Oct. 26) by Tom Pollock, chairman of the MCA Motion

Picture Group, and Casey Silver, president of production for Universal Pictures.

The agreement gives Universal first look at all feature film projects developed by Sheridan and Pearson through their company, Ferndale Films. Suzanne Rothbaum will serve as vice president of development and production for the company.

"We are proud to be in partnership with such acclaimed filmmakers as Jim Sheridan and Noel Pearson," said Pollock. "The fact that their very first feature film, 'My Left Foot,' received five Academy Award nominations is a testimony to their desire and ability to make quality pictures."

In 1989, Sheridan wrote and directed "My Left Foot," which won him Academy Award nominations as Best Director and for Best Screenplay. Produced by Pearson, the film also won a Best Picture nomination and Oscars for Best Actor Daniel Day-Lewis and Best Supporting Actress Brenda Fricker, as well as the New York Film Critics Award, the Paris Critics Prize and the Donatello Award. Their second feature film, "The Field," starring Richard Harris, which Sheridan wrote and directed and Pearson produced, will be released this Christmas.

Rothbaum, who previously served as vice president of development at Patrick Palmer Productions, was the associate producer on the upcoming film "Mermaids " starring Cher. She has also worked in various production capacities on the motion pictures "Stanley & Iris" and "Moonstruck."

Ferndale Films will be based on the Universal Studios lot.

CHARLESTON, WV (OCT. 26) PR NEWSWIRE - Eagle Bancorp, Inc. (NASDAQ-NMS: EBCI) the parent company of First Empire Federal Savings and Loan Association, today reported net earnings of $520,000 for the third quarter of 1990 as compared to $320,000 for the third quarter of 1989. This represents a 62.5 percent increase in net income over the previous year's third quarter. Net income for the first nine months was $2,105,000 compared to $1,001,000 for the same period in 1989. First quarter 1990 net income included $719,000, or $.56 per share net of tax, of tax refunds and interest thereon resulting from the out of court settlement of litigation with the Internal Revenue Service regarding losses on reciprocal loan sales and income received from early withdrawal penalties on certificates of deposits. Third quarter net income includes $115,000 in dividends from Ski Ventures, Inc. resulting from the sale of Snowshoe, a Pocahontas County, West Virginia ski resort. Earnings per share for the third quarter and year to date in 1990 amounted to $.41 and

$1.65 per share, respectively compared to $.25 and $.79 per share for the same period in 1989.

Stockholders' equity increased from $29.4 million at December 31, 1989 to $31.1 million at September 30, 1990. As previously announced, on October 16, 1990 the Board of Directors authorized the payment of an $.11 per share regular quarterly dividend on November 9, 1990 to stockholders of record on October 26, 1990. This represents a 22 percent increase from the previous regular dividend of $.09 per share. This is the ninth consecutive dividend since the company went public in July 1988.

Loan originations increased to $8.2 million for the third quarter compared to $7.5 million for the similar period in 1989. Loan originations for the nine months ended September 30, 1990 were $22.5 million, a decrease from 1989's record production of $28.3 million for the smiilar nine month period. The year to date decrease in originations is a direct result of a slower housing market, which is reflective of the national trend. The Company continues to maintain and improve its local market share and to adhere to strict quality origination standards.

Average net interest spread was 2.90 percent for the quarter ended September 30, 1990 compared to 2.23 percent for the quarter ended September 30, 1989, while the average net interest margin increased to 4.09 percent compared to 3.63 percent for the quarter ended September 30, 1989.

Mr. J. Christopher Thomas, President and Chief Operating Officer stated, "The third quarter earnings, exclusive of the $115,000 dividend from Ski Ventures, Inc., increased 26.5 percent from the same period in 1989. This favorable increase is a result of higher earning assets resulting from 1989's record loan originations and from the favorable performance of our adjustable rate loan portfolio."

First Empire Federal Savings and Loan Association operates ten offices in southern West Virginia. Eagle Bancorp, Inc. is traded on the NASDAQ SYSTEM (SYMBOL EBCI).

BOISE, IDAHO (OCT. 26) PR NEWSWIRE - Idaho Power (NYSE: IDA) today reported third-quarter earnings on common stock of $16.5 million, or 49 cents per share reflecting its strongest quarterly earnings performance of 1990. The continuing impacts of last winter's low snowpack on the company's

hydroelectric system largely account for the slight decline from 1989's comparatively strong third-quarter earnings of $18.6 million, or 55 cents per share.

"Below normal streamflows continued as expected, increasing our use of external power purchases and reliance upon higher cost coal-fired resources," said Dewey Hammond, Idaho Power's chief financial officer. "But healthy retail sales and a robust regional economy have helped keep our earnings picture in relatively good shape."

From July to September, streamflows were 25 percent below normal and 20 percent below last year, causing the utility's generation mix to be comprised of 45 percent hydro and 55 percent coal. A normal water year's composition is 54 percent hydro and 46 percent coal during the third quarter.

"We need a wet fall and winter to correct our generation mix," said Hammond, "and reverse the pressure being placed on earnings and other financial benchmarks by the cost of substituting coal for hydro."

The effects of increased power production costs and reduced off-system sales - another reflection of volume restrictions due to low streamflows - were offset significantly by strong third-quarter gains in energy sales to the residential commercial and agricultural sectors.

"The same hot, dry summer that impacted water conditions spurred above-normal demand for electricity in the third quarter," said Hammond. "The service territory's largest increase in pump-irrigated cropland in nine years coupled with an addition of 7,000 customers during the past 12 months demonstrates the continuing healthy growth of our economy."

Third-quarter operating revenues were $125.6 million, compared to $128.2 million in 1989.

For the nine months ending Sept. 30, results were: operating revenues of $347.0 million for 1990 and $379.6 million for 1989; net income of $48.6 million for 1990 and $64.4 million for 1989; earnings on common of $45.4 million for 1990 and $61.2 million for 1989 and earnings per share of $1.34 for 1990 and $1.80 for 1989.

HOUSTON (OCT. 26) PR NEWSWIRE - ENCOAL Corp. and the U.S. Department of Energy announced today the groundbreaking for a demonstration plant to convert Powder River Basin coals into two new environmentally attractive fuels for use in electric utility and industrial boilers. ENCOAL Corp. is a subsidiary of Shell Mining Co., an affiliate of Shell Oil Co. The plant will be co-funded with the DOE through a cooperative agreement.

Located at the site of Shell's Triton Coal Co. Buckskin Mine, the plant will use a mild gasification process called Liquids from Coal (LFC) to convert about 1,000 tons per day of sub-bituminous coal into two low-sulfur fuels -- a solid similar to bituminous coal and a liquid similar in quality to a No. 6 fuel oil. The plant will yield daily about 500 tons of the solid fuel and about 500 barrels of the liquid fuel. The two fuels will give utilities and industry new options for reducing emissions, and for complying with existing air quality regulations and those expected to be included in the pending federal Clean Air Act amendments.

The $72.6 million project is scheduled to be completed and producing fuel by mid 1992. About 100 people will be employed during construction of the plant and 15 will be needed to operate it.

"We commend the U.S. Congress and Department of Energy for their leadership in finding new ways to use our coal resources more effectively and in a more environmentally benign manner," said Jack Mahaffey, Shell Mining Co. president.

The ENCOAL demonstration plant is one of 13 projects selected in the third round of the DOE's Clean Coal Technology Program. ENCOAL is the first participant in the third round to have successfully negotiated an agreement with the DOE and to pass congressional review.

The LFC process was originally developed by SGI International of La Jolla, Calif., and then licensed by SGI and Shell Mining under their partnership, TEK-KOL. Triton Coal Co., a subsidiary of Shell Mining Co., will furnish the plant site and fuel for the plant. The M. W. Kellogg Co. of Houston will be responsible for engineering, procurement and construction activities

associated with the project.

"Shell Mining is proud to be a part of the ENCOAL venture and we look forward to the success of not only this project, but hopefully to commercial-sized plants to be built in the future," said Mahaffey.

ST. PETERSBURG, FL (OCT. 26) PR NEWSWIRE - Medcross, Inc. (NASDAQ: MDCR) announced today that Dornier Medical Systems has informally notified the company of a delay of at least two years before any lithotripsy manufacturer receives approval from the FDA to market a biliary lithotripsy machine.

The delay will mean termination of the participation of Medcross Lithotripsy in the FDA investigational process. Medcross Lithotripsy is a profitable venture in which Medcross owns a 50 percent interest. The company's management had expected a significant reduction in the income from Medcross Lithotripsy in 1991 because of a contractual reduction in service fees.

Medcross Lithotripsy's equipment purchase contracts with both Dornier Medical Systems and the van manufacturer have buy back clauses which will enable the venture to sell back the equipment without loss.

Medcross expects to offset the loss of revenues from Medcross Lithotripsy by starting up new projects. The company plans to place a new mobile magnetic resonance imaging system into operation in late December. Other new projects are planned, as well.

HOUSTON (OCT. 26.) PR NEWSWIRE - Continental and Colorado Ski Country USA announced today savings up to 50 percent on "Learn to Ski" packages within Colorado. The packages for beginner skiers include round trip airfare, lodging, group lesson, ski rental, and beginner lift tickets for as low as $276.00 per person.

This exclusive program also allows for a more experienced skier, when traveling with the novice, to receive an all mountain lift ticket, airfare, and lodging for the same price.

Seven of Colorado's top destination resorts are participating in the program, which is available from Nov. 27 through Dec. 14, including Breckenridge,

Copper Mountain, Crested Butte Mountain Resort, Keystone Resort, Vail, Steamboat, and Winter Park Resort.

"Continental Airlines has developed exceptional fares for this unique program available through Colorado Ski Country USA. Airfare booked in conjunction with this program will be the lowest of the ski season," said Bob Lepisto, vice president of Sales for Continental Airlines.

John Lay, president of CSCUSA, said, "A commitment has been demonstrated by the airline and the ski industry to come together to make skiing attractive, affordable, and less intimidating to the beginner skier."

Continental Airlines offers more than 145 daily flights to Denver, and from Denver, Continental Express operates frequent service to many Colorado ski destinations including, Crested Butte and Steamboat Springs. Continental Connection bus service provides "door-to-door" transportation to most major resorts from Denver's Stapleton Airport.

The "Learn to Ski" program is available in cities throughout the country, and have some restrictions including a minimum stay of two nights. These packages can be booked by calling 1-800-634-5555 and referring to the "Learn to Ski" program.

ATLANTA (OCT. 26) PR NEWSWIRE - To focus more attention on its retail and commercial banking operation, Home Federal Savings Bank of Atlanta will change its name to HomeBanc Federal Savings Bank.

Home Federal President Robert F. Tomain said the change is effective Monday, Oct. 29.

"For the past three years Home Federal has been expanding its retail and commercial banking operation. The new name HomeBanc better reflects who we are today, a strong financial institution with a leadership position in mortgage lending and a full complement of innovative financial services for banking customers," said Tomain.

Bank signage will begin changing immediately and be completed by Dec. 15. The bank intentionally retained the burgundy and grey color scheme of the old Home Federal logo as well as the word "home" and the traditional white columns to capitalize on existing name recognition, according to Tomain.

The 61-year-old savings bank has 10 branches in Cobb, Cherokee, DeKalb,

Gwinnett and Fulton counties. The bank reported 1989 earnings of $3 million with a return on average assets of .93.

LOS ANGELES (OCT. 26) PR NEWSWIRE - In an innovative and unprecedented marketing strategy, Orion Pictures will advertise the November 21st openings of its adventure epic, "Dances With Wolves," co-produced, directed by and starring Kevin Costner, on a network of American Indian radio stations, which broadcast from South Dakota through the Southwestern United States.

Orion will provide these stations with special radio spots recorded in Lakota Sioux, the native language spoken throughout much of "Dances With Wolves." Most of these stations, which air mainly Native American and country-western music, broadcast entirely in American Indian languages.

Regarding this unique approach, Orion's president of marketing and distribution, David Forbes, comments, "Not only is this a sound and cost-effective way to reach a key audience for 'Dances With Wolves,' but it also gives us the opportunity to help support the Native American business community."

"Dances With Wolves" has been lauded in advance screenings for its authenticity of presentation of Indian life in the late 1860's, the period in which the film is set. In addition, it stars a large American Indian cast, including Graham Greene, Rodney A. Grant, Floyd Red Crow Westerman, Tantoo Cardinal, Doris Leader Charge and about 25 other actors in important speaking roles.

"Dances With Wolves" is a TIG Production for Orion Pictures release. Mary McDonnell and Robert Pastorelli also star in the film. It is produced by Jim Wilson and Kevin Costner, and directed by Costner from a screenplay by Michael Blake, based on his novel. The film will have a limited engagement on Nov. 9, and its national run will begin on Nov. 21.

#90299p0360 10/26/1990 ~PR Newswire

CHICAGO (OCT. 26) PR NEWSWIRE - Midway Airlines Inc. (NYSE: MDW) today announced a net loss for the quarter ended Sept. 30, 1990 of $18,728,000 ($1.96 per fully diluted share) on revenues of $166,631,000 compared with net losses of $1,870,000 ($.19 per fully diluted share) on revenues of

$121,786,000 during the same 1989 quarter.

For the first nine months of 1990, Midway Airlines reported net losses of $53,080,000 ($5.58 per fully diluted share) on revenues of $494,365,000 compared with net income of $6,137,000 ($.56 per fully diluted share) on revenues of $365,530,000 for the same period in 1989.

"As previously reported, Midway Airlines' third quarter results were influenced by three principal factors," said David R. Hinson, chairman and chief executive officer. "The company continued to incur the costs related to expansion of its Philadelphia hub while at the same time its operating costs were rising due to unprecedented increases in the price of aviation fuel.

"At present rates of consumption, the company has had to absorb in excess of $10 million in monthly operating expenses due to higher aviation fuel prices. During August its ability to recover these steep cost increases was adversely impacted by the discount pricing policies of other air carriers," said Hinson.

On Sept. 30, 1990, the company had 10,133,229 shares of common stock issued and outstanding.

Effective Oct. 6, Midway Airlines general reservations toll-free number outside Chicago is 800-866-9000. Special service numbers are: Telemarketing 800-866-9888, Group Sales 800-866-9555, French language 800-866-9010, and FlyersFirst 800-866-9070. In Chicago, the reservations number is 312-767-3400.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly-owned subsidiary, the Midway Commuter, serve 61 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

#90299p0363 10/26/1990 ~PR Newswire

BLOOMFIELD HILLS, MICH. (OCT. 26) PR NEWSWIRE - PHM Corporation (NYSE: PHM), Bloomfield Hills, announced today its consolidated revenues, income, income before income taxes, income taxes and net income for the third quarter and nine months ended Sept. 30, 1990, and the declaration of its regular quarterly dividend.

For the quarter ended Sept. 30, 1990, PHM's net income was $5,177,000 ($.22 per share), compared with $9,515,000 ($.36 per share), including an extraordinary loss from early extinguishment of debt of $2,655,000 ($.10 per share) for the comparable period in 1989.

Sales from homebuilding operations in the third quarter of 1990 increased to

$211,259,000, from $186,694,000 in 1989. This resulted primarily from a seven percent increase in the average unit sales price to $134,000. Pre-tax income from homebuilding operations was $2,490,000 in the third quarter of 1990, compared with $6,348,000 in 1989. Pre-tax income for the third quarter of 1990 was negatively impacted by a reduction in gross margins caused by a change in the mix of sales to units with lower gross margins, and a softening of the housing market in certain divisions compared to the prior year.

During the quarter ended Sept. 30, 1990, net new orders of $180,000,000 (1,371 units) were received, compared with $186,000,000 (1,385 units) during the quarter ended Sept. 30, 1989. Housing unit backlog at Sept. 30, 1990, increased to $300,000,000 (2,043 units) from $266,000,000 (1,792 units) at Sept. 30, 1989.

The company's financial services subsidiaries (mortgage banking, financing and thrift operations) had pre-tax income of $4,068,000 for the quarter ended Sept. 30, 1990, compared with $6,167,000 for the quarter ended Sept. 30, 1989.

The Board of Directors declared a regular quarterly dividend of $.03 per share on the company's common stock, payable Jan. 2, 1991, to shareholders of record at the close of business on Dec. 14, 1990.

#90299p0366 10/26/1990 ~PR Newswire

HUDSON, CO (OCT. 26) PR NEWSWIRE - The second test in the U.S. Air Force Car Assembly Launch Test Program (CALTP) was successfully carried out at noon (MDT) today by Westinghouse Electric Corp.'s (NYSE: WX) Sunnyvale, Calif.-based Marine Division at the Rocky Mountain Railcar Company facilities here.

The test involved a highly sophisticated, 89-foot-long, 550,000-pound engineering model (EM-1) of a Missile Launch Car (MLC) destined for use in the Peacekeeper Missile Program which has been undergoing extensive testing here for the past several months to validate the design.

This testing culminated today with the ejection of a 200,000-pound test vehicle simulating a Peacekeeper missile. The test vehicle reached a height of several hundred feet before landing in a recovery pit adjacent to the MLC.

Today's test will provide engineering data to verify that the MLC and the railbed can withstand the launch loads. The first live flight test using an actual missile is scheduled for 1992 at Vandenberg Air Force Base, Calif.

The Rail Garrison concept is a mobile ICBM basing system, taking advantage of the current Peacekeeper missile system and the nation's existing commercial

railroad network.

The trains will be located in secure garrisons on existing Air Force bases throughout the continental United States. The trains will be parked in train alert shelters inside each garrisoned area during normal day-to-day operations with the missile remaining on continuous strategic alert. During periods of national need, the trains could be directed by higher authority to leave the garrison and disperse onto the nation's rail network.

Each train will include two locomotives, two security cars, two missile cars, a launch control car, a maintenance car and other supplemental cars.

Under a $167 million full-scale development contract award from the U.S. Air Force's Ballistic Missile Organization, Westinghouse is providing systems definition, design, development and test of the Peacekeeper Rail Garrison Missile Launch Cars.

#90299p0370 10/26/1990 ~PR Newswire

DEARBORN, MI (OCT. 26) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is in the process of notifying dealers and owners of a voluntary safety recall of some 1990-91 Crown Victoria and Grand Marquis and 1990 Taurus, Sable, Continental, Tempo and Topaz vehicles to inspect and, if necessary, replace the driver-side air bag module.

Initial estimates are that 55,000 units will be recalled for inspection, although only about 133 will need a new module installed. Certain of these units would have damaged screw threads in a component of the supplemental air bag inflators.

If a vehicle with a suspect air bag module is involved in a deployment-level collision, it is possible that the bag would not inflate properly and would not protect the driver as intended. In addition, combustion gases would flow directly through the air bag rather than through the normal filters and cooling media, presenting the possibility of injury to vehicle occupants. No incidents of improper inflation have occurred in actual driving situations.

Owners will be notified by mail and asked to return the vehicles to their dealers for inspection. If a vehicle has a module with partially damaged threads, a new driver-side air bag module will be installed at no charge. Dealers will be notified by mail starting Nov. 1.

BATON ROUGE, LA. (OCT. 26) PR NEWSWIRE - Gulf States Utilities Co. (NYSE: GSU) has asked that March 1 be set as the implementation date for a $29.9 million revenue increase in Louisiana.

In today's (Oct. 26) filing with the Louisiana Public Service Commission, GSU noted that the request is for the fourth step of the court-ordered Louisiana phase-in plan for the River Bend nuclear power plant. Company officials said the filing includes updated cost allocation and expense information, and contemplates a fifth-step increase of $12.9 million in 1992. The latest request is based on a 13 percent return on common equity.

This past February, the LPSC granted GSU a third-step increase of $28 million,

based on a 12.79 percent return on common equity. The commission also implemented a deregulated asset plan for disallowed River Bend costs, in accordance with an October 1989 ruling by a Louisiana district court.

Since updated cost allocation and expense information filed by GSU in the third-step case was not considered in the February decision, the commission had provided for only one more step increase of about $19.6 million in 1991, officials said.

#90299p0383 10/26/1990 ~PR Newswire

ST. LOUIS (OCT. 26) PR NEWSWIRE - The board of directors of Monsanto Company today approved a restructuring of Monsanto Agricultural Company, an operating unit, to reposition the company for the future.

Restructuring actions include a reorganization of the crop chemicals business on a product line basis, including office consolidations and disposition of nonessential assets, and the proposed sale of the company's animal feed ingredients business.

In line with these changes, reductions in employment will also occur, including early retirement and other benefits paid to the people involved.

The reorganization will result in three new product divisions -- Roundup, Crop Protection Products and New Products Divisions -- plus a Global Operations Division responsible for worldwide sales and distribution. The company's Animal Sciences and Plant Sciences Divisions will continue as currently structured.

Monsanto will offer for sale its animal feed ingredients business, which includes Alimet and MHA feed supplements and Santoquin feed antioxidant. The business had 1989 sales of about $160 million and employs about 80 non-manufacturing people internationally.

Management of the feed ingredients business is located at Monsanto headquarters in St. Louis, with research conducted at two facilities in the St. Louis area. The business group's liquid methionine feed supplement, sold under the trademark Alimet, is produced in a 200 million pound a year plant in Alvin, Texas. MHA granular feed supplement and Santoquin antioxidant are produced at the company's Nitro, W. Va., plant. Monsanto would continue to operate both units for a purchaser with employment at the plants unchanged.

The employment reductions associated with the restructuring will include a special voluntary retirement incentive program, available to eligible salaried U.S. employees, along with a voluntary separation program for certain other

employees. The final date for accepting either voluntary program will be Nov. 26, 1990.

Monsanto said that it will reduce employment by approximately 300 people. The company said that, if workforce reductions in addition to the voluntary programs are required, these would be handled under a period of redeployment and severance payments.

Employees affected by the restructuring will have assistance programs available, including financial and tax counseling, plus professional career counseling and training in seeking new jobs. Monsanto Agricultural Company has about 3,400 salaried employees.

Monsanto Agricultural Company had 1989 sales of $1.56 billion, excluding feed ingredients sales.

MISSION VIEJO, CALIF. (OCT. 26) PR NEWSWIRE - Coldwell Banker Residential Real Estate Services of Southern California today announced that several company-owned offices will be consolidated. The restructuring includes consolidating smaller offices in San Pedro, Hacienda Heights, West Los Angeles Toluca Lake, and Los Angeles/Sunset Boulevard into larger adjacent offices.

"Our intent is to position Coldwell Banker for the long-term opportunities in the industry by increasing the productivity of existing offices," said Tom Williams, president of Coldwell Banker Southern California. "This restructuring will provide a better level of service while streamlining operational costs."

The sales associates in the five consolidated offices will be given the opportunity to join other Coldwell Banker offices. Clerical and support personnel may also be considered for positions at other company locations.

Coldwell Banker recently opened new offices in Laguna Niguel and Sherman Oaks, and will be moving the Torrance office into a larger facility in Redondo Beach next week. The new Sherman Oaks office is a state-of-the-art facility on Ventura Boulevard and is the largest Coldwell Banker office in the Southern California system, with 6,600 square feet. Also moving to larger facilities are the Mission Viejo, Rancho Santa Fe and El Cajon offices.

Coldwell Banker has nearly 1,900 residential real estate offices and more than 40,000 sales associates in North America, and is a member of the Sears Financial Network.

ANAHEIM, CALIF. (OCT. 26) PR NEWSWIRE - Safeguard Health Enterprises Inc. (NASDAQ: SFGD), the nation's largest publicly held provider of managed dental healthcare plans, announced its financial results for the third quarter ended Sept. 30, 1990. Earnings per share were $.03 compared to $.16 a year ago. Net income was $138,000 compared to $717,000 a year earlier. Health care revenues were $14,762,000 compared to $15,295,000 for the same quarter a year ago.

For the nine month period ending Sept. 30, 1990, earnings per share were $.28 compared to $.49 a year ago. Net income was $1,264,000 compared to $2,369,000 a year earlier. Health care revenues were $44,813,000 compared to $46,482,000 for the same period a year ago.

"We are pleased to note that membership in the company's plans increased in the third quarter to 727,000 compared to 722,000 at the end of the second quarter of 1990," said Steven J. Baileys, D.D.S., president and chief operating officer. "Our expanded sales and marketing staffs have embarked upon an aggressive sales campaign. We have also significantly enhanced our administrative and service capabilities through additional staff and systems to fortify our leadership position in the managed dental healthcare field. With these changes we are confident that our clients will receive true long term cost containment and outstanding service resulting in strong acceptability of our programs," Baileys said.

Safeguard operates and managed dental healthcare plans in 13 states providing dental services to members through an independent panel of over 1,700 provider locations.

#90299p0406 10/26/1990 ~PR Newswire

ABBOTT PARK, IL (OCT. 26) PR NEWSWIRE - Abbott Laboratories (NYSE: ABT) announced today that the Food and Drug Administration has approved the marketing of Lupron Depot for the treatment of endometriosis, a disease that affects an estimated 1 in 15 women of reproductive age and is a leading cause of infertility. Lupron Depot (leuprolide acetate), a synthetic analog of the naturally occurring gonadotropin releasing hormone (GnRH), is marketed by TAP Pharmaceuticals, a joint venture between Abbott Laboratories and Takeda Chemical Industries of Japan.

Hank Pietraszek, president of TAP Pharmaceuticals, said "This approval is the result of our continuing research and development efforts to examine the benefits that GnRH analogs can bring to women suffering from a variety of gynecologic disorders. We now have clinical studies underway in the treatment of fibroid tumors and infertility, and are committed to maintaining our leadership position in this promising field of research.

"In addition, this new approval should contribute significantly to TAP sales, which have grown substantially since we entered the market for treating advanced prostate cancer with Lupron five years ago," Pietraszek concluded.

Endometriosis is an often painful condition in which endometrial tissue, the tissue that lines the uterus, grows elsewhere in the body -- often on the ovaries and other organs in the pelvic cavity. Like the lining of the uterus, areas of endometriosis respond to the hormones of the menstrual cycle. They build up tissue each month then breakdown and bleed during menstruation. This process causes local irritation in the pelvis which can result in pain and the formation of scar tissue.

Endometriosis and the resulting scar tissue can lead to infertility, chronic pelvic pain, painful urination and bowel movements, pain during sexual intercourse and increasingly painful menstrual discomfort.

Endometriosis affects five million women in the U.S., according to the Endometriosis Association, a patient support and educational organization based in Milwaukee.

Abbott Laboratories is a worldwide manufacturer of health care products, employing 42,000 people. In 1989 the company's sales and net earnings were $5.4 billion and $860 million, respectively, with earnings per share of $1.93.

INDIANAPOLIS (OCT. 26) PR NEWSWIRE - Railroadmen's Federal Savings and Loan Association (NASDAQ: RRMN) today reported earnings of $662,795 for the third quarter which were 55 percent higher than the third quarter of 1989. The increase in income is reflected by increases in interest income and fee income to the company as well as a decrease in interest expense. Interest income for the third quarter of 1990 increased by $55,386 and fee income increased by $97,911 compared to the third quarter of 1989. Interest expense was reduced by $85,719 compared to the third quarter of 1989. Net interest income, a key indicator of thrift profitability, rose 7.14 percent from third quarter 1989 to third quarter 1990.

Earnings for the third quarter were $662,795 or $.49 per share. This compares to $426,441 or $.32 per share for the same quarter in 1989. Year-to-date earnings were $2,075,302 or $1.54 per share as compared to $2,042,007 or $1.54 per share in 1989. Shareholders' equity continues to grow and reached its highest level during the third quarter of 1990 which was $16,347,357.

J.R. Kocher, chairman of the board and chief executive officer, said, "Core earnings have been steady and strong all year and were one of the reasons for our stock dividend in August of this year." Kocher also indicated, "The proposed merger conversion with Archer Federal Savings and Loan Association, Chicago, which was announced in September of 1990, is progressing as planned."

Kocher said, "Service is an important part of our business. To achieve a high level of service in a cost effective manner is paramount. We are pleased to report that we have been able to maintain a very high level of lending activity and customer service while controlling expenses."

Mortgage loan commitments for the third quarter were $22.3 million bringing the year-to-date commitments to $71.1 million. In keeping with Railroadmen's commitment to the home mortgage market, its home equity line of credit continues to grow at a steady pace. Railrodmen's closed 141 home equity loans in the third quarter. For the first three quarters of 1990, Railroadmen's closed 468 home equity loans bringing its portfolio to 2,101 home equity loans. On Sept. 30, 1990, Railroadmen's customers were utilizing $25.1 million or 51 percent of an available credit line of $48.7 million.

Railroadmen's operates 12 full service offices in Marion, Madison, Hamilton and Brown counties.

#90299p0418 10/26/1990 ~PR Newswire

WASHINGTON (OCT. 26) PR NEWSWIRE - The 1991 budget agreement, which cuts Medicare by $42 billion as a deficit reduction move, does nothing to corral runaway health-care costs for older Americans, the president of the nation's second-largest senior group said today.

"You can't gain the upper hand on the double-digit growth in health costs just by lopping billions from Medicare," said Martha McSteen, president of the National Committee to Preserve Social Security and Medicare. "Simply cutting Medicare misses the point. The system won't become more efficient and the costs will still be there. They just will have to be absorbed by Medicare beneficiaries.

"The problem is that millions of those beneficiaries live on fixed incomes and simply cannot afford to absorb a greater share of the cost. To get Medicare costs under control the challenge is to make the system more efficient -- not simply cut funding."

McSteen said bipartisan efforts in both the Senate and House were effective in sharply reducing the original cuts envisioned by the budget summiteers.

"This was a move in the right direction, a move toward insuring that seniors are treated fairly in the federal budget process and we appreciate the members of Congress, both Democrats and Republicans, who stood up for seniors," she said.

McSteen challenged reports that senior programs were spared by the budget cutters.

"Seniors didn't escape this budget unscathed. Far from it." McSteen said. "Like every other taxpayer, seniors will pay new, higher taxes for gasoline, a six-pack of beer, airplane tickets and other products. On top of that, older Americans also will have to swallow a substantial cut in Medicare. That's hardly special treatment.

"The real problem is out-of-control health costs for all Americans, including seniors. The average annual health care bill for persons over 65 is more than $5,700. And there's no end in sight.

"We absolutely must get a handle on these costs without reducing the quality of care," she said. "And you don't do that simply by cutting Medicare funding."

#90299p0429 10/26/1990 ~PR Newswire
WASHINGTON (OCT. 26) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed CitySavings and Loan Association, San Antonio, Texas, in receivership and chartered a new federal mutual institution to take its place.

The new institution, CitySavings and Loan Association, F.A., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The takeover did not result in any interruption of CitySavings day- to-day operations. The institution and its branches will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because CitySavings was operating in an unsafe and unsound condition in that it had substantially insufficient capital, with no prospect of replenishment without federal assistance.

CitySavings' failure is due primarily to losses stemming from securities and investment speculation and risk controlled arbitrage. CitySavings, since early 1988, relied heavily on the appreciation and sale of investments to generate income, and has made very few new loans over the past two years. Nevertheless deficient policies and procedures for loan underwriting and asset classification have contributed to CitySavings' high level of delinquent loans and real estate owned -- $28.7 million or 16 percent of total assets.

CitySavings is insolvent on a tangible capital basis in that it has negative tangible.

CitySavings' net losses during the first two quarters of 1990 amounted to $9.8 million.

CitySavings was a state-chartered stock association. The shareholders will retain no interest in the new institution.

As of Aug. 31, 1990, CitySavings reported assets of $184.4 million, liabilities of $183.3 million and tangible capital of negative $2.1 million, for a tangible capital-to-assets ratio of negative 1.12 percent.

SANTA BARBARA, CA (OCT. 26) PR NEWSWIRE - Mentor Corp. (NASDAQ: MNTR) announced today that it has acquired Teknar Inc. of St. Louis, a privately held company, for $10 million cash plus certain performance payments.

Teknar manufactures and markets diagnostic ultrasound equipment for the urology and ophthalmology markets. For the fiscal year ended Dec. 31, 1989, Teknar generated approximately $11.1 million in revenues and $1.2 million in net income.

Christopher Conway, chairman of Mentor, said that the acquisition of Teknar accomplishes a number of strategic objectives, including strengthening its presence in the ophthalmology market and establishing a sales base in the diagnostic and therapeutic equipment market serving urologists. "Teknar has the number one share in the urology ultrasound market and a good reputation for quality and service," Conway said. "The combination of Mentor and Teknar should provide broader coverage, increased market share and a platform to launch complementary products. Similarly, sales of Teknar's ophthalmology ultrasound scanners, which amount for about one-third of sales, should be enhanced by support from Mentor's ophthalmology subsidiary."

Conway further stated that Kenneth Head, president of Teknar, and Arthur Bollinger, vice president and general manager, will continue with the company following the acquisition. "These gentlemen have built an exciting and dynamic company," Conway said. "We are extremely pleased to have them as members of our management team."

Mentor Corp. develops, manufactures, and markets medical and surgical devices for the specialties of urology, plastic, and reconstructive surgery, and ophthalmology; and products for hospital and home health care.

#90299p9955 10/26/1990 ~PR Newswire

SANTA BARBARA, CA (OCT. 26) PR NEWSWIRE - Mentor Corp. (NASDAQ: MNTR) today announced record sales of $16.7 million for its second quarter ended Sept. 30, 1990. Mentor also stated that it achieved record operating earnings for the first six months of the year.

Sales for the quarter were $16.7 million, a 35 percent increase over sales of

$12.4 million a year ago. For the first six months of the fiscal year, sales were a record $33.0 million, also a 35 percent increase over $24.4 million last year.

As previously reported, the company announced that it took a pretax charge of $1.5 million, or approximately $.09 per share after tax, for costs of restructuring certain of its manufacturing operations, and the cost of restructuring its sales force in preparation for a major new product introduction.

As a result of this charge, net income for the quarter was $1.1 million, or $.10 per share, compared to $2.0 million, or $.19 per share last year. For the six months net income was $3.2 million, or $.30 per share, versus $4.1 million or $.38 per share last year.

Mentor recently moved its polymer manufacturing operation from Santa Barbara to Dallas. Over the next two years other operations, including sterilization, distribution and some product assembly will be moved from Santa Barbara to Dallas. $1.3 million of the charge includes amounts estimated for certain start-up costs, the costs of nontransferable equipment, the resolution of pollution control issues and a general reserve for unspecified expenses.

Also in connection with the manufacturing relocation, the company announced that it has sold its Santa Barbara manufacturing facility for approximately $5.5 million, and has leased it back for an initial period of three years.

The company's surgical sales force is being restructured and expanded into two separate urology and plastic surgery sales forces. A charge of $200,000 is being reserved against the anticipated restructuring costs.

Urinary incontinence can be treated with injections of Urethrin, a physiologically compatible substance which assists the function of the urethral sphincter. On April 5, 1990, Urethrin was recommended for marketing approval by an Food and Drug Administration advisory panel. The company hopes to receive final FDA approval to market the product some time during its current fiscal year.

Mentor Corp. develops, manufactures and markets medical and surgical devices for the specialities or urology, plastic & reconstructive surgery, and ophthalmology; and products for hospital and home health care.

#90299p9958 10/26/1990 ~PR Newswire

PARSIPPANY, NJ (OCT. 26) PR NEWSWIRE - Home Nutritional Services Inc. (OTC: HNSI) today announced its final results for the third quarter ended Sept. 30.

Revenues for the quarter increased to $21 million compared to $17 million for the third quarter of 1989, while earnings increased to $2.1 million, or $0.18 per share on 11.88 million common shares, from $1.8 million, or $0.18 per share on 10 million shares, in the third quarter of 1989.

Revenues for the nine months ended Sept. 30 increased 26 percent to $59 million compared to $46 million in the first nine months of 1989, while earnings on 18 percent more shares outstanding increased to $6.6 million, or $0.56 per share, in the first nine months of 1990 from $4.7 million, or $0.47 per share, in the equivalent period in 1989.

Third quarter revenues in 1990 were impacted by lower patient census than anticipated at a few of HNS' larger centers in September and slower than expected growth at recently opened centers. HNS also reported an improvement in its day-sales-outstanding (DSO's) in accounts receivable in the third quarter of 1990 to 150 days, compared to 168 days in the first quarter of 1990 and 159 days in the second quarter of 1990. According to Kent H. Kerkhof, president and chief executive officer of HNS: "I am pleased with our improved cash collections and with the progress that we have made in our reimbursement efforts in general. Our success at directing the energies of our organization on dramatically reducing DSO's gives me confidence that enhancing our focus on improving individual center revenue performance will result in similar success."

HNS, a 66-percent-owned subsidiary of Healthdyne (NASDAQ: HDYN), is a national provider of home infusion therapies and related services. Founded in 1980, HNS is one of the oldest and largest providers of home infusion care, with operations in 26 states that are conducted through 29 regional centers, 18 satellite facilities and 25 additional sites of service. HNS is recognized as a leader in quality care and clinical sophistication.

#90299p9961 10/26/1990 ~PR Newswire

WILMINGTON, DE (OCT. 26) PR NEWSWIRE - Matlack Systems Inc. (AMEX: MLK) today reported improved results for the quarter and the fiscal year ended Sept. 30, 1990.

The company's operations in its fourth fiscal quarter were profitable despite

continued sluggish conditions in the bulk trucking industry. Revenues for the quarter ended Sept. 30, 1990, were up almost 4 percent to $54,218,000 compared with $52,206,000 last year. Operating expenses, which were essentially flat despite higher revenues, reflected the impact of a cost cutting program implemented earlier in the year. For the most part, increased fuel expenses were offset by fuel surcharges to its customers. Earnings before taxes were $914,000 in 1990 compared with a loss of $1,383,000 in 1989. Net earnings for the quarter were $614,000 or $.11 per share compared with a loss of $911,000 or $.17 per share last year.

For the full year, revenues were $218,667,000 compared with $219,678,000 last year. Revenue reductions from fewer loads carried and fewer miles run were almost offset by a higher yield per mile resulting from modest rate increases and improvements in the business mix. Since the cost reduction program was implemented in January, the company has been profitable in a soft economic environment in which the chemical industry has cut back production do to slowing demand. Earnings before taxes for the year were $52,000 compared with a loss of $1,284,000 a year ago. Net earnings were $17,000 in 1990 compared with last year's after tax loss of $864,000.

In the short term, a recession or softer economic environment will preclude significant profits, however, pending favorable legislation and increased industry-wide attention to environmental exposure give the company cause for optimism. These latter factors are expected to divert more traffic to the safer carriers in the industry. The company's financial resources, liquidity and credit availability remain strong.

Matlack Systems Inc.'s major operations consist of Matlack Inc., one of the largest carriers of bulk commodities by truck in North America. Matlack operates approximately 1,400 tractors and 2,900 trailers out of 90 terminals located in 35 states and three terminals located in Canada.

MIDDLEFIELD, CT (OCT. 26) PR NEWSWIRE - Zygo Corporation (NASDAQ: ZIGO) today reported sales of $6,720,000 for the three months ended Sept. 30, 1990, an increase of $686,000 over the comparable prior year period. Company Chief Executive Officer Paul F. Forman reported that the company had net earnings of $115,000, or $.05 per share, vs. net earnings of $46,000, or $.02 per share, for the three months ended Sept. 30, 1989. Backlog at Sept. 30, 1990, was $10,508,000 compared to $7,492,000 at Sept. 30, 1989, an increase of 40 percent.

"The improvement in net earnings was due primarily to higher sales," Forman

said. "This improvement reflects our ongoing efforts to improve profitability while, at the same time, continuing to make investments for the future."

Zygo Corporation designs, develops, manufactures and markets high-performance, laser-based, noncontact electro-optical measuring instruments and accessories and manufactures precision optical components. The firm is based in Middlefield.

MILPITAS, CA (OCT. 26) PR NEWSWIRE - Zitel Corporation (NASDAQ: ZITL) today announced net sales for the quarter ended Sept. 30, 1990 were $11,711,000 compared to $8,093,000 for the same quarter of the prior year an increase of 45%.

Income before extraordinary credit was $1,187,000 ($0.21 per share) versus $809,000 ($0.15 per share) for the same quarter of the prior year, an increase of 47 percent.

An extraordinary credit from the utilization of net operating loss carryforwards of $127,000 ($0.02 per share) was reported in the same quarter of the prior year. The net operating loss carryforward was fully utilized during fiscal year 1989.

Net sales of $34,803,000 were reported for the year ending Sept. 30, 1990 versus net sales of $31,585,000 in fiscal 1989, an increase of 10 percent.

Income for the year before extraordinary credit was $2,814,000 ($0.50 per share) versus income before extraordinary credit of $3,216,000 ($0.60 per share) in fiscal 1989. An extraordinary credit from the utilization of net operating loss carryforwards of $252,000 ($0.05 per share) was reported in fiscal 1989.

Zitel designs, manufactures and markets high-performance solid-state mass memory subsystems for special purpose original equipment manufacturers (OEMs)

supporting a number of mini and mainframe computers, including RAMdisk(tm) for end-user customers using Unisys computer systems.

The Company is headquartered at 630 Alder Drive, Milpitas, Calif. 95035.

NEW YORK (OCT. 26) PR NEWSWIRE - Hill and Knowlton, Inc., the international public relations and public affairs counseling firm, has reorganized its Asia-Pacific operations, it was announced today.

Thomas E. Eidson, president of Hill and Knowlton International, said the following senior appointments are effective immediately:

John Connolly, 43, managing director, Australia and New Zealand, was named president of Hill and Knowlton Asia-Pacific, reporting to Eidson. Connolly will have responsibility for 18 offices in Asia, Australia, New Zealand and Hawaii.

A public relations professional for more than 20 years, Connolly is known internationally for his work in investor relations and corporate communications.

Charles S. Crawford, 44, who has been president of Hill and Knowlton Asia Ltd. in Hong Kong, has been appointed a special assistant to Robert L. Dilenschneider, president and chief executive of Hill and Knowlton, Inc., and will transfer to Washington.

His new responsibilities include developing global strategies, marketing initiatives and coordinating international business development initiatives. Crawford also will have additional responsibilities as a vice chairman of Hill and Knowlton Public Affairs Worldwide in Washington.

Clifton Kagawa, 40, has been named executive vice president, Hill and Knowlton Asia-Pacific, reporting to Connolly. Kagawa continues as chairman and chief executive officer, Hill and Knowlton/Communications- Pacific, Inc., Honolulu. Hill and Knowlton/Communications Pacific has grown in eight years under the combined leadership of Kagawa, Richard N. Zwern, president, and Barbara J. Tanabe, executive vice president, into a 75-person firm representing more than 50 of Hawaii's largest corporations, trade associations and non-profit organizations.

Anne Forrest, 52, managing director Hong Kong and China, Hill and Knowlton Asia Ltd., was named regional director, reporting to Connolly. She will continue to head the Hong Kong and Beijing offices and will have responsibilities for the expansion and coordination of business with the Asian offices. Forrest, formerly in public relations in Wilmington, Del., has lived in Hong Kong since 1981.

Sir Robert Cotton will continue to act as non-executive chairman of Hill and Knowlton Asia-Pacific. Former Australian cabinet minister and ambassador to the United States, Sir Robert has been active in Asia- Pacific affairs for over 30 years.

"These appointments are yet another manifestation of our belief in, and commitment to, the growth of Hill and Knowlton beyond the shores of the Continental United States," said Eidson. "We regard the Asia- Pacific area as one of the most important growth areas in the world."

Hill and Knowlton, Inc., based in New York, is the leading international public relations and public affairs counseling firm with 65 offices in 24 countries. Its parent company, WPP Group plc, is the leading advertising and marketing services group in the world.

AKRON, OH (OCT. 26) PR NEWSWIRE - The BFGoodrich Company (NYSE: GR) and Hercules Incorporated (NYSE: HPC) have signed a definitive agreement for BFGoodrich to acquire various business units of the Hercules Aircraft and Electronics Group. BFG will pay $176 million in cash for the businesses. The sale is subject to review by appropriate U.S. government agencies.

The business units of the Hercules Aircraft and Electronics (A&E) Group to be acquired include Hercules Aerospace Display Systems, Inc.; Hercules Aerospace Limited, a British corporation; and all four divisions of Simmonds Precision Products, Inc. The businesses supply aircraft fuel-measurement and fuel-management systems; speed- and torque-sensing devices; jet engine electrical and ignition systems; electromechanical actuators; liquid crystal displays and aircraft sensors. Most commercial jetliners now in production and most U.S. military aircraft currently in use are equipped with A&E components.

The businesses in the A&E Group will become part of BFGoodrich Aerospace, a division of BFGoodrich, and will be operated as independent profit centers.

The A&E Group employs about 2,700 people and had sales in 1989 of approximately $200 million. Principal locations are in Vergennes, Vt.; Norwich, N.Y.; Chester and Cedar Knolls, N.J.; Hatfield, Pa.; Fort Lauderdale, Fla.; Mississauga, Ontario; Bracknell, England and Zevenaar, the Netherlands.

BFGoodrich Aerospace produces aircraft components, including wheels and brakes; emergency evacuation and ice protection systems and instruments and avionics equipment. It also provides maintenance, repair and overhaul services to the aerospace industry. Sales in 1990 are expected to be approximately $500 million.

The BFGoodrich Company also produces plastics and specialty chemical products. Total company sales for 1990 are projected to be about $2.4 billion.

Hercules is a diversified producer of specialty chemicals, chemical propulsion systems, and advanced materials and polymer products. Its principal worldwide markets include adhesives, aerospace, coatings, disposable hygiene products,

food, packaging, paper and printing. Total company sales for 1990 are estimated to be $3.1 billion.

CONTACT: Bev Pierce (media), 216-374-3411, or Tom Waltermire (investor), 216-374-2556, both of BFGoodrich; or Robert Hessler (media), 302-594-6920, or William W. Bewley (investor), 302-594-5254, both of Hercules Incorporated.

#90299p9985 10/26/1990 ~PR Newswire

NORCROSS, GA (OCT. 26) PR NEWSWIRE - Intelligent Systems Master, L.P. (AMEX: INP) announced today the financial results for its third quarter ended Sept. 30.

For the three month period, the company recorded sales revenue of $10,971,000, marginally higher than in the same period a year ago.

The net loss for the quarter allocable to limited partners was $1,772,000 or $.23 per unit compared to net profit of $125,000 or $. 00 per unit a year ago. Last year, the company's results for the quarter included other income of approximately $1,900,000 from gains recognized on the sale of certain assets. There were no comparable transactions this year. The average number of units outstanding declined by 11 percent year-to-year as the company continues to repurchase its units in the open market.

Expenses in the quarter ended Sept. 30 were down by approximately $950,000 compared to second quarter this year. However, expense levels were up this year compared to a year ago due primarily to the inclusion of operating expenses of the OrCAD subsidiary which was acquired in December 1989 and significant non-cash amortization expense related to the acquisition. Furthermore, other income (expense) for the quarter includes approximately $500,000 in losses related to the company's pro rata share of the financial results of Brier Technology, a company in which Intelligent Systems owns a significant minority position.

OrCAD, a subsidiary of Intelligent Systems, is on target to ship the ESP framework, a new graphically based design environment that has been integrated with OrCAD's Release IV product line, a substantially upgraded version of the company's full range of DOS-based design automation tools. The ESP framework provides easy tool selection and file management as well as a seamless transfer of design information between software packages. This product line update should fuel OrCAD's next stage of growth as a market leader in microcomputer-based electronic design automation software.

Brier Technology is now shipping the fastest, most reliable, highest capacity superfloppy disk drive available. Production volumes are increasing but are still very limited. Typically, due to low gross margins, disk drive manufacturers generate losses until very high volumes are achieved. Brier will be previewing its next generation of high capacity superfloppy drives at COMDEX/Fall, the preeminent industry trade show. A major marketing program for Brier's superfloppy drive will begin in mid-November and Intelligent Systems expects it will garner considerable interest and awareness.

Intelligent Systems' results includes substantial interest income earned in the quarter and year-to-date periods from notes acquired in sales of assets. Interest and principal payments related to these notes are current. However, in response to the uncertain economy and increasingly restrictive lending environment, the company does not anticipate renewing cash distributions to unitholders in the foreseeable future. Furthermore, the company intends to conserve cash by taking a more conservative approach to new investments and continuing to reduce operating expenses.

Intelligent Systems is a diversified technology partnership whose depositary units are traded on the American and Pacific Stock Exchanges under the symbol INP. The company conducts its business through subsidiares: Q/COR (enhancement products for microcomputers), InterQuad (European distribution of enhancement products), OrCAD (electronic design automation software) and Datavue (laptop computers). The company also has investments in developing technology companies, including Brier Technology (25 mb superfloppy disk drive).

SUMMARY OF RESULTS

3 months ended Sept. 30	1990	1989

Revenue	$10,971,000	$10,617,000

VALPARAISO, IN (OCT. 26) PR NEWSWIRE - Indiana Federal Corporation

(NASDAQ-NMS: IFSL), parent company of Indiana Federal Savings and Loan Association, today reported earnings $728,000 or 27 cents a share for the third quarter ended Sept. 30, 1990, a 72 percent increase over earnings of $423,000 or 15 cents per share for the same period last year. The lower 1989 earnings were the result of higher provisions for loan losses.

Earnings for the nine months ended Sept. 30, 1990, were a record $2.7 million or $1.00 per share, up 35 percent compared to $2.0 million or 73 cents per share for the same period in 1989.

For the three-month period ended Sept. 30, 1990, net interest income after provision for loan losses, the Company's core business, was $3.7 million, a 25 percent increase over the $3.0 million recorded for the same period of 1989. The net interest margin for the quarter ended Sept. 30, 1990, increased to 3.23 percent from 2.82 percent a year ago. Net interest income after provision for loan losses increased to $11.5 million for the nine months ended Sept. 30, 1990, a 15 percent increase over the $10.0 million recorded for the same period a year ago.

Operating expenses were up 8.7 percent to $3.1 million for the third quarter ended Sept. 30, 1990, from $2.8 million for the year ago period. The increase in operating expenses includes several non-recurring items totaling $107,000. Operating expenses were up 4.9 percent after taking into account the nonrecurring charges.

Shareholders' equity increased to $55.5 million or $20.78 per share at Sept. 30, 1990, compared to $19.89 per share at year end 1989. As of Sept. 30, 1990 the corporation had acquired a total of 72,000 of its outstanding common shares. An additional 66,500 shares were acquired in the first two weeks of October, bringing the corporation's total to 138,500 shares or 5 percent of its outstanding common stock. As announced on Oct. 18, 1990, the corporation intends to repurchase an additional 5 percent or 130,000 of its outstanding common shares.

At Sept. 30, 1990, total assets were $551.0 million, down $1.8 million from $552.8 million at the end of 1989.

Indiana Federal savings ad Loan Association, a wholly owned subsidiary of Indiana Federal Corporation, maintains a network of eight full service offices in northwest Indiana and loan production offices in Highland, Fort Wayne and South Bend, Indiana.

#90299t0396 10/26/1990 ~ts

BONN (OCT 26) TASS - THE BUNDESRAT (UPPER CHAMBER OF THE GERMAN PARLIAMENT) WHICH HELD ITS MEETING HERE TODAY, APPROVED BILLS ON THE RATIFICATION OF THE TREATY ON CONDITIONS FOR THE TEMPORARY DEPLOYMENT AND WITHDRAWAL OF SOVIET TROOPS FROM GERMANY AND THE AGREEMENT ON SOME TRANSITION MEASURES.

THE TREATY ON CONDITIONS OF THE TEMPORARY DEPLOYMENT AND WITHDRAWAL OF SOVIET TROOPS FROM GERMANY WAS SIGNED IN BONN ON OCTOBER 12.

IN COMPLIANCE WITH THIS DOCUMENT, SOVIET TROOPS HAVE THE RIGHT TO CONDUCT THEIR USUAL OPERATIONS ON THE TERRITORY ALLOCATED TO THEM, INCLUDING MILITARY EXERCISES AND MANOEUVRES.

THEIR WITHDRAWAL TO THE USSR WILL BEGIN FROM THE TIME THE TREATY ENTERS INTO FORCE. THE WITHDRAWAL WILL BE CARRIED OUT ON A STAGE-BY-STAGE BASIS AND MUST BE COMPLETED BY THE END OF 1994.

THE TREATY NOTES THAT THE GERMAN SIDE WILL RESPECT THE LEGAL POSITION OF SOVIET TROOPS AND WILL REFRAIN FROM ANY ACTIONS HAMPERING THE IMPLEMENTATION OF THEIR DUTIES.

THE TREATY ALSO DEFINES THE ORDER OF TROOPS SUPPLIES, RULES OF USING REAL ESTATE THAT IS GERMANY'S PROPERTY, ROADS AND COMMUNICATIONS AND STIPULATES MEASURES TO PROTECT ENVIRONMENT.

A MIXED SOVIET-GERMAN COMMISSION IS BEING SET UP TO SETTLE OUTSTANDING ISSUES CONCERNING THE TREATY'S APPLICATION.

THE AGREEMENT ON SOME TRANSITION MEASURES REGULATES FINANCIAL ISSUES CONCERNING THE DEPLOYMENT AND WITHDRAWAL OF SOVIET TROOPS FROM GERMANY.

IN COMPLIANCE WITH THE DOCUMENT, A SPECIAL FUND, TO WHICH THE GERMAN SIDE WILL CONTRIBUTE THREE BILLION MARKS, IS BEING SET UP TO COVER EXPENSES FOR THE UPKEEP OF SOVIET TROOPS.

IN ADDITION, GERMANY WILL GRANT AN INTEREST-FREE CREDIT OF THREE BILLION MARKS TO THE SOVIET UNION. THE GERMAN SIDE WILL APPROPRIATE 7.8 BILLION MARKS TO IMPLEMENT A HOUSING PROGRAMME FOR TROOPS AND THEIR FAMILIES RETURNING HOME.

THE AGREEMENTS WILL BE SUBMITTED FOR RATIFICATION TO THE GERMAN BUNDESTAG IN THE NEAR FUTURE.

#90299t0414 10/26/1990 ~ts
TBILISI (OCT 26) TASS - "PARLIAMENTARY ELECTIONS IN GEORGIA (A SOVIET TRANSCAUCASIAN REPUBLIC), SCHEDULED FOR OCTOBER 28, WILL BECOME AN IMPORTANT LANDMARK ON THE WAY TO ATTAINING GENUINE POLITICAL AND ECONOMIC SOVEREIGNTY BY THE GEORGIAN PEOPLE", SAID IRAKLI ZHORDANIA, CHAIRMAN OF THE CENTRAL ELECTORAL COMMISSION FOR ELECTIONS TO THE REPUBLICAN PARLIAMENT.

HE STRESSED IN A TASS INTERVIEW THAT, FOR THE FIRST TIME IN SOVIET PRACTICE, THESE ELECTIONS WILL BE HELD ON A MULTI-PARTY BASIS, IN ACCORDANCE WITH A MIXED MAJORITARIAN SYSTEM. ZHORDANIA BELIEVES THAT "THIS WILL ENABLE THE GEORGIAN PEOPLE TO MAKE THEIR CHOICE ON A TRULY DEMOCRATIC BASIS". ELEVEN POLITICAL PARTIES AND PARTY BLOCS WERE PERMITTED TO TAKE PART IN THE ELECTIONS. PREVIOUSLY FOURTEEN PARTIES WERE REGISTERED. HOWEVER, THE CENTRAL ELECTORAL COMMISSION CROSSED OUT FROM THE ELECTORAL LIST THREE POLITICAL ORGANISATIONS FOR THE VIOLATION OF THE LAW ON ELECTIONS, INCLUDING THE STALIN SOCIETY. THE VIOLATION CONSISTED IN NOMINATING CANDIDATES, WHO WERE ALSO MEMBERS OF OTHER PARTIES, WHICH IS STRICTLY FORBIDDEN BY THE LAW, ZHORDANIA SAID.

THE COMMISSION HAD TO TACKLE NUMEROUS ORGANISING PROBLEMS, HE CONTINUED. MOST OF THEM EMERGED AS A RESULT OF THE FACT THAT TWO MONTHS ARE TOO SHORT A TIME FOR PREPARING THE ELECTIONS. HOWEVER, ALL THOSE PROBLEMS WERE RESOLVED, AND NOW ONE CAN BE CONFIDENT THAT THE VOTING WILL BE HELD ON A PROPER LEVEL. RESPONDING TO A TASS QUESTION, ZHORDANIA STRESSED THAT NO CASES OF AN OPEN VIOLATION OF RULES, THAT REGULATE THE CONDUCTING OF AN ELECTORAL CAMPAIGN, HAD BEEN REGISTERED. HOWEVER, TWO DAYS AGO UNIDENTIFIED PEOPLE FIRED FROM AUTOMATIC WEAPONS AT THE HOUSE OF FALERIAN AVADZE, LEADER OF THE ACCORD, PEACE REVIVAL ELECTORAL BLOC. THIS IS REGARDED AS A GROSS PROVOCATION AIMED AT HAMPERING THE VOTING.

ZHORDANIA SAID THAT OFFICIAL REPRESENTATIVES OF FRENCH, BRITISH, AMERICAN, BELGIAN, SWEDISH AND IRISH PARLIAMENTS WOULD ACT AS OBSERVERS AT ELECTIONS. THEY HAVE ALREADY COME TO GEORGIA. REPRESENTATIVES OF THE BALTIC REPUBLICS, THE RUSSIAN FEDERATION AND THE UKRAINE WERE ALSO INVITED.

ACCORDING TO THE LAW, THE RESULTS OF THE VOTING WILL BE MADE PUBLIC FIVE DAYS AFTER THE CLOSURE OF POLLING STATIONS.

#90299t0421 10/26/1990 ~ts
SVERDLOVSK (OCT 26) TASS - THE TASKS OF RUSSIAN SOCIAL DEMOCRATS IN THE PRESENT COMPLEX POLITICAL SITUATION AND THEIR FUTURE GOALS ARE DEBATED AT THE SECOND CONGRESS OF THE RUSSIAN SOCIAL DEMOCRATIC PARTY UNDER WAY HERE.

ITS CONSTITUENT CONGRESS WAS HELD IN MOSCOW IN MAY. THE PARTY NOW HAS A MEMBERSHIP OF SOME TEN THOUSAND.

PEOPLE'S DEPUTIES OF THE SOVIET UNION AND RUSSIA AND A LARGE NUMBER OF DEPUTIES OF LOCAL COUNCILS PARTICIPATE IN THE SECOND CONGRESS. DELEGATES INCLUDE WORKERS, REPRESENTATIVES OF THE INTELLIGENTSIA, MANY YOUNG PEOPLE.

THE DELEGATES REPRESENTING MANY REGIONS OF THE RUSSIAN FEDERATION, THE BIGGEST REPUBLIC OF THE USSR, DISCUSS THE DRAFT PARTY PROGRAMME. QUESTIONS OF THE SOCIAL POLICY AND SOCIAL PROTECTION IN CONDITIONS OF A TRANSFER TO MARKET RELATIONS HOLD THE CENTRAL PLACE.

OLEG RUMYANTSEV, MEMBER OF THE PARTY'S PRESIDIUM, PEOPLE'S DEPUTY OF THE RUSSIAN FEDERATION, TOLD TASS THAT THE SOCIAL DEMOCRATIC PARTY SEES ITS PLACE IN SOCIETY AS A "CONSCIOUS AND CONSTRUCTIVE PART OF THE DEMOCRATIC MOVEMENT." "THE SOCIAL DEMOCRATS ARE STRIVING TO IMPROVE THE SOCIETY BY MEANS OF REFORMS " HE SAID. "WE ARE PREPARED TO PARTICIPATE IN A REVOLUTION THAT IS A CONSTITUTIONAL AND LEGAL REVOLUTION, NOT THE ONE FOUGHT AT THE BARRICADES."

OLEG RUMYANTSEV, SECRETARY OF THE RUSSIAN PARLIAMENT'S CONSTITUTIONAL COMMISSION (WHICH IS CHAIRED BY BORIS YELTSIN, PRESIDENT OF THE RUSSIAN FEDERATION'S SUPREME SOVIET) NOTED THAT SOCIAL DEMOCRATS INTEND VIGOROUSLY TO PARTICIPATE IN THE POPULARISING OF THE REPUBLIC'S NEW FUNDAMENTAL LAW THE DRAFT OF WHICH HAS NOW BEEN SUBMITTED TO THE CONSIDERATION OF COMMISSIONS AND COMMITTEES OF THE RUSSIAN PARLIAMENT AND WILL LATER BE DISCUSSED BY AN EXTRAORDINARY CONGRESS OF PEOPLE'S DEPUTIES OF THE RUSSIAN FEDERATION.

THE DRAFT PROGRAMME OF THE SOCIAL DEMOCRATIC PARTY ASSESSES RUSSIA'S HISTORIC PART COVERED IN THE 20TH CENTURY AND SETS OUT THE SOCIAL DEMOCRATS' VIEW OF THEIR PLACE IN SOCIETY AND STATE AND FORMULATES THE GOALS AND STAGES OF THE PARTY'S ACTIVITY IN CONDITIONS OF A TRANFER TO A MARKET. THERE IS DIFFERENCE OF OPINIONS ON WHETHER THE DOCUMENT SHOULD BE ADOPTED AT ONCE OR WHETHER THE CONGRESS SHOULD BE HELD IN TWO STAGES.

IN THE AFTERNOON THE DELEGATES WORK IN THE COMMISSIONS TO DISCUSS SEPARATE SECTIONS OF THE DRAFT PARTY PROGRAMME. THE CONGRESS WILL END ON SUNDAY.

LAS VEGAS, Nev. (OCT. 26) UPI - Evander Holyfield was crowned the new heavyweight champion of the world Thursday night when he knocked James ''Buster'' Douglas cold with a right to the head in the third round.

Holyfield, 28, improved to 25-0 with 20 knockouts to achieve the goal he set for himself when he began boxing at the age of 10. The end came suddenly when Douglas missed a left hook and Holyfield dropped a right hand to the jaw, putting the overweight champion on his back.

Douglas tried to sit up but fell back and was counted out by referee Mills Lane at 1:10 of the third.

Douglas, 30-5-1, stayed down for almost four minutes before his handlers helped him to his stool. Led by trainer Lou Duva, all of Holyfield's cornermen leapt into the ring and stepped over the fallen ex-champion immediately after he was counted out.

Douglas was making the first defense of the title he won with a shocking upset of Mike Tyson last February. But Douglas fell grossly out of shape after winning the title and weighed 246 at Wednesday's weigh-in - 14 1/2 pounds more than for Tyson.

Holyfield, an 8-5 favorite largely because of Douglas' poor condition, weighed 208. He became the lightest man to win the heavyweight title since Michael Spinks at 200 pounds in 1985.

Douglas, a 30-year-old from Columbus, Ohio, held huge physical advantages across the board. At 6-foot-4 with an 83-inch reach, he stood an inch and a half with a 5 1/2-inch reach advantage over Holyfield.

Still, Douglas never reached Holyfield with a solid punch in the scheduled 12-round bout before a crowd of about 16,000 at The Mirage's outdoor stadium.

Holyfield stayed out of Holyfield's range in the opening round and stunned the champion with a left hook and a right-hand lead later in the round. Holyfield shifted his target to Douglas' soft middle in the second round, making the champion wince from body blows.

Douglas tried to open up in Round 3, but missed his first big punch and took the consequences when Holyfield delivered the one-punch knockout. Holyfield became the 15th undefeated fighter to capture the heavyweight championship.

He said before the fight he has signed to defend that title against 42-year-old former champion George Foreman next year.

Douglas earned a record $24 million while Holyfield was paid $8 million.

Despite the excitement of the evening, Nevada State Athletic Commissioner Duane Ford said he found Douglas asleep in his dressing room about 40 minutes before the opening bell when he went to deliver final instructions.

It took Holyfield barely 10 more minutes to put Douglas out again.

Holyfield was the 13th heavyweight challenger to enter the bout as favorite, and became the eighth of those challengers to win.

Holyfield's weight was four pounds less than his career high of 212 last November against Alex Stewart.

Holyfield overcame the ninth-largest weight disadvantage in heavyweight championship history. He also became the first man to move up from cruiserweight champion to take the heavyweight crown. Douglas became the 14th heavyweight champion, counting split titles, to lose his first defense. His reign of eight months and 14 days was the 10th- shortest in history.

He also became the second-heaviest champion to lose his title. Primo Carnera was 263 1/4 when stopped by 209 1/2-pound Max Baer in 1934.

Holyfield, who settled for a bronze medal in the 1984 Olympics when he was disqualified for hitting late, held the undisputed 190-pound pro title until moving up in weight in 1988. He is 7-0 since making his heavyweight debut July 16, 1988, with an eighth-round knockout of James Tillis. Holyfield won all six non-title heavyweight bouts by knockout.

Holyfield made his pro debut with a six-round decision over Lionell Byarm Nov. 15, 1984 in New York, and won a piece of the cruiserweight title with a split 15-round decision over Dwight Qawi in his 12th bout. He won five cruiserweight title fights and unified the crowns before moving up.

Douglas had won seven straight since losing a 10th-round TKO against Tony Tucker May 30, 1987, for a piece of the heavyweight title.

His other losses were against David Bey, Mike White and Jesse Ferguson and he fought a draw against Stefan Tangstad.

#90299u0126 10/26/1990 ~United Press International

LAS VEGAS, NV (OCT. 26) UPI - The only thing Buster Douglas proved Thursday night is that he was a fraud masquerading as heavyweight champion.

The 246 pounds he carried against Evander Holyfield was an insult to a crown he won last February from previously undefeated Mike Tyson. Only 'Robuster' wouldn't admit it.

''I'm not embarrassed,'' Douglas said after Holyfield took his title with a third-round knockout.

Douglas ignored the obvious - that he trained more at the supper table than in the gym, and that the 14 1/2 extra pounds he jiggled prevented him from even being competitive in the fight.

''Sometimes it goes your way, sometimes it doesn't,'' said Douglas, not the least bit apologetic. ''I was more than willing to accept the challenge. I wanted to fight the best - that's why I put the title on the line against Evander Holyfield.''

Douglas lost the first two rounds on all three judges' scorecards, yet he said he wasn't worried.

''I got caught with a good shot,'' he said of the overhand right that floored him a minute into the third round. ''By the time I picked up the count (of referee Mills Lane), it was over.

''I just overextended myself. I was hoping to get some rounds under my belt to get the rhythm going. But when you're a champion, you live by the sword and die by the sword.''

Now, the king is dead.

''What I came in at is what I am comfortable at,'' Douglas said of his weight. ''I was ready to fight.''

Douglas said he might retire, although a rematch against Tyson is a virtual certainty.

''At this point, I don't know,'' he said of the future. ''It's something I'll have to decide myself.''

Douglas might consider replacing his co-trainers, J.D. McCauley and John Russell.

''I knew this weight thing was going to come up over and over again,'' said McCauley, Douglas' uncle and trainer since the start of the boxer's career. ''For three or four or six rounds, the weight wouldn't have been a problem.

''But he didn't get off, he leaned in from the outside and Evander caught him clean. It happens.''

Douglas made $24 million Thursday night, but lost his chance to defend his title against Tyson for $20 million next spring.

#90299u0170 10/26/1990 ~United Press International

(OCT. 26) UPI - Congress is chomping at the bit to get out on the stump and campaign for next month's elections. The entire House and about one-third of the Senate are up for re-election. But first, the members of Congress have to

settle some pressing issues. The House sent housing and defense bills to the Senate Thursday. And the Senate sent a new farm bill calling for a 25-percent cut in subsidies to President Bush for his signature.

But those measures are small potatoes compared to the budget talks. Congress is trying to find a way to trim the deficit by 500-BILLION dollars in the next five years. Congressional Democrats feel they've struck a compromise with Republicans and the White House in a package based on new gasoline and excise taxes and a higher tax rate for the rich. The president says he's ''feeling good about'' the latest proposal.

U-S District Judge Thomas Penfield Jackson decides the fate of Washington, D-C Mayor Marion Barry Friday. The disgraced politician faces one year in jail and a 100-thousand-dollar fine for his one conviction of drug possession. U-S attorney Jay Stephens issued a scathing 19-page statement Thursday, arguing for the maximum sentence. He said Barry shows NO remorse and is- in his words- ''sorry only that he got caught.''

A member of El Salvador's congress was shot and killed Thursday on the outskirts of San Salvador. The lawmaker belonged to the ruling conservative Nationalist Republican Alliance. NO group has claimed responsibility, and there's evidence the congressman may've been killed in a robbery attempt. He's the sixth Salvadoran congressman to killed in 10 years of civil war.

A Time magazine poll of 505 young men and women shows they have NO misconceptions about the problems of juggling work with a family life. An overwhelming 82 percent of the 18-toyear-olds surveyed said they expected it to be difficult for a woman to have a career, marriage and children. But about half the men said they'd be willing to stay home and raise the children if that were an option.

There's good news and bad news in the Dallas fig-leaf controversy. The city fathers have removed fake fig leaves from a series of three one-foot-tall sculptures of female nudes on exhibit at the City Hall. But they've moved the statues to a less-conspicuous location in the building. The artist still finds the whole thing ''silly and kind of sad.''

-30- 2582

#90299u0178 10/26/1990 ~United Press International

LAS VEGAS, Nev. (OCT. 26) UPI - Before defending his heavyweight championship, James ''Buster'' Douglas called himself his own worst enemy.

He then backed it up by putting on a pitiful display as heavyweight champion. Fortunately for fight fans, it was his last. Evander Holyfield took that title putting Douglas flat out at 1:10 of the third round with an overhand right to the head.

While Holyfield deserves credit for the way he handled himself under fire and while giving away 38 pounds Thursday night, Douglas certainly contributed to his own demise.

First, he came in grossly overweight at 246. Then he failed to throw a punch in anger, pawing at the smaller challenger with light jabs that fell short despite his substantial reach advantage.

Finally, he threw an amateurish right uppercut that Holyfield calmly stepped away from and countered with his own right. Down went Douglas, who stayed there for almost four minutes despite never losing consciousness.

Referee Mills Lane, who counted over the overweight champion, said he thought he could have gotten up. Others said the same.

''What a piece of junk,'' said Mike Trainer, the attorney for Sugar Ray Leonard who put together the pay-per-view end of Thursday night's show for promoter Steve Wynn.

''He's a dog. You expect people who fight for that money (a record $24 million) to show up and be professional. It's inexcusable.''

Douglas came into the fight looking to answer several questions. He had a tag as a lazy fighter who had either quit or run out of gas in previous losses.

Remarkably, he put it all together last Feb. 11 in Tokyo when he scored a shocking 10th-round knockout of Mike Tyson. At the time, it was described as the greatest upset in sports history. It is even more surprising now.

Douglas proved his critics correct Thursday night. He was lazy with little heart and no fire.

Promoter Don King, who had a signed contract from Douglas to fight a rematch with Tyson next, was among the critics.

''When the guy don't even try to get up, he went back to the same old Douglas '' King said. ''He quit again. He didn't even try to get up.

Douglas offered no excuses and no apologies.

''I'm not embarrassed,'' he said. ''Sometimes it goes your way, sometimes it doesn't.

''I don't think my weight had any bearing on the fight.''

Douglas's trainers should share the blame for failing to get their fighter in shape. Co-trainer John Russell said Douglas enjoyed the fruits of his championship too long before defending his title.

''James ''Buster'' Douglas's best weight is 230 pounds,'' Russell said. ''When we got him, he was big. He stayed out there a long time. He was on the circuit a long time. We should have fought in June. There's only so much weight you can take off without losing your strength.''

Butch Lewis, the promoter waiting on the sidelines to join the ex- champion's team, said there was ''nothing there.''

But he did not give up hope.

''He just needs the right team,'' Lewis said.

What he needs are bigger guys to pick him up next time.

''At this point I don't know,'' he said of his future. ''It's something I'll have to decide myself.''

Douglas's manager, John Johnson, spent the week boasting his fighter has more talent than Muhammad Ali. The way he fought Thursday, Douglas is lucky if he can beat Ali now.

Douglas, in tears at the post-fight press conference, watched the new champion enjoy his crown.

''It's sunk in,'' Holyfield said. ''I felt going into the fight I would be the heavyweight champion of the world.''

He probably knew it at the weigh-in.

#90299u0262 10/26/1990 ~United Press International

(OCT. 26) UPI - Chicago's Steve Larmer, who can expect a payday next week, Thursday night cost Washington a chance to steal a point or two on the road.

Larmer scored two goals, including the fastest overtime goal in club history, leading the Blackhawks to a 3-2 victory over the Capitals.

Scheduled for salary arbitration in the next week, Larmer continued to make a good case for himself by increasing his season's goal total to nine, second only to the 13 of St. Louis' Brett Hull.

''Sure, I look at numbers, but we'll wait and see what happens,'' said Larmer, who earned $265,000 last season. ''My job is to play hockey. My contract is in the hands of my agent (Larry Kelly), and I have complete confidence in him.''

Larmer intercepted Rod Langway's ill-advised clearing pass, then rifled a 30-footer over the left shoulder of goalie Don Beaupre eight seconds into the extra session. The former club mark was 18 seconds by Doug Wilson on Nov. 2, 1989.

''I was lucky,'' said Larmer, who is on a pace to eclipse his career highs of 46 goals and 90 points. ''(Langway) doesn't do that often.''

''It was a helluva shot,'' said Chicago Coach Mike Keenan. ''He's played very strongly. He had a big impact on the outcome tonight.''

The Blackhawks fought back from their second one-goal deficit at 5:53 of the third period when Chris Chelios slammed a short rebound of Wayne Presley's shot.

''I'm not frustrated,'' Washington Coach Terry Murray said after his club's three-game winning streak was snapped. ''Sure, we would have liked to get a point, but we did a lot of good things. It was a good game for everybody.''

After Troy Murray and Dirk Graham were whistled for minor penalities on the same sequence in the second period, Washington capitalized on the 5-on-3 manpower advantage to take a 2-1 lead.

Chicago defenseman Dave Manson played in the contest despite having been suspended four games the previous day by the league office. His suspension will begin Thursday when the Blackhawks host Quebec.

In other games, St. Louis blasted Toronto 8-5, Boston topped Vancouver 4-2, New Jersey routed Buffalo 5-1, Pittsburgh downed Quebec 6-3 and Calgary defeated Edmonton 4-2.

Blues 8, Maple Leafs 5

At St. Louis, Brett Hull scored his second hat trick in as many nights and Ron Wilson added two goals, helping the Blues stretch their unbeaten streak to five with back-to-back victories over Toronto. The Leafs are off to the worst start in franchise history with a 1-9-1 record.

Bruins 4, Canucks 2

At Boston, winger Dave Christian and defenseman Jim Wiemer scored just more than three minutes apart in the second period, helping the Bruins snap a four-game slide. Boston, outscored 26-4 in its last four games, posted its first win since a 4-2 victory Oct. 10 in Winnipeg.

Devils 5, Sabres 1

At East Rutherford, N.J., Kirk Muller scored one goal and added two assists, helping the Devils remain undefeated at home at 6-0-1. Troy Crowder put New Jersey ahead with a shot just under the crossbar behind goalkeeper Clint Malarchuk at 19:07. Rick Vaive scored a power-play goal for Buffalo.

Penguins 6, Nordiques 3

At Pittsburgh, Kevin Stevens scored three goals for his second career hat trick, helping the Penguins snap a four-game winless streak. Quebec goalie John Tanner was replaced by Ron Tugnutt after surrendering goals on Pittsburgh's first three shots.

Flames 4, Oilers 2

At Calgary, Doug Gilmour's short-handed goal at 19:16 of the second period broke a tie and lifted the Flames. Gilmour was sent in alone on a breakaway by Tim Sweeney, who stole the puck at the Edmonton blue line and fed a behind-the-back pass to Gilmour.

#90299u0266 10/26/1990 ~United Press International

(OCT. 26) UPI - Around the world, around the clock, the latest news from U-P-I...

Congressional leaders are putting the finishing touches on a deficit- cutting plan. President Bush yesterday appeared willing to embrace the five-year proposal, which a spokesman called ''a historic bipartisan agreement.'' But lawmakers say a fair amount of work remains before a deal is set. .

With budget negotiations nearing a successful end, the Senate and the House are gunning for final adjournment of the 101st Congress during the weekend. Lawmakers are hoping to quit the nation's capital with only 10 days to go before midterm elections.

The White House appears to be changing its tactics in the Persian Gulf. Defense Secretary Cheney says as many as 100-thousand more U-S troops could be sent to Saudi Arabia. The move would represent a 50 percent increase in current troops levels... and possibly mark a switch from a defensive to an offensive force.

Marion Barry's lawyer is expected to argue during a sentencing hearing today that the Washington, D-C, mayor should NOT be sent to prison because he is a first-time drug offender. But prosecutors say Barry should serve the maxiumum one year in prison because of what they call his ''brazen disregard'' for the law.

A general strike called by unions has died down in the Philippines... but NOT the violence that came along with the work stoppage. The military says troops battled suspected rebels trying to burn a bus outside Manila today, leaving a policeman, two suspected rebels and a passenger dead.

(OCT. 26) UPI -

Baseball

California - Declined arbitration with outfielder Brian Downing and reliever Greg Minton, making them free agents.

Kansas City - Announced it would not offer a contract to second baseman Frank White.

New York Mets - Signed infielder Tom Herr to a one-year contract; sold the contract of infielder Tom O'Malley to Hanshin of the Japan League.

San Diego - Named Ed Lynch director of minor leagues.

Basketball

Golden State - Signed center Steve Johnson, a restricted free agent, to a one-year contract.

LaCrosse (CBA) - Signed guards Herb Dixon, Marty Haws and Ricky Spicer; forwards Anthony Allen, Skip Barry, and Jeff McFadden; and center Mike Williams.

Philadelphia - Released forward Brian Rahilly and guard Kenny Travis.

College

La Salle - Suspended basketball guard Randy Woods for six games for punching teammate Keith Morris during a pickup game.

Football

Houston - Signed kicker Teddy Garcia.

Philadelphia - Signed running back Thomas Sanders and placed running back Robert Drummond on the injured reserve list.

Pittsburgh - Placed defensive end Aaron Jones on the injured reserve list and signed defensive lineman Craig Schlichting to their practice squad.

Hockey

NY Islanders - Assigned defensemen Joe Reekie and Jeff Finley and left wing Brad Lauer to Capital District of the AHL; re- assigned center Greg Parks to Capital District.

#90299u0276 10/26/1990 ~United Press International

NEW YORK (OCT. 26) UPI - Striking Daily News workers used rocks and sticks to smash up a bus believed to have carried non-union workers Friday in a walkout

that could determine the fate of the nation's largest daily tabloid newspaper.

Just after midnight, about 25 to 30 union members stormed a bus, occupied only by its driver, near Brooklyn plant. There were no reported injuries.

Seven of the Daily News's 10 unions went on strike Thursday night, bringing to a boil a simmering contract dispute between the 1.2 million circulation newspaper and its workers, who have been without a contract since March 31.

The News published a smaller paper Friday, but the early edition was more than three hours late. The newspaper, which is owned by the Tribune Co. of Chicago, planned to hire permanent workers to replace the strikers.

One man was arrested a short distance from the plant for throwing a rock that hit two police officers at 12:35 a.m., said police spokeswoman Sgt. Mary Wrensen.

During the attack on the bus, rocks and bricks went flying the windshield and windows were completely smashed. Police prevented strikers from overturning the bus.

About 200 police officers, some in riot gear and on horseback, were posted in the area where a crowd of 150 people remained through the night.

''We're at the bridge,'' said Mike Alvino, head of the Newspaper and Mail Deliverer's Union, which represents the drivers. ''We're officially on strike for unfair labor practices.''

The drivers were immediately joined in the strike by unionized mailers, pressmen and four smaller unions. Only the Newspaper Guild, the stereotypers and the typographers did not walk out.

The Newspaper Guild, which represents reporters and editors at the paper, will honor picketlines, said George McDonald, head of the Allied Printing Trades Council, the umbrella group for the 10 unions.

Management spokesman John Sloan said the News was using the Brooklyn facility and plants in Garden City, Long Island and Kearney, N.J., to put out Friday's paper.

Asked whether non-union workers were being used, Sloan said, ''We have a very extensive contingency plan that is now in place and since employees have gone out on strike, we will be permanently replacing any employee who is now gone out on strike.''

The unions dispatched pickets to the paper's headquarters on Manhattan's 42nd Street, where unionized editors and reporters continued working.

Alvino said the driver's union struck in response to management's decision to lay off 60 members of his union who were ''arbitrarily'' picked for firings.

But News spokeswoman Lisa Robinson denied there were any layoffs and blamed the unions for the strike.

''The Daily News position is we think it is indeed unfortunate that a strike was provoked by these unions against the Daily News, at a time when we were involved in the collective bargaining process to resolve our differences,'' Robinson said.

The strike followed a violent confrontation that happened early Thursday as workers prepared to deliver the day's editions. About 200 members of the drivers union left their jobs at the Brooklyn plant Wednesday over the firing of a union member who, claiming a medical disability, wanted to sit down as he worked.

As non-union labor was brought in to help deliver the paper, unionized workers rampaged outside the plant early Thursday, attacking a bus carrying the non-union workers and setting fire to delivery trucks.

Daily News officials said the workers walked off the job ''voluntarily'' and described the action as a strike. They immediately began hiring permanent replacements.

Members of the drivers union, however, insisted they had been ordered from the plant Thursday morning and then locked out when they tried to return to work.

#90299u0301 10/26/1990 ~United Press International

MANILA, Philippines (OCT. 26) UPI - An earthquake measuring 6.2 on the Richter scale struck the southern Philippines, causing minor damage to buildings but no injuries, officials and news reports said Friday.

Philippine Volcanology Institute spokesman Lito Lanuza said the temblor at 7:01 p.m. Thursday was centered in the town of Bislig, 895 miles south of Manila.

Witnesses quoted by radio reports said the quake caused cracks on building walls and toppled bottles from racks of variety stores, but no one was hurt.

The temblor also was felt in varying degrees in the nearby cities of Davao and Cagayan de Oro in Mindanao and the central cities of Tacloban and Cebu.

It was the third quake to hit the Bislig area in 11 months.

On March 27, a quake which measured 5.6 on the Richter scale killed one person

and injured two others in Bislig.

On Dec. 15, two people were killed in Surigao City near Bislig in a magnitude 7.3 temblor.

An earthquake with measuring 7.7 hit the northern Philippines July 16, killing more than 1,600 people and causing extensive devastation.

#90299u0304 10/26/1990 ~United Press International
TOKYO (OCT. 26) UPI - Former Japanese Prime Minister Yasuhiro Nakasone said Friday he will travel to Baghdad next week to meet with Iraqi President Saddam Hussein and seek the release of Japanese hostages.

Nakasone, Japan's prime minister from 1982 to 1987, said he also wants to discuss a peaceful solution to the crisis, but his priority will be to win the release of the Japanese hostages.

''Of course, as a Japanese, I am most concerned about the Japanese,'' Nakasone 73, said at a news conference announcing his plans. ''I want to do whatever I can to solve the situation.''

Iraqi Ambassador to Japan Rashid Al-Rifai said Hussein will meet with Nakasone who is expected to leave Thursday for Baghdad and stay four days.

Nakasone decided to go to Baghdad in response to the requests of the families of Japanese hostages, news reports said.

His decision was influenced by the trip of Former British Prime Minister Edward Heath to Baghdad earlier this week which resulted in the release of 38 British hostages.

There are more than 200 Japanese trapped in Iraq, including 139 who are being held hostage at strategic locations.

Nakasone will be going as an individual not as a representative of the government, a spokesman for the Japanese Foreign Ministry said.

''We are not involved in the visit,'' said Taizo Watanabe.

Watanabe said Nakasone will work for the release of all hostages, not just Japanese.

-30- 1644
#90299u0310 10/26/1990 ~United Press International
(OCT. 26) UPI - A powerful storm with winds approaching hurricane strength

slammed the North Carolina coast Friday causing flooding and beach erosion, while frost hit the Appalachians and Midwest and showers dampened the Northwest.

The storm prompted gale and coastal flood warnings along the Outer Banks of North Carolina as the storm moved slowly off the coast with winds topping 65 mph and seas running as high as 16 feet.

The storm was caused by the counter clockwise rotation of a low pressure system off the coast combining with the clockwise rotation of high pressure over the Midwest.

The high pressure system pulled freezing air down from Canada, so while the coast was battered by stormy weather, a frost warning was in effect for the north foothills and parts of South Carolina.

The storm also affected the Virginia and Delaware coasts with high tides and strong winds as it moved northeast off the North Carolina shoreline. A flood warning was in effect for the Delaware coast.

Storm warnings extended north to Atlantic City, which had clouds, temperatures in the 50s and northeast winds topping 30 mph. Newark, N.J., had clouds and winds that were increasing in strength.

The high pressure system sent temperatures below freezing from the Middle Atlantic states to the Midwest, and frost warnings were posted in West Virginia and the eastern third of Ohio, where skies were clear and temperatures in the low 30s.

Clear skies also covered the Great Plains, and stretched to the Rockies. Denver had clear skies and lows in the upper 30s with winds reaching 20 mph.

Showers doused Washington and other parts of the Pacific Northwest but skies began to clear and temperatures rose toward the upper 50s.

#90299u0312 10/26/1990 ~United Press International

BARROW, AK (OCT. 26) UPI - An extensive two-week search of the polar ice north of Alaska ended after officials gave up trying to find two federal biologists and their pilot who disappeared on a bear-tracking mission.

The U.S. Fish and Wildlife Service polar bear specialists and a pilot vanished Oct. 11 during a low-altitude bear survey over the ice 200 miles north of Point Barrow, the northernmost point of land in the United States.

The Coast Guard coordinated a massive search, using three of its C- 130s, three civilian aircraft and a sophisticated Canadian radar plane to cover a

60,000-square-mile area over and over again until search planes had covered a total of 305,000 square miles when the effort ended in failure Thursday night.

''To have three C-130s and four chartered aircraft searching day after day is a massive effort,'' Coast Guard Lt. Dan Bobalek said.

Not a single clue was ever found despite the tremendous effort so the Coast Guard declared the search at an end when its planes returned Thursday night, Coast Guard spokeswoman Kathy Yonce said from Juneau.

The biologists' twin-engine Aero Commander had two weeks of food on board, and the search lasted a full two weeks. The missing plane also carried survival gear and two emergency locator transmitters, but no signal was ever picked up.

Although there was a stretch of open water between the northern coast of Alaska and the polar ice pack, the search was concentrated over the ice where the biologists were tracking bears.

Even night searches were conducted to see if the sound of search planes might elicit signal flares from the missing trio.

The biologists, John Bevins, 35, and George Menkens, 33, and their pilot, Clifford Minch, 50, were all from Anchorage. They were tracking radio-collared polar bears in a study of female and cub population and survival.

Bevins and Menkens were two of the five polar bears biologists employed by the federal wildlife agency in Alaska.

BANGKOK, THAILAND (OCT. 26) UPI - The Juvenile Court Friday postponed a trial of a 17-year-old British girl charged with trying to smuggle more than 65 pounds of heroin out of Thailand, officials said.

Patricia Ann Cahill was sent to the juvenile court but the prosecutor asked the court to postpone the trial, said Sakol Liuruang, director of the Observation and Protection Center for juvenile suspects.

The court set the next hearing for Cahill on Nov. 13.

''She is in good spirits and fine. She can eat Thai food and speak some Thai '' Sakol said.

''She has denied all charges,'' Sakol said.

Cahill and her British friend, Karyn Joanne Smith, 19, both from Birmingham, were arrested with more than 65 pounds of heroin hidden in their suitcases on

July 18 while they were preparing to board a flight at Bangkok International Airport.

Smith, because she is over 18 years old, is being tried at Bangkok Criminal Court with the next hearing set for Nov. 9.

So far neither defendant has registered an official plea in their cases.

The two girls would have faced possible death sentence if were 20 years old, but under Thai law, the judges have to reduce penalties for persons under 20 years old.

#90299u0474 10/26/1990 ~United Press International

CORINNA, ME (OCT. 26) UPI - A house fire early Friday killed three children and an adult, officials said.

The house was completely engulfed in flames when firefighters arrived shortly before 1 a.m., said Department of Safety spokesman Stephen McCausland.

The house was reportedly owned by Robert and Christina Sands. A fire department official said the couple escaped the blaze with another child.

The names of those killed were not officially released.

The dead man was said to be a 29-year-old family friend. The children were aged 3, 4 and 7.

Four investigators from the State Fire Marshal's Office and a medical examiner were on the scene.

The cause of the fire was not immediately known, but initial reports said it may have been caused by a wood stove.

#90299u0477 10/26/1990 ~United Press International

(OCT. 26) UPI - Fears of hostilities in the Persian Gulf sent stock prices tumbling Friday on the Tokyo Stock Exchange, dropping its leading indicator 1.4 percent.

The blue-chip Nikkei Average of 225 selective issues, which surged 475.75 points Thursday, fell 346.99 points to end the week at 25,005.64.

The broader-based Tokyo Stock Exchange Price Index of all major shares, which gained 39.15 points Thursday, dropped 19.59 points to 1, 861.04.

Volume was comparatively thin as an estimated 500 million shares changed hands down from 725 million shares Thursday.

Declines out paced advances 658 to 343, while 126 issues remained unchanged.

Elsewhere in Asia, banks, exchanges and most major businesses were closed Friday in Hong Kong for the start of the Chung Yeung Festival holiday. Trading will resume Monday.

In Singapore, stocks slumped in light trading on the Singapore Stock Exchange following the tumble in Tokyo.

In Bangkok, stocks continued to fall in moderate trading on the Thailand Stock Exchange.

The Securities Exchange of Thailand Index, which fell 10.66 points Thursday, lost another 10.12 points or 1.4 percent to 688.57.

Volume amounted to around an estimated 2.3 billion Thai shares, compared with 3.5 billion shares changing hands Thursday.

Prices fell sharply in active trading on the Korean Stock Exchange.

The Korean Composite Stock Index, which fell 28.21 points Thursday, lost 32.03 points or 4.2 percent to 735.03.

Declines overpowered advances 906 to only 38.

In Taipei, stocks closed sharply lower in heavy trading on the Taiwan Stock Exchange.

The Taiwan Stock Exchange Weighted Index plunged 203.05 points - or 5.8 percent - to 3,316.36.

In Australia, stocks were broadly lower in active trading on the Sydney Sharemarket.

The All Ordinaries Index, which slipped 1.4 points Thursday, dived 20.6 points to 1,354.7.

Volume amounted to around an estimated 96.2 million shares, compared with 56.4 million shares changing hands Thursday.

In Wellington, New Zealand investors pushed stock prices higher in light trading.

The Barclays Share-Price Index, which tumbled 45.01 points Thursday, rebounded 31.46 points to 1,409.18.

Analysts said prices moved higher as local investors sought selected blue chip stocks with high yields.

#90299u0569 10/26/1990 ~United Press International

NAGS HEAD, NC (OCT. 26) UPI - Hurricane-force winds ripped a dredge from its moorings Friday, slamming the vessel into the Herbert C. Bonner bridge and tearing a 300-foot section from the only land link between Hatteras Island and the mainland.

Five thousand people were left isolated.

No injuries were reported on either the dredge or the bridge from the 2 a.m. impact. North Carolina transportation officials, who estimated repairs could take up to six months, worked to establish emergency ferry service to the island along North Carolina's Outer Banks.

Gusts of 90 mph blew the 200-foot-long dredge into the 2.5 mile bridge, which spans Oregon Inlet. Telephone and electrical service were knocked out to the Hatteras Island communities of Buxton, Rodanthe and Salvo.

''The people on Hatteras Island are isolated,'' said emergency management spokeswoman Gwen White. ''There's ocean overwash in Buxton and Rodanthe, but we do not perceive there is any danger to anyone.''

Sheriff's deputies and emergency medical personnel braved choppy waters for a boat ride to the island, but reported no major problems, White said.

Emergency officials used ham radios to stay in contact with the island's residents.

''When you live in this part of the country, you're accustomed somewhat to isolation,'' White said. ''Our concern is to get generators down there to get power returned.''

But heavy rain and winds hammered the coast early Friday, hindering the National Guard's effort to get generators to the island and the transportation department's plans to establish ferry runs.

#90299u0574 10/26/1990 ~United Press International

NEW YORK (OCT. 26) UPI - The New York Stock Exchange reported Friday these odd lot transactions by principal dealers through NYSE facilities for Oct. 25: Purchases of 314,694 shares and sales of 402,582 shares including 20,182 shares sold short.

-30- 392
#90299u0575 10/26/1990 ~United Press International
(OCT. 26) UPI - White House chief of staff John Sununu warns congressional leaders against any funny business in the last stage of budget talks. He said yesterday ''there's a lot of mischief that can be done'' in putting the final touches on a budget deficit-cutting plan. Congressional and administration bargainers have agreed on a rough framework for the five-year package.

Federal prosecutors are seeking a one-year jail term for Washington D-C Mayor Marion Barry. Barry is scheduled to be sentenced today for his conviction on a single count of drug possession. In court papers, Barry argued that during his trial- in his words- ''I may have appeared to be calm and UNmoved, but on the inside, I was suffering nearly UNbearable humiliation.'' Barry wants to be sentenced to community service.

Drug chief William Bennett is in Alaska on a mission to outlaw legal marijuana in Alaska. But his entourage of security agents appeared to outnumber supporters during an anti-drug meeting last night sponsored by Alaskans for Drug-free Youth. Despite speaking to a largely pro- marijuana crowd, Bennett explained that he came to Alaska to convince voters to re-criminalize marijuana in balloting November 6th.

Philippine military officials say four people were killed as troops fought suspected communist rebels trying to burn a passenger bus near Manila. Officials say four rebels escaped during the melee. The gun battle erupted as a general strike called by leftist unions appeared to fizzle after two days. The unions want an increase in the daily minimum wage, which is the equivalent of three dollars 46 cents.

-30- 1785
#90299u0576 10/26/1990 ~United Press International
(OCT. 26) UPI - The Pentagon is putting the U-S-S Iowa in mothballs, in part due to budget cuts and costs associated with a tragic gun turret explosion. De- commissioning ceremonies will be held for the battleship today at Norfolk Naval Station in Virginia. A 1989 gun turret explosion on the Iowa killed 47 sailors. The cause of the blast remains under investigation. The Navy says it would cost about 12-Million dollars to repair the Iowa's gutted Number Two gun turret.

NASA says the Hubble Space Telescope will photograph a huge storm on Saturn next month. The storm is called ''the Great White Spot'' or ''Wilber Spot'' after New Mexico astronomer Steuart Wilber who discovered it last month. It now measures more than 50-thousand miles in diameter, making it larger than the ''Great Red Spot'' on Jupiter. Hubble telescope will photograph the storm for three days.

A former professional wrestler plans to go to Iraq in a bid to win freedom for Japanese hostages. Published reports say the only member of Japan's Sports and Peace Party with a seat in parliament will try to organize a music and sports festival in Baghdad. A Tokyo paper said members of Japan's parliament are UNhappy with the wrestler's efforts. He went to Iraq last month on a trip to secure the hostages' freedom, but came back to Tokyo empty-handed.

Right-wing French politician Francois Leotard threatens to resign from the conservative Republican party, saying he wants to return to grass roots work as a party militant. Leotard has been president for the small party for two years. The party is a key member of the center-right Union for French Democracy grouping.

Diaper maker Dandees Enterpriess vows to remove the words ''bio- degradable'' from its packaging by year's end. The firm will become the second Southern California company to do so. Dandees says it's taking the action in response to a state law that takes effect next year. The law restricts use of the term ''bio-degradable'' to products that decompose within one year through natural biological processes.

#90299u0606 10/26/1990 ~United Press International

BUDAPEST, Hungary (OCT. 26) UPI - Transportation in Budapest ground to a halt Friday and the main roads to several other towns were blocked by taxi drivers staging a strike to protest a steep rise in gasoline prices.

Cab drivers in the capital began a spontaneuous demonstration Thursday night and were soon joined by others around the country, hours after the government announced price increases of up to 70 percent for gasoline, effective at 12:01 a.m. Friday.

Talks between representatives of the drivers and government officials began early Friday in an attempt to end the protests amid demands by the drivers to suspend the price increases while negotiations continued.

In Budapest, all seven bridges across the Danube were blocked and major intersections sealed off by taxis and trucks. Gyor, the major thoroughfare leading west toward neighboring Austria, also was completely sealed off as were several other major arteries.

Drivers also blocked roads in several other large towns and sealed off border cossing points.

A roadblock in the town of Szekesfehervar, south of Budapest, delayed the departure of Red Army troops heading to the Soviet Union from a local army base, prompting a warning from Defense Ministry spokesman Gyorgy Keleti.

Emergency vehicles were allowed to pass with the assistance of the taxi drivers and police, who made no attempt to intervene with the biggest nationwide demonstration by taxi drivers in Hungary's modern history. Despite appeals, the drivers refused to allow commercial vehicles through the blockades, causing shortages of milk and bread and other foods in city shops.

Despite the inconveniences, most Budapest residents appeared supportive of the strike, which came as a result of ''a wrong political decision,'' Automobile Club general secretary Tibor Balogh told Budapest radio.

Food stores in the capital were filled with shoppers trying to snatch up whatever was available amid fears there would be no fresh food deliveries through the weekend.

Budapest Police Chief Sandor Barna told the radio the authorities may intervene if the crisis was not soon resolved.

The official news agency MTI said police already had prepared contingency plans to remove the blockades and restore normal traffic flow if necessary. Budapest Radio said police may begin to remove the barricades from the bridges as early as mid-day.

Government spokesman Balazs Laszlo described the drivers' protest as ''unlawful,'' saying the striking drivers had not given 72 hours notice of their demonstration.

The first round of negotiations aimed at ending the strike began at 8 a.m. Friday between representatives of the drivers, National Trade Union Council General Secretary Sandor Nagy and Interior Ministry officials.

The talks broke off a few hours later, with the drivers vowing to continue their protest until the government reversed its decision on price inreases.

Interior Minister Balazs Horvath was in charge of the government while Prime Minister Jozsef Antall was recovering in a hospital after undergoing minor surgery on Thursday.
